It does not necessarily have to be cold for someone to have a bath with hot water. Some people are just more comfortable or prefer hot water baths, despite the weather conditions. You need a water heater or a geyser. A water heater or a geyser is an essential item in an Indian household. This is especially true, considering the swaying weather conditions. Racold, a brand well-known for its water heating solutions, presents to you a wide range of water heaters and geysers. When you shop online for Racold water heaters, you might be overwhelmed by the number of options available. You could consider the following before buying a Racold water geyser: While buying a water heater you must consider the electricity it is going to consume. Having said that, the electricity consumption depends on a number of things, such as: Volume of Hot Water This is basically the capacity of the geyser. The more the hot water you and your family need, the more the electricity the geyser will consume. This is dependent on the water usage. So how do you judge the usage of hot water? Now, to ballpark the usage of water, you can consider this for an average adult. If you stay alone or you have a partner sharing the house with you, you can choose the Racold 6 L instant water geyser. For a family size of three, you can consider choosing the Racold 15 L storage water geyser. The Type of Water Heaters Storage Water Heaters This type of water heater can be considered as the most basic and classic water heater, that is used for domestic purposes. It can store the hot water for a small duration of time without consuming any electricity. Instant Water Heaters These are high-powered geysers that instantly heat up the water for your usage. This type is compact and ideal for small bathrooms where space is a limitation. Buy a Racold geyser online from popular shopping sites. You can choose a geyser and these sites list out the Racold geyser price for you. If it is in accordance with your budget, you can buy the geyser.
