

## 1: SparkNotes: SAT Subject Test: Math Level 2: Taking a Practice Test

*The SAT Subject Tests Student Guide .pdf/MB) contains information on all 20 SAT Subject Tests, official sample questions, test-taking tips and approaches and more. Answer Explanations to the Mathematics Level 2 Practice Questions .pdf/KB).*

You are given 65 minutes to complete the section. The passages are presented either individually or paired with another passage. Some of the passages may contain tables, graphs, or charts - but require no math or topic-specific knowledge. The passages will always include: One passage from classic or contemporary literature from the US or worldwide One passage about a social science topic e. Constitution or a speech by a President Two passages or a passage and a passage pair that are science focused, including Earth science, chemistry, physics, or biology. The SAT Reading section attempts to measure the following: Command of Evidence - find evidence that best supports an answer; determine how authors support their claims with evidence; identify relationships between informational graphics and reading passages. You are given 35 minutes to complete this section. This section presents reading passages that contain deliberate errors. You are asked to correct the errors by choosing the best possible replacement. This section still requires a firm grasp of grammar rules including punctuation and common English usage. You are expected to choose words that will improve the tone, style or syntax of the selection. You are expected to select changes to the passages that improve them. The No Calculator section has 20 questions with a 25 minute time limit. The calculator permitted section has 38 questions with a 55 minute time limit. There are two types of questions in the math section - traditional multiple choice and "grid in" questions which require you to determine the answer with selecting from choices. The SAT Math section focuses on the following math topics: Passport to Advanced Math - create and solve quadratic and exponential functions; create equivalent forms of algebraic expressions; add, subtract, and multiply polynomial expressions; understand relationship between zeros and factors of polynomials. SAT Essay The optional SAT essay component will require you to read a passage and write an essay that explains how the author develops a persuasive argument. You are given 50 minutes to complete the essay. Every SAT essay prompt is nearly identical to this example: As you read the passage below, consider how [author] uses evidence, such as facts or examples, to support claims. Be sure that your analysis focuses on the most relevant features of the passage. The SAT topic is different every time, but will always have the following attributes:

Flair can now be selected from the sidebar! This community aims to promote discussion of the SAT and of various methods to prepare for the exam. Flair can now be selected by choosing "edit" under the "Show my flair on this subreddit" For more help, please message the moderators. Do not ask if your score is "bad," or tell anyone that their score is "bad. No advertisements or solicitations. No link, self-post, or comment may offer services for compensation. Do no post, ask for, or direct a person to copyrighted documents such as unreleased SAT pdfs or books available for purchase. Tests allowed on the sub can be found here. Even referencing the location of any other test may result in a ban without warning, at the discretion of the moderators. No google drive or google doc links. Your title should be descriptive, informative, and on-topic. If you are asking a question, you should be specific. One-word titles and titles in all caps are not acceptable either. Posts may be removed if they ask a question that is easily answered by Google, the FAQ, or the sidebar. Do not post asking for a prediction of your score. Discussion threads are stickied for every test date. Leave a comment in that particular test thread if you want others to guess your score. Click here to access the FAQ. Please read it before posting! Prep Materials Large-scale data analysis of the community including average test and practice test scores, recommended resources, hours studied and improvement, etc.

### 3: SAT Math Practice Test 2 | High School Test Prep

*Unlike the "regular" SAT, which tests Mathematics in addition to Writing, Reading, and an Essay, the SAT Subject Test in Mathematics tests math and only math—algebra, geometry, trig, and pre-calc, to be exact.*

The SAT 2 is a set of over 20 subject tests and is used in the USA as a yardstick to assess college admission applications. While the SAT 1 tests you for basic verbal and math literacy, the SAT 2 tests are more disciplined in terms of being subject oriented and let you and educational institution gauge your academic strengths through the scores of your subject tests. The Math subject test is a higher level Math test and covers numbers and operations. There are two levels of the Math test, Level 1 and Level 2. Level 1 covers more basic mathematical concepts whereas Level 2 deals with the application of such concepts to perform other mathematical operations. Facts The Math test of SAT 2 allows test takers to use calculators whilst appearing for their tests. However, having a calculator to your aid does not necessarily mean an easy test. It is a test which involves subject matter from Algebra, Geometry and Pre-calculus and trigonometry courses, so if you are familiar with these concepts it is only the applications of their principles that you have to work upon. The tests require you to use the prescribed methods of problem solving by application of the appropriate theories and hence you cannot go wrong with the method of solving questions. If you are not familiar with the mathematical concepts any operations covered in the Math Level 1 test, it will be difficult for you to directly opt for Level 2. All questions throughout the test, whether difficult or easy, receive a point for each correct answer. The score is then converted on a scaled measure ranging from points. Test takers and colleges would be informed of the applicants score according to their instruction. Contents of the Test Math tests consist of a variety of subject chapters. These concepts are tested in the Math Level 1 Test but on a lower degree of difficulty as compared to Level 2. A detailed and comprehensive explanation about the differences between Level 1 and Level 2 subject matter can be found at <http://> Questions that are left blank are considered as a null score. Therefore, you are advised not to waste too much time on one particular question. Attempt everything you think you know and come back for the rest. There are instructions on the use of calculators and the types that are not permitted. You should thoroughly read through the guidelines for the exam to avoid possible inconvenience. Calculators with a QWERTY keypad and those that have other methods of input apart from the conventional buttoned- calculator are also barred. When you feel you have completed all the study matter for the Math test, use practice test papers to test if you are able to answer them well. Score your answers as they would be in the actual test. You will be able to judge what concepts and operations you need to work on and how you should manage to complete your test paper within an hour. The College Board suggests that you should have studied Algebra for two years, Geometry for one year, and Precalculus or Trigonometry or both to be able to comfortably study and appear for the Math Level 2 test.
