Background[ edit ] These claims have been made by the historian William Estabrook Chancellor , amateur historian J. Rogers , ophthalmologist Dr. Leroy William Vaughn, [1] and Dr. All but Chancellor base their theories chiefly on the work of J. Rogers, who apparently self-published a pamphlet in claiming that five presidents of the United States, widely accepted as white, also had African ancestry. Slavery in the United States Citizenship and associated claims have split on two dimensions: Later this was changed so that a person had to have at least seven-eighths European ancestry to be legally white. Social acceptance by the majority-white community was often the key as to whether a person was considered white, more than details about ancestry, especially in early periods on the frontier when few records were kept and people often did not know much about their origins. This law hardened slavery as a racial caste system. But, it was not until after the end of slavery and regaining of power by conservative whites in the late 19th-century South that they passed laws to create racial segregation and Jim Crow. From to , southern states of the former Confederacy passed constitutional amendments and legislation making voter registration more difficult, essentially disfranchising most blacks and tens of thousands of poor whites. In the early 20th century, southern states tried to find more ways to enforce segregation. Beginning with Tennessee in , through Oklahoma in , most southern states adopted the one-drop rule , and hardened racial lines so that a person of any African ancestry was to be recorded as and considered as black in the binary society. During the same period, Florida , Indiana , Kentucky , Maryland , Missouri , Nebraska , North Dakota , and Utah retained their old "blood fraction" statutes de jure , but amended these fractions one-sixteenth, one-thirty-second to be equivalent to one-drop de facto. They have noted that numerous mixed-race families of varying proportions of European and African ancestry developed in colonial and antebellum United States. In award-winning research, Paul Heinegg traced the ancestry of free black families in North Carolina in the census, finding that most were descended from free people of color in colonial Virginia who migrated to other areas. They were mostly descendants of unions between white women, indentured servant or free, and African men, slave, indentured or free, from years when associations among the working class were fluid. Joshua Rothman looked closely at antebellum Virginia and numerous mixed-race families in *Notorious in the Neighborhood: Sex and Families across the Color Line in Virginia*, â€” In her deep research, however, she did not support claims that Jefferson was of mixed-race descent. The Thomas Jefferson Foundation agrees that the weight of historical evidence supports this conclusion. Punch lived in the Colony of Virginia during the seventeenth century. Mainline historians do not support these claims. In her recent analyses of historical evidence about the Hemings and Jeffersons, for example, the scholar Annette Gordon-Reed makes no claim of African descent in the Randolph family. Hazard interviewed Paris Gardiner, who said he was present during the presidential campaign, when one speaker states that Thomas Jefferson was a mean-spirited son of a half-breed Indian squaw and a Virginia mulatto father. That is the extent of his evidence. The Johnny Cake Papers were a collection of folk tales published in , not , and only one tale commented on Jefferson. To date we have not found this quotation in any sources contemporary to the election of First published in , the stories told date in many cases back to the beginning of the 19th century, while others are thought to be even older. The reference in question appears in the "Seventeenth Baking," in which a "most veracious stump orator from Providence" spoke expansively on the achievements of [president] John Adams, " Brands are agreed he had no black ancestors. Mail received by Lincoln called him "a negro" [41] and a "mulatto". Herndon , Lincoln had "very dark skin" [44] although "his cheeks were leathery and saffron-colored" [45] and "his face was The Charleston Mercury described him as being "of Harding[ edit ] Warren G. Harding was said to have African ancestry; one claim was by his political

opponent, a controversial and racist historian, William Estabrook Chancellor. He said he did not know and demonstrated that it was not a significant issue. Faulkner on the subject, which he perhaps meant to be dismissive: One of my ancestors may have jumped the fence. He did not note that another meaning of her surname is the landscape feature of moor or bog. Eisenhower[ edit ] Dwight D. Some of his immigrant ancestors settled in Pennsylvania in and after, migrated west to Kansas. Roosevelt had an ancestor born in North Africa. His ancestor Henry Smith was born to English parents Col. William Smith has been used by his descendants to distinguish themselves from other Smith through use of the compound surname Tangiers Smith ever since.
