*The original Phantom full-tower case set the tone and benchmark in terms of quality and design functionality for NZXT and the NZXT Phantom is a worthy case to carry on that legacy. more.. FutureLooks 10/20/*

I found the build quality to be very good. It comes with a flawless finish that everyone will appreciate and is a great choice for anyone who wants to show off their rigs inside. This case has lots of drive bays, fans, cable management, cooler hole, tool-less design and is available in three different colors. With plenty of room and liquid cooling options, the Phantom would be great for an enthusiast, while the mostly tool-less design makes it great for amateur builders. It looks good and is well designed. NZXT really delivers quite the package with stunning looks and a high level of attention to detail. However, the price point is slightly above competitors with similar feature sets and build quality. Phantom boasts similar characteristics to that of the original Phantom but in a smaller shell and more affordable price-tag. The assortment of colors is ideal for those that like to color match their components. Returns are not allowed beyond 30 days of the purchase date.
