

1: THEA Test Home Page

A Telluride Association Summer Program (TASP) is a free six-week educational experience for high school juniors that offers challenges and rewards rarely encountered in secondary school or even college.

What should I do? Find out what is available in your school or community to help you prepare for this test and others that you may be taking. You can learn how to improve test-taking skills or work with a teacher or tutor to learn good test-taking strategies. If your test results show you need to improve your reading, writing, or math skills, you can take courses, work with a tutor, or take other steps to improve your skills before you graduate. You must take the TASP Test, or an approved alternative test, before you can begin college courses at a public institution of higher education. What if I do not pass all sections of the test? Talk to your high school counselor or college admissions counselor about how to improve your skills by tutoring or taking certain classes. Ask your college or university admissions counselor for information about Quick TASP or approved alternative tests. Also, ask about the computer-administered test. Can I take the test more than once? Yes, but remember there is no reason to retake sections of the test you have already passed. The passing scores you receive on the TASP Test while in high school count toward meeting the TASP requirements for five years after you take the test if you do not enroll in college, or will count indefinitely if you enroll within a five-year period. What is required if I take college courses while I am in high school? You will be required to take the TASP Test or an approved alternative test before enrolling in dual-credit courses receiving credit for a high school class and a college course at the same time or enrolling concurrently receiving credit for a college course while you are enrolled in high school. You can only take college courses in the subject areas you passed on the test reading, writing, and math. You and your parents should receive your scores about two weeks after you take the test. When you register for the test, you can designate one or more colleges or universities to receive your scores; however, no one else will know your scores unless you decide they should. Can I take the test on a computer? Yes, at 12 sites across the state at colleges and universities. If you miss all of the regularly scheduled test dates, you may be able to take it at one of these sites. When you take the TASP Test by computer, you will receive unofficial test scores immediately that will allow you to enroll in college courses. The registration fee is more than the paper-and-pencil test fee, and seating is limited. Registration for the computer-administered test is by telephone only at: You may also take an alternative test on a computer. Ask your high school counselor about how to register for it, and ask about the fee.
