

1: 4 Methods | How to Transfer Photos from PC to iPad Without iTunes - EaseUS

Yet, to set up a new iPad, users had to plug it into a PC or Mac running iTunes and use iTunes to activate the device. This is no longer necessary. With new iPads, iPhones, and iPod Touches, you can simply go through the setup process after turning on your new device without ever having to plug it into iTunes.

There was a time when Apple device users had to plug their devices into their PCs or Macs and use iTunes for device activation, updates, and syncing, but iTunes is no longer necessary. **Device Activation** When the iPad first came out, it was touted as a device that could replace full PCs and Macs for people who only needed to perform light computing tasks. Yet, to set up a new iPad, users had to plug it into a PC or Mac running iTunes and use iTunes to activate the device. This is no longer necessary. With new iPads, iPhones, and iPod Touches, you can simply go through the setup process after turning on your new device without ever having to plug it into iTunes. Just open the Settings app on your device, select the General category, and tap Software Update. For example, you can purchase a movie from the iTunes Store. You can download the content right from the store to your device. This also works for apps – apps you purchase from the App Store can be accessed in the Purchased section on the App Store on your device later. This would allow you to purchase content on one device and have it automatically download to your other devices without any hassle. **Music** Apple allows you to re-download purchased music from the iTunes Store in the same way. You can stream all your music – perfect if you have a huge library and little storage on your device – and choose which songs you want to download to your device for offline use. When you add additional music to your computer, iTunes will notice it and upload it using iTunes Match, making it available for streaming and downloading directly from your iOS devices without any syncing. This means you may get higher-quality versions of your songs if you ripped them from CD at a lower bitrate. Use it to subscribe to podcasts and configure them to automatically download directly to your device. You can use other podcast apps for this, too. However, new iOS devices are configured to automatically back up their data to iCloud. This happens automatically in the background without you even having to think about it, and you can restore such backups when setting up a device simply by logging in with your Apple ID. **Personal Data** In the days of PalmPilots, people would use desktop programs like iTunes to sync their email, contacts, and calendar events with their mobile devices. Just sign into your email account – for example, a Gmail account – on your device and iOS will automatically pull your email, contacts, and calendar events from your associated account. **Photos** Rather than connecting your iOS device to your computer and syncing photos from it, you can use an app that automatically uploads your photos to a web service. You may still need to use iTunes if you want to sync local music without paying for iTunes Match or copy local video files to your device.

Click Open to start transferring. You can also transfer files from PC to iPad by selecting the specific category. Just click the button to manage your iPad file by categories. For example, to add music to your iPad from PC: And that is it. Choose the specific files you need, just send them as an attachment to yourself. Open the file in iPad and the file will be available locally. This is OK if you have to do this occasionally but not a very efficient way. Choose a cloud drive. Set up an account, you just need to drag and drop files from your desktop to the cloud drive. Then you can view them on your iPad. Most of these cloud drives offer limited free space, and you need to create an account there. Some of these require you to download a computer client as well as an iPad client. Besides, when it comes to contacts, calendars, after sync, the data on computer and iPad would be kept the same. If this is not what you want, please refer to Part 1. Download the latest version of iTunes. Plug in your iPad with a USB cable. Click the iPad tab on the upper left, select the file type you want to transfer from PC to iPad. Here we take Movies as an example Step 3. Select the movie files you want to transfer from PC to iPad. Any questions about this article or AnyTrans for iOS are warmly welcomed to be left in the comment section.

4: ios - iPad Factory Reset Without iTunes - Ask Different

Are you looking for an alternative to iTunes to sync and manage your iPhone from your Mac or PC? Look no more, you've found iMazing! Who is this guide for?

Still, there are some situations in which you need, due to various reasons, to get rid of all that stuff on it. Also, if you own a jailbroken device, this will automatically remove the jailbreak. But what if I told you that you can restore an iPad without iTunes fast and easy, by simply following some steps? When should I restore my iPad? The idea is that there are some situations in which restoring the tablet is the only thing you can do. Your iPad is constantly freezing, not allowing you to perform even some of the most basic actions Your iPad has a ridiculously big lag and it acts weird all the time Yo want to sell the tablet, so you need to get rid of all your personal stuff on it You want to wipe everything on it, for a fresh start You got a virus. How can I restore my iPad? Apple is aware that their tablets are far from being perfect, so a restore can be the best thing for them sometimes. But you were asking how to restore iPad without iTunes, right? Stick with me, then! The main reason why this type of reset is better compared to one done through iTunes is that data and personal files are not recoverable anymore. There are three main ways through which you can restore an iPad without iTunes or a PC: Factory reset an iPad without iTunes through Hard Reset This is actually the easiest method since all you need to do is press a few buttons and it takes minutes. Keep them pressed for 10 seconds until the Apple logo will show up on the screen. This means that the hard reset was successful. Release both buttons and wait for your iPad to restart. Factory reset an iPad through the Settings menu Actually, at a second thought, this method is even easier than the previous. However, it can be done while your iPad is still functioning properly, without any lag. Choose Erase all Content and Settings And this is actually it, unless you have a passcode for the tablet. In this case, you will see a dialog box where you need to type it. Then, wait until the tablet restores to factory settings in a few minutes. At least for me. Just for the sake of this article, by the way. See how much I care about you guys? This is what you need to do: Run the tool after installing it. After the tool detects your phone, from the menu on the left, choose the Erase All Data option. Click on Erase and wait for the tool to get rid of anything you have on your tablet. If things still look difficult, You can try giving a visit to your nearest Apple Store and they can do it there for you. Wrap-up And there you have it, folks! A complete guide on how to restore iPad without iTunes in just a few minutes, not complicated at all. Seriously, all three methods presented here are very simple. Which one of these is your favorite? Also, do you know any other method which can be added to this list? Let us know, by dropping a few lines in the comments section below!

5: How to Restore iPad without iTunes in 5 Minutes (Update)

iPad is now very popular and widely used all over the world, but the problems also come along among the users. Some of them have problems with the sync function of iTunes, and some of them delete files by mistake, and want to restore iPad with easy methods.

But for some folks, the iTunes way of doing things feels unbearably confining. If you want to add music from your laptop or desktop to the iPad, you will have to use it to complete the task. So what are the iTunes alternatives? Converting them to a iTunes acceptable format before copying to your iPad is another hectic task you might want to skip. So, is there any iTunes alternative or simpler solution that can directly transfer tunes to iPad from Windows computer, regardless of its file format? There are number of compelling and capable iTunes alternatives that allows you to put music and other stuff onto an iPad from Windows machine. Amongst them, iTransfer is our favorite. It lets you easily transfer music, movies, playlists, ringtones, photos, contacts, messages, podcasts and more amongst your iPad, iPhone, iTunes, Android devices and computer. It takes just a few clicks away to copy any kind of music directly to an iPad from a PC and vice versa without restriction. Hook up iPad with your Windows computer Download the iTransfer and install on your Windows laptop or desktop, launch it. Eight large icons on the top bar make it easy to figure out how to accomplish your tasks with the program. Next, plug your iPad using included Lightning cable into the computer, and wait for the program to detect it. You then will see your device shown in the upper left corner. Add songs from local folder of computer onto iPad Click on the Music icon on the top bar, this should show you the iPad music library where lists all of your tracks and playlists including podcasts, iTunes U, audiobooks, the default playlists and your own created playlists on the sidebar. One-click to transfer data from LG handset to iPhone. A dialog opens, which lets you browse your computer for music files to add. Simply navigate your computer library and pick the songs you want to move to iPad, then press Open. The amount of time that it takes for transfer process to complete depends on how many of songs being transferred. You can now listen to your favorite songs on iPad anywhere and anytime. Just one note - an Export button next to Add button available for you to move music files on your iPad to save on computer, if needed. You might also like.
