*Chapter Teaser. Book One. She did not know that the wolf was a wicked sort of animal, and she was not afraid of him. Chapter One Scarlet was descending toward the alley behind the Rieux Tavern when her portscreen chimed from the passenger seat, followed by an automated voice: "Comm received for Mademoiselle Scarlet Benoit from the Toulouse Law Enforcement Department of Missing Persons.*

Her grandmother has gone missing for many weeks and Scarlet is sure that she has been kidnapped rather than left on her own will as the authorities believe. She notices a tattoo on his arm; a string of numbers and letters that have no meaning to her. When she gets back from her job, her estranged dad is there and is desperately trying to find something. She questions her dad, who has burn marks all up his arms from being tortured, and he says that the same people have her grandmother because she is hiding something. Scarlet heads out to question Wolf in a fight ring, where he defeats and almost kills the champion. The next morning Wolf comes by her farm and tells her that the tattoo stands for a group he used to be part of and that they are the ones who kidnapped her grandma. He decides to help Scarlet and they both embark on a trip to Paris. On the train to Paris, Scarlet meets a man called Ran, who Wolf seems to smell on her later. They jump off the train after a letumosis outbreak occurs and continue their journey through the woods. Wolf fights with Ran and almost kills him until Scarlet shoots him in the arm. They leave Ran unconscious and get on another train to Paris, and Scarlet learns that her father has died. Throughout this time, Wolf and Scarlet start to develop romantic feelings for each other. Meanwhile, Cinder teams up with captain Carswell Thorne, a fellow prisoner who stole a spaceship from the American Republic military, and they escape from the New Beijing prison. They escape on the ship, a Rampion, but find problems with the autopilot. Once in space, Thorne asks Cinder where she wants to go and even though Dr. When Scarlet and Wolf arrive in Paris, he leads her to where her grandmother is being held, but turns her in and reveals that he is a Lunar Special Operative, a bioengineered wolf-Lunar hybrid soldier who serves Queen Levana. Then, she is imprisoned. Barely escaping, Cinder tracks down Scarlet. Her grandmother also tells her that Scarlet is the granddaughter of Logan Tanner, the doctor who spirited Selene to Earth and performed her cyborg surgery, and eventually killed himself after suffering many years of Lunar sickness. Ran comes in and threatens her but her grandmother sacrifices herself to allow her to run away. However, after killing Michelle, Ran chases down Scarlet until Wolf appears and starts fighting with him, eventually killing him. Wolf then corners Scarlet and struggles with his thaumaturge control but is shot with a tranquilizer dart by Cinder, who thought he was harming Scarlet. Scarlet and Wolf reconcile, Wolf reasoning out that he was able to overpower his wolf killing instinct due to his overwhelming animal-like instinct to protect his mate, and Scarlet agrees to be his "alpha female".

### 2: Books & other thoughts: Scarlet by Marissa Meyer

*I was lucky to score an advanced copy of Scarlet from Marissa Meyer while at Comic Con. Totally me. I was in the middle of another book which I quickly finished in order to start this.*

I liked this better than the first one! I love,love,love the action and romance! This is quickly becoming one of my favorite series, guys. First off, I want to give serious praise to Marissa for her ability to create interesting, captivating characters. Introducing new main characters after the series has already started is quite a difficult thing. But Scarlet is awesome. Thorne is constantly entertaining. Switching between the different characters and storylines was seamless and truly skillfully done. My sci-fi loving heart was overjoyed with the detail and skillful crafting that presented itself in this novel. I want more of the world. I just want to go back to it. So, seriously, two thumbs up for that. The plot in this one was amazing. I loved how creatively different this retelling of Red Riding Hood was. I swear, I was reading most of it with this huge grin on my face because the quality was just so high. The story is just action-packed, intriguing, and totally captivating. And getting a glimpse of Kai and the political situation every once in a while was such a big plus and really showed how well Marissa thought the whole story through. I just loved it! So I found Scarlet to definitely be an action-packed thrill ride, but ultimately was a bit let down by the last portion of the book. How do I describe my frustrations without spoiling things? At a certain point, the story just gets a lot more violent and brutal, graphically so. It did not fit my expectations of the novel, and instead of really pulling me in even more or causing me to gasp or cry or whatever the intention was, I was a bit turned off. It was just creepy. Anyway, this means the last part of the book was less pleasing to me and ultimately explains the rating. Scarlet is fast-moving, entertaining, and packs a punch with its awesome characters and awesome world. Any YA reader with the slightest interest in the sci-fi genre. I did not even request an ARC of the novel because it came out a day before my birthday, and it made the perfect gift. There is no denying that the temptation to get my hands on an ARC was strong. It has ridden in my purse for a week, just so I can snatch moments to devour the pages. It was a whirlwind romance. Sadly though, it did not sweep me off my feet. No, I mean it, it really must be me. Scarlet had all of the fantastic qualities that Cinder had: Little Red Riding Hood is even one of my favorite fairy tales! Scarlet and Wolf had all of the makings of interesting literary characters, but I found myself resenting the time given to their story. The banter between Cinder, Captain Thorne, and Iko and all combinations thereof was delightful. Maybe it was just me wanting more of Cinder and her story that disrupted my enjoyment of the novel. I just had trouble connecting with her after I spent so long waiting to rejoin Cinder on her journey. I can say that Wolf is far too broken of a bad boy for my taste, and maybe it was the mom in me that wanted to smack Scarlet for taking him along. I started reading the novel asking myself questions like, "Does Wolf want to eat grandmother? Grandmother is also in possession of some secrets of her own, which wove the story in Scarlet well into The Lunar Chronicles. I loved being introduced to more of this futuristic Earth, and I honestly cannot wait to read Winter, which is supposed to be set on the moon. The fact that Scarlet did not completely work for me makes me no less a fan of The Lunar Chronicles, and I can still happily say it is the one of the most imaginative series currently being published. Scarlet is an important building block for the series as a whole, and I will definitely reread it at a later date to see if my bad-naturedness truly played a part in my feelings about this book. I encourage you to check out these two blogs that gave Scarlet very high ratings: The townfolk of Rieux, France, think that Granny Benoit is crazy and not to worry. Scarlet knows that something is wrong. In a simultaneous storyline picking up just moments after Cinder being thrown into prison, the newly found lost Lunar Princess is making a break for it. Picking up just after Cinder left off, I thought it was fantastic how this story evolved during this novel. She acts with a lot of maturity and a level head - even in the midst of a prison break! He reminded me a little of my four favourite fictional captains Brannigan from Futurama, Reynolds from Firefly, Harkness from Torchwood and Sparrow from Pirates of the Caribbean. I loved his comic relief and the snarky, snarly sarcastic banter exchanged between him and Cinder. The addition of some of my favourite characters from the first book, Iko and Kai, really added to the excitement. The new story of Scarlet and Wolf was interesting. Everything is ramping up in

terms of story - I loved how the seemingly separate lives of Cinder and Scarlet are connected. Maybe it was the fact that I read it in half a day, that it was too much all at once? Space it out a little, like give it two days. What she does in this book will be just the tip of the ice berg. Plus she is so friggin badass. I feel SO bad for him in this book as he struggles with his feelings for Cinder, whether it was all a glamour or if he really likes her. I love her red hoodie, I love her hair, I love her attitude, I love her relationship with Wolf, I just love her. Captain Cadet Carswell Thorne: This guy is hilarious, and his relationships with Cinder him purposefully bugging her, Cinder making scathing remarks back is spot on and perfect. In a good way. He was the source of mystery in this book. I just want to note that the pacing is very different than Cinder. The first book set everything up: Scarlet picks it up, has tons of action mixed in with some slower, more reflective moments. It manages to satisfy some elements from the first book while introducing new conflicts and mysteries for the next books. And they do, so perfectly. Close X Follow us.

Scarlet killed the engine, already grabbing for the discarded portscreen. The Toulouse police must have found something. The comm was followed by a video ad from the police, reminding all delivery ship pilots to be safe and wear their harnesses while engines were running. Scarlet stared at the small screen until the words turned into a screaming blur of white and black and the ground seemed to drop out from beneath the ship. The plastic panel on the back of the screen crunched in her tightening grip. After three solid whaps, the screen only flickered in mild irritation. The grease and whiskey scent from the tavern nearly choked her as she swallowed her breaths, trying to rationalize her way out of the anger. She would go to the police station. It was too late to go now—tomorrow, then. First thing in the morning. She would be calm and logical and she would explain to them why their assumptions were wrong. She would make them reopen the case. She would tell the detective that he had to keep searching. She would make him listen. Half a dozen plastic crates filled with garden vegetables were crammed into the back of the ship, but Scarlet hardly saw them. She was miles away, in Toulouse, planning the conversation in her head. Calling on every last persuasion, every ounce of reasoning power she had. Something had happened to her grandmother. The tomatoes splattered, juice and seeds spraying across the piles of garbage that were waiting to go into the compactor. She pictured the tomatoes bursting all over his smug little— A door swung open just as a fourth tomato was obliterated. She could feel heat emanating from her face, the erratic thumping of her pulse. Gilles wiped the sweat off his almost-bald head and glared, his default expression. Which was true—they were technically hers until he paid her for them. The noise of dishes and laughter spilled out into the alley, bizarre in its normality. Her grandmother was missing and nobody cared. She turned back to the hatch and gripped the edges of the tomato crate, waiting for her heart to stop hammering behind her sternum. The words from the comm still bombarded her thoughts, but they were beginning to clear. The first wave of aggression was left to rot with the smashed tomatoes. When she could take in a breath without her lungs convulsing, she stacked the crate on top of the russet potatoes and heaved them out of the ship. The line cooks ignored Scarlet as she dodged their spitting skillets, making her way to the cool storage room. She shoved the bins onto the shelves that had been labeled in marker, scratched out, and labeled again a dozen times over the years. Scarlet pulled away and grabbed a bin of parsnips and radishes, passing them to the waitress. Come now, Scar, the street fighter I was telling you about the other— oh, maybe that was Sophia. Table four wants you. Settling the basket of onions against her hip, Scarlet shut the hatch and brushed past the waitress. Have you heard anything new? Scarlet busied herself rearranging the baskets before the waitress could say something optimistic.
