

1: No Game, No Life: The Movie - Zero () - IMDb

No Game No Life 9: It Seems the Gamer Siblings are Resting for One Turn (ãfŽãf¼ã,²ãf¼ãfãf»ãfŽãf¼ãf©ã,²ãf¼ã,²ãf¼ãfŽãf¼ã...,,ã!¹ã•ã,€ã,¿ãf¼ãf³ã¼'ã,€ã••ã•†ã•§ã•™) is the ninth volume of the No Game No Life (Series) series, published on August 25,

We begin with her back story. When she was young, she was sent to an orphanage and ended up undertaking a lot of intelligence tests because of her brilliance. A few years later, she was adopted into a family with an older brother " Sora, who use to cater hit words to gain favour with adults. The siblings begin there. Jibril attempts to play a game with Shiro, asking Shiro to lose and the penalty will be the removal of her false memories. Just before Shiro can make a fatal move that costs Blank a loss. The chess game brings Shiro back to her senses. Steph is the first person to acknowledge the fact that Sora might be real too. Shiro begins her investigation. Shiro confirms the strange change by groping Steph. Now we flash out to a game of Reversi or Othello to demonstrate exactly what Sora had in mind. The 32 stones constitute and represent your existence and ranked in importance according to the priorities assigned by your subconscious. You start to lose and gain parts of yourself back as you play the game. In the end, the loser loses his existence. The winner gets to make two demands of the loser. Shiro has Jibril scan the room for magic and it exists but she is unable to pinpoint its location. She trips over three Reversi pieces " 1, 2 and 3. The third is the method to win the game. Does that make sense to you guys? Shiro turns the entire board around with her three remaining pieces and brings her brother back, along with victory. The entire room collapses on itself because the game has finally finished. Sora never lost because he never used the last three key pieces of his existence. They are all things outside him. I guess it was pretty scary for Kurami and Fie as well because their existences were on the line. Why are they so close? Another really great episode of No Game No Life. This series is going really strong. When she becomes certain of her brother and Blank, the sudden flood of colour into the screen adds to the intensity of the moment. Episode 9 assuages my worries about Shiro and Sora being dysfunctional when they are apart. Though Shiro was pretty panicky at first, she quickly gets her wits about her and in the end she comes through for her brother. I am also very impressed with the way the comedy is inserted in this episode and how it was placed at the end as a way of relieving the audience of the gravity of the game. They really do not disappoint.

One day, they are challenged to a game of chess by Tet , a god from another reality. The two are victorious and are offered to live in a world that centers around games. They accept, believing it to be a joke, and are summoned to a reality known as Disboard [Jp. There, a spell known as the Ten Pledges prevents the citizens of Disboard from inflicting harm on one another, forcing them to resolve their differences by gambling with games whose rules and rewards are magically enforced. In-game, rule enforcement only occurs when the method of cheating is acknowledged and outed by the opponent, allowing players to cheat through discreet methods. Sora and Shiro traverse to Elkia [Jp. After their parents died, the two no longer had emotional ties to society and eventually became agoraphobic and hikikomori. She has a lot of explicit knowledge but lacks the intuition to win games. As a result, Stephanie strives to restore the honor of her grandfather and humanity. They discover her grandfather kept hidden records on the other species which becomes an asset to their victories; LN 2. They are ruled by a nameless Miko , a logical woman who helped the Eastern Federation flourish for the past fifty years. She allies herself with Sora and Shiro who promises benefits for humanity and warbeasts. After the alliance between humans and warbeasts, he works alongside Stephanie to formalize the union. Their weakness to sunlight can be spread through bites which deters the other species from sharing blood with them. They require the life of a male from another species in order to reproduce; their magic allows them to seduce anyone of their choosing. Both species live in a nation called Oceando [Jp. Eight hundred years prior, the empress went into hibernation and the mating rituals killed all but a single male dhampir. He makes a deal with the sirens to lure Sora and Shiro in an attempt to have one of the two races enslave humanity. Sora and Shiro deduce his deception but decide to save both races regardless. During the era when the sixteen species were at war with each other, a human named Riku Dola [Jp. Using its power, Tet cast the Ten Pledges on the world, ending the war and making the world center around games. He had intended to turn the idea into a manga series, but an unspecified illness made him unfit to handle the workload. While hospitalized for treatment, the author imagined how his idea would work as a light novel, and settled for that medium instead. A Kamiya began writing the first volume and was advised to break it into three parts due to its length. A After the third volume, a new editor was assigned to the series. A Kamiya noted the third volume contained a lot of plot progression, and was going to balance it out in the fourth volume with more lighthearted and carefree events. Volumes four and five were written as a single volume; since volume four lacked a climactic ending, Kamiya had to restructure the story.

No Game No Life Episode 9. Seishun Buta Yarou wa Bunny Girl Senpai no Yume wo Minai. Episode 6.

Originally a light novel written by Kamiya Yuu, No Game No Life or NGNL for short is a series not quite like any other, mixing together numerous ordinary concepts into a not-so-ordinary and very refreshing story. In recent years there has been a fair share of anime following the concept of "being trapped inside a video game with no way to escape it", and it has been very successful. No Game No Life however takes the exact same idea and flips it upside down. The only other anime I can think of that uses a somewhat similar idea is Mondaiji-tachi ga Isekai kara Kuru Sou Desu yo, but NGNL takes it one or two steps further, and more importantly does it around nine or ten levels better. Their real-life identities however were unknown to the world, but as it turned out it consisted of a pair of NEET Not in Education, Employment or Training gamer siblings: That is to say before they got challenged online by a mysterious chess player who brought them to the very limits of their abilities before they could eventually manage to win. And thus, the games began. In the world of Disboard, there are a total of sixteen different races that have been granted the protection of the Ten Commandments, and are therefore the only ones worth mentioning. However as shameful as being at the bottom of the food chain might be, that ranking was made before Sora and Shiro arrived as reinforcements. Sounds simple enough, right? This anime can and will do anything and everything as long as the author can think it up in his head beforehand, and let me tell you: Of course that is not to say the grander, overarching story is any less impressive. Actually it manages to maintain the individual episode quality while still staying on track for the long-term plot in a very smooth manner of fashion, and as a result the anime never ever gets boring. Sora is extremely charismatic and cunning. He uses tons of deceitful tactics and strategies planned out way in advance in order to direct the flow of events much more so than meets the eye at first glance. As he likes to say, no matter how the game turns out, his victory is already assured from the very beginning. Shiro on the other hand looks like nothing more than a moe fanservice loli at first glance, and to some extent I cannot say that part is wrong per se. Now as far as Shiro herself is concerned, that does however not change the fact that there is a hell of a lot more to her than that. Also, in reality her level of genius is way above that one of her brother, but in a very different way. Thus even if they might be defeatable on their own, when they play together they are almost invulnerable, hence why [] is always together as one It has tons of purple and red everywhere and tends to use colors even for distinguishing details like shadows, outlines and similar. As always when it comes to artwork, it is entirely a subjective matter and whether you like it or not is up to every viewer individually. Personally I really liked it though, it somehow fit the over-the-top environments and atmosphere of the series very well, but I would still have to say that had it been for any other anime it would probably just have come off as being really weird. The ED is better albeit still not amazing, although when the full version came out I found it a lot more enjoyable than I did during the anime itself. That part asides though, the OST for the anime itself is one or two levels above that. Especially the music playing during some of the games themselves as well as the occasional epic speeches that occurs every once in a while during this anime have some very epic background tracks along with them. As far as Sora goes, more people will probably familiarize him with the fact that he has the same voice actor as Kirito from Sword Art Online, which might give some people the impression that NGNL is yet another anime which goes down the same route SAO did They both make an absolutely solid performance in this case anyway, however to me the best voice acting in No Game No Life is the one done by Hikasa Yoko in her role as Stephanie. The role she has as the character constantly getting abused by the two siblings simply for their enjoyment combined with the tsukkomi character she has to play for whenever their inner NEETs surface results in her having numerous different comedy roles at the same time, yet Yoko absolutely nails them all every single time in an absolutely hilarious fashion. This is not due to aspects such as constant cliffhangers or anything although that also happens a few times but simply due to how much fun every single episode is to watch. The concept of the anime as a whole is extremely appealing and interesting to follow, and due to the unlimited potential of the games themselves, every episode is completely different from the last one despite following the same ideals. Every single

character is likable yet drastically different from one another. On top of all that the actual comedy part of NGNL is brilliant as well, including countless references to other anime series. Ever since I first read the synopsis of this anime several months before it started airing, I immediately thought to myself: As a result, everything ends up being immensely satisfying.

Horou cannot comprehend why, but she does anyway. Sora explains that Imanity has no move left and is taking a break as no one will be willing to confront them directly, especially after their win against an Old Deus. They turn out to be Ex-Machina. Einzieg, a male Ex-Machina, the current administrator of the Ex-Machina as well as the race representative and Ymirein, a female Ex-Machina, who is a formal cluster commander. The other 11 are female Ex-Machina. They believe that Sora is the Spieler they have been looking for for millenniums. After combatting Artosh, only 28 units remain and now leaving only 14 units functioning. Einzieg is overdue for replacement for years and the entire race may stop working any day now. This follows by irrational conversations: Sora and the Ex-Machina are unable to reach agreement, they then decide to settle this in a game of standard chess. The Ex-Machina layout the rules: If the Ex-Machina win, Sora will need to provide information on his ideal love interest. Einzieg states that Sora has no room to bargain despite the Ex-Machina issuing the challenge, they are also defining the game and rules as he will be aware that Sora will not let the Ex-Machina go extinct. This leaves Sora with no other choice but to agree to play the game without Shiro. Sora lost the game, in which he provides his hentai materials hidden in his tablet computer to the Ex-Machina which Shiro is fully aware of. One day, Sora asks Horou for information on the Ex-Machina, to which Horou replies that she was in hibernation before the Ex-Machina were created, and only had woken up about 50 years ago when Miko reactivate her Quintessence. Basically, she only knows as much as Miko knows. What makes me, me? The game is like standard chess but without turns. Moves that are not played on the rhythm are considered as invalid moves so think, DDR or whatever music game you are familiar with. The chess game will be 13 sets, and will be the best of 7 games. If the Ex-Machina win, Sora is to offer his naked photos and will perform reproduction procedures with them without further delay. The game goes back and forth with both sides coming up with new strategies and counters after each set. They also notice that Sora plays much more sophisticated moves when Shiro is around. This is the first time the Ex-Machina realize Shiro may have some form of importance, however the story did not build on the parallel between Schwi and Shiro. Ymirein continues to state that they are formally married and exchanged vows, and the Ex-Machina have already won the game because this, the marriage, is a proof that Sora is indeed the Spieler. Despite not being the administrator, she seems to have strong individualism: Everyone concluded and convinced Ymirein that all those were her constructed memory, thus being false. Out of devastation and humiliation, Ymirein repeatedly requests for self-destruction or exile. Meanwhile, Shiro was not amused by the scene, perhaps being the first time Shiro is described to be angry. Afterward, the Ex-Machina leave, Einzieg is to be replaced with a newly reproduced unit. Ymirein starts addressing Sora with his actual name and not Spieler, and proposes her love and desire to be his wife, where again, Shiro got very angry for that.
