Packed with real-life examples of retired men seeking to jump-start their lives, this six-step solution offers a great array of advice.*

Danco As a successful business owner do you have a finish line? An irrevocable retirement clause? Retirement is usually an unpleasant subject. While at his peak he should determine the date on which he will confer authority and get out. I come into the office a little later. I look around a bit, but the kids are really doing a wonderful job. I take a lunch hour and I play a little golf. We head to We head to Arizona in the winter for several months. Nothing quits at the peak. Everything has a period of perfection. And everyone has their peak. How good will she be at 35? It was only in the days when you got shot in the saddle by an errant knight in armor, or the life expectancy was 35 that people died at the height of anything. Now, with life expectancies of 70 - 80 years, we are likely going to last past our peak. Retirement is only considered unpleasant if we lack purpose. If you expand your world there are an infinite number of things that are fascinating. The expansion of our world is truly the work of retirement. This is the renaissance of man. I invite you to share it. It is a time of mentoring people and giving back. I would like to remind us that no matter what we do, we cannot insulate our lives from those who will follow us. The world will be better off when you have explained what you know to those who must follow. Your final glory is in the achievement of your students. They need and want you. The future will thank you and remember you. Currently, Jim specializes in putting Financial Education programs into the workplace.

2: Renaissance - 3 Reviews - Olmsted Falls Senior Living

Retirement is usually an unpleasant subject. It's often not something founders of successful businesses discuss because it's most often equated with castration or death.

By Kevin Do you dread going into work in the mornings? By following the practical advice in this book, you can restructure your life and get out of the rat race at an age you never would have thought possible. The Rat Race How do we get into the rat race in the first place? Well, there are a few causes: Once upon a time, a high school diploma was more respectable than it is today. This drive toward higher education eats up many years that could have been used generating wealth, and also leaves many students graduating with a heavy debt burden. Is all of this education really necessary? The price of education is increasing, whereas the quality is not necessarily following in step. I do believe that higher education can make sense if you can use it to your advantage, and while college was a mixed experience for me, I did enjoy university. A mis-placed education is not the only way to shave years off your life and add up debt: Go get a loan for it. Go get a mortgage. Want to furnish the new home? Put it on the credit card. All of this consumption must come at the cost of future income, and the requirement to spend the best hours of the day working at an office in order to pay these obligations effectively turns a person into a wage slave; unless they want to go bankrupt and lose everything, they must continue to earn income. They have no financial freedom. A side effect of this credit is that in our current monetary system, credit is not always backed by real savings. This leads to overheating which can drive up the prices of assets, such as homes. This price inflation punishes everyone except the first receivers of the new money who were able to buy in before prices were driven up. Everyone else must either borrow even more money, or go without a home for that much longer, until they can purchase in cash. Such inflation on the back of credit expansion can eventually lead to disastrous consequences, especially for those who end up in the most debt and are left holding the bag. With all of the debt incurred to get an education, a home, transportation, etc. a person can become very dependent on their job and the income attached to that job. Without sufficient assets to cover the basics of life without having to work for it, this person is stuck in the rat race. What are the biggest expenses for most people? These are thus the areas that will have the biggest impact on your success, or lack thereof, of getting out of the rat race. The development itself is surrounded by forests and farms, and the only way in and out is via a high-speed divided highway. The houses actually looked fairly nice, and each one was distinct from the one next to it. I was surprised, since most of these sort of developments are usually very cookie-cutter. Each home was also fairly large, at about an estimated sq. Although the homes were large and looked nice, the cars were all standard recent-model econoboxes. Nice houses or not, if you want to get out of the rat race someday, this is precisely the kind of development you do not want to live in. Two cars would be required for a couple living out there. So, what is one to do? Some of the topics that Jacob explores: Lowering the thermostat in the winter and raising it in the summer. Living somewhere where a car is not required, so that a family can downscale to 1 car or even no car at all. Rediscovering the lost art of walking. Recovering minutes of your life that were used being stuck in traffic and used to earn money to pay for your car, and using them to build up your health and peace of mind instead. Becoming a Renaissance man What does becoming a Renaissance man mean? Think of a man like Leonardo da Vinci. Not only is the man famous for his inventions and scientific studies, but he is also one of the most famous painters of his time. His talents and interests were broad and deep, and there was no shortage of things to work on and explore. Contrast that to the path that many people choose today. They become highly specialized in one particular area, but when it comes to the simplest house repair, an expensive contractor visit is required. Since this high degree of specialization is draining and can leave little time for other pursuits, the only alternative is to fill the void by spending money on entertainment, fashion, and rushed vacations to expensive resorts. Jacob makes the case that while this high degree of specialization is beneficial in some ways it can lead to a high income, for one, it leaves one highly dependent on their narrow set of skills, and leads to fulfillment in other areas being sought with dollars, rather than life experiences. Such a person will be much more equipped to handle disruptive changes, and will also have many more outlets for creative

expression and joy. It could also help you to find more joy in your own life. Areas that might be a little too extreme Although job outsourcing is a valid concern in the modern-day economy, I believe that Jacob may be overstating the degree to which people are specialized. Because the methodologies remain similar; software development is about solving problems. If I need to instruct the computer to display a dialog to the user and then use that result to fetch something from a database, chances are I can figure out how to do it, if the language allows it. I believe the same is true of those who work in the finance and business professions. It may be that one day that AIs will be smart enough to obsolete all of us, but that is another problem. As Jacob alludes to in his book many times, quality is very important, and paying a bit more for quality can lead to spending less overall. There is also a difference to me between being frugal and being too cheap. That line is crossed when the additional dollars saved do not compensate for the loss of well-being or enjoyment. I know I could save a few bucks by switching to fluorescent lighting, but the few dollars I would save would not make up for the negative health effects of fluorescent lighting nor the loss of enjoyment I get from a well-lit place. I have another friend whose house is so cold that I need to wear my jacket indoors. The path to early retirement I personally enjoyed reading this book, and it opened my eyes to many changes I can make in my own life. Public transportation is another big expense, and one thing I might try in the nicer months of the year is to bike to work. If I can get there in a similar time by bike, that could be a great way to get into shape and save money at the same time! It is actually an entire philosophy that looks at taking a more hands-on approach to life, and finding satisfaction and joy through experiences, rather than material consumption. If you would like to read more, you can purchase the book from Amazon. Jacob also writes at [earlyretirementextreme](#). So, reader, what do you think about early retirement, extreme style? Tell me about your dreams. I will be choosing a winner amongst the commentators by the end of next week, and the winner will receive a complimentary copy of Early Retirement Extreme! He enjoys exploring unvisited places around the world and gaining new experiences. He believes that by properly managing our energy and time, we can learn to invest our lives wisely.

3: Assisted Living & Retirement Community in Austin, TX | Renaissance-Austin
