Some possible ways the resource file can be presented are in a file folder, flash cards, poster, paper, handout, presentation, or a job www.enganchecubano.com II: Personal Theory Paper Write a word paper where you create your own intervention theory.

Chairman, National Bipartisan Commission on Central America Published Years of Renewal Scope and Contents The papers consist of correspondence, memoranda, writings, speeches, photographs and other material that document the career of the diplomat, author and foreign policy expert and scholar Henry A. Kissinger, who served as United States secretary of state from to and as assistant to the president for national security affairs national security advisor from to The Part II papers primarily document his career before and after he worked in government, as a professor at Harvard University and later as an influential author and commentator on international affairs and consultant. The Part II papers also contain material relevant to his years in office. Part I, maintained at the Library of Congress, consists of materials primarily documenting his government career and includes copies of records from his government service. The three Parts of the Henry A. Kissinger papers complement and overlap each other in numerous ways which the finding aids for each Part describe in greater detail. The Provenance section of this finding aid provides more information about the division of the papers into the three Parts. Part II contains his personal correspondence as well as subject, trip and speech files from his time in office in Series II. A smaller number of documents, including the memoranda of conversation in Series II, touch upon policymaking, especially the public presentation of policies, but the documents in Part II by themselves tend to provide only a fragmentary picture of the policies they concern. Throughout Part II, memoranda of conversation are often especially informative documents because they are detailed summaries or nearly verbatim accounts written to document a specific conversation. Most of these materials can be found in Series I. Student files detail his education at the City College of New York, Lafayette College while serving in the Army and Harvard University, primarily through class notes and papers. Army files offer a view of his military training and service in World War II, his role in the military government of Germany during the post-war occupation and his study of military government during the Korean War that he conducted as an Army reservist in There are also files from his work with the Council on Foreign Relations during the s and s and the writing of his widely-read Nuclear Weapons and Foreign Policy, published in Kennedy and Lyndon B. Johnson presidential administrations, including his fact-finding trips to Vietnam in and , can be found among his professional files with additional material in the correspondence files of Series I. They also shed light on the transnational Atlantic community of political and academic leaders whose personal and intellectual ties helped to maintain good relations between the United States and Western Europe and sustain the NATO North Atlantic Treaty Organization alliance during the Cold War. The papers do not include files from his international consulting firm, Kissinger Associates, which he founded in The papers, however, do provide insight into his dealings with the international business community and foreign governments, primarily through correspondence and a small number of memoranda of conversation. His continued work advising on American foreign policy is documented through correspondence as well as files on his chairmanship of the National Bipartisan Commission on Central America from to The papers offer substantial coverage of his work as an author and public commentator on international affairs. There is only a limited record of the publication of his acclaimed and best-selling memoirs and other books published after he left office that includes neither drafts nor drafting notes. However, there is a wide variety of speeches and articles, including drafts for his regular column in Newsweek magazine. In addition, his post-government correspondence provides material on the writing and editorial process for many of his publications including his memoirs and books. Additional material on his post-government career can be found in Part III, especially for the period after While materials concerning his family are scarce, there is scattered correspondence with family members including his brother, Walter Kissinger, and his father, Louis Kissinger, as well as a large number of family photographs. Arrangement The papers are arranged in seven series: Early Career and Harvard University, Moving Images and Sound Recordings, United States -- Foreign relations -- United

States -- Foreign relations -- Soviet Union.

PART II RESOURCE PAPERS pdf

3: Henry A. Kissinger papers, part II - Yale University Library

Maximize Operator Effectiveness Part II: Interpreting the New ANSI/ISA Standards The second paper of a two-part white paper series, "Maximize Operator Effectiveness," provides new case studies and guidelines on developing a detailed plan of action for the improvement of a process control HMI.

Here are some fantastic resources and tips on how to use them to their fullest extent: Depending on the size of your school, you may have a subject area librarian for the particular type of research you are doing. Some universities, for instance, have specialist librarians for topics like music, art, and humanities. When asking your librarian or teacher, just be sure to be tactful. Academic journals – These journals are a great way to find cutting edge research on your topic. Academic journals add credibility and professionalism to a paper. They work well for both humanities and scientific papers. Another great way to access academic papers is Google Scholar. It is a search tool that finds scholarly articles – academic journals, patents, theses, court proceedings, and more. Google Scholar displays how many times an academic piece of literature was cited, which is a rough numerical indicator of how influential the research was. Google Scholar also has link under each posting to help you find related articles. Books – Books are still one of the best ways to find credible information about a source. Some fields such as the humanities prefer their students use books for sources rather than websites, since books typically contain more detailed information and perhaps more in-depth thinking than websites do. Books can be found on your school or public library website. Type in keywords related to your topic in the search field, and see what kinds of literature comes up. Write down the call number of the book so that you can find it within your library. Google has another service, Google Books, that will help you find books related to your topic. Just type your research topic into the field and Google Books will provide you with a list of relevant books. Once you click on a book you like, Google Books will give you a preview of the book and information related to buying the book or finding it in your library. Websites – Websites are sources you should approach with caution. The trick is to weed out the unreliable information. They help people with a lot of things shopping, searching for flights, comparing restaurants. Here are some tools that help you find information for a particular field of interest:
