Materials science has provoked and contributed to the emergence of various nanomaterials, biomaterials, electronic, optical, magnetic materials, piezoelectric materials, ceramics, glasses, polymers, metal alloys, smart materials, semiconductor materials and design of complicated structures through the innovation of technology by the advancements in the study of materials science. Materials Science conferences all over the world have been organized with the charismatic enthusiasm and the outcome of such scientific event has put forward the novelties and in the engineering sciences and influenced various universities for the adaption of various specialized courses that motivated students, faculty and other academicians to organize academic conferences. Testimonials I was very impressed by the international scope of participants at the Chicago meeting and the quality of work presented. It speaks very highly of the organizers of this meeting as it is no small task to get medical researchers from around the world to gather at a single site for an exchange of ideas. The accommodations were wonderful and the noontime luncheons delicious. Congratulations on an exceptional conference. The attendance exceeded the expectation. Session went on time permitting ample time for questions and answers. Doctors from all across the World attending Endocrinology has made this conference a successful event. Everything was very well organized, and very important, members of the Conference Series were always present for support and help. I greatly appreciated this. Thank you very much again. It was my great pleasure to attend Endocrinology My husband and I really enjoyed the scientific programme, the positive international atmosphere and the welcoming spirit. We will recommend your coming conferences to our colleagues. Best wishes and good luck with future work. Ylva Vladic Stjernholm Karolinska University Hospital, Sweden The Conference Series llc LTD meeting "Translational Medicine " has been a very great meeting providing a comprehensive view on ongoing international clinical developments and gave me the option to make a lot of novel contacts to start collaborative research with people from all over the world. Discussion directly with almost all peoples in a familial atmosphere is very fruitful as well as the venue, time frame and organization has been very convenient Andreas Weinhaeusel AIT Austrian Institute of Technology, Austria This Conference was one of the best and even brilliant I have ever attended. There was very nice to have a mix between theory, basic science, sharing best practices and practical recommendations. The quality of the panels was outstanding, and I think you arranged a great cross-section of topics! I will help recruit speakers to the next meeting as an organizer member of the conference committee Shabaan Abdallah University of Cincinnati, USA It was a great pleasure for me to attend the conference. It was perfectly organized, I met many nice people and listen to many valuable talks. Elzbieta Jarzebowska Warsaw University of Technology, Poland Thanks for your kindly help and service during the conference. The conference was very interesting and also very useful for my academic research. So I will attend the Biostatistics next year if I have time. It was just excellent in all aspects. Annette Bentley President, American Celiac Society, USA Thank you for your email and for your well done job in organizing the Food Technology , All subjects in this conference was in depth knowledge from your good selections of international speakers and I expect conference will be in the same level of performers. I had a great time and thought the program was really nicely put together Trine N Jorgensen Cleveland Clinic Foundation, USA The recent Stem Cell Congress in Chicago, from the scientific standpoint, the highest quality and most useful of the three ConferenceSeries-sponsored conferences that I have attended. The presentations I heard were uniformly good. I would seriously consider participating in the Sept. My wife and me keep Endocrinology firmly in our hearts.
