

## PT. XIII: ADOLESCENT MEDICINE pdf

### 1: Nelson textbook of pediatrics | Search Results | IUCAT

*University of Kansas Medical Center Rainbow Boulevard Kansas City, KS | TDD.*

The patient portal provides families the ability to communicate with our office remotely, 24 hours a day. Some important tasks that families can now do: Provide them with your email address. They will activate the account and send you a temporary password. Please remember, each child needs their own account! For added convenience, have the Patient Portal in the palm of your hand, anywhere, anytime. Download the Healow app to your Smartphone from the App Store. While each child needs their own unique Patient portal account, the Healow app can merge all of the accounts into the one app. Sign up for the Patient Portal, conveniently find the link to the Portal through our website [www](http://www). Explore all of the features. Find Practice Details in the upper right hand corner. This information can also be obtained from our website [www](http://www). Please review the name of the medication and the strength prescribed. Send a secure message to make corrections if necessary. This is particularly helpful when patients are also being seen by specialists. Visit Summary is also helpful in tracking frequent illness such as recurrent ear infections or strep throats. Click onto Personal Information and Additional Information to update home address, email address and telephone numbers. Please always keep your demographics current and accurate. Click on Ask Doctor for secure messaging to the office staff or providers. This should be used for non-urgent messages only. The advantage is that non-urgent questions can be asked anytime of the day, not just during office hours. For specific prescription requests, please use Refill Requests; for insurance referrals to specific specialists, please use Referral Requests. With New Appointments, parents can make their own routine appointments. Under Reason, please use the format: Under Message, please indicate any special concerns or issues. Families find it most convenient to set up email rather than text or phone for communication preference. Under Medical History, parents can enter Family History details; Under Surgical and Allergies, parents can enter Surgeries, Hospitalizations and Allergies that might have occurred in the interval between Well Child Visits or as part of the first visit appointment.
