Outcomes for Basic Skills Learners: A Four-year Longitudinal Study Hillary Metcalf & Pamela Meadows
Enhancing "Skills for Life": Workplace Learning and Adult Basic Skills Karen Evans, Edmond Waite and Lul Admasachew

The eight-apartment unit at Cougar Village was gutted by fire in August. The action was taken yesterday by the executive committee under authorization of the full board so that the project may proceed in timely fashion for an August opening. The full board, which will not meet again until February, gave the authorization at its Dec. In addition, the new building will have updated building code specifications, including a new alarm system and automatic fire sprinklers. In addition to current code requirements, the system connects to the campus central monitoring system, including the attic space which is beyond building code requirements. The companies awarded the contracts are: The 32 students who were scheduled to live in the unit this past fall semester were re-assigned to other space in the apartment complex. Two students already moved into an apartment in the building escaped injury largely thanks to SIUE Police Officer Dan Murphy who spotted the fire and pounded on front doors to roust anyone who may have been inside. Wilson concluded lightning caused the fire because of burn patterns and other evidence indicating the blaze started in the attic. It was also noted that there was no evidence of cooking in the building at the time nor was there evidence of combustibles. The bench, located along the path of the Shade Stroll Garden, is a serene spot to enjoy the plants and trees throughout the seasons. The focus of SIUE Day, says Julie Babington, is to celebrate the University while gaining faculty, staff and retiree support as well as local business support. Babington, director of Annual Giving for the SIUE Foundation, said she has been impressed by the growth over the years in event participation by faculty and staff. This represents almost 25 percent of our employees and a 33 percent increase over last year. The Vice Chancellor for Student Affairs is our small-sized fewer than 10 full-time employees department winner with a 83 percent participation rate; The Early Childhood Center, mid-sized full-time employees department, is the winner is our overall top performer with an outstanding percent participation rate; and The School of Nursing, is our large-sized 25 or more full-time employees department winner with a 57 percent participation rate. Team members included construction management majors: The experience will help prepare the students for the ACI Spring Convention in Chicago, which includes a concrete bowling ball and pervious concrete competition. A physics faculty member and two students from Southern Illinois University Edwardsville recently attended a workshop on astronomy and new media in the Netherlands. Research Associate Lecturer Pamela Gay and computer science students Mark Sands, a junior, and Cory Lehan, a senior, spent a week at the Lorentz Center at Leiden University in Leiden, the Netherlands, discussing with other scientists various ways to communicate science to diverse audiences. A major topic of the conference was how blogs, podcasts and social networking are being used to generate public interest in the science of astronomy. The popularity of the Galaxy Zoo project, along with the wide use of user-friendly Google Sky and Microsoft Worldwide Telescope technology, has created an atmosphere for the cultivation of "citizen scientists," according to a news release sent out by Astronomy organizers. The release further stated themes covered during the meeting included citizen science projects, new media for outreach and communication, network-based research tools and data visualization. Brainstorming sessions were held about development of new ideas and applications to promote citizen involvement in the field of astronomy, as well as future discovery and the production of new scientific results. Astronomy was held in conjunction with the International Year of Astronomy For more information visit: SIUE faculty members Serdar Celik, assistant professor of mechanical and industrial engineering; Susan Morgan, chair and professor of civil engineering; and Bill Retzlaff, associate professor of biological sciences and chair of that department, presented during the conference and then led the visitors on a campus tour. The international visitors, including more than 20 faculty, students and practitioners, were in St. Louis attending the Sixth International Phytotechnologies Conference. The collection contains thousands of scientific journal articles, various writings, photographic

OUTCOMES FOR BASIC SKILLS LEARNERS : A FOUR-YEAR LONGITUDINAL STUDY HILLARY METCALF PAMELA MEADOWS pdf

slides, audio tapes and source documentsâ€”some of which date back to the 16th Centuryâ€”from the many fields of biology and oceanography. The entire collection consists of more than 50, items, collected individually over a lifetime of research, spanning some four decades. He continued his work as a science writer in both Spain and Venezuela and, in , became a graduate student in biology at the University of Miami, Florida, where he studied the evolutionary biology of cave fishes. Since , Romero has been professor of biological sciences and chair of that department at Arkansas State University. He created a host of new courses in the areas of biospeleology, marine mammals, history and philosophy of science, science in the cinema and science communication. Throughout his career, Romero published more than pieces including numerous books, peer-reviewed publications and monographs on a wide variety of subjects including cave biology, marine mammals, paleontology, environmental studies, and history and philosophy of science. He has produced, written, and, in many cases, directed and hosted about 1, radio broadcasts and 50 television shows, including award-winning nature documentaries. Construction on the new Science Building at Southern Illinois University Edwardsville is expected to begin this month or January, according to top University administrators. Neher said the projected move-in date on the Science Building will be around November We can now properly address that. We are thankful for the support of the Governor, our local legislative delegation, the labor and business community, SIU President Glenn Poshard and all those who have enabled this day. The doors will open at 6 p. Reservations may be made for tables of no more than eight. The evening will offer challenging trivia, during the regular question-and-answer sessions and during survivor trivia. Free popcorn and pretzels will be offered; also, soft drinks will be available for purchase. To make reservations, call All contestants will receive a Certificate of Recognition. Clair and Washington counties in Illinois. Submissions must be postmarked by Feb. For more information visit, siue. The two had a front-row seat with more than other Twitter users and social media masters to witness the second-to-last launch of the Space Shuttle Atlantis, as part of a coordinated social media experience. The event was coordinated by NASA and drew more than , virtual followers. Gay has been maintaining her own blog about the experience, as well as her personal and professional experiences, at starstryder. She and Sands have Twitter accounts at starstryder and marksands, respectively, which are openly accessible to the public. For more information about space shuttle Atlantis STS mission, visit nasa. Images are available for viewing through Flickr. The biweekly service will be provided by fellowship-trained head and neck surgeons from the medical school, according to Dr. HANOT is a multidisciplinary treatment team that includes head and neck surgeons, medical oncologists and radiation oncologists who determine the most current and appropriate treatment options for each patient. Other specialists include pathologists, oral surgeons, dentists, social workers, dietitians and nurses. Letters about the new service are being sent to physicians and dentists in Jersey, Macoupin, Madison, Bond, Clinton, St. Clair, Monroe and Randolph counties. The mission of the SimmonsCooper Cancer Institute at SIU is to serve the people of Central and Southern Illinois by addressing present and future cancer care needs through medical education, biomedical research and patient service. For more information, visit the Web site: The board gave the executive committee authorization today at its regular meeting on the campus of SIU Carbondale. The 32 students who were scheduled to live in the unit this fall semester were re-assigned to other space in the apartment complex. Two students already moved into an apartment unit got out of the burning building largely thanks to SIUE Police Officer Dan Murphy who spotted the fire and pounded on front doors to roust anyone who may have been inside. No one was injured. Originally, the chapter proposed a grant to help the community at-large but consulted with the School of Education faculty who suggested the Center be the focus of the grant. As a result, the grant will be used to provide backpacks, books, writing supplies, water bottles, and tutoring to the student population at the Detention Center. The Council also is charged with finding ways to improve teaching and learning; to assure readiness and smooth transitions for students at each level of their education; and to cultivate and demonstrate accountability and efficiency in all school programs from pre-school to college. The 23 appointments made by the Governor include business leaders, teachers, parents and civic groups, as well as university, community college and school officials. There are four legislative

Understanding the origins of poor literacy and numeracy skills in adulthood and how to improve them is of major importance when society places a high premium on proficiency in these basic skills. This edited collection brings together the results of recent longitudinal studies that greatly extend.

The Hmong resettlement study: The report is part of a larger, national project on Hmong resettlement. Section I gives general information about the area, the population, the economic base and employment opportunities, welfare, housing, refugee services, and a mixed community reaction to the Hmong. Section ii gives a brief summary of the size and history of the Hmong population in Providence, which was estimated at approximately 1., in Section iii discusses the issues of employment, job training, education, and adult English-as-a-second-language programs. In section iv summaries of the site specific findings are given, along with reflections on the future of the Hmong in Providence. Some of these findings are as follows: Cg Teamwork and literacy: The study focused on the formal and informal educational practices from which workers organized into 19 production teams ranging in size from 3 to 88 members learned and taught literacy skills. The teams were observed from four vantage points: Although the high-performance model stimulated innovative teaching approaches, including some strategies developed specifically for or by skills-poor workers, most of the approaches proved inadequate to enable the less literate and educated workers to overcome their poor position and improve their literacy skills. Mn Adults with Low Proficiency in Literacy or Numeracy 1 edition published in in English and held by 15 WorldCat member libraries worldwide This paper offers a comprehensive analysis of the information from the Survey of Adult Skills PIAAC regarding adults with low literacy and numeracy proficiency. The paper first describes the demographic and socio-economic characteristics of these populations. Although, they are more likely than the rest of the population to exhibit certain characteristics, such as lower levels of educational attainment, lower rates of unemployment or more disadvantaged backgrounds, adults with low literacy are found in among all socio-demographic groups and in all walks of life. The paper then explores the frequency with which adults with low proficiency engage in the reading, writing and numeracy practices and the relationship between these practices and a range of social and economic outcomes. For most outcomes, levels of engagement in literacy practices appear to be as strong predictors as proficiency, indicating the importance of encouraging more intense use of these skills both in and outside of work. The unique data from the Survey of Adult Skills regarding performance on the simple reading tasks the so called "reading components" is also analysed. Adults with low proficiency are found to be able to easily recognise commonly used words in printed form but often have difficulty with processing the logic of sentences and reading extended passages for basic meaning. Adults with low proficiency are considerably less likely than their more proficient peers to participate in formal or non-formal adult education or training programmes, which is mostly due to the socio-demographic and employment characteristics of this population. However, the lower participation rates among the low proficient adults does not appear to be a consequence of their lack of motivation as much as of the presence of various obstacles to participation, such as lack of time and the cost of training A bibliographic guide to functional literacy by Stephen M Reder Book 6 editions published between and in English and Undetermined and held by 15 WorldCat member libraries worldwide Adults with Low Proficiency in Literacy or Numeracy 1 edition published in in English and held by 15 WorldCat member libraries worldwide This paper offers a comprehensive analysis of the information from the Survey of Adult Skills PIAAC regarding adults with low literacy and numeracy proficiency. However, the lower participation rates among the low proficient adults does not appear to be a consequence of their lack of motivation as much as of the presence of various obstacles to participation, such as lack of time and the cost of training Expanding theories of adult literacy participation: Participation has been studied primarily from the perspective of service providers, gathering data on participants or dropouts. Since the s, researchers have shifted from a narrow preoccupation with participation in education to interest in

OUTCOMES FOR BASIC SKILLS LEARNERS : A FOUR-YEAR LONGITUDINAL STUDY HILLARY METCALF PAMELA MEADOWS pdf

participation in learning. Although research had been mainly descriptive, researchers seek now to explain adult participation. The descriptive studies have identified sociodemographic characteristics of participants in formal adult education, their motivations for attending classes, barriers or deterrents to their attendance, and characteristics and perspectives of "nonparticipants. Some comprehensive theories and models that have been developed to explain participation are as follows: None of the theories is sufficient. Y1b The Hmong resettlement study: Much of the data was gathered through personal interviews with Hmong and individuals working with Hmong in Fresno County. The first section gives general information about Fresno County and describes the general population, other refugee groups, the economic base farming , economic problems, housing, problems of refugee services, and the very negative community reaction to Hmong refugees. Section ii gives information on the size and history of the Hmong population who, according to one source, numbered approximately 10, in May, Section iii considers a variety of resettlement issues, including lack of English proficiency, lack of job skills, discrimination, welfare dependence, lack of job search skills, and the lack of entrepreneurial experience and technical assistance for farmers and small businessmen. Also discussed are education issues, in particular the feelings of extreme disorientation the Hmong feel in the schools and their sense that the education is inappropriate for their needs. The final section considers secondary migration, welfare disincentives, socialization problems, and psychological issues. The paper concludes with extensive appendices, which include Fresno County welfare caseloads, refugee services available, organization of services, and transcripts of letters translated into English from Hmong in Fresno County. Outlined in the guide are strategies for expanding community outreach efforts identifying who needs help and where help is typically obtained, learning from successful literacy helping networks, and viewing literacy as a social activity ; recruiting literacy helpers using grassroots outreach and other publicity methods ; and presenting a literacy helper workshop defining the purpose of the workshop and the role of the facilitator, working out the logistics of the workshop, and selecting the content of the workshop. Workshop materials for addressing the following goals are provided: Lists of objectives, exercises, and instructor scripts are provided to help facilitators cover each of the four workshop goals. An annotated list of resources concludes the guide. Mn The Hmong resettlement study: Much of the data was gathered through personal interviews with Hmong and individuals working with them in Fort Smith. Section I gives general information about the area, the population, the economic base manufacturing , employment possibilities, welfare, housing, refugee services, and the relatively positive community response to the refugees. Section ii gives brief information on the size and history of the Hmong population in Fort Smith, which was estimated at approximately in Section iii describes employment which, while high, is low paying and entirely based on one industry manufacturing , welfare assistance none of the Fort Smith Hmong receive welfare ; economic development land purchases for farming ; job training; education including particular problems for Hmong girls ; and adult English-as-a-second-language programs. Section iv summarizes the findings specific to the Fort Smith area, which include:
