

1: "Run for the River" Triathlon " Coal River Group

The Run for the River 4 Mile Trail Run/Walk has the same focus as all of our races: good, friendly, and fun competition, but this one is also geared to those of you who would like to enjoy a walk on 4 miles of trail along the beautiful Rappahannock River and the historic Fredericksburg Canal.

Concept[edit] Run-of-the-river or ROR hydroelectricity is considered ideal for streams or rivers that can sustain a minimum flow or those regulated by a lake or reservoir upstream. Traditional hydro dams store enormous quantities of water in reservoirs , sometimes flooding large tracts of land. In contrast, run-of-river projects do not have the disadvantages associated with reservoirs , which is why they have less environmental impact. Some may consider a project ROR if power is produced with no water storage while limited storage is considered ROR by others. Developers may mislabel a project ROR to soothe public perception about its environmental or social effects. The Bureau of Indian Standards describes run-of-the-river hydroelectricity as: In such stations, the normal course of the river is not materially altered. An example would be the 1, MW La Grande-1 generating station. Previous upstream dams and reservoirs are part of the s James Bay Project. Advantages[edit] When developed with care to footprint size and location, ROR hydro projects can create sustainable energy minimizing impacts to the surrounding environment and nearby communities. Cleaner power, fewer greenhouse gases[edit] Like all hydro-electric power, run-of-the-river hydro harnesses the natural potential energy of water, eliminating the need to burn coal or natural gas to generate the electricity needed by consumers and industry. Moreover, run-of-the-river hydro-electric plants do not have reservoirs thus eliminating the methane and carbon dioxide emissions caused by the decomposition of organic matter in the reservoir of a conventional hydro-electric dam. As a result, people remain living at or near the river and existing habitats are not flooded. Any pre-existing pattern of flooding will continue unaltered, presenting a flood risk to the facility and downstream areas. It thus generates much more power during times when seasonal river flows are high i. Availability of sites[edit] Rapids can provide enough hydraulic head The potential power at a site is a result of the head and flow of water. By damming a river, the head is available to generate power at the face of the dam. Where a dam may create a reservoir hundreds of kilometres long, in run of the river the head is usually delivered by a canal, pipe or tunnel constructed upstream of the power house. Due to the cost of upstream construction, a steep drop is desirable, such as falls or rapids. Environmental impacts[edit] Small, well-sited ROR projects can be developed with minimal environmental impacts. In the case of fish-bearing rivers a ladder may be required and dissolved gases downstream may affect fish. In British Columbia the mountainous terrain and wealth of big rivers have made it a global testing ground for Mw run-of-river technology. As of March , there were applications pending for new water licences solely for the purposes of power generation " representing more than potential points of river diversion.

2: 17th Annual Run the River 5K/10K - Roswell, GA | ACTIVE

Run for the River is part of the annual Kenai River Festival, a free family event geared towards fun and inspiration. The proceeds from the race help support the Festival and the eonmental programs of the Kenai Watershed Forum.

3: Run for the River 5K/10K Registration Page

The River. The St. Lawrence River is one of the largest Rivers in the world and a magnificent place to live, work and play. Save The River has been working for more than 35 years to protect the River for current and future generations.

4: Run for the Riverfront - 5k 10k in North Aurora Illinois, Aug 4

The Run for the River 5K is a unique race to benefit the Bitter Root Water Forum, a community driven non-profit organization dedicated to supporting the traditions of agriculture, community and recreation by protecting, enhancing

and restoring the Bitterroot Watershed through on the ground restoration projects and watershed education.

5: Run for the River 5K Registration Page

About The Event. Choate Construction Run the River 5K & 10K Run, 5K Walk, 1M Fun Run. Enjoy a scenic run/walk along the Chattahoochee River as you join your fellow runners & walkers in the Choate Construction Run the River 5K & 10K Run, 5K Walk, 1M Fun Run benefiting HomeStretch.

6: Choate Construction Run the River - HomeStretch

Run the River is a community event sponsored by Ryan's Pharmacy and Liv9 Nutrition in support of the Nackawic Bend Ski Club's SKIS IN SCHOOLS initiative. Race central is held at the Nackawic Shopping Mall, overlooking the majestic Saint John River and the World's Largest Axe.

7: Run for the River - Fredericksburg, VA | ACTIVE

Save The River Blog! Save The River is a non-profit, member-based environmental organization whose mission is to preserve and protect the ecological integrity of the Upper St. Lawrence River through advocacy, education and research.

8: "Tales of Wells Fargo" Run for the River (TV Episode) - IMDb

Enjoy a scenic run/walk along the Chattahoochee River as you join your fellow runners & walkers in the 17th Annual Choate Construction Run the River 5K/10K. Proceeds will be used to continue HomeStretch's mission of providing housing, hope, and life skills to homeless families. This fast, flat.

9: Laughlin River Run® - Home Page

Jim Hardie is escorting prisoner Ira Kyle to Santa Fe for trial when they stop in Red Bluff overnight. Jim quickly learns Ira is hated in Red Bluff when the marshal attacks Ira. However, Pop Kyle says Ira didn't commit the murder they say.
