Get all of our newest free resources directly to your inbox. It is designed to help you practice second grade standards for computation. This 2nd Grade computation Review Game is designed to match our 2nd grade computation math check. You will find the link for the coordinating math check at the bottom of this post. This review game was created in the hopes of it fitting into classrooms across the nation regardless of your standards. You can use this game as review for your students before a test. Or, use it in a third grade classroom for a beginning of the year review. Problems for the following standards are included: Add and subtract within 1, Use models, drawings and strategies. Show fluency in solving addition and subtraction facts. Solve real-world problems involving addition and subtraction within Understand the commutative and associative property. Show that the order two numbers are added and how they are grouped does not change the sum. Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns. Write an equation to show the sum. This free math game we created has been designed to touch upon each of the standards. Playing the Game Correct answers throughout the game are praised with a praise slide! To play, students need to click on the apple on the first slide and they will be taken to the first problem. When a problem is answered correctly, they will receive a slide giving them some praise. Students click on the praise and are taken to the next problem. The game is created so that the final slide is linked to return to the first slide. This will start your game. We have a commercial use license for ourselves, you will just need to download the free version! You will find the coordinating second grade computation check here:

2: 2nd Grade Math Review - Factile Jeopardy Classroom Review Game

2nd Grade Review. Showing top 8 worksheets in the category - 2nd Grade Review. Some of the worksheets displayed are Practice book o, Ab2 gp pe tp cpy , Write how much in, Grade 2 end of the year test, Grade 2 reading comprehension work, Vocabulary 2nd grade homophones,, Week 1 day 2.

Instapaper x While getting all of our curriculum lined up for the year can be overwhelming, sometimes putting it all into practice can be equally as daunting. Choices that may have seemed great at the beginning of the year might not pan out by the end of the year. This year Kaleb was still doing the bulk of his subjects with me, although we were working on him being a little more independent in some subject areas. Working on All About Homophones was more of an occasional lesson maybe five throughout the year based on what we were learning about. The similar formats simplify the teaching and they streamline well together. This will definitely be a program we use again next year. For those of you who know me well, you know that it is our favorite homeschool spelling program , hands down! And the dog "yep. Ever since we brought her home, that is where she likes to rest during school time, especially spelling! We did work through most of Picture Smart Bible and at the end of the year switched over to Grapevine to work on a short lesson. Kaleb liked the simpler pages for younger kids that Picture Smart Bible offers, but he really enjoys drawing, so Grapevine was the best fit for him this year. The 90 Devotions for Kids is a perfect fit for our mornings and we ended up purchasing the next devotion book because we loved it so much! We loved the Advent study from Ann Voskamp "those coloring pages just seal the deal! Mystery of History 4 combined with Story of the World 4 ; Liberty Kids dvd series Although the lessons were longer in MOH 4 , the kids loved this year because we were able to add in so many REAL videos from recent events and see pictures of things as they happened. Kaleb really enjoys the coloring pages that go along with Mystery of History and is a stickler for getting those finished each day. He meticulously saves each and every one of them! We did fill in here and there with Story of the World, but primarily focused on Mystery of History. Kaleb also loves to embellish and add in his own drawings art is another one of his favorite things , so there was a lot for him to work on this year and add in to our lessons. That may be a period of history that I am rather fond of. We just did the lessons as they were written in the book the same as they are on the CD-rom, and his math skills are off the charts. He loves numbers "so fun to see his little brain at work. On to TT4 next year! Life of Fred Dogs "this is always a fun filler for us. Kaleb just giggles when we pull out the book and we actually worked on Dogs and also worked on Edgewood as well. Kaleb was able to work on this independently each day and still loves it, so we will likely continue next year with it as well, because he loves the repetition. The pace for the year was 2 to 3 lessons a week, depending on how they wanted to work on the lessons. If we were in a groove, we kept going with lessons! Reading All About Reading Level 2 and misc. This has been an area for me that has caused much angst the past two years, but we are just working slowly and steadily, making sure he has a solid foundation in all he is doing. He IS making improvement and beginning to enjoy it, which is so much of the process. Next year we will move on to All About Reading 3. A Reason for Handwriting Level B Kaleb is always quick to pull out his handwriting first thing note the pajamas above and get his handwriting done right off the bat. In addition to working through A Reason for Handwriting Level B , he also wanted to work on some cursive learning as well, so I found a few random workbook pages on our shelves from years gone by that he could add in. It makes me laugh that he hates to write a four word sentence , but he is meticulous on his handwriting sheet! This was one area that he was able to do mostly independently this year. When he was ready to do a lesson usually once a week unless he asked to do more , I would pull out the supplies for him and he would pop in the dvd from Home Art Studio and work through the lesson on his own. He amassed quite the display wall throughout the year! Definitely planning to use it again next year with him, but the 3rd grade program. Additional Learning One of the things that I really wanted to do this year for Kaleb was intentionally add in learning time with Spielgaben.

3: 2nd Grade Week in Review | Chestnut Hill Academy

Review of the entire second grade math curriculum. Kids will enjoy working on these mixed review pages. Great way to keep practicing math skills.

Get all of our newest free resources directly to your inbox. It is designed to help you practice second grade standards for number sense. Reddit Shares 2nd grade is a big year for us. Post sponsored by TestingMom. I had my son tested for gifted in 1st Grade. So he ended up with bad behavior. So here I sat, listening to the 1st Grade teacher explain that he did not pass the gifted test. Then, I heard the silver lining. All of 2nd grade would be tested for gifted. We have another chance. The whole 2nd grade class would be tested for gifted this year. This time, I promised that we would be ready. We are preparing for 2nd grade gifted test with TestingMom. My son is reading at a 4th-5th grade level and already memorizing multiplication tables at the start of 2nd grade. Testing for gifted may impact his whole educational future. So we joined TestingMom. This online resource gives parents and children everything they need to excel at school starting at Pre-K through 8th grade. An easy-to-use online site dedicated to helping parents and kids excel at test preparation on every level The only fully accredited test prep program for students in Pre-K to 8th grade. Reviewed and accredited by National Council for Private School Accreditation and by Accreditation International Individualized test prep and skill building with ability to focus on areas based on child struggles, test types such as IOWA, gifted, CogAT Test, and state testing , and grade level Lots of parent resources Online and offline options practice test questions with printable tests at home or hone skills with online games and teaching tutorials Expert guidance TestingMom. Top memberships also include monthly \$5. For Kids I have seen my son grow leaps and bounds in the short week that we have used TestingMom. TestingMom provides over 1000, challenging questions, interactive games and activities for the most popular tests given in our 50 states. Written Tests This has to be hands-down my favorite part. There are tons of great written tests that can be printed, mirroring the same types of tests my son would get in school. From math to reading, science to language arts, I have a huge selection of tests that we can use at home or on-the-go. Your child will also gain access to current events, educational videos and more all curated for kids. Confidence Building The biggest takeaway from using TestingMom. For Parents Education is not just for kids. That means that we need to have the tools to best teach our children. A Wealth of Tools The explanations are great. The breakdown of tests is awesome. The experts on hand priceless. The site is easy to navigate and use, helping me to find the right tests for my son. As with any important product for my family, I always want to try it out for myself first. Be sure to follow TestingMom. What do you love about TestingMom. Be sure to follow Raising Whasians via Facebook , Twitter , Google , Instagram , Pinterest and YouTube for more of our family moments, recipes, kid crafts and travel tips. Looking for more parenting tips?

Review Game on Review of second grade English. Linked to PA state standards at the 1st - 2nd grade level.

In that post, I wrote about my plans for this year. I still recommend it, but having done it with my elder son, I was ready for something new. I love these books! I have taken my time with them, letting him read each book several times once per day , do one puzzle at the back of the book, and I also printed out the available worksheet that they have on their website for each book. We begin each book by going over the sounds it introduces. We have also been working in the 2nd grade Reading Star Wars workbook. Literature “ My second grader has listened to many books this year, including Blood on the River: All of those he listened to with his brother. He loves them and always wants to do math first. Also, they were easy for him because I started him in these books at a later age than his brother, and he had already done a lot of math with his previous curriculum, Singapore. But we like Life of Fred much better. Our huge history timeline is filling up with interesting points of history! We did watch plenty of science and nature documentaries , raised monarch butterflies , expanded our garden, and continued to learn about birds. My 2nd grader is all about birds. We started making bird journals together too! I will write more detailed posts when I feel like I have more to say about it. We have been using Risas y Sonrisas , and I love it. Leading up to this trip, I spent a few weeks teaching the boys about the Impressionist and Post-Impressionist artists as well as a few other artists whose works were featured in that museum. I ordered several Chicago Institute of Art books from our state-wide inter-library loan system. I wrote about his cello practice here. How is homeschooling going for you?

6: Preparing for the 2nd Grade Gifted Test | TestingMom Review

Create engaging Jeopardy-style quiz games for the classroom in just minutes with Factile. It's free, easy and loads of fun! Create your own or choose from , existing games and join over 1million users in countries worldwide!

Look for and make use of structure. Introducing the Word Value 10 minutes Today I want to help students better understand the term value. MP6 refers to attending to precision and in this case, I want students to have a precise understanding of a word that is frequently used in mathematics. I ask if anyone knows what it means? We brainstorm a list of possible meanings. I record them for students to see. We talk about the different meanings and settle on which one or ones refers to math. I ask students to record the word and its meaning in their math journals. I want students to understand that value refers to what something is worth, or how much an amount is worth. I know that we have not helped yet to understand how it applies to math, but we have agreed on a definition that allows us to all be talking about the same thing. Now I invite students to the rug to explain a new game that they will play. I tell them that I will explain the game and demonstrate it before they play. I show students that today we will only use the cards 2, 4, 6, 8, and 0. We will remove all other cards from the deck. We will play the game in groups of 3. Each group will have a game board, the 5 cards, and 3 colored chips. Next he turns over a playing card different from the number cards value cards. An example might be if the value of your digit 4 is 4, you may move 4 spaces. If the value of your 4 is you may move 2 spaces. If the value of your 4 is 40 you may move 1 space. If the value of your 4 is not here, stay where you are. I ask a student to be my partner and we each take 2 turns playing the game together. I pick up the cards, arrange them into 42, and read my number. I draw my card and it says if the 2 is in the thousands place I may move 2 spaces. My 2 is there so I move 2 spaces. Now my partner repeats the process. I check for understanding and then partner students up and provide them with the materials they will need for the game. During the game I circulate around to check for understanding of the idea of the value of a number. If I find students who are struggling, I help them to write out a 5 digit number in expanded form. They can then refer to this as they think about what they have built. Playing the Game Independent Practice 15 minutes After playing the game, I ask students to return to their desks. I place a deck of cards with numbers from 0 to 9 on each set of desks. I ask each student to draw 4 or 5 cards, create a number as they had in the game, write the number on their paper and then express it in expanded form. The numbers across the bottom add up to the number at the top. I often refer to these as number mountains number mountain. I invite a student to come up and show us how they would draw the cards, write the number and record it in expanded form. I check for understanding and then let students work on their own. I circulate around the room to help students who may be struggling, and to informally assess understanding.

7: Reader Rabbit 2nd Grade Game Review

Second Grade in Review Homework Booklet prepares children for third grade with activities that review and reinforce many of the concepts and skills taught in second grade. Reading, spelling, math, and social studies are just a few of the topics children will brush up on while completing the entertaining activities in this book!

This is a room that you sleep in. A baseball player hits the ball out of the field. A game children might play with a stone and chalked squares on the sidewalk that they have to jump.
