We offer the lowest price on the market without compromising on quality. See what we can do for your Institution! Administrative Agenda As cordial and constant communication is tantamount to success of every bureaucracy. Web School ERP is well equipped to serve in monitoring all activities in your school. Right from class, section calendar, teacher, parent or the entire school, the software makes the sharing of emails, SMS messages and questionnaire very easy to get across to school personnel. Easy access to student records, grades, schedules, parent information, health records, skills e. This helps in eliminating stress from teaching with easy to use modules of learning. Easily manage all tasks from student attendance, assessments, subject notes, class schedule, assignment grading, eliminating lateness, evaluating assessment and absenteeism, generating monthly report sheet on class, reduced printing or photocopying administrative duties. We realized the need for a specialized access portal for the teachers as they are an integral part of the education system. Our school management system software enhance overview generalization and consultation of courses on each student and their parent involvement, which makes students to always strive to attain being the best and working in-hand with dedicated teachers on areas they are lacking behind. Web School ERP helps cut down note taking in class to personal development, which enhance child growth. The major feature of the student module is that it is designed in a way that it prioritizes all the necessary needs of the pupils. They can securely access this portal with their unique login password to stay updated with a daily class timetable and teacher allocations. This software makes learning easier as a class timetable, assignment grades, attendances are conveniently taking from anywhere. A student has the opportunity of getting notes, class supporting material, library records, and exam schedules to help complete coursework. Also, each student has a personal login password to their portal. Parents are given chance to get involve in child education and stay updated on their development track performance across all subjects and class. This feature is made so as to satisfy the important duties of the parents, in monitoring the performance of their children in both the academics and the extra-curricular activities. Track child cost which includes school fees, discount and levies, which also gives the opportunity to make convenient transaction. Web School ERP also gives the opportunity to get a child results on assessment test, examination, behavioral progress, timetable, attendance and public holidays in school. Web School ERP provides an easy to use interface with initiative functionalities and controls. Exciting range of features and flexibility for customization is that what makes this school software unique and spectacular. Web School ERP is a notion to reckon with in consideration of a school management system. The importance of Web School ERP System is to bring about more productivity and learning to an educational institution through the application of new discretion in school management. Web School ERP provides hours service that makes schooling all time available. School Management System is a large database system which can be used for managing your school's day to day business. SMS allows users to store almost all of their school's information.

SolutionDots systems are offering a lot of features in TotalSchool Systems that completely changed the style of management. Online Student Registration Form: TotalSchool systems provides the online student registration forms to the students. It allows electronic entry test and reduces the usage of papers. It allows the administration to complete their tasks such as fees, admission and records online. In this section, students could easily review that after entry test their admission is approved or not as well as the administration will approve or reject the request in this section. It allows the administration to manages the invoices of admission, entry test, monthly invoice etc. In TotalSchool record of students dues could be easily managed, administration, student, and parents can easily check fee records. TotalSchool also keeps the profile record of all students like their name, address, contact and semester details etc. Electronic Student Attendance helps to maintain records of present students automatically. TotalSchool is accessible to students so they may able to view their study scheme, timetable announcements etc. It is also accessible to the parents and makes them able to track the study history of their children without visiting the school. Teacher Access and Management: Exam management was not so easy task for teachers and administration but TotalSchool manages exams like a magic. After exams, a big problem was managing the result at all aspects but again TotalSchool has taken this responsibility and all record manages easily. It has taken the responsibility to manage all your accounts and make administration free from this accountability. TotalSchool also has taken the responsibility of HR management. Now hiring new staff is also a very easy task for administration. The Web Based System: TotalSchool is a web based system you just need to have an internet connection and can access it from any computer at anywhere. TotalSchool is a highly reliable software that manages all of your working in school management efficiently. TotalSchool manages all the record updated by users. It also allows the administration to manage the user by itself, they can add, edit or delete the user data modestly. School Management System efficiently manages the fee plan as well as the installments for students automatically.

3: School Management System, School Management Software ERP

School Management System software that automates the life cycle of a student from admission to pass-out, maintains academic records, facilitates collaboration, allows schools to collect fees, conduct exams and print report cards.

What is most burning? With multiple channels of communications like emails, SMS, portal, Video and telephone, maintaining and tracking unified communications is extremely important to create a thriving ecosystem of the engaged community. More Details Fee Payment As your institution grows, tracking fee payments become a serious overhead. In addition, more and more students demand online fee payment facility. Online Bank Transfer is not convenient, as for the student and parent identifying exact fee amount is difficult, and for your School, bank reconciliation is cumbersome, often resulting in errors. Identifying over due payments and reminding only those who are yet to pay is also challenging. Find out how SchoolTime takes care of all these issues with ease. More Details scheduling Planning class routine and schedules is one of the primary needs to run a better organised institution. Giving real time access to schedules to students and teachers is also critical. Scheduling examination, classes, assignments are all extremely convenient with SchoolTime. Advanced analytics also provide you with the Teacher Occupancy that can play an important factor to better distribute work load of Teachers while creating class schedules. Try for yourself how SchoolTime can easily help you fine tune your scheduling. CRM Relationship management is a clearly neglected area for educational institutions. Easily design your admission forms or enquiry forms using a drag and drop interface. Publish your web forms in your website to accept enquiries online, and even process student admissions using the SRM module- the first CRM system built for Education. Visualising these data in visual graphs and charts provide you with never before insights. The system has already assigned access levels avoiding you the trouble to do so for every user. The same login portal intelligently identifies the type of user based on their access credentials- reducing complexity to manage and administer your SIS. Out of the Box Flexibility for all Grading Type from School Management System Our experts have studied in detail all types of Grading Systems followed in any part of the world, and designed the module to enable configuration of any Grading system followed by your Institution. The only SIS which can accommodate any complexity in Grades and results processing. The software has taken over the world of education by a storm and has also set an example of how an ERP system can be designed.
