*Basic Trope: Two characters work well together because they're diametric opposites. Bob and Alice have extremely similar tastes " but they hate each other's guts. Alternatively, Birds of a Feather. They're different and hate each other's guts. Back to Opposites Attract. What's that? You say you.*

Click here to download the Opposites File Folder Game for free! Opposite Game Brief Description: Print out these pictures and glue them into a file folder. Then, cut out the other page and have your child velcro the pictures onto the folder next to its opposite. Opposite Game Materials Needed: Paper to print this file Adhesive Velcro such as dots or strips, can be found at walmart or craft stores Opposite Game Assembly Instructions: Print out page 3 on regular printer paper. Make sure to leave space for the answers. Print page 5 on card stock or thicker printer paper. If desired, laminate this page for added protection. Cut out each square and attach a piece of Velcro to the back of each one. Place Velcro pieces on the file folder where answers to the questions should go. Use the game as described in the instructions on the following pages. This game is designed as practice for children working on learning opposites. Show your child three or four possible answers and have him pick the right one. Ask your child the question What is the opposite of hot? See if she can come up with it on her own. When she does, hand her the answer and let her Velcro it on. Ask your child the question without using any visuals put the folder away. You can work on these words at different levels as well: Put all of the pictures on in the correct places. Is that hot or cold? Have your child come up with something that matches the descriptor ex: Start with two-steps and work your way up. There are many great vocabulary words in this game.

## 2: Opposites Theme for Preschool

*Kurt Beadell, Vibrant Table's Creative Director, explains how he takes two opposing vibes -- rustic and sophisticated -- to create a gorgeous backdrop for a.*

**Giant Collage Materials Needed:** Provide two very large pieces of newsprint. Label them "Large" and "Small". Have tape and glue available. Provide Collage materials fabric, paper, misc. Encourage the children to glue or tape items that are large and small to the appropriate papers. Also, be sure to encourage creativity--can they make a LARGE item with the supplies perhaps gluing a bunch of paper into the shape of a large car?!  
**The Enormous Turnip** Make a paper mache turnip! Mix water and flour and glue, dip newspaper strips and place all over a large balloon. When dry, pop balloon and have children help paint. Pre-cut large circles 2 per child , wiggly eyes, glue, miscellaneous arts and crafts supplies, markers. The children glue wiggly eyes on each circle and then draw a smile on one and a frown on another. Pre-print the smiles and frowns for the children to trace if needed. The children decorate each face. Discuss with them things that make them happy or sad.  
**Day and Night Materials needed:** White paper with a thick black line drawn down the middle from top to bottom. Talk about the opposite of day and night. Encourage the children to draw a picture, or items, on the left that they would see during the daytime sun, birds, etc.  
**Opposite Textures Materials Needed:** One egg carton for each child, opposite texture items for each egg cup section such as cotton balls, sand paper, velvet, velcro, corduroy, felt, feathers, etc. Discuss the textures and the opposites--rough, smooth, soft, hard, etc. Perhaps add those small colored wooden cube blocks to your unit blocks for contrast in size this week! A 1 inch piece of rope or yarn and a 7 foot piece of rope or yarn. Show the children the small piece of yarn. Tell them it is an inch long. Ask them what kinds of things in our classroom are this small? Let them discuss and let them walk around the room to find some to measure against the yarn! Now show the 7 foot piece of yarn. Tell them it is 7 feet long. Again, ask if there are anythings in our classroom that are this long perhaps the tables? Tell them that some dinosaurs were even longer than this yarn!  
**Act out the Actions Materials:** Have cards with words and pictures for the children to act out, such as: A big square and a small square. Show the children the cards discuss them. Hand each child a card and have them find the friend who has the opposite of their card. You may need to do this one child at a time at first before having the entire group do this at once. It will give them more practice understanding each action. Write down actions on pieces of paper and place them in a box or decorative bag. Each child has a turn reaching in the bag to choose an action for the group to act out. Clap hands encourage them to clap fast then slow; with their hands high and then low Reach your arms-- up and then down, right and then left Jump--fast and slow; high and low Make up many of them.  
**Hot and Cold Materials needed:** Put velcro on the back. Give each child one card. Each child takes a turn placing their card on the correct side of the board. Place the board in your library area for the children to continue the sorting on their own or to make up their own stories using the pictures.  
**Cooking with children helps develop their math skills and helps them learn how to follow directions. It also allows for some great conversation! Ask many questions while cooking with your children to encourage conversation! Be sure to ask specific Space theme questions while making these fun snacks! Help them to identify sweet and sour. Add COLD whipped cream!**  
**Oatmeal Pancakes** Have the children help you to measure and mix the ingredients:

### 3: Paradoxing: Playing with Opposites

*A comparison of two antithetical or opposite thoughts can show a lot to the actor and audience alike. Two opposing ideas in a line can show a the scope of thought in a characters mind. Hamlet in the above quotation is contemplating two very serious ideas.*

Prev Next Life seems to be filled with a play of opposites. The patterns of life display a never-ending rhythmic dance of light and dark, peace and agitation, love and fear, coherence and chaos. We imagine that if we are disciplined enough or use all the best manifestation techniques, we can somehow get rid of the shadow side of the equation. You may be attached to holding onto the status quo in a family company that needs to go through drastic changes to keep up with the market. You feel caught between the opposing forces of tradition and the winds of change. A clash of right and left brain values keep things from moving forward in a progressive way. When most people experience the conflicts of this dynamic, they try to minimize the conflict by decreasing the polarity. We soften our grip on one end of our desire or need of the time, but in the process, often relinquish some deep longing, such as fulfilling our vision or purpose. Maybe there is another way. There can be great power in holding the dynamic tension of this play of opposites. Hold it long enough until it resolves in a new, third field of life, that somehow embraces both opposites. It is as old as the sun. All the great heroes who have gone before us have encountered the challenges of the play of opposites. Great epic myths take us into this sacred world of archetypal depth where all these values are magnified in the extreme. The Ramayana is a classic of world literature, and also one of the most well-known sacred stories of India and Southeast Asia. The Ramayana is the story of a divine being or avatar, who comes to earth as a man " Rama " to purify the world of the dark forces of ignorance. Along the way, Rama encounters an extraordinary play of opposing forces "seemingly excruciatingly irreconcilable opposites " until his ultimate victory. Cunningly, she now calls upon those boons "demanding that her own son be crowned and that Rama be exiled to the forest for fourteen years. In this situation, we feel the tremendous pull of emotion of the tug between heart and mind. How could Rama do this? Herein lies the secret of great epics such as the Ramayana. This story is so vast, profound, and multi-layered that it contains virtually every dynamic of relationships and their unfolding pull between heart and mind. As we follow its epic journey, we explore every swing of emotion " " from the depths of despair to supreme ecstasy and everything in between. Again and again we encounter its apparently irreconcilable values, and we shake until we must transcend to a deeper level of synthesis, which embraces the opposites in a new way. Our consciousness expands exponentially in the process. Evolution proceeds through this play of opposites. It is simply one value emerging. Then its opposite value appears "and then transcendence. This is the actual mechanics by which we grow in life. That is why the heroic quests such as the Ramayana are such profound teaching vehicles for life. By following this lila on the magnified, mythic level of Ramayana, we train our consciousness to embrace, rather than resist, this exquisite play within our own life. Remember to be steady in your Self the next time you are confronted by the challenging illusion of opposing forces. By embracing this, you can transcend into a deeper fullness that somehow encompasses both. Inside That we find the the real field of victory!

Create New Basic Trope: Alex Wiseman, consummate Mad Scientist, creates a female clone of himself named Alice to become his right-hand woman and future successor. Alex creates dozens of female clones of himself to work as his lab assistants and personal bodyguard squad. Alex was aiming to create a perfect duplicate of himself on the beginning. But the first clones based on male test subjects started to deteriorate really fast, both on health and intellect, rendering them useless for his purpose. Alex is female-to-male Transgender or even just a very convincing Crossdresser, and when he clones himself, that clone therefore reflects his genetics. Alex wants a counterpart, but he knows that two people looking exactly the same would be confusing. Alex first made a male clone of himself - Alan - that he raised as a son. Alice has the phenotype of a female, but no vagina nor identifies as female. But then her male genitalia dissolve and she becomes a girl again. Alice turns to be a diabeetus inducing Kawaiiko of epic proportions, for some reason. Alex creates an Opposite Sex Clone of himself named Alice, who eventually grows male genitalia and becomes a hermaphrodite, then loses her female organs and becomes a man, then regrows her female organs becoming a hermaphrodite again, then she loses her male organs and becomes a regular female again. Alternatively, Alice grows up, become a female mad scientist, and makes an Opposite Sex Clone of herself, which then does the same thing, and so on Fanservice to provide fetish material. Well, I guess this comes close enough. Alex is an insufferable narcissist who thinks the only person worthy of him would be his female mirror image. Then he comes up with the technology to create opposite sex duplicates, and he gets an idea Alice is very spiteful about Alex. Therefore, she goes around impersonating him, claiming that "he" was always transgender in order to confuse people and threaten ruining his reputation. Even after finding out about the disadvantages of the male clones when compared to the female ones, Alex decides to continue researching to create a perfect clone of himself; anything else would be unacceptable for him. So this is your duplicate. Do you think I could have one myself? Why would you want a female clone? Having some action with myself. Get out of my sight before I kill you! This whole deal with the opposite gender clones actually makes me wonder how would it be to have one myself. It would be freaky, but also kinda cool. But you already use dresses all the time! Despite being an almost perfect duplicate of Alex, Alice turns to be a rather different person when compared to the original. To avoid the previously described scenario, Alex transfers his personality and memories into Alice. However, even when fully aware of his decision and plans, the clone starts to develop serious psychological issues related to her new physiology. Despite the fact that it is impossible for Alice to become his mirror image, Alex remains firm on his decision to turn her into his successor, so he starts raising her as if she were his beloved daughter. After facing her existential crisis, Alice decides to move on and face her new life as woman with the best disposition. Alice, completely excited and wowed by her body, regularly behaves crudely such as examining herself and teasing men. Yet if she tries to keep this fact hidden, any guys she has sex with react horrified.
