

1: How to setup a pig farming business | How To Raise Livestock

Are you interested in starting a commercial pig farming business? Do you need a sample hog / pig farming business plan template? If YES, i advice you read on.

If YES, i advice you read on. Do you know that pigs have one of the highest rates of reproduction in animals? Pigs can birth up to 15 offspring at once and that is just one of the things that make pig farming attractive to investors. Pigs also grow very fast and pork meat is in huge demand in most countries where there is a minority of people practicing religions that forbid consumption of pork meat. In a typical pig herd, there are the males which are known as the boar, the females known as the sows and the little pigs known as the piglets or the farrows. Pig farming is very lucrative. Farmers are often faced with the challenges of choosing the best animals to rear because there are just so many to choose from-goats, pigs, poultry, fishes etc. If you are faced with such a challenge, some of the reasons why you should consider choosing pig farming over others include-: They are more rugged and easier to raise. They can also survive days without food or water. Pigs are also cheaper to raise compared to fishes or poultry because they can eat most foods that humans eat and even if you have to buy feed for them, their feeds are cheaper than those of other animals. If you do not have money for fancy pig feed, you can always make do with stuff you can find around you or food wastes from your kitchen. This is totally impossible with fishes. The immune system of pigs is higher than other animals. As long as you give them the needed vaccines regularly, they would not fall sick. The same cannot be said for chickens which could be wiped out in one fell swoop by a disease outbreak. Pigs also generate more profit and if you ever get tired of pig farming, you could easily dive into real estate, using your pig farm as your first construction site. The first thing you need to take care of is finding a suitable location for breeding your pigs. Please, do not try to do this at home. The reason is because pigs can be very smelly and you will be sure to receive a lot of complaints and protests from your neighbors because of the smell and noise your piggery would generate. So instead of causing great discomfort to others, look for a farmland for your piggery. Just one plot of land would be enough for a small scale piggery but if you are opting for a large scale pig farming business, make sure you purchase a land that is large enough to allow for spacing, grazing and feeding. The shelter that you would build for your pigs is known as a pig pen. This would keep your pigs safe from the elements of weather and other diseases or contamination. You may build your pen with iron or concrete depending on which one you prefer and find more affordable. When constructing your pig pen, ensure that you build a proper drainage for the pigs where all the wastes can pass through. You should also make sure the drainage is kept clean at all times to avoid insects, pests, diseases and contamination. Pigs love playing in water, so you should consider building a water pool in your pig pen for them to play in and stay healthy. The water in the pool should be changed regularly and kept clean at all times. To start your piggery, you would need healthy piglets which you can get from other pig farmers around you. Ensure that the piglets you buy are healthy and have been well taken care of. You should also ask for their vaccination history records to be sure that they have taken their vaccinations up to date. You would need both male and female pigs. The number of piglets you need to purchase would depend on the size of your pen because pigs can multiply very quickly. Pig farmers start with as low as one each male and female or as many as 50 each depending on the scale of pig farming you want to go into. To ensure that your pigs receive the best healthcare, you should engage the services of a veterinary doctor who would act as a consultant for your piggery. The duties of the veterinary doctor would include giving the pigs the right vaccination regularly, checking up on the pigs from time to time to ensure that they are in good health, offering nutrition advice and treating the pigs when they fall ill. You are in luck when it comes to pig feeding because they can eat most of the things that human beings can eat which means that you may not have to start worrying about getting some special feed for them. However, it is important to pay special attention to their nutritional needs. They need to be fed a balanced diet with classes of food like protein for body building, carbohydrate for growth and strength, vitamins, minerals and fiber. You should also provide them with clean water all the time. I already mentioned that pigs love water and this includes their drinking water. They would also play in and mess up their drinking water, so you should opt for

a water supply system that cannot be messed up by the pigs and ensure that they are checked upon and their water is changed regularly. Pigs can be sold live to meat sellers or used to make sausages and bacon. You can approach other pig farmers for assistance on how to sell your pigs. Pigs are usually sold per kilogram so the bigger your pigs, the more money you would earn.

2: Pig farming business plan

A Sample Pig Farming Business Plan Template Business Overview The agricultural sector of which livestock farming or better still pig farming is a part of is no doubt among the leading industry in most countries of the world; it is the industry that produce food for the populace and of course raw materials for industries.

Roles and Responsibilities Chief Operating Officer: Responsible for preparing financial reports, budgets, and financial statements for the organization Responsible for overseeing the smooth running of HR and administrative tasks for the organization Defines job positions for recruitment and managing interviewing process Carries out staff induction for new team members Responsible for training, evaluation and assessment of employees Oversees the smooth running of the daily farming activities across the various farming sections. Responsible for managing boarding services, breeding services, dairy support services, livestock health services, farrier services, and shearing services et al. We know that if we get it right from the onset, we would have succeeded in creating the foundation that will help us build a standard pig farming business that will favorably compete with leading livestock farms in the United States of America and in the rest part of the world. As a pig farming business, we look forward to maximizing our strength and opportunities and also to work around our weaknesses and threats. Our strength as a livestock farming business is the fact that we have healthy relationships with loads of major players agriculture merchants in the livestock farming industry; both suppliers and buyers within and outside of the United States. We have some of the latest livestock farming machines, tools and equipment that will help us breed pigs and other livestock in commercial quantities with less stress. Aside from our relationship network and equipment, we can confidently boast that we have some the most experienced hands in livestock farming industry under our payroll. Our weakness could be that we are a new livestock cum pig farms in the United States and we may not have the required cash to pump into the publicity of our business. We are aware of this and from our projection will overcome this weakness with time and turn it to a major advantage for the business. The opportunities that are available to us as a pig farming business cannot be quantified, we know that there are loads of people, and industries that will source for pigs, pork, and also industries that will source for the raw materials from our livestock farms both in the United States of America and other parts of the world. Some of the threats and challenges that we are likely going to face when we start our own livestock farm cum piggery business are global economic downturn that can impact negatively on household spending, bad weather cum natural disasters draughts, epidemics , unfavorable government policies and the arrival of a competitor a commercial farm that rear same animals as our livestock farms within same location. There is hardly anything you can do as regards this threats and challenges other than to be optimistic that things will continue to work for your good. They now find it easier to run both livestock farming and crop cultivation. Some even go ahead to include meat processing and packaging business alongside their product offerings; it helps them maximize profits in the agriculture industry. The fact that there is always a ready market for commercial pig farming makes the business ever green. As a matter of fact, one of the new trends in livestock farming industry is that with the recent advancement in technology livestock farmers can now improve the various breeds of the animals they are breeding. As a matter of fact, it is now easier for livestock farmers to comfortably import the kind of breed of domestic animal they want to breed from any country of their choice and also advancement in technology has made it easier to cross breed different species of animal. Our Target Market As you would expect, the target market of those who are the end consumer of livestock farm produce and also those who benefits from the business value chain of the agriculture industry is all encompassing; it is far reaching. Every household consumes produce from livestock farms be it meat, milk, and the skin leather used for bags, belts and shoes production et al. So also a large chunk of manufacturing companies depends on livestock farms for some of their raw materials. In essence a pig farmer should be able to sell his or her farm produce to as many people as possible. We will ensure that we position our business to attract consumers of agriculture produce not just in the United States of America alone but also other parts of the world which is why we will be exporting some of our livestock farm produce either in raw form or processed form to other countries of the world. Our

Competitive Advantage It is common to find entrepreneur flocking towards an industry that is known to generate consistent income which is why there are more commercial livestock farmers in the United States of America and of course in most parts of the world. For example, Statistics has it that there were 2. These goes to show that there are appreciable numbers of livestock farmers in the United States of America but that does not mean that there is stiffer competition in the industry. This is so because part of the success of any nation is her ability to cultivate her own food and also export foods to other nations of the world. We have done our homework and we have been able to highlight some factors that will give us competitive advantage in the marketplace; some of the factors are effective and reliable livestock farming processes that can help us sell our livestock and processed meat at competitive prices, good network and excellent relationship management. Another competitive advantage that we are bringing to the industry is the fact that we have designed our business in such a way that we will operate an all “round standard commercial livestock farms that will be involved in diverse areas such as animal rearing and meat processing and packaging plant. With this, we will be able to take advantage of all the available opportunities within the industry. Lastly, our employees will be well taken care of, and their welfare package will be amongst the best in the industry meaning that they will be more than willing to build the business with us and help deliver our set goals and achieve all our objectives as a standard commercial livestock farms with a meat processing and packaging plant. In view of that, we decided to set up a standard meat processing and packing plant to help us maximize profits in the industry. Over and above, we have perfected our sale and marketing strategies first by networking with agriculture merchants and companies that rely on raw materials from the livestock farming industry who are likely to refer become our customers. Advertise our business and livestock farms in agro “allied and food related magazines and websites List our commercial livestock farms on yellow pages ads local directories Print out fliers and business cards and strategically drop them in offices, libraries, public facilities and train stations et al. In essence we are not going to rely only on the sale of our livestock to generate income for the business but also other business interests within the value chain.

3: Piggery Business Plan - Essay Samples

4: Starting Pig Farming Business Plan (PDF) - StartupBiz Global

Pig Farming Business Plan In Nigeria PDF - Sample Template. THIS BUSINESS PLAN IS REGULARLY UPDATED AND CAN ALSO BE USED FOR BANK LOANS, GRANTS, PROPOSAL FOR COMPETITIONS ETC.

To ensure effective and efficient production and distribution of meat at affordable prices. To provide top quality meat for healthy living of people all over the world. My business is production and sales of pork and life pigs. I plan to establish a company that will produce these pigs in commercial quantity and sell to my numerous customers. We want to feed Nigeria with healthy meat and export to other countries. We will ensure that we sell the highest number of pigs for pork in Nigeria and increase production every year in order to satisfy our customers. The most important thing in my business is hygiene and best practices in animal production. Pig farmers, pig butchers, wholesalers, retailers, abattoirs, meat processing companies, food packaging companies are my target customers. My business is positioned to take advantage of growth trends in the industry. My most important company strengths are measurement of life pigs weight, processing and packaging of pork, none of my products are exposed for contamination, and best possible hygienic measures are taken. My company will succeed because we provide the most important basic need that is protein in form of animal meat and our products are consumed daily by majority of Nigerians. Due to the fact that the available meats are not enough and are not of the best hygienic standard, we will provide quality meat and make profit. With the experience, skills, and strengths of management team and workers to be employed, we will ensure that this business grows to become a house hold name in Nigeria and a world class company. These customers buy pig from farmers in the state. It is our responsibility to locate and market our products to them. Local consumer of pork in Onitsha, Nnewi, Awka, Nkpor and Oba, Anambra State will be encouraged through proper marketing technique using our point on purchase sales outlet. These consumers buy pork in the market for consumption. Through proper marketing strategy, these customers will be encouraged to buy our products. Pig farmers in the state who need boar, piglets or sows are our targeted customers. They may want to buy a boar, piglets or in- sows pregnant pigs for their farms. All pig farmers in the state will be located and visited and how to sell products to them when they need them will be strategized. Wholesalers and retailers of pig in the state are our valued customers. They buy from farm and resell to the butchers and consumers. They will be searched and located and their contact kept in our record. They will be contacted when they need any product. Public markets are places where our customers may want to come and buy our product. Sellers of pork are also our targeted customers. Abattoir and meat processing companies are our targeted market. Our product will be sold to them for further processing. Food processing and packaging companies like UAC foods and other food packaging companies in the state, eateries, restaurants and hotels are also our targeted customers. These companies will be encouraged to put pork in their menu, and will be sold to customers. A very good marketing strategy will be employed. In fact, the Food and Agricultural Organization of the United Nations FAO quarterly bulletin of statistics reported that there is a greater output of meat from pigs. Local pig farmers hold greater percentage of the market share. All the pig farmers are my targeted customers because of the production technique in artificial insemination in pig production to be used. I plan to be a major factor in the market. Demand for meat has risen more than five-fold in the past 50 years in Nigeria, according to the FAO. The FAO said that it believes that the rapid growth of developing economies suggests meat consumption will continue to grow and outpace the growth of supply. The growth trends on the market is seriously increasing rapidly and more consumers preferring to eat pork because it is affordable and readily available upon increase production. However products in the market are not packaged and I will take advantage of this. We will introduce product packaging to increase product development. The pig industry can be a very reliable one due to certain attributes of pigs and the Nigerian production system. Pigs have a high survival rate and also have the ability to utilize a host of agro- industrial by- products and crop residues with little or no processing and minimal cost. Pricing Power Pricing My method of setting prices is based on weight of my life pigs and pork. For my business, my pricing policy is higher than that of my competitors because I am starting. I will increase quality of my products and use this to sell my products to my targeted

customers. My price will be fair and I will compete on quality. My company will charge fifteen thousand naira for kilogram of live pig. Our processed one kilogram of pork will go for four hundred naira. Price is important in this market but my customers mostly make their purchase decision on quality. This is my pricing power. My days as an undergraduate, from till date, have given me the privilege to run and manage Benco Pig Farm, a family pig farm. It has given me the needed technical experience. With continuous training and re-training on business skills and entrepreneurship, I will grow this business to compete internationally and also extend my tentacle to other agro based enterprises. It has given me the needed technical production skills. The table below shows list of required and acquired skill needed in my business. I am hard working and always come first in any thing I do in life. I am innovative, motivated and persistent in any thing that I venture in life in order to achieve success. I am a class leader for five years as an undergraduate. My hobbies are playing chess, reading, meeting people and travelling. Following are the tentative specifications and budget for this equipment. I will also buy 3 in 1 printer. The printer will print, photocopy and scan. Computer tables will be bought for both the laptop and general work table in the administrative building. Etisalat will be my internet providers. Budget for Internet access. It is my intention to grow Ifekentus Nigeria Ltd into a large firm with international standard and relationships. The initial and ongoing cost of operating as private limited liability company will be a necessary business expense. Also, since a properly run private limited liability company will afford me limited liability, I feel this is the right form of business for me. I intend to depend on my attorney to handle all aspects of setting up the limited liability company and maintaining proper company records. With my management team and me as managing director, we will grow this business and provide jobs to many Nigerians. There is a plan for continuation of the business if I am dead, or incapacitated. I can be replaced by the owners of this company. Working hours will be from 8am to 4pm everyday from Monday to Friday except for security agents who will work all day and night. They are owners of the Private limited liability company. This is to encourage them to put in their best and ensure business successes. I will pay them very well. I will train them and increase their salary. This is because I will ensure that best hands are employed. I will pay twenty thousand to young youths who are unemployed when starting the business. This salary structure will increase after one year to a standard compared to the one paid by good companies. I believe in paying my workers well so that they are motivated. My workers will be trained. The cost will be the cost of doing business. Licenses My company will apply for all necessary licenses. I plan to register the company immediately the company is empowered. I plan to complete tax registration forms and get a tax identification number. I will pay myself salary, pay payroll taxes, company tax and formalize my business with the government. I will consult my professional consultants on how to acquire these licenses. I will ensure that the following requirements are achieved. This will cover my livestock, farm buildings, machinery and equipment which form part of the investment on the farm in accordance with its policy. The risks to be covered are death or injury caused by: These risks are covered when I have satisfied such conditions relating to good animal husbandry which I plan to achieve. Cost of Insurance cover. The cost of the insurance cover is 7. I plan to pay this to an agricultural insurance company, Nigerian Agricultural Insurance Corporation in Anambra State. I will depend on my insurance agent to give me expert advice and take up all insurance covers for my business. This is because it will reduce the cost of transportation. It is located along a Federal Government road, Onitsha Owerre road.

5: How to Start a Piggery Business in the Philippines - Complete Guide

Pig farming business is a very profitable business, and many people are making money all over the world by starting a piggery business. However, to build a successful, sustainable pig farming business, you require sufficient knowledge of how to efficiently raise the pigs, good management skills, and a good pig farming business plan.

Posted by admin Agriculture , Business Ideas , Business Plans 3 Pig farming business is a very profitable business, and many people are making money all over the world by starting a piggery business. However, to build a successful, sustainable pig farming business, you require sufficient knowledge of how to efficiently raise the pigs, good management skills, and a good pig farming business plan. This article will outline how to start the piggery farming business, and the pig farming business plan PDF, Word and Excel. Pig farming is a lucrative business, providing income for millions of people, but there are some essential things you need to do before you venture into the piggery business. You have to decide on the size of your pig farming business project i. If you do not have a lot of capital, you can always start small and grow your piggery business overtime, remember, Rome was not built in a day. What you need Land for Pig Farming Business To start your piggery business, you require a large enough area for erecting the necessary pig sty and other farm buildings. The pig farming project requires a gentle sloppy site with well-draining soils e. This is essential as enables easy flow of effluence. You should locate your piggery farm at least 1 kilometre away from the rivers to avoid possible contamination of water from effluence. You should first asses if the land is suitable for operating a pig production business. It is advisable to locate the pig farming project nearer to good roads as that will help minimize costs and enable the farmer to have access to and from the piggery business project. Your pig farming business plan should take into account the cost of purchasing or renting the land. Housing for the Pigs You need good and efficient housing for your pigs. This will make management of the pigs easier and it reduces the mortality rate of the piglets. Note that pigs at different stages of growth require different environments temperatures and different housings. Piglets require protection from very low temperatures to ensure that they grow to their maximum potential level. On the other hand, the growing and reproducing pigs must be protected against high temperatures. Your piggery farming business plan should take into account the construction costs for the housing of pigs. Sows and Bows To start your pig farming business, you require breeding stock. The breeding stock you require are boars and sows. Boars are the male pigs which will service the sows, which are the female pigs. Ensure that you purchase a good breed of pigs. When you are buying the breeding stock, buy from farms which are known to produce good and healthy pigs. The growth potential of your piglets will depend on the nature and quality of the parent stock. Thus it is of great importance to buy a good pig breeding stock from reliable piggery farmers. You require 1 boar for every sows. The number of soars which you buy for your pig farming business will depend on the scale of your piggery business. One sow gives birth to piglets from one pregnancy. A sow can fall pregnant twice a year. The pregnancy of a pig lasts for 3 months, 3 weeks and 3 days days. The pig farming business plan should take into consideration the cost of buying the breeding stock. Feed for the Pigs You ought to correctly feed your pigs. The pigs must be given the correct type of feed as well as the correct amount of feed. If you fail to give the proper feed to pigs then you may miss the slaughter weight targets and the desired quality of the pork. This may lead to a loss in your pig farming business. Note that pigs require different types and amount of feed depending on which stage of growth they are at. Your pig farming business plan should take into account all the feed costs at different stage of growth of the pigs. Capital for a Piggery Farming Business Starting a pig farming business is capital intensive. The capital is required for constructing the pig housings, purchasing the breeding stock, purchasing stock feeds and other costs associated with running a pig farming business. The amount of capital you need for your pig farming business will depend on the size of your piggery farming project. Your pig farming business plan should clearly outline the money required to start and operate a pig production business. Management And Labour for a Pig Farm The number of employees you require for your pig farming business will depend on the size of your piggery project. There may also be need for finance and marketing team, depending on the size of your pig production business. Your pig farming business plan should take into account the salary costs

for all the people you are going to employ. Market You can slaughter your pigs when they are between the ages of 4 months to 6 months. The exact age at which you slaughter your pigs depends on whether you want to sell your pigs as porkers or as baconers. The market for pork is very huge and is ever increasing. The annual global demand of pork is 11 million tonnes. You can supply pork to abattoirs, local butcher shops, retailers, hotels, supermarkets, restaurants, wholesalers and individual consumers. The pig production business plan ought to include a proper marketing plan to use in your piggery business. The export market for pork is also very huge! As you grow your pig farming business you will be able to export the pork to other countries. We introduced the business plans after discovering that many were venturing into the pig production business without enough knowledge and understanding of how to run the piggery business, how to keep the pigs, lack of understanding of the financial side of the business, lack of understanding of: It will be easier to plan and budget as you will be aware of all the costs involved in setting up and running the pig farming business. Shillings, Rupees, Rands, Pesos e. When you download it, you just adjust the figures on the inputs sheet Required details include the number of pigs, costs of feed, salaries, selling prices of the pork etc. After entering the required details, the excel template will automatically generate all the financial statements Income statements, cash flow statements, balance sheets, break even analysis, payback period analysis, start-up costs, financial graphs, revenue and expenses, Bank Loan Amortization. 6: Pig Farming Business Plan | Pro Business Plans

Piggery Farming Business Plan (PDF) In Nigeria - Sample Production Template Manual BUSINESS PLAN Pig Farming Business Plan in Nigeria - Pigs can be raised in controlled or free environment, as a small- or large-scale business.

You can start a successful piggery business from your backyard with a good business plan. If you are thinking of starting a piggery business, here are some tips to make your business plan writing easy, and to ensure the success of the business. You will also find sample business plan that you can use in designing yours. How to Start a Piggery Business Without doubt, piggery business is serious and profitable business. The beauty of it is that you do not need much money or large piece of land to start it off; you can start right at your backyard for the time being. That moderate space at the back of your home can be transformed to a temporary piggery and you will be racking in some cool profit in no time at all. The process of raising pigs is simple and you do not need to be an expert in agriculture or animal sciences to get things done. Everyone understands how nutritious and delicious pork can be and you will never have problem selling your pigs to both neighbors and other customers located far and near. In starting a pig farm, it is better to buy the young pigs and raise them instead of breeding the young ones. What are the advantages of buying young ones? The advantages are revealed below. You will get your investment on the business back in no time at all. You only require about one year to raise the pigs and start raking in the cash. No need for the demanding management and highly specialized labor required in breeding the new ones. No need to empty your bank account on halting operation, which would have been highly expensive if you had attempted to breed the young pigs. What are the specific considerations you need to take note of before you start your piggery business? Now, we will look into some of the very important considerations you need to have when planning to startup a piggery business. Writing a Business Plan Here are free business plan templates to get you started To start any business whether small or large you will need to have a written plan for it. Your business plan will capture your expectation for every area of the business, including the production and marketing of the pigs. The plan will reveal how profitable the business will be and what you need to do to make it so. Writing a business plan can be a bit technical for most people, but studying some good samples can help in writing yours. You can also find websites where you can be guided to write your business plan on their online platform. Choosing your location There are some very important things you must consider when choosing the perfect location to set up your piggery. They are highlighted below: The piggery is not supposed to be located in the urban area. It was hinted earlier that you can set up a piggery at your backyard. But this is only practicable if your home is in the outskirts of the city and not in the middle. The piggery must be at least 25 meters from drinking water. While your backyard may be used as the pig farm, the ideal place to use should be some m from any industrial, institutional, commercial, or residential area. Each sow should occupy an area of 2. More space should be provided for them as they grow in size. This is the more reason the piece of land used for establishing piggery should be large enough and also expandable. How to construct pig house The pigs grow with time. Therefore, their houses must be constructed to allow for this growth. If the house hampers growth, it may promote disease spread among the pigs. If you have decided to set up the piggery at your backyard, then you can make use of ordinary nipa and bamboo to build their houses, since such construction would be temporal Make sure the piece of land on which the pig house is built is somewhat sloppy. This promotes proper drainage and prevents the piece of land from getting muddy with time. Muddy piggery is not the best place to manage. If the pig house you are building is intended to be permanent, make sure the floor is made of concrete and this will reduce parasitic infections and diseases and also promote easy cleaning. If the concrete floor is too hard however, it will cause leg and foot problems. It should also not be too smooth to prevent slip. Are you ready to form a new business? You can incorporate your business today by easily and quickly filling simple online forms. Best online business incorporating services everyone is talking about. Equipment and facilities Facilities like drinking and feeding troughs are needed in the pig house. A number of materials can be used in making the troughs, but it is best to use concrete for constructing them. If there is no money for concrete construction, you can equally make use of truck or automobile tires that are cut in half. Feeding the pigs The feeding of the pigs should start when the

sows are one week old. As they grow, make sure you change their food ration in accordance with their age. The ration change should be gradual; if not, their normal feeding behaviors may be altered. Once they start feeding, allow up to two months to wean them. A starter ration should be used during this period. Do not give them a finisher ration until they are about 20 weeks old and weigh as much as 60 kg. Health management Make sure to always clean the equipment, pens, runways and building to ensure they are in constant good health. Also, make sure they are disinfected and sanitized on regular basis. When a new pig is brought in, first isolate or quarantine it before allowing it to join the rest. Recommended Put your business on the path to success with a solid plan created with Business Plan Pro Software. 7: Starting a Commercial Pig Farm – Sample Business Plan Template

How to start a piggery business: If you are thinking of starting a piggery business, here are some tips to make your business plan writing easy, and to ensure the success of the business. You will also find sample business plan that you can use in designing yours.

The project offers good investment benefits. We therefore highly recommend it for implementation. The role of pig farming cannot be over emphasized; pigs can be raised in a Controlled or free environment, in a small or large scale business. But in whatever size, a prospective farmer would need input as to how to raise pigs. Efficiently and in more productive manner – No branch of live stock farming gives better results than raising of well bred Swine, when conducted with a reasonable amount. The pig is one of the important animals to raise in the farm either for meat or for profit, and no farm is ampler unless some pigs are kept to aid the modern method of farming, that means pigs are having positive external effect on farm land. Till date, in Nigeria the pig farming has not been taken with vigorous intent, the farmers in the east and the north, west are still to come to the reality and importance of pig farming. The pig requires less labour, less capital, less equipment and makes greater gains than any other farm animal, and money invested more quickly than any other farm animal. Pig feeders can be obtained from stock breeders, and producers, in question and classified into different categories some are well suited for a specific environment indoors or outdoors. Crossbred pigs tend to grow faster consume food more efficiently and are vigorous when buying a feeder, choose the large and healthy looking ones at least 25lbs, If you are choosing a male, which is observed to grow slightly faster than females, get one that is already castrated. Male or Female they must be preferably Immunized ask the breeder for health information and stock of the breeder. Pigs need housing to keep them warm during cold temperatures and to shelter them from excessive heat. Pigs are sensitive to heat and could die of heat stress when housed indoors, temperature condition must be well regulated, and Controlled temperature condition can help to maximize growth. Cooking mechanism for pigs can come in form of drift water system or wallow for a hog pen. A major concern about pig farming is that, most farmers do it in a local way, and the pig farming is for commercial purpose but not in large scale production. And another concern is the sanitary aspect, Sanitation is important to keep the pigs disease free. A mechanism for easy cleaning and removal of waste is necessary for any type of pig housing some like scooped pen floors to make waste collection easy. The ignorant of knowing that pigs are supposed to be sold out between 5 to 7 months and after then they can lose their weight which a novice farmer cannot understand, and thereby reducing his revenue. To some extent we can say the pigs have diminishing marginal utility when it comes to their weight. The more they grow, their weight increases, but get to a point when their weight began to decrease. Some farmers are of the opinion that pig farming is growth enhancing both to private individual and the country as a whole. My business is production and sales of pork and live pigs. I plan to establish a company that will produce those pigs in commercial quantity and sell to my numerous customers. We want to feed Nigeria with healthy meat and export to other countries we will ensure we sell the highest number of pigs for pork in Nigeria and increase production every year in order to satisfy our customers. The most important thing in my business is hygiene and best practices in animal production, Pig farmers, pig butchers wholesalers retailers, abattoirs, meat processing companies, food packaging companies are my target customers. My business is positioned to take advantage of growth trends in the country. My most important company strengths are measurement of live pigs weight, processing and packaging of pork, none of my products are exposed for contamination and best possible hygienic measures are taken. My company will succeed, because we produce the most important basic need that is protein in form of animal meat, and our products are consumed daily by majority of Nigeria except for most Islamic states. Due to the fact that the available meats are not enough and are not of the best hygienic standard, we will provide quality meat and make profit. With the experience, Skills, and strengths of Management, team and workers to be employed, we will ensure that our business grows to become a household name in Nigeria and world Class Company.

8: THE WAY OUT IN AFRICA: A Complete Business Plan for Piggery Business in Nigeria

I plan to stick with this specialized business that I know best unless fatally defective Dishonestly, theft, shrinkage: I intend to implement the same policies that have been proven by Panock Piggery and Poultry Farm, one of my biggest competitors.

Order now The business is a small private venture and has unlimited liability, each partner is fully liable for the debts incurred or profits gained. The business will be based in the rural district of Argyle Mountain located in the parish of Westmorland. The land on which the business will be situated was acquired from one of the partners, who is owner of the property. The small house on the property will be converted to a storage unit for feed needed for pig rearing. The property also has a nearby water source; water will be pumped to the pens for the pigs from this stream. This location is also secluded with no close neighbours; public nuisance from the operation of the business will be avoided. The entrepreneurs of Argyle Mountain piggery took advantage of an opportunity that presented itself on the market; explain. The entrepreneurs sort to address the demands for a reliable supply of pork as the competitors fail to satisfy this demand. The business is also situated at an opportunistic location close to the target market. The business, exemplary service and products will facilitate its growth and expansion. Once a market for a product a business produces is available the business has a good chance to succeed. What will determine the faith of the business is how it is managed and operated. The business will be located in the community of Argyle Mountain in the parish of Westmoreland. Argyle Mountain Piggery is proposed to start with ten pig, four pens and a small storage unit where feed and the equipment and tools will be stored. For the first six months of operation the business will have three employees where two will be working shifts on weekdays and the other on the weekend. As the business expands more man power will be employed. The venture will start as a small farm that shall expand as the pigs reproduce. Piggery will sell primarily to restaurants, local butchers and supermarkets. Contracts with such entities will bring additional revenue for further expansion. By the end of the second year of operation the business is expected to double its out. By the end of year six of operations the business is expected to accumulate enough wealth to facilitate growth in the form of opening a new branch in St. Economic Benefits One of the economic benefits of operating a piggery is the opportunity to contribute to the society whilst gaining recognition for the effort. Operation of a business of this kind helps to contribute to the development and growth of the society in various ways such as: Social Benefits The social aspect of a business is very much important seeing it involves the relationship between people. There are several social benefits to be gained from operating a business. Firstly there is a close personal contact with employees and customers, which makes good personal relationships with employees and owner creating a better understanding of customer needs. Also through the promotion and transaction of business potential clients and business partners are developed. Finally there is the opportunity to sponsor community events thus developing stronger relationships. Personal Benefits It is said that although money is not the primary force driving most entrepreneur the possible profits the business will earn is a motivating factor in the decision to start the business. Owning a business also provides entrepreneurs the independence and opportunity to achieve what is important to them, also reaping the rewards of knowing that the driving force behind the business are them. Finally any modification of the business or its products and services are easily facilitated as well as fostering easy decision making. Human Resources Human resource looks at the activities undertaken by an organisation to attract, develop and maintain an effective work force within the organisation. Some of the key factors of human resource is staffing which involves the selecting, training, developing, placing and orienting new employees, where they can be most productive. The entrepreneurs of Argyle Mountain Piggery realize how crucial it is to have an effective workforce in order to be better able to meet and even exceed the ever changing demands and needs of our target market. Therefore it is of great importance to recruit the right individuals, who are able to interact with customers, provide good customer service and are able to contribute positively to the overall growth of the business. In addition employees have to be trained in order to meet up to the standards, goal and objectives of the organisation as well as ensuring that each employee is capable of

performing the assigned tasks. The positions required are designed in the organizational chart. In recruiting members of staff a number of methods will be employed; such functions would include job advertisements through electronic or printed media especially in the Argyle District community. Persons with the required qualifications and experience will be shortlisted and screened then the most suited and fit persons will be interviewed. A job analysis which will be performed to determine the job specifications for each assignment and subsequently the job descriptions will be developed. This will allow employees to gain constructive feedback with regards to deficiencies if any and assist in determining if employees have the right behaviour and attitude to complete task towards achieving the goals of the organisation. Therefore full-time employees will be remunerated based on their job functions and their responsibilities as well as the hours worked. They will also benefit from special discounts. A revision of salary will be performed based on the rate of inflation and profitability of the business and will be revised by the Human Resources Management. Based on the feasibility study the demand is high for pork in Argyle District, as the community of Argyle Mountain and its surroundings consume about 2,000 pigs annually, which is equivalent to approximately 10,000,000 pounds of pork. On the farm certain equipment and supplies are needed to carry out operations including: The stores are located at approximately half an hour from Argyle Mountain. Supplies can also be ordered on a monthly basis. There might be possible considerations of alternatives if cheaper such as a generator or solar energy to be a part of the going green concept for protecting the environment. Purpose of the Business Plan In order to emphasize the issues and expectations of the Argyle Mountain Piggery, this business plan was prepared. Blurred issues such as the target market, the aims of the business, the market segment and the proper pricing strategy will be addressed. These factors will aid the competitiveness of the proposed business and allow the future success of the venture. In doing the business plan the factors mentioned previously will be harmonized as the areas of weaknesses and strengths will be identified and also the prediction of possible problems before they might occur. The business plan however, will not be definite as there may be future changes in the proposed business so the business plan will be made to accommodate these changes. The business plan will also outline the duties and responsibilities of the professionals of the business which will give them a chance to concentrate their efforts on their specific tasks. A clear method of operation will be outlined to further guide the members of the proposed venture. Also the business plan is to be used as a reference for loans and investment funds that will be borrowed for the purpose of the proposed business as lending agencies will seek proof and a properly expressed idea before they invest money. Also for the purpose of borrowing money, the business plan will outline a feasible method of obtaining capital for the repayment of the loan and also for the sustainability of the proposed venture. The business plan will also be used to attract new employees as well as new partners for the future expansion of the proposed venture as this expansion will trigger a bigger revenue as well as profit. These establishments are singled out because their basic operations would require the service the proposed business would provide. The characteristics of the pork being offered by Argyle Mountain Piggery will possess: This will ultimately affect the overall muscle and fat development. This is important for the soundness as well as the appearance of the pigs. A level-topped pig will have a more correct slope to its shoulder and legs and have an advantage in ease of movement. Muscle – Our pigs will possess two important things that contribute to the evaluating of its muscle are the amount and type of muscle as the grade of the pigs would have been carefully selected and bred to yield the best results for the quality. Freedom of excess fat – Excess fat on the finished product is not a desirable feature for customers with the exception of persons in the business of jerk as the fat is used as a part of the jerking procedure; therefore, pigs with very little fat should be ideal. This can also be linked to the grade of the pigs; however the grade that is targeted by the proposed venture will help to solve this matter. Frame Size – Frame refers to the skeletal size of the pig. Frame size is determined by the grade of pigs. The grade of pigs targeted is of the Duroc and Yorkshire breed as these pigs have the desired skeletal frame and when bred with one another will generate good results. The prices of the produce from the piggery will vary based on the orders received from the market. The pigs will be sold as either live weight or dead weight. The offal will also be offered. With that established, a regulated pricing strategy must be employed. Specific cuts will also be priced at the dead weight price per pound. Discounted prices may be considered when over a certain amount of meat or pigs are purchased. The

penetrating pricing strategy will be used to gain access to the market as well as to gain a loyal customer base. The distribution of the products meat will be done via a refrigerated bus and the live pigs will be delivered to the respective clients using an open back, two 2 ton truck. However, the appropriate preparations will be made in the case of the client having an operational vehicle to do their own transport. Argyle Mountain Piggery would be advertised on a wide scale with much emphasis being placed on popularizing the business. Argyle Mountain Piggeries would take advantage of the new and innovative social networks to promote and advertise its services. The Jamaica Yellow pages will also be considered as a source of advertisement. Newspapers advertisements will also be utilized. This will be done on a continually until a customer base is formed. Flyers will be distributed to allow persons to become aware of the new and upcoming business. The final promotional strategy will be via word of mouth from our developing customer base. However, this method is not necessarily directly related to the members of the business as we would rely on the satisfied customers to relate their satisfaction to potential clientele. Mission Statement Argyle Mountain piggery aims to provide the best grade of pork and pigs to the community and its clients we aim to raise the standard of Jamaican pork and find more innovative ways to advertise the versatility of pig meat. Financial Manager Some of the main functions of a Finance Manager include: Human Resource Manager Human resource managers may perform the following tasks: He will organised and supervisor all the work to be done by the Administrative. Appendices Tools used in the feasibility study. The aim of this questionnaire is to determine the market for pork in the Argyle Mountain district and surrounding area. Your honesty is greatly appreciated as it will help in establishing the feasibility of the proposed piggery. All information you provide will be held confidential. What is the nature of the business you operate? How long have this business been operational? In what manner would you prefer the pork products to be weighed? Live weight only r.

9: A Sample Pig Farming Business Plan Template

Find here a detailed pig farming business plan sample checklist for your ready reference. Starting piggery is a very much profitable livestock business. Among the various livestock species, piggery is the most potent source for meat production and pigs are more efficient feed converters after the broiler.
