Share via Email For the past six months, I have been trying to hold a conversation with Elizabeth Wurtzel. Each week, I have phoned both her land line and mobile, leaving messages intended to flatter her into returning my calls, but I have managed only one brief exchange: A call to a friend who works for a national book chain confirms its continuing sale: This may have more to do with film-business politics than Wurtzel herself, though one of her more notorious statements has played its part. In February, while promoting *More, Now, Again* via an interview with the *Toronto Globe and Mail*, she was asked about the events of 11 September, in the context of her residence close to the World Trade Centre. I thought, this is a really strange art project. It fell like water. People were going on about it. That part really annoyed me. Since then, noises have occasionally been made about a possible release - in spring of this year, for example - only for the wires to once again go quiet. Among those involved with the film, all this has led to an evident tetchiness. An email to one of the key players, tentatively asking if I might be allowed to see it, brought forth the following reply: The upshot, she seemed to argue, had been our own kind of arrested development. When she attempts suicide, her therapist tells her she has never lost a patient and is not about to start. For all that, *Prozac Nation* has rather dated. It now reads like a document of that all-too-brief era that stretched between the end of the Cold War and the toppling of the aforementioned twin towers, when history momentarily seemed suspended, and Anglo-American popular culture took on an inescapable sense of pained introspection. Wurtzel nailed the spirit of the age thus: Back in, he and Norwegian director Erik Skjoldbjærg, responsible for the original version of *Insomnia*, took on a script whose first draft had attracted the attention of Christina Ricci. Completed without the aid of a big movie company, the film was duly screened at the Toronto Film Festival. Miramax, for better or worse, sent in its acquisitions people and quickly forged a distribution deal. But Christina was on the covers of *Premiere* magazine and *Psychology Today*, they brought out a tie-in paperback that sold, and then Look at the book: So any failure to put it over will be looked at very carefully.
