Moon Crater Freeze dried ice cream flavored crystals that explode in your mouth. These carefully detailed sculptures are beautifully finished and then fired to create a durable keepsake. The gold panner stands about six inches tall and his pack mule stands about eight inches tall. The figurines are finished with a rich brown color giving them a wood tone. Made in the US. They are 3 inches in diameter and 3 inches tall. Looks just like an old prospectors gold poke. The candy coated gum is gold colored and looks like small gold nuggets. Each bag contains 2 ounces of gum. Just place a glass of water in front of him and watch while he continuously bobs his head into the water-drinking away. He keeps bobbing his head for days or until the water runs out. This thing works like magic and you cannot help but be fascinated by this clever novelty. A hundred and fifty years later, the era still captures the American imagination. This book is a must for those interested in the realities of Gold Rush life, shown in over period photographs. Mining stock certificates, currency and newspapers from the day are also shown, along with antique mining tools-all with current values provided for collectors. Includes pricing on old and new bottles. Michael Polak, pages, 6 x 9 inches with a soft cover. Identification and pice guide to Indian arrowheads. Thousands of new illustrations, some in full color. Includes information on finding, buying, trading and selling antique bottles. The only coin-price book with full-color photographs of actual coins. Everything you need to know to get started in the fascinating and profitable hobby of the world of coin collecting. How to get started. How to grade and price coins. How to ID counterfeit coins. Unusual coins tokens and medals. Includes a black light buyers guide with test reports. Includes a very good section on ultraviolet light basics. Paperback, pages and photos and illustrations. The colors are so pure and the glow is so seemingly unnatural. Hundreds of glowing minerals are shown, including Aragonite, Celestine, Feldspar, Microcline, Picropharmacolite, Quartz, Spinel, Smithsonite, plus many, more. Over beautiful color photographs illustrate how fluorescent minerals look under the UV light, and in daylight, making this an invaluable field guide. Included are values, a comprehensive resources section, plus helpful advise on caring for, collecting, and displaying minerals. Thirty categories, from advertising and assay equipment to surveying equipment and tokens, chronicle old mining methods in detail. An elevated appreciation is gained here of the men and women who spent part of their lives in mining with this equipment. Today, historians and collectors pay respect to those people as they preserve and interpret the equipment that remains. This is an important and valuable reference for all concerned. Includes a comprehensive grading guide, up to nine grades, with prices for over 45, coins. A bonus DVD version is included. Breathtakingly pure colors, with their ethereal glow, immediately capture your attention. To help the collector, over photos display the minerals both as they might be found in daylight and under the effects of ultraviolet light. Written for the collector and the merely curious, this pictorial reference will enrich your collecting experience with its informative text. It is an essential source for enjoying and identifying fluorescent minerals. Some respond to shortwave, some to longwave and some to both. Kit is 7 inches x 11 inches with 15 samples of minerals. The wave length is nm. When certain ordinary rocks are exposed to ultraviolet light, they actually emit visible light in brilliant colors! This kit contains a longwave ultraviolet light, a study guide, and 4 fluorescent mineral samples. These are all packed in an 8" x 12" x 2" wood case with two drawers. Includes the 65 page book "The Story of Fluorescence". The light source is an amazingly bright LED instead of a traditional fluorescent tube. This is a lot of focused LED UV light in a very small light weight package measuring only 4 inches long and weighing only a few ounces. The push button on-off switch is located at the end of the rugged black aluminum housing. A belt-carry case is included. Lenses are crystal clear light weight acrylic. Cap style magnifiers have a fixed standard three dimensional lens and a fold-in fold-out snap action secondary lens. Perfect for working with fine gold, jewelry, examining ore specimens or any close up work where hands free

magnification is required. Can be worn with or without glasses. The primary lens has a 1. The body is made of plastic with glass lenses. A little on the large size for a pocket magnifier but gives a large clear field of view at 10 power. Gives a wider and clearer field of view than smaller magnifiers with a smaller lens. Weighs about 7 ounces and uses 4 AAA batteries, which are not included. Also included is a handy protective plastic storage case and a small screwdriver to facilitate changing the batteries. The 3x and 4x lenses swing out of the protective plastic case individually, or if used together give 7x magnification. These are both contained in a chrome plated steel protective housing with glass lenses.
