

## 1: Nursing NCLEX® Exam Practice Questions | NRSNG

*The Association of Rehabilitation Nurses believes that the role of the advanced practice rehabilitation nurse is a valuable asset within rehabilitation practice and is essential for the continued growth and expansion of rehabilitation nursing as a specialty.*

Read Rationales and the Re-Read One of the most important concepts of test prep is reading and analyzing the rationales. If you get a question wrong it can be easy just skip over it and move on, instead dive into the rationale and look over each element. There are only so many things that you will learn in your nursing education. As such, there are only so many questions that you can be asked. I mean how many ways can you be asked about the symptoms of hyperkalemia? Expose you to commonly asked questions and themes Make you familiar with the wording Help you identify strengths and weaknesses You should work to scale up the number of questions as your progress through your program. As a brand new student your focus should be learning HOW to be a nursing student schedule, time management, and critical thinking. At this point in your journey start by taking maybe 10 or so questions a day. Each semester increase the number by 10 questions so that by the end of your program you are up to 50 questions. Try to schedule the exam within 45 days of graduation while the information is fresh. If you use this method you will feel comfortable with the content that will be covered as well as feel confident in the TYPES of questions and wording. In fact, you never have to score perfectly. What really matters is that you are improving. The best way to guarantee improvement is repetition. The best way to achieve these feelings is to keep doing things that we already know we can do well. So how does this apply to nursing school? When you take a quiz over an area you are struggling with or not familiar with. Finding your weak areas is easy with NursingPracticeQuestions. With advanced statistics by category you know exactly where you need to focus. Get started with a free account, select the area you want to study, and start taking free questions now! Sample List of Practice Questions Inside:
