November 1, Happy Halloween, everyone! Tahlia and I actually visited this site last July so that we could include our photographs here. Today as well as in the decades following the incident, reports of spectral figures and wandering spirits, prowling about in search of their elusive eternal resting place, haunt the torture site as well as the final burying place of the two officers at Mt. Hope Cemetery in Rochester. The story goes something like this: The Haudenosaunee, better known to non-Native Americans as the Iroquois, assessed the threats posed both by the British and the Americans. Based upon their experiences, neither the Americans nor the British seemed a trustworthy ally. The indigenous peoples of the Americas had faced land theft, deception, decimating diseases, near constant warfare, false promises, and outright genocide ever since Europeans arrived on American shores. But during the Revolution most tribes of the Confederacy eventually came to perceive the British as the lesser of the two evils, and so elected to side with them. On several notable occasions, Seneca-British forces raided frontier settlements, and these attacks ultimately culminated in the Creepy Finger Lakes story here. After the Wyoming Valley attack, allegations circulated among the colonists that the Seneca had committed atrocities against the settlers, with some folks going so far as to deem the Seneca savage butchers. These false claims angered Native soldiers. A few months later, a New York community faced a similar fate. These events led some Americans to call for revenge against the Seneca. As the American military pondered how to respond to the attacks, they focused on the beautiful farms and orchards that the Seneca cultivated in the Finger Lakes. As part of their alliance with the British, the Seneca agreed to share their crops with the soldiers, effectively aiding and abetting the military enemies of the American colonists. So, partly as a decisive effort to retaliate for the American lives lost at Wyoming and Cherry Hill, and partly as a way to disrupt the possibility of British successes in New York, the Continental Army hatched a plan that would strike a devastating blow to the Seneca. An image supposedly of Lt. A young woman whom Boyd had evidently left pregnant and enraged cursed him as he left with the Sullivan Expedition. At the northern tip of Conesus Lake, General Sullivan sent Lieutenant Parker ahead to scout the precise location of the town. Nearly half of his men escaped with their lives, but Boyd, Parker and Hon Yost, their Oneida Indian guide, were taken prisoner. And things did not go so well from there. This remainder of this story is not for the faint of heart. Soâ€¦Hon Yost was the first to die. Of the three prisoners, he got off the most mercifully. Accounts of what happened next to Boyd and Parker vary somewhat, but apparently, both men were first tied to enormous trees, such as this one which still stands on the Boyd-Parker Memorial Site. In , another similar tree on the site, believed to have been THE torture tree, mysteriously cracked and toppled over. There was no storm or lightning. What caused it to crash down remains unknown. The size of the tree makes it easy to believe that it was standing in To offer some perspective on the size of this tree, here are Tahlia and Skye. Skye hams it up for the camera! For such a figure, the Seneca reserved the most brutal tortures. According to one source, Boyd â€¦was then scourged with prickly ash boughs, and compelled to move around until the pain was so great that he could go no further. Looking up from the bottom of the tree above After Boyd was dead, the Senecas fled the scene. Members of the Sullivan expedition soon after discovered his body, along with those of Parker and Hon Yost, which they hastily buried. The site became known as the Torture Tree, and it is here where the desecrated spirits of the deceased reportedly lingered, long after their demise. But this is still not the end of the story for the mutilated soldiers. Several decades later, Mount Hope Cemetery in Rochester designated a prominent hill in the cemetery for the remains of local Revolutionary-era soldiers. We will never know. What we do know is that whatever remains were found in their graves were again relocated during the Civil War, and once again on the day after Halloween in , when the military section of Mt. Hope was moved to a flatter, and hopefully final, cemetery plot. Perhaps their spirits finally rest in peace. But after the Sullivan Campaign, peace continued to elude many Seneca people. The Sullivan Campaign destroyed nearly all Cayuga and

PERSONS, PLACES, AND THINGS AROUND THE FINGER LAKES REGION, THE HEART OF NEW YORK STATE pdf

Seneca villages. The soldiers decimated their lands, orchards, crops and homes, such that during the very harsh winter of , thousands of Senecas and Cayugas starved to death. That is a horror story. Along the Sullivan Trail: Winfield, Mason et al. A Supernatural History of the Lower Genesee
