My Perfect Little Secret On the first day of sophomore year, Lillian Grace Parker organizes handouts with sticky tabs, assigns different colored highlighters to each class, and loads the whole thing into a bubblegum-pink binder. As the number on the scale goes down, Lilly keeps changing her goal to a lower weight. Lilly thinks if she can just lose a few more pounds all her troubles will melt away. Will she continue to lie to everyone she loves to hide her little secret and maintain her distorted version of a perfect body or will she have the courage to fight for her life and see herself for more than the reflection in the mirror? This is a story for anyone who is or has been a teen. And anyone who eats food. In all the right places, this book does not mince words. It describes precisely the phenomenon of an altered body image. This book is an excellent point of departure for conversation between teenagers and their parents, as the author accurately points out that even the most astute parents can miss the warning signs of eating disorders. Coppage writes this cautionary tale from the empathetic perspective of someone who clearly understands kids today and remembers what it feels like to be in high school. I want to get the word out there that the novel exists and I want it to be available to all teenagers, whether it is at the bookstore or at their local library. If I am able to meet my kickstarter goal and exceed my initial goal, I will use any leftover money to purchase additional books, do more promoting of the book, and expand the sales into further venues. Rebecca Glenski Coppage struggled with an eating disorder from the time she was twelve until young adulthood. Now thriving and healthy, she is a pediatric intensive care nurse practitioner, a position in which she has experienced everything from being thrown up on to taking care of the sickest kids in the Midwest. Additionally, Rebecca has provided medical services on several mission trips to the Dominican Republic, where she helped operate on patients with birth defects as well as on burn victims. As a college student, she lived in Ecuador for a summer, finessing her Spanish. Other early experiences that shaped her perspective were training at the Olympic Training Center in Lake Placid for figure skating during high school, and training as a gymnast rigorously for eleven years. She also lived in a cabin with twelve year-old girls as a camp counselor, which provided further insight into the teenage psyche. Rebecca credits her husband and daughter with adding great joy to her life, and they eagerly await the arrival of the newest member of their family at the end of the year. Risks and challenges There are always risks and challenges to releasing a book independently. But, the book is already written and in the hands of my amazing editor. My team and I are very confident that we can pull this project off without any problems or delays. Should we experience any problems at all along the way, we will be sure to let all backers know immediately. Questions about this project?
