1: Internet for people, not profit â€" Mozilla

Make Firefox your default browser Video available: View this video to see this in action. If you have more than one web browser installed, any links that you click on will automatically open in your default browser.

Phoenix was renamed due to trademark issues with Phoenix Technologies ; the replacement name, Firebird, provoked an intense response from the Firebird database software project. These improvements came in the wake of decreasing market share to Google Chrome , as well as concerns that its performance was lapsing in comparison. Despite its improvements, these changes required existing add-ons for Firefox to be made incompatible with newer versions, in favor of a new extension system that is designed to be similar to Chrome and other recent browsers. Firefox 57, which was released in November , was the first version to contain enhancements from Quantum, and has thus been named Firefox Quantum. A Mozilla executive stated that Quantum was the "biggest update" to the browser since version 1. Features of Firefox Features include tabbed browsing , spell checking , incremental search , live bookmarking , Smart Bookmarks , a download manager , private browsing , location-aware browsing also known as " geolocation " based on a Google service, [62] and an integrated search system, which uses Google by default in most markets. Firefox Hello was an implementation of WebRTC , added in October , which allows users of Firefox and other compatible systems to have a video call, with the extra feature of screen and file sharing by sending a link to each other. Firefox Hello is scheduled to be removed in September As they are not compatible with its multi-process architecture, XUL add-ons are now deemed Legacy add-ons and are no longer supported on Firefox 57 and newer. The Firefox add-on website also gives users the ability to add other applications such as games, ad-blockers, screenshot apps, and many other apps. Firefox has passed the Acid2 standards-compliance test since version 3. For security and privacy reasons[which? CDM runs within a " sandbox " environment to limit its access to the system, and provide it a randomized device ID to prevent services from uniquely identifying the device for tracking purposes. The DRM module, once it has been downloaded, is enabled and disabled in the same manner as other plug-ins. Browser security Firefox allowed for a sandbox security model to manage privileges accorded to JavaScript code, but that feature has since been deprecated. In comparison, exploit code for known, critical security vulnerabilities in Firefox was available for nine days before Mozilla issued a patch to remedy the problem. It is not relational at all," she said. In February , plans were announced for Firefox 22 to disable third-party cookies by default. However, the introduction of the feature was then delayed so Mozilla developers could "collect and analyze data on the effect of blocking some third-party cookies. The change was made due to its use across the majority of websites, the potential repercussions on non-experienced users who are unaware of its impact, along with the availability of extensions such as NoScript , which can disable JavaScript in a more controlled fashion. The following release added the ability to disable JavaScript through the developer tools for testing purposes. Firefox 43 blocked unsigned extensions, but allowed enforcement of extension signing to be disabled. All extensions must be submitted to Mozilla Add-ons and be subject to code analysis in order to be signed, although extensions do not have to be listed on the service in order to be signed. It is enabled by default in development versions of Firefox, but not in release versions. Until November , Firefox was the last widely used browser not to use a browser sandbox to isolate Web content in each tab from each other and from the rest of the system. To use this feature the user have to set in "about: The standard in network. To use DoH solely, the value must be 3. Mozilla localizations Firefox is a widely localized web browser. The first official release in November was available in 24 different languages and for 28 locales , including British English , American English , European Spanish , Argentine Spanish , and Chinese in Traditional Chinese characters and Simplified Chinese characters.

3: Open With Firefox - Chrome Web Store

Open With Firefox sends web pages from Chrome to Firefox browser.

It replaced the previous "Australis" UI and features new menus, a new customization pane and tabs without rounded corners. One of new features of Firefox 57 is the ability to open bookmarks always in a new tab. Here is how you can enable it. Click here to fix Windows errors and optimize system performance Firefox 57 is a huge step forward for Mozilla. The browser comes with a new user interface, codenamed "Photon", and features a new engine "Quantum". It was a difficult move for developers, because with this release, the browser drops support for XUL-based add-ons completely! All of the classic add-ons are deprecated and incompatible, and only a few have moved to the new WebExtensions API. Some of the legacy add-ons have modern replacements or alternatives. Unfortunately, there are plenty of useful add-ons which have no modern analogs. The Quantum engine is all about parallel page rendering and processing. It is possible to make Firefox 57 open your bookmarks in a new tab automatically. While you could open a bookmark in a new tab by holding the CTRL key on the keyboard or from the bookmark context menu, you might find it useful to make this behavior permanent without extra actions. There is a new hidden option in about: To open Bookmarks always in a new tab in Firefox 57, do the following. Open a new tab and enter the following text in the address bar: Enter the following text in the search box: You will see the parameter browser. Double-click on it to set it to TRUE. Now, click on the bookmarks button to open the Bookmarks pane, and click on any bookmark. It will open in a new tab! You can help the site keep bringing you interesting and useful content and software by using these options:

4: Open Tabs in Firefox to the right of the current tab - gHacks Tech News

The first, Open new windows in a new tab instead, is enabled by default and instructs Firefox to always open new pages in a tab instead of a window. To disable this functionality and have new pages open in their own separate browser window, simply remove the checkmark next to this option by clicking on it once.
