Assembly And operating instructions for your orbit® Heavy-duty traveling sprinkler. Model If you contact Orbit at the Web site or toll-free.

Rather, it is a low resolution visual reference only containing relevant information regarding the file e. Model 07SUM rB. Sprinkler assembly Begin by inserting the black plastic T into the top of the sprinkler. Twist the long silver spray arms into the T, tightening the black rings until the spray arms are held securely in place. Correctâ€™sprinkler will move forward Wrongâ€™sprinkler will move backwards 2. Positioning the arms Positioning the spray arms correctly will ensure. Move each spray arm individually to adjust watering diameter from a minimum of 15 feet to 55 feet. Positioning the shut-off ramp The shut-off ramp may be used at any point along the hose pattern to stop the sprinkler. Place the automatic shut-off ramp over the hose where you want the sprinkler to stop, ensuring a minimum of 5 feet of straight hose on either end of the ramp. For wide spray coverage, move the arms so they are pointing upward approximately 30 degrees. Direction of Travel 5. Hooking up the sprinkler For windy conditions, move the arms to a horizontal position. Set the sprinkler on the hose so that the front tire. Make sure the sprinkler is facing the direction you would like it to go. Hook up the hose to the rear of the sprinkler. Select a traveling speed by pulling up on and rotating the dial on the top of the sprinkler. The sprinkler will travel from 0 to 37 feet per hour based on setting. Select this speed for faster movement and light watering Low: Select this speed for slower movement and heavier watering Neutral: Select this speed for no movement; the sprinkler will remain stationary and water a designated area. Begin by creating at least a three-foot loop with the end of the hose to prevent pinching when connecting to the sprinkler. Do not create sharp turns in the hose pattern. Running the sprinkler Pull out the stopper underneath the sprinkler between the back wheels and turn on the water supply. The sprinkler will move at the speed indicated along the hose track, stopping when its shut-off plunger contacts the ramp stop. Stopping the sprinkler Customer Service Contact Information When the sprinkler comes in contact with the shut-off ramp, the incline causes the stopper to be pushed up, stopping the sprinkler. Moving the sprinkler Before repositioning the hose and moving the sprinkler to another part of the lawn, be sure to turn off the water first. It will be very difficult to move the stopper back down if water pressure remains in the hose. Preventing sprinkler damage Use caution when picking up and moving the sprinklerâ€™dropping it could potentially result in damage to the sprinkler or its parts. Do not force the sprinkler to move faster or slower along the track while it is in operation. Do not let the sprinkler become mired in thick grass or mud. Be sure there are no objects blocking the path of the sprinkler. The sprinkler is designed to move across grass onlyâ€™never attempt to use the sprinkler on concrete driveways, sidewalks, or other hard surfaces. Doing so may result in severe damage to the motor assembly. We will replace, free of charge, the defective part or parts found to be defective under normal use and service for a period of up to six years after purchase proof of purchase required.
