Sep 23, Posted by Mr. Popo Replies of This topic: The Nikon that people knows today is synonymous to excellence and it does not come as a surprise as the products are built for durability and worth every cent. The name was later changed to Nikon Corporation in , after one of its camera product. For the first 60 years, the multinational Tokyo-based corporation focused on the manufacturing of optical lenses and equipment for use in binoculars, inspection, cameras and microscope. Its first namesake camera was first released in with the lenses popularised by an American photojournalist covering the Korean War. He fitted Nikon optics to his Leica cameras resulting to award winning photos. In , the company introduced its first single lens reflex line of cameras, the Nikon F Series. The small format cameras became quite popular among professional photographers and were even used by the US Space Program. The company partnered with Kodak to produce its line of SLR cameras using existing Nikon film bodies. In , it released the Nikon D1 SLR, which is one of the first digital cameras to possess sufficient image quality but sold at relatively low price. Nikon continued to be one of the top brands when it comes to DSLRs until mids. In , amidst management changes, the company released new camera designs and was applauded by professional and amateur photography enthusiasts for their innovation. Its new line of mid range SLRs promised speed, low-light performance and ergonomics. Popularity in the Philippines Without a doubt, Nikon digital cameras are among the top Filipino favourites and rightly so. The company has made a name for itself in the country for offering reasonably priced yet high performing cameras. Digital SLR Cameras – the D series, according to the company, stands for a "deep" experience as the devices are used for capturing special moments. Its most priced camera is the D which boasts of Other cameras under this series have megapixel ranges between Nikkor Lenses – professional photographers have found a partner in Nikon with its collection of wide zoom, normal zoom, telephoto zoom, single focal length and special purpose lenses. They also have teleconverters and manual focus lenses. Advanced Cameras with Interchangeable lenses – cameras under the Nikon 1 series comes with built in image intelligence system which divides single moments into series of high quality images effortlessly. Compact Digital Cameras – the Coolpix Series is probably the most popular among Filipinos as they are quite handy yet powerful. The cameras are available in a variety of cool colours with megapixels ranging from Official Stores Columbia Digital is the exclusive distributor of Nikon cameras in the Philippines and works with re-sellers and other authorized dealers. There are also numerous online sellers that carry the Nikon brand if you are looking to buy one of the products from the comfort of your own home. News Last January 7, , Nikon announced the release of its latest camera model, the D It even comes with a new retractable zoom kit lens. The D4 successor, which will come 2 years after its predecessor, is said to have a new image processing engine and will feature more hi-tech autofocus performance which will result to better image quality. Nikon generally has two different types of digital cameras in the market, which are DSLRs and compact point and shoot models. The company then started make lenses for cameras, microscopes, binoculars and other similar instruments. Through the years, the company also added several innovative features to its line of SLR cameras that were later adopted by other makers. Since then the company has gone on to release several models, including a point and shoot line called Coolpix. Popularity in India Nikon surely has a huge reputation in the Indian camera market. In fact, it holds the largest share, along with its closest competitor, which is Canon. The company releases all of its models in the country and even has a large network of stores and service centers. Also, Nikon serves the market over a wide range, from basic compact shooters to its flagship releases that are meant for advanced professionals. They are also largely affordable, at least for the basic to mid-range shooters and offer many features. Design of Nikon Digital Cameras Nikon puts a lot of focus on the design aspects of its cameras. They are exclusively designed to suit the needs of the market. These cameras are largely made of polycarbonate for the most part and also metal. They are known to be pretty light and can be easily carried around. The front portion of these cameras has the lens in the compact models. For the DSLR models, there is space for mounting the lens of choice. The flash also rests on the front face, and can be found in the side or the slightly above. DSLRs naturally have the better of the lot. Besides this, both types of cameras cater to a large range of the market and have cameras for all ages and levels, from entry level amateurs to professionals. The latter ones are usually meant for the higher range products. The resolution offered by images range between The DSLRs make use of lenses that offer better resolutions and zooming features. Optical zoom facility for compacts also vary between devices, and even go up to as high as 83x. All the cameras support various memory card formats. Batteries varies from device to device, and are either of AA or Li-ion rechargeable ones. Nikon Digital Camera News Nikon has recently made its entry into the premium market for compact shooters, with the release of the Coolpix P in February More Digital Cameras for you Brands.
