

## 1: Israel for Kids: Week 2

*Israel & the West Bank Travel Maps These free, printable travel maps of Israel & the West Bank are divided into seven regions: The Galilee and the Golan Heights.*

The distance from the city of Dan in the north to the city of Beersheba in the south is only about miles. That may sound big, but really the whole nation of Israel could fit in the United States over times! Something really cool about Israel is all of the different landscapes. Along the coast by the Mediterranean Sea, there are a lot of flat plains that were perfect for growing plants and food. In these areas you could find all kinds of things from flowers, to fruits like oranges, grapes and lemons, and grains to make yummy bread. When you travel further into Israel, you reach the Foothills and Hill Country. Foothills are small hills, but next to them in the Hill Country were big hills. Some of these hills are talked about in the Bible like Mount Gilboa where there was a big battle. That means this is the closest place to the center of the Earth that you can walk to on ground. In ancient times, this area was very tropical like Hawaii! It is good to know these things about Israel so we can have a better understanding of what it was like when the events in the Bible took place. Click here to listen if the above player does not work. God promised Abraham, the first Hebrew, that if he would leave his home in Ur the Chaldees a city near the Persian Gulf and travel to a land that he had never seen before, God would bless him and his descendants would outnumber the sand on the seashore and the stars in the sky. God promised that if anyone blessed Israel they would be blessed, and if anyone cursed Israel they would be cursed. But the greatest promise was that one of his descendants would be the Savior of the world who would bless all mankind. This all took place around BC, and the Israelites did not actually enter the land of Israel and take possession until around BC. When Moses looked over the land from the top of the mountain on the other side of the Jordan River he saw the beautiful land flowing with milk and honey. The Israelites were not fully aware of how strategic this little piece of land was. This little territory borders three continents, Asia, Africa, and Europe and is in the center of the ancient world. If one were to travel from any of the great empires they would pass through Israel. For example to travel from Egypt to Greece, or from Rome to Persia, one would have to pass through the land of Israel. God made the Jews His "chosen" people, who were chosen to bear his oracles prophecies and tell the whole world about God. They succeeded in accurately transcribing the prophecies and even numbering them to perfection, but they failed in the task of sharing their God with the rest of the world. Yet God was in control and sent the Messiah to complete the mission by raising up a church, a band of followers, who would take the message to the farthest parts of the world. It all started in the land of Israel. The Land of Israel. The land of Israel throughout history has been the area of land bordering the continents of Asia, Africa, and Europe. The land itself stretches from the city of Dan in the north to the city of Beersheba in the south, a distance of only about miles. From east to west it is only 28 miles from the Sea of Galilee to the Mediterranean Sea. The distance from the Sea of Galilee to the Dead Sea in the south is almost twice as far, about 54 miles. The Land of Israel is much smaller than most people realize. There were five natural divisions in the Land of Israel which run parallel to each other through the entire land from north to south. Also running perpendicular to these divisions was the Plain of Esdralon which runs from east to west. The Coastal Plain of Sharon. The Coastal or Maritime Plain was a very fertile region located along the western shores of the Mediterranean Sea. The thin strip of land was nearly 10 miles wide extending about miles from the Plain of Phoenicia in the north to the Plain of Philistia in the south. The Coastal Plain actually was divided into 3 main sections: Phoenicia to Mount Carmel in the north, Sharon in the middle, and Philistia in the south. Centuries of rain from the hill country brought extremely rich soil to the plain of Sharon and along with the warm weather it produced an abundance of flowers, grains and oranges, lemons, grapes, almonds, figs and, on the foothills, olives. Farmers produced lots of crops in the foothills including olives. The Hill Country, or mountain region were part of the mountains of Lebanon, and they were naturally divided into four regions: The Jordan Valley, which follows the Jordan River descending into a gorge which continues to descend into the deepest land trench, feet below sea level. The Eastern Mountain Range. The Eastern Mountain Range, situated east of the Jordan River were fertile mountains naturally divided into 3 sections: Bashan in the north,

Gilead in the middle, and Moab in the south. The Plain of Esdralon. All of the Plains, Hills, and Valleys go from north to south but the flat Plain of Esdralon actually goes from east to west. You can see this when you are standing on the top of Mount Carmel, and its a beautiful sight to see. It was also referred to as the Plain of Jezreel and in the midst of the plain is a hill called Megiddo. In history whoever controlled Megiddo controlled the plain, and also Israel. Most of the major battles were fought near this hill. The Hebrew word for hill is "har" and this hill on which Megiddo sat was called "Har-megiddo" or the Hill of Megiddo which translated into Greek is "Armageddon. Dear Jesus, we thank you for Israel, and for the promises that you made to the first Hebrew, Abraham. You told him that if he obeyed you that you would give his descendants a beautiful land flowing with milk and honey. You also promised that the Savior would come out of this land. We love your promises and we love you because you first loved us.

## 2: Printable Map Of israel Download | Printable Coloring Pages

*Printable maps of Israel. This collection of maps showing the country of Israel include a detailed map showing major cities as well as an outline map that can be printed for a geography lesson about this country located in the Middle East. This map of Israel was created by the United Nations.*

The value of a map gallery is not determined by the number of pictures, but by the possibility to see the world from many different perspectives. Technology We unlock the value hidden in the geographic data. Thanks to automating the complex process of turning data into map graphics, we are able to create maps in higher quality, faster and cheaper than was possible before. Forever free We created Maphill to make the web a more beautiful place. Without you having to pay for it. Maphill maps are and will always be available for free. Real Earth data Do you think the maps are too beautiful not to be painted? No, this is not art. All simple maps of Israel are created based on real Earth data. This is how the world looks like. Easy to use This map is available in a common image format. You can copy, print or embed the map very easily. Just like any other image. Different perspectives The value of Maphill lies in the possibility to look at the same area from several perspectives. Maphill presents the map of Israel in a wide variety of map types and styles. Vector quality We build each simple map individually with regard to the characteristics of the map area and the chosen graphic style. Maps are assembled and kept in a high resolution vector format throughout the entire process of their creation. Experience of discovering Maphill maps will never be as detailed as Google maps or as precise as designed by professional cartographers. Our goal is different. We want to redefine the experience of discovering the world through the maps. Fast anywhere Maps are served from a large number of servers spread all over the world. Globally distributed map delivery network ensures low latency and fast loading times, no matter where on Earth you happen to be. Spread the beauty Embed the above blank simple map of Israel into your website. Enrich your blog with quality map graphics. Make the web a more beautiful place. Get a free map for your website. Discover the beauty hidden in the maps. Brought to you by Maphill.

Latest up to date archeological information. Contact author with comments or questions High accuracy Bible maps and Chronological time lines: This collection of free Bible maps and chronologies are the most accurate in the world available today. Why pay big money for bad maps, when these maps are free! Even maps in Logos Bible software, for example are highly inaccurate and full of mistakes, errors and misplaced cities. Most important, the Bible is taken as the error free, inspired word of God. The maps and chronologies were created by taking the Bible as a true record of earth history. Many Bible maps are produced by PhD professors who do not believe the Bible is real history and reject the creation story, the flood, the tower of Babel, the Exodus, the Conquest. Further they reject inspiration of the Bible and view David and Solomon as mythical people who never lived. The atheism of these Bible map creators lurks in every city the place on their maps. Great care has been taken in utilizing satellite imagery to get a perfect, distortion free map of topography. Most commercially available maps today that you find in books and Bibles are highly distorted. Most other bible maps come from atlases which contain huge distortions because they present the entire earth on a flat, two-dimensional view. Our maps have a 5 km from the surface resolution and are almost perfect. Chronology is the science of historical dating. Great care has been taken into creating the most accurate Bible timelines available. Most commercially available Bible chronologies are widely inaccurate. Part of the reason is that the creators of the chronologies are atheists and do not view the stories in the Bible as ever actually happening. Consequently, these atheists will never get the correct dates for events they view as fiction. Knowing the precise GPS coordinates of a Bible city ensures it is marked exactly in the correct place on the map. The multitude of errors of city locations in commercial maps are compounded by the topographical distortions of the base maps. So not only is the base map distorted, a city is often placed tens of kilometres from its true location. With our correct base map, we can then locate a city exactly where really is on that map ensuring the highest level of precision. Steve Rudd the author of these maps and chronologies, is a Bible believing, weekly church attending, staff archeologist at Shiloh Israel. Most places on the map are marked with their Bible name AND the archeological site name. Archeology is a critical tool in creating Bible maps and chronologies. Before they begin to excavate a site, Archeologists make assumptions in advance which Bible city they are digging. Highly trained and experienced archeological specialists interpret and classify the pottery and objects unearthed. Findings lead to either rejecting or confirming the presupposed city location. We have used the latest most up to date archeological information in associating an archeological site name with its correct Bible name. Bible based Satellite imagery using GPS locating which are archeologically precise. We provide balanced and complete information, news and views to promote understanding and dialog. We cannot continue without your help! If peace in the Middle East is important to you, please help us by making a tax-deductible donation. During its long history, its area, population and ownership varied greatly. The present state of Israel formally occupies all the land from the Jordan river to the Mediterranean ocean, bounded by Egypt in the south, Lebanon in the north, and Jordan in the East. The remainder is divided between land occupied by Israel since the 6-day war and the autonomous regions under the control of the Palestinian autonomy. Prior to , the territory that is now called Palestine and Israel was ruled by the Ottoman Turkish Empire, and included three sanjaks districts. The name "Palestine," that was used by Roman and briefly by Arab rulers, was revived by the British, who received a mandate from the League of Nations to administer Palestine as a national home for the Jewish people. The Arabs objected to the creation of the Jewish state and fought a war against it. The Arab side lost the war, and the Palestinian state never really came into being. The territory allotted to the Palestinian state by the UN partition resolution was taken over by Israel and Jordan. About , Palestinians became refugees. Palestinians were hopeful that this process would end in a state for them. However, the peace process was marred by terrorist attacks, Israeli proliferation of settlements and negotiations that seemed to lead nowhere. Following breakdown of the final status negotiations in the summer of , riots erupted in September when Israeli right wing political leader Ariel Sharon paid a controversial visit to the temple mount, in the Al-Aqsa mosque compound, holy to Muslims.. Palestinians refused to accept the agreement offered by US President Clinton in December , and violence continued at least until the beginning of Israel has reoccupied large parts of the territory it had ceded to the Palestinians in the West Bank during the Oslo peace process, and continues to build settlements on Palestinian land click for map. Election of relatively moderate Mahmoud Abbas as Palestinian Authority President and the Israeli disengagement plan withdrawal from Gaza and some West Bank settlements offer new hope of peace. Israel has a population of over 6. Most the remainder are Jews. Life expectancy is over 75 years, and infant mortality about 7 per thousand, comparing favorably with Europe and North America. The Palestinian areas account for about 2, square miles of the total territory.
