## 2: Topics and Notes - CSS Forums

*The w3-panel class is the perfect class to display notes and information. Notes are often displayed with a color: London is the most populous city in the United Kingdom, with a metropolitan area of over 9 million inhabitants.*

Demo and observation time! Basic setup I started off with the most basic of markup structures. Because reduced test case. My original intention was to use grid for laying out a figure with multiple images and a caption. There are two sets of grid lines: I interpret this as, when the document has been set to vertical-rl, grid columns run top-to-bottom while grid rows run right-to-left like so: I want the 2 images to stack on top of each other, and the caption to stretch the length below i. There seems to be some issues with the Grid Inspector tool here. Before I started using the Grid Inspector tool, I would apply borders to the grid items. Okay, this reduced test case looks like Grid is working just fine in vertical writing-mode. So this is the code that will give me the layout I wanted in my earlier write-up ignore the border code. I copied over the content from that demo, and rewrote the markup to make the figures flatten out. So the markup for each figure was changed like so: That would be awesome! The classes on each figure were to deal with if the figure had 1 image or 2 images. So for single image figures, the image just spanned 2 columns instead. The layout code for each figure looks like this: Source code for the grid version of the demo on GitHub , and live version viewable here. I wish I were there with you. We should track down the engineers working on it this week. Does anyone care about this vertical writing mode stuff? Until the next one.
