The nurse is discussing gene therapy in a continuing education class. Which is the best definition of eugenics? The use of gene therapy to prevent disease b. The development of new drugs based on gene therapy c. Intentional selection, before birth, of genotypes that are considered more desirable than others d. The nurse is explaining the Human Genome Project to colleagues. Which of these is the main purpose of the Human Genome Project? The study of genetic diseases. The study of genetic traits in humans. The discovery new genetic diseases. To describe the entire genome of a human being. A patient has just been told that she has the genetic markers for a severe type of breast cancer. The nurse is asking a patient about his family history as part of an assessment. Which component is included in an effective family history? Covering at least three generations of family history c. Photo Atlas of Drug Administration 1. Verifying orders with another nurse b. Documenting the medications given c. Counting medications in the medication cart drawers d. The nurse is giving an intradermal ID injection and will choose which syringe for this injection? A patient is to receive a penicillin intramuscular IM injection in the ventrogluteal site. The nurse will use which angle for the needle insertion? When administering medication by IV bolus push, the nurse will occlude the IV line by which method? Not pinching the IV tubing at all b. Pinching the tubing just above the injection port c. Pinching the tubing just below the injection port d. Pinching the tubing just above the drip chamber of the infusion set 5. The nurse has an order to administer an intramuscular IM immunization to a 2-month-old child. Which site is considered the best choice for this injection? The nurse needs to administer insulin subcutaneously to an obese patient. Which is the proper technique for this injection? Using the Z-track method b. Inserting the needle at a 5- to degree angle until resistance is felt c. Pinching the skin at the injection site, and then inserting the needle to below the tissue fold at a degree angle d. Spreading the skin tightly over the injection site, inserting the needle, and then releasing the skin 7. The nurse will plan to use the Z-track method of intramuscular IM injections for which situation? The medication is known to be irritating to tissues. The patient is emaciated and has very little muscle mass. The medication must be absorbed quickly into the tissues. The patient is obese and has a deep fat layer below the muscle mass. After administering an intradermal ID injection for a skin test, the nurse notices a small bleb at the injection site. The best action for the nurse to take at this time is to: The nurse is administering an IV push medication through an IV lock. After injecting the medication, which action will be taken next? Flushing the lock b. Regulating the IV flow c. Clamping the tubing for 10 minutes d. When adding medications to a bag of intravenous IV fluid, the nurse will use which method to mix the solution? Shaking the bag or bottle vigorously b. Turning the bag or bottle gently from side to side c. Inverting the bag or bottle one time after injecting the medication d. Allowing the IV solution to stand for 10 minutes to enhance even distribution of medication Chapter A patient was diagnosed with pancreatic cancer last month, and has complained of a dull ache in the abdomen for the past 4 months. This pain has been gradually increasing, and the pain relievers taken at home are no longer effective. What type of pain is the patient experiencing? An year-old basketball player fell and twisted his ankle during a game. The nurse will expect to administer which type of analgesic? Synthetic opioid, such as meperidine Demerol b. Opium alkaloid, such as morphine sulfate c. Opioid antagonist, such as naloxone HCL Narcan d. Nonopioid analgesic, such as indomethacin Indocin 3. A patient is recovering from abdominal surgery, which he had this morning. He is groggy but complaining of severe pain around his incision. What is the most important assessment data to consider before the nurse administers a dose of morphine sulfate to the patient? His pulse rate c. The appearance of the incision d. The date of his last bowel movement 4. A year-old patient is in the recovery room after having a lengthy surgery on his hip. As he is gradually awakening, he requests pain medication. Within 10 minutes after receiving a dose of

morphine sulfate, he is very lethargic and his respirations are shallow, with a rate of 7 per minute. The nurse prepares for which priority action at this time? Immediate intubation and artificial ventilation c. Administration of naloxone Narcan d. Close observation of signs of opioid tolerance

5. A patient will be discharged with a 1-week supply of an opioid analgesic for pain management after abdominal surgery. The nurse will include which information in the teaching plan? How to prevent dehydration due to diarrhea b. The importance of taking the drug only when the pain becomes severe c. How to prevent constipation d. The importance of taking the drug on an empty stomach

6. A patient has been treated for lung cancer for 3 years. Over the past few months, the patient has noticed that the opioid analgesic is not helping as much as it had previously and more medication is needed for the same pain relief. The nurse is aware that this patient is experiencing which of these? Opioid abstinence syndrome

7. A year-old man has come into the urgent care center with severe hip pain after falling from a ladder at work. He says he has taken several pain pills over the past few hours but cannot remember how many he has taken. He hands the nurse an empty bottle of acetaminophen Tylenol. The nurse is aware that the most serious toxic effect of acute acetaminophen overdose is which condition? Central nervous system depression

8. A year-old woman being treated for end-stage breast cancer has been using a transdermal opioid analgesic as part of the management of pain. Lately, she has been experiencing breakthrough pain. The nurse expects this type of pain to be managed by which of these interventions? Administering an immediate-release opioid c. Changing the opioid route to the rectal route d. Making no changes to the current therapy

9. The nurse is reviewing herbal therapies.

2: Pharmacology and the Nursing Process 8th Edition Lilley Collins Snyder Test Bank

Let this outstanding pharmacology text help you learn how to administer drugs safely and effectively! Now in its eighth edition, Pharmacology and the Nursing Process continues to deliver the perfect amount of pharmacology, prioritization, and nursing process information to today's nursing students.

Source credibility can impact your grade. Here are questions to guide your evaluation process: How easy is it to find contact information for the author? Publisher Is the publisher well known and well respected in the industry? Do they have a website? How selective is the publisher in determining what they publish? Are they also the main retailer for what they publish? Does their other content seem legitimate and credible? Currency When was the source originally published? When was it last updated? Are you citing the latest version? If not, how does that affect your argument? Accuracy Does the argument the author makes appear anywhere else? Is it backed up with data or other sources? Where does the information presented come from? Are there grammatical or spelling errors? Relevance What is the tone of voice? Does it appeal more to an academic reader, or is it more casual? What is the intended audience of the source? Is it similar or different from your intended audience? Bias If the source is a website, does the site have ads? Do they affect the content? What is the purpose of the source? Is it to persuade or argue? To entertain or inform? Do they seem to only present one side of the argument? How do they address the counter argument, if at all? Citations Does the author give credit to sources where they received information and conducted research? Do the sources they used seem legitimate? What sources refer to the one you are using? Do those seem legitimate? Reproduced Is this the original source? Has it been reproduced? If it was reproduced, when was that done? If it was reproduced, does it have copyright information or information on the original source? Complete How much information can be learned from the source on a particular topic? Does it talk about a broad topic, or a specific element of a topic? Are there larger, more popular sources on the topic than this one? Credible After reading through the various questions above, does this source seem credible? Serving High School, College, and University students, their teachers, and independent researchers since
