

### 1: The Science of Getting Rich - Bruce Van Horn

*"The Science of Getting Rich" written by Wallace D. Wattles was first published in by Elizabeth Towne Publishing New York. The original text is now in public domain.*

Wattles remained a mystery throughout his life. However, of all the things we know, he was an American author inspired by and a member of the New Thought Movement. This book he wrote is one of the most popular self-help books ever written. Wallace wrote this book to show people the real meaning of wealth and secrets of hard work to achieve it. This is his only book which got much success among the reading circles. In this book, he has taught people how to become wealthy in their life. Of course, there are no magical secrets but this book is a guideline to achieve something really amazing. The Science of Getting Rich Summary: For those who do not have enough to read the complete book, here is a summary of this book. This book is a beautiful combination of few formulas in order to reach the heights of success. First, Wallace has explained few things in detail including Life, Mind, and soul. He says that health is life and the physical development in a better way is the first key to success. Then comes the mind. A good mental development is very necessary to do anything in life. Once you have a good and healthy brain, you will work good and hard. Working good and hard comes from a healthy brain and this one of the secrets to achieve wealth in your life. The 3rd thing is the soul purity of which is very important to serve other and achieve the real wealth in life. After all this, Wallace talks about the wealth and the desire of wealth. Desire is that thing which asks of men to progress in their lives. Desire is the most powerful constructive power if used in the positive way. Also, it is the destructive power if used in the negative way. The book also talks about working in the place where you actually belong. Working at a place where you have your talents. All of us have got some talent in us and we need to look for it. Once you have understood and started working on these things, there will be no one stopping you from reaching the success. I am going to say a few straight things about this book. This is an excellent guide to know what you actually like and how you can become healthy. There is no secret or magic to make your rich and powerful. It takes a lot of struggle, work, talent, and using that talent in the right direction. Using your desire in the right path is also one of the keys to success. That is because, desire is the best constructive power if the humans learn to use it in the positive way. Keep working hard, working at the place where your talent lies, and one day you will become wealthy. Wallace, being a part of New Thought Movement, knew something more about life due to his mentor Phineas Quimby. To learn more about life, I will definitely recommend this book to everyone struggling in life. Get this book right now from the market or your library and learn the science of getting rich. If you the soft copy for the book, download The Science of Getting Rich Pdf right now from our website. Also, keep visiting our website for more free pdfs and book reviews.

*The Science of Getting Rich is just what I needed right now. I think from the stress of everyday responsibilities to the current political climate, life has been weighing me down. This book gave me a new and more positive perspective about all of that.*

From the back cover of the book: There is a Science of getting rich, and it is an exact science, like algebra or arithmetic. There are certain laws which govern the process of acquiring riches. Once these laws are learned and obeyed by any man, he will get rich with mathematical certainty. The object of all life is development, and everything that lives has an inalienable right to all the development it is capable of attaining. The plan of action laid down herein was deduced from the conclusions of philosophy. It has been thoroughly tested and bears the supreme test of practical experiment. The men and women who practice these instructions will certainly get rich; and the riches they receive will be in exact proportion to the definiteness of their vision, the fixity of their purpose, the steadiness of their faith, and the depth of their gratitude. A note from author Bruce Van Horn: It speaks truth and wisdom, and offers hope to those who will read, receive, and follow its trustworthy guidance. *Wattles*, was written with a seemingly archaic language for a society that now seems like ancient history. The prophetic nature of this book makes it timeless and more applicable to this current culture—and to your life—than perhaps it was to those who first read it in . Even before I finished reading this short book, a sense of great peace and clarity came over me. I no longer need to compete for what I want. I do not need to hurry to beat someone else to the prize. I do not need to worry that there will not be enough for me or for anyone else. The truth was plain and simple: *Wattles*, I will be able to create the life that I want. And this is exactly what has been happening in my life from that moment up to the present day. My business has grown both financially and in terms of its worldwide reach. I am more confident in my abilities. My relationships are stronger, and new relationships have been birthed through ways I never foresaw. Simply stated, by applying the principles taught in this book, I am getting rich! While *Wattles* published this book in , I am convinced he wrote this book for future generations and future teachers. Perhaps he wrote it so that I might give it to you. ### 3: The Science of Getting Rich by Wallace D. Wattles

*The Science of Getting Rich is a book written by the New Thought Movement writer Wallace D. Wattles and published in by the Elizabeth Towne Company. The book is.*

Your privacy is important to us. Wattles timeless law of attraction classic. Wattles law of attraction classic published by the Elizabeth Towne Company. Everything in my life, emotionally, physically, financially, everything had fallen apart. Something inside of me had me turn the pages one by one and I can still remember my tears hitting the pages as I was reading it. My television production business started to go from strength to strength. My income levels soared prodigiously. Relationships miraculously healed and marvellous new ones came pouring in from all directions. This is a common experience for people who discover this miracle book. This book is the key to prosperity you have longed for. It will change your life. WHATEVER may be said in praise of poverty, the fact remains that it is not possible to live a really complete or successful life unless one is rich. No man can rise to his greatest possible height in talent or soul development unless he has plenty of money; for to unfold the soul and to develop talent he must have many things to use, and he cannot have these things unless he has money to buy them with. A man develops in mind, soul, and body by making use of things, and society is so organized that man must have money in order to become the possessor of things; therefore, the basis of all advancement for man must be the science of getting rich. The object of all life is development; and everything that lives has an inalienable right to all the development it is capable of attaining. In this book, I shall not speak of riches in a figurative way; to be really rich does not mean to be satisfied or contented with a little. No man ought to be satisfied with a little if he is capable of using and enjoying more. The purpose of Nature is the advancement and unfoldment of life; and every man should have all that can contribute to the power; elegance, beauty, and richness of life; to be content with less is sinful. The man who owns all he wants for the living of all the life he is capable of living is rich; and no man who has not plenty of money can have all he wants. Life has advanced so far, and become so complex, that even the most ordinary man or woman requires a great amount of wealth in order to live in a manner that even approaches completeness. Every person naturally wants to become all that they are capable of becoming; this desire to realize innate possibilities is inherent in human nature; we cannot help wanting to be all that we can be. Success in life is becoming what you want to be; you can become what you want to be only by making use of things, and you can have the free use of things only as you become rich enough to buy them. To understand the science of getting rich is therefore the most essential of all knowledge. There is nothing wrong in wanting to get rich. The desire for riches is really the desire for a richer, fuller, and more abundant life; and that desire is praise worthy. The man who does not desire to live more abundantly is abnormal, and so the man who does not desire to have money enough to buy all he wants is abnormal. There are three motives for which we live; we live for the body, we live for the mind, we live for the soul. No one of these is better or holier than the other; all are alike desirable, and no one of the three—body, mind, or soul—can live fully if either of the others is cut short of full life and expression. It is not right or noble to live only for the soul and deny mind or body; and it is wrong to live for the intellect and deny body or soul. We are all acquainted with the loathsome consequences of living for the body and denying both mind and soul; and we see that real life means the complete expression of all that man can give forth through body, mind, and soul. Whatever he can say, no man can be really happy or satisfied unless his body is living fully in every function, and unless the same is true of his mind and his soul. Wherever there is unexpressed possibility, or function not performed, there is unsatisfied desire. Desire is possibility seeking expression, or function seeking performance. Man cannot live fully in body without good food, comfortable clothing, and warm shelter; and without freedom from excessive toil. Rest and recreation are also necessary to his physical life. He cannot live fully in mind without books and time to study them, without opportunity for travel and observation, or without intellectual companionship. To live fully in mind he must have intellectual recreations, and must surround himself with all the objects of art and beauty he is capable of using and appreciating. To live fully in soul, man must have love; and love is denied expression by poverty. The man who has nothing to give cannot fill his place as a husband or father, as

a citizen, or as a man. It is in the use of material things that a man finds full life for his body, develops his mind, and unfolds his soul. It is therefore of supreme importance to him that he should be rich. It is perfectly right that you should desire to be rich; if you are a normal man or woman you cannot help doing so. It is perfectly right that you should give your best attention to the Science of Getting Rich, for it is the noblest and most necessary of all studies. If you neglect this study, you are derelict in your duty to yourself, to God and humanity; for you can render to God and humanity no greater service than to make the most of yourself. ### 4: The Science of Getting Rich by Wallace D. Wattles (Review)

*Summary of The Science of Getting Rich Summary of Wallace Wattles' Teachings. The following is an edited excerpt from Chapter 17 of The Science of Getting Rich including acting in a certain way.*

Do more than fill your present place Provide the absolute best. How well do you serve your audience? Reach, stretch, strive, learn, and apply, and always try to grow so that you can serve your audience better. Make money now Go the extra mile. This will help you to earn more customers. As that happens, continue to give them more value. The Science of Getting Rich exposes the formula. Serve a lot of people, provide more value than anyone else, and give a lot away for free. Then begin to charge a little for something. You will begin to succeed right away because people will trust and like you and they will want to buy your products. Money is just a medium for the exchange of value. Most people in this world are paid according to the value that they create for their fellow man. When you provide a huge amount of value, you will receive a corresponding amount of money. Give people the impression of increase Do people feel that they will gain value by associating with you? You should strive to give maximum value to everyone you meet. Impress upon everyone you interact with the benefit they will receive by associating with you. Make sure people understand that what you are giving them is valuable. Make sure that people see how hard you are working to help them succeed. Look at the blogs that we write for the Wealth Creation Mastermind. The WCM is dedicated to helping others become financially free, and we give away high caliber content without expecting anything in return. On top of that, we offer free coaching via our weekly Mastermind call. Then, only after providing a really high value proposition without charging, do we present you with the option to pay money for truly advanced services. This is the last action step. You become abundant by using your creative imagination to develop a plan to add great value to others. The more you help people get the things they want, the more wealth and abundance will flow to you. But like anything, the more attention you give something, the better you get at it. Treat understanding these concepts the same way you would treat learning a new skill, and really throw yourself into mastering them. Look at how The Beatles, one of the most iconic rock bands in history, got their start. Between and they played in cellars and small clubs in Hamburg Germany for six hours a night, for virtually no pay, and often with a very small audience. By the end of that time they had hundreds of hours of experience performing to a live audience. When they exploded onto the international scene, it was because of the hard work they had done in mastering their craft. There is tremendous benefit to be gained by systematically rereading and studying this book. Practice it, and practice some more. Learn the formula for success. But if you want to cut your learning curve and dramatically grow your results, then consider what would happen if you took it one step further. What if you could find a group of like-minded people, all studying this text and others like it, all helping each other learn and helping each other to rapidly improve their lives? Are You a Good Fit? You want more out of life You believe in self improvement You want to make an impact You have decided to be the highest and best version of yourself possible Invitation If this description fits you, then we highly recommend you fill out the form on this page to Join the Mastermind. We learn how to harness the creative method of thought in specific ways to create wealth.

*4 WALLACE D. WATTLES THE SCIENCE OF GETTING RICH Chapter 1 THE RIGHT TO BE RICH WHATEVER may be said in praise of poverty, the fact remains that it is not possible to live a really complete or successful life unless one is rich.*

The monistic view of the universe, on which the book is based, says that everything in the universe is linked up and part of the whole. It is the basis of Oriental philosophy and religion, and also, Wattles argues, the foundation for Descartes, Spinoza, Leibniz, Schopenhauer, Hegel and Emerson – philosophers he spent years studying. It is also the faith of the New Thought churches, which are remarkably light on dogma and strong on the betterment of man. Whereas the traditional Christian church linked spirituality with poverty, the religion of Wallace Wattles emphasises the naturalness of abundance. He took this to its logical end by saying that a person could not really fulfil their potential by having to struggle financially – in fact, the evolution of the world depended on each of us seeking riches in an honest way. Tapping in to the flow What is the source of wealth? All the great prosperity writers say the origin of wealth is thought, rather than things. Can abundance really emerge from apparent nothingness? Consider what the great inventor Thomas Edison said: This may seem astonishing and impossible to believe, but it is true. Ideas come from out of space. Through visualization of what you desire on a repetitive basis, the thing will come into being through the organization of existing modes of production. This is the secret shortcut to gaining what you need. Yet man, through most of history, has approached it from the other round by trying to create things only from existing materials, applying thought to things through manual labor. We have only just begun to operate as God does, Wattles notes, who is after all continually creating something from nothing. If you accept that all things come from something immaterial, how you live and act will be different from someone who believes that the basis of everything is matter. Appearances alone will cease to form the basis of your decisions, because your underlying knowing will be that the universe is abundant and ever-renewing. He can conquer fate; he can have what he wants. The fact of increase Nature always seeks expression and increase – this is the one reliable fact of the universe. It seeks greater sophistication and refinement; in short, progress. It should be to further your fullest expression, not just for excitement and entertainment. Just as it is wrong to be extremely selfish, at the other extreme it is not wise to sacrifice yourself too much. Creation not competition The author reminds us that the Substance which creates the evolving universe does not pick and choose who it will favor; its power is open to all and its flow of riches is endless. These are ideas of competition which do not reflect the reality of an abundant universe. The idea of competition rests on the belief that there is one pie to be carved up, whereas creation rests upon an acknowledgement of riches infinite. You need to become a creator rather than a competitor But what about all the people who have become rich on the plane of competition? They are like the dinosaurs of prehistoric eras, Wattles says, in that they have been a vital part in an evolutionary process of organizing production, but are invariably brought down by the same logic of competition that thrust them to the fore. Their riches were neither satisfying to themselves nor enduring in a wider societal sense. Big organizations cannot shut you out of prosperity if you follow your own path to it. Harmonious gratitude Many will attest that the best way to draw something to you is to give thanks that you already have it. Because the nature of the universe is abundance, it rewards those who are actively aware of the fact and are continually grateful for it. When you are attuned to the source that creates all things, it is natural that it will provide you with the things you need. Gratitude will prevent you from falling onto the plane of competitive thought and lack, and make you realise the blessings that are already yours. He further advises not to spend your time complaining about the world, railing against magnates and politicians. Do not care how poverty is created or sustained, even if you have an interest in the history of tenement dwellers or third world hunger - look only for what makes for riches. Final word The question must be asked: Some will say that we should want less, settling for a standard of living less taxing on the earth. This is no doubt true, but it fails to take account of human nature. What is a man or a woman if not a bundle of aspirations? Desire is the engine that drives the world, and without every-increasing wealth there would be a miserable gap between what is wanted and what

can be afforded. The nature of life is growth and increase, so it would be contradicting nature to restrict the urge to plenty. It is also a fact that you cannot seek the higher things in life if having to fight for the basics. It is also much easier to have a positive view of life when you are able to surround yourself with items of beauty. And not least, Wattles points out, to live soulfully a human being must have love, and it is difficult to love when you are poverty-stricken. For this we have partly to thank the pioneers of prosperity consciousness, who have removed the possibility of personal riches from the realm of guilt to rightful expectancy. Despite its mystical language, it is profoundly practical.

### 6: The Science of Getting Rich Pdf Free Download. - All Books Hub

*The Science of Getting Rich will guide you in developing a vision, strengthening willpower, cultivating gratitude, and receiving life's abundant gifts. This book is available in paperback, Audible audiobook, and Kindle e-book from Best Success Books.*

Money is not the problem, for there are many with it who do great things for others. The problem comes in loving it above all else. A great giver, you are? Then forget what you cannot control the evil rich? Set your legacy to EARN, pass on not only your riches but a richness of understanding to you and yours and theirs and theirs and theirs. A must read for all humans. This is the main thrust of the book. It sets you right on the course of how to specifically obtain wealth. There is a little bit of spirituality involved, and if "God" offends, you may want to look elsewhere for inspiration. However, keep in mind that the current wealth gurus T Harv. Ecker, Mark Victor Hansen, Robert Allen, and others speak to the issue of mental attitude and clearing oneself of the "negative" and "unbelieving. I call it the sectarian "law of attraction. And even though it was written a long time ago, its format is inline with that of current gurus who advocate simplicity, directness, "cumulative points" review at end of each chapter, and exercises or the need for the reader to "do" not merely sit back and read. I would not recommend this book for young Christians in the faith, but for those who already have solid biblical principles because the book could be misconstrued if read in search for quick miraculous wealth. The text is to be read in its entirety, just like the truth, it is to be taken in its entirety otherwise it becomes a lie of omission. The author is trying to make a point that aside for the few incorrect doctrinal points in order to enjoy th This is an interesting book for Christians. The author is trying to make a point that aside for the few incorrect doctrinal points in order to enjoy the blessings of a wealthy life one must follow 3 simple principles: Thank God always this vision He gave you will become reality! His point is that God created us all unique and with equal opportunities to enjoy His blessings - which include wealthiness, but that many think of it the wrong way. If making money is the objective of life that is the wrong objective just as it is wrong to strive to get rich for the wrong reasons. Becoming wealthy is not about overpowering others in thought or in means, but having the attitude that "What I want for myself, I want for everybody". As for opportunities - chapter 13 - is the best: Only do such work other work as a mean to get to what you want to do! Even though this book was written over years ago it is a book with principles that can be applied today because it is not about getting into one facet of the job market that one can use to become wealthy, but about finding out our individual journey first, helping and wanting good things for others and achieving the blessings that come from the discovery of oneself as God made them.
