

Responses / P. Jones, R. Melick Problem areas related to biblical inerrancy / J. Packer Implications of biblical inerrancy for the Christian mission / M. Erickson.

EOL will initially be funded by the Alfred P. Sloan Foundation and the John D. Over the next 10 years, the EOL will create internet pages for all 1. It will expedite the classification of the millions of species yet to be discovered and catalogued as well. Eastern Tropical Pacific Shore Fishes. Panama was selected for the workshop for having the richest biodiversity in coastal fishes in the region of the Tropical Eastern Pacific, and home to many endemic species in the Gulf of Panama and the Gulf of Chiriqui. According to the scientists, Panama is privileged for its rich diversity. This assessment was the first global review of the conservation status of every marine vertebrate species, and of selected invertebrates and plants, to analyze its populations and design strategies for long term conservation. The project involves a range of partners in compiling and analyzing all existing data on approximately 20, marine species, and will determine the risk of extinction according to the IUCN Red List Categories and Criteria. The Red List is set upon precise criteria to evaluate the extinction risk of thousands of species and subspecies. These criteria are relevant to all species and all regions of the world. The aim is to convey the urgency of conservation issues to the public and policy makers, as well as help the international community to try to reduce species extinction. Spatial and temporal effects of pre-seeding plates with invasive ascidians: Conservation awareness and research to protect rare plants. Understanding biological conservation strategies: Local replenishment of coral reef fish populations in a marine reserve. Effects of small-scale disturbance on invasion success in marine communities. Patch size and isolation effects on epiphytic and epiphyllous bryophytes in the fragmented Brazilian Atlantic forest. Habitat deterioration affects body condition of lizards: The impact of forest spread on a marginal population of a protected peony *Paeonia officinalis* L. Area-based refinement for selection of reserve sites with the benefit-function approach. Is declining *Campanula glomerata* threatened by genetic factors? Relationship between spatial distribution of urban sprawl and species imperilment: Detecting introgressive hybridisation in rock partridge populations *Alectoris graeca* in Greece through Bayesian admixture analyses of multilocus genotypes. Conservation status of *Prodontria* Coleoptera: Scarabaeidae species in New Zealand. Habitat type influences fire resilience of ant assemblages in the semi-arid tropics of Northern Australia. Genetic tracking of the brown bear in northern Pakistan and implications for conservation. Bats in a fragmented landscape: Cryptic species as a window on diversity and conservation. The non-native solitary ascidian *Ciona intestinalis* L. The American mink in Europe: Density and population size of mammals introduced on a land-bridge island in southeastern Brazil. Buccal swabs allow efficient and reliable microsatellite genotyping in amphibians. Applicability of research findings to conservation policy. The colonial ascidian *Didemnum* sp. A test for a cost of opportunism in invasive species in the Commelinaceae. Influence of diversity and road access on palm extraction at landscape scale in SE Ecuador. Effects of prescribed fire and fire surrogates on floral visiting insects of the blue ridge province in North Carolina. Benthic foraminifera associated with the invasive ascidian, *Didemnum* sp. Modelling the distribution of stygobionts in the Jura Mountains eastern France. Implications for the protection of ground waters. Biogeography and hotspots of amphibian species of China: Endemic land snail fauna Mollusca on a remote Peninsula in the Ogasawara Archipelago, northwestern Pacific. Extremely low levels of allozyme variation in southern Korean populations of the two rare and endangered lithophytic or epiphytic *Bulbophyllum drymoglossum* and *Sarcanthus scolopendrifolius* Orchidaceae: Western Ukrainian *Cochlearia* Brassicaceae - the identity of an isolated edge population. Increased isolation of two biosphere reserves and surrounding protected areas WAP ecological complex, West Africa. Distribution, abundance, and conservation of vinaceous amazons *Amazona vinacea* in Argentina and Paraguay. Genetic diversity of captive binturongs *Arctictis binturong*, Viverridae, Carnivora: Development and application of tools for incursion response: Hybridization and phylogeography of the Mozambique tilapia *Oreochromis mossambicus* in southern Africa evidenced by mitochondrial and microsatellite DNA genotyping. Endemic freshwater finfish of Asia: Variation in the establishment of a non-native annual grass

influences competitive interactions with Mojave Desert perennials. Population structure and genetic diversity of trout *Oncorhynchus mykiss* above and below natural and man-made barriers in the Russian River, California. Conservation and sustainable use of living natural resources. Molecular evidence for hybridisation between the two living species of South American ratites: Distribution and long-term temporal patterns of four invasive colonial ascidians in the Gulf of Maine. The role of colonial ascidians in altering biodiversity in marine fouling communities. Genetic consequences of habitat fragmentation and loss: Invasion by *Aegilops triuncialis* barb goatgrass slows carbon and nutrient cycling in a serpentine grassland. Food web structure provides biotic resistance against plankton invasion attempts. Hay strewing, brush harvesting of seed and soil disturbance as tools for the enhancement of botanical diversity in grasslands. Population genetics of the freshwater mussel, *Amblema plicata* Say Bivalvia: Feral swine management for conservation of an imperiled wetland habitat: How many species of gall-inducing insects are there on earth, and where are they? Obligate groundwater fauna of France: Effects of restoration management on the estuarine isopod *Cyathura carinata*: Risk assessment of riparian plant invasions into protected areas. Factors and scales potentially important for saproxylic beetles in temperate mixed oak forest. Elevational gradients of diversity for lizards and snakes in the Hengduan Mountains, China. The cost of postponing biodiversity conservation in Mexico. Wide ecological amplitude of a diversity-reducing invasive grass. Scale-dependent effects of habitat fragmentation on hawthorn pollination, frugivory, and seed predation. Three decades of deforestation in southwest Sumatra: Notes on the habitat and adult behaviour of three red-listed *Colophon* spp. Phenotypic plasticity rather than locally adapted ecotypes allows the invasive alligator weed to colonize a wide range of habitats. Recent population expansions of non-native ascidians in The Netherlands. Floodplain lake fish assemblages in the Amazon River: Montane refugia for endemic and Red Listed dragonflies in the Cape Floristic Region biodiversity hotspot. The representation and functional composition of carabid and staphylinid beetles in different field boundary types at a farm-scale. How much do site age, habitat structure and spatial isolation influence the restoration of rainforest beetle species assemblages? Quantifying off-highway vehicle impacts on density and survival of a threatened dune-endemic plant. Resource availability, matrix quality, microclimate, and spatial pattern as predictors of patch use by the Karner blue butterfly. Potential of marine reserves to cause community-wide changes beyond their boundaries. Tropical forests and climate policy. Giant panda numbers are surging - or are they? The invasion of barred owls and its potential effect on the spotted owl: The decline of native coccinellids Coleoptera: Coccinellidae in the United States and Canada. Impacts of urbanization on Florida Key deer behavior and population dynamics. Reintroduction and genetic structure: Rocky Mountain elk in Yellowstone and the western states. Urgent need for empirical research into whaling and whale watching. Assessing habitat and resource availability for an endangered desert bird species in eastern Morocco: Breeding distributions of north American bird species moving north as a result of climate change. America at the energy crossroads. Genetic diversity within and between remnant populations of the endangered calcareous grassland plant *Globularia bisnagarica* L. Indirect food web effects of *Bythotrephes* invasion: Phylogenetic relationships of ocelot *Leopardus pardalis albescens* populations from the Tamaulipan biotic province and implications for recovery.

The Conference on Biblical Inerrancy, under the sponsorship of the six Southern Baptist seminaries, met May , Scholars, pastors, and interested laypersons gathered to study and discuss inerrancy.

United States District Court, D. South Dakota, Southern Division. Fishman , Phillip Fishman Law Office. Tom Melick, Defendant, represented by Reece M. Both of these motions are unopposed by defendants. The district court, the Honorable Lawrence L. Piersol, referred these two motions to this magistrate judge for determination. Plaintiff does not explain who Metro Communications is. The court has no independent knowledge of what kind of an organization Metro is. Metro Communications is not a named party to this lawsuit, being listed as neither a plaintiff nor a defendant. There are two basic vehicles for obtaining documents in discovery which the Federal Rules of Civil Procedure describe. If the documents are in the possession or control of a "party" to the lawsuit, one serves that party with a request for the production of documents. Even if plaintiff had served a defendant with a Rule 34 discovery request, a motion to compel compliance with that request would be premature prior to a good faith effort on the part of the moving party to try to resolve the discovery dispute. Accordingly, the current motion is not proper as an effort to enforce a Rule 34 request. Alternatively, if Metro Communications is an agency which exists independent of any of the named defendants and is therefore a "nonparty," the Federal Rules of Civil Procedure direct that plaintiff serve Metro with a subpoena duces tecum. Serving a nonparty with a subpoena under Rule 45 entails certain safeguards to protect the nonparty from unreasonable requests and efforts. If Metro does not agree with the subpoena, it can move to quash the subpoena. Plaintiff does not recite in either of the two pending motions that plaintiff has served Metro with a subpoena for the documents requested. The two pending motions cannot be granted. If Metro is within the control of the City of Sioux Falls, the motions are inappropriate because they were not preceded by serving the city with a request for the production of documents and a good faith effort to resolve any disputes over the discovery. If Metro is an independent nonparty, this court has no personal jurisdiction over Metro and no authority to simply order Metro to produce documents.
