

1: SAP Library - Implementation Guide for R/3 Customizing (IMG)

SAP Materials Management MM is a part of Logistics area and helps to manage the procurement activity of an organization from procurement. It supports all aspects of material management planning, control etc.

By using the XK01 transaction code the user can successfully link the document with the vendor master record or by utilizing the following menu path: Lister below the following special procurement types available in the SAP System: The user must make the payments to the vendor, only when goods are withdrawn from his store. Please follow the steps below: Go to mm02 t. User can Search it via Company code and Valuation area. Data archiving removes mass data which is no longer required by the system but that still should be available for reporting from the database. The stock population is known as the total of all stock management units which are encompassed in an inventory sampling. All these stock management units are exclusively defined through the allocation of the stock management levels to a given inventory sampling. As a result of this, the stock population is also defined when the user allocates the level of the stock management. The user can try to create a new movement type with reference to movement type. The user can modify the description in the In the user field by customizing SPRO and appended a search help to it. If the user modifies the material type in MMAM transaction, then automatically the valuation class will be altered in the material master. The system will accept the changed material type valuation class which was initially created for that material type. Subcontracting is defined as one of the procurement processes available in MM. In this process, the components are shared with the vendor for getting the final product. The material which must be produced by the vendor can be ordered as a subcontract item in a purchase requisition, purchase order, or scheduling agreement. Each of the subcontract item has one or more sub-items which contains the individual components the vendor is required to perform the subcontract work or value-added service. We recommend you to get an updated invoice in which the cost of Nut Bolt and Gasket etc. Thereby, you can either alter the PO price as per that price or make the invoice accordingly. Assume we are creating movement type Goods issue for a network Please follow the steps below: RTP Returnable Transport Packaging is referred to a multi-trip packaging medium for instance, containers or pallets through which the goods can be transported multiple times between customers and vendors. Returnable transport packaging from a vendor which is stored at a place on your premises is treated as a special stock and is clearly assigned as a belonging to the vendor. A quantity of returnable transport packaging can be entered at goods receipt for a purchase order, as listed below: On the initial screen please enters the movement type and also the order number or the selection criteria for the purchase order. Now please select and copy the required items. A popup window will appear, Please enter the movement type and the special stock indicator e. Now please enters the returnable transport packaging items. At last, post the goods movement. A transfer posting of RTP stock between two storage locations is entered as listed below: Now enter data to the initial screen: Now give the plant and the issuing storage location. Give vendor and the receiving storage location on the next screen. Please enter all the items. A goods receipt was posted for a purchase order. You then want to make other changes in the purchase order. What may be changed? If follow-on documents already exist for a purchase order, changing The purchase requisition is not m Implement and the related s that it contains, unless - depending on your Support Package level - they have already bee How can I extend all material to a new plant? How can we delete materials permanently from Material mast How can we track requisitions that have the deletion indicator set? Can we track the date in which the deletion indicator was set? How is the tax code determined in purchase orders? In the standard system, the system considers the following sources for the tax code in this sequence: BAPIs for goods movementsQ1: You can refer the change document tables cdpos and cdhdr. In which business transactions can serial numbers be included? What should be done when differences exist between the existing serial nu

Modules are usually abbreviated for the business process they represent. All together there are some nineteen core modules. These modules are highly integrated in real-time, which means, that if information is shared between modules then the data is entered only once. This reduces the chances of error arising from repetitive entry and also reduces the man-hours. Managers and decision makers always have information at their fingertips and this helps them in effective decision making. SAP has been around for nearly four decades. There are well over 10 million SAP users worldwide and jobs keep popping up all around the world. SAP is usually implemented in phases. The first phase is when organizational structure and accounting components are configured, tested and then taken live. Gradually more modules are turned on. MM Course The purpose of this book is to learn step-by-step general configuration methods for the MM module which has always been the backbone of Logistics. The course is built on menu path navigation of the Implementation Guide IMG and the application area. The training course combines classroom theory of SAP technology with hands-on practice. LearnSAP strives to evolve with the marketplace, delivering skills-based education that is sensitive to market needs and convenient to students. Our goal is to help people develop into employees who are equipped to meet the challenges of a marketplace where change is the one constant. On changing the password, the copyright information appears when you login for the first time, click on enter key here and you will be logged in the SAP System. The Menu bar is the top line of any dialog window in the SAP system. Standard functions that are available in displayed in this toolbar. The applications like save, top of page, end of page, page up, page down, print, etc. Application specific menu options are available on this toolbar. To start a business application without having to navigate through the menu transaction codes are assigned to the business processes. Transaction codes are entered in the command field to directly start the application. There are several ways of login off from the system: Materials Management deals with managing the materials products and or services resources of an organization with the aim of increasing productivity, reducing costs and increase optimization and at the same time be flexible to accommodate changes. SAP Materials Management MM is a part of Logistics area and helps to manage the procurement activity of an organization from procurement process, inventory management, invoice verification and material planning. Is a process of acquiring goods and or services in the right amount, at the right price at the right time. Procurement can refer not only to buying of goods and or service, it also can include outsourcing. Procurement process generally starts when there is a Demand or Request for a Material or services. Vendor Selection is the next step after receiving the quotes from the vendors. Negotiating the terms and conditions. Organizational Structure is also referred to as Enterprise Structure. Enterprise Structure is made up of Organizational Units and have to be defined and each of the unit has a relationship to one another and this relationship has to be created by way of assignment. The creation and assignment of organizational units is done in Customizing of Enterprise structure. Configuration uses the inherent flexibility of the enterprise software to add fields, change field

names, modify drop-down lists, or add buttons. Configurations are made using powerful built-in tool sets. Customization involves code changes to create functionality that is not available through configuration. Customization can be costly and can complicate future upgrades to the software because the code changes may not easily migrate to the new version. Wherever possible avoid customization by using configuration to meet the goals

SAP Implementation Guide: Company Code represents an independent accounting unit within a client. Each company code has its own balance sheet and its own profit and loss statement. Operational unit within a company code. This level contains the data specific to a storage location. Stock levels are an example of the data maintained for each storage location. An organizational unit responsible for procuring materials or services for one or more plants and for negotiating general conditions of purchase with vendors. The purchasing organization assumes legal responsibility for all external purchase transactions. The purchasing organization is further subdivided into purchasing groups buyer groups , which are responsible for day-to-day buying activities. A purchasing group can also act for several purchasing organizations

Page: Click on Enter and then click on Save. You will be asked to reconfirm the address. Click on Enter again to confirm the address. A Customizing Request will be prompted. Note down the Request Number and henceforth use this request number to save all your configurations. On the next screen pop-up Enter the following information: Customizing request will be prompted, select your own and click on Enter Accept all messages if any by clicking on enter. The reason for these storage locations being associated with the plant created, is due to the step in definition of the plant, where we copied the associated tables for our plant from a standard SAP plant All the Storage Locations assigned to plant get copied over. Select all the storage locations that you do not need and delete them for your own plant VV You can also create new storage locations. The data will be saved. Click on green back arrow twice to go back to the main IMG screen.
