

1: Upload photos and files to OneDrive - OneDrive

Using the OneDrive desktop app. If you have Windows 7, Windows Vista, or a Mac, you can install the free OneDrive desktop app to upload files and folders to OneDrive automatically.

Rahul Saigal November 25, , 8: In fact, they can use any web browser to get to the files you share with them. And you have a complete control in your hand—your files will only be shared with the people you choose. Through the modern app, users were able to upload their files and folders easily, and even share them without having to use the web interface of OneDrive all the time. OneDrive for Windows 10 brings better integration with the File Explorer. Sharing a file as a link has many advantages, particularly when sending them through email. Email can be rejected by servers when attachments are too large, and even if a large email makes it to your recipient, the recipient might not be happy for having big attachment in their mailbox. OneDrive makes it easy to share a link to a file that can be sent by email, Facebook, or as a text message. Open OneDrive in File Explorer and locate the file or folder you want to share. After a few seconds a notification will appear letting you know that a link has been prepared. Open Mail client and enter the email address of the recipient of the file. Upon receipt of the message, the recipient simply has to click the link to have access to your shared file. Even though this link grants access to only the document or folder it was generated for, there is nothing to identify who used the link, and it could be shared with anyone. If you want a greater control, you might want to share from the web interface, which will allow you to share with specific email addresses and grant limited access to the file. Share a File or Folder from OneDrive. Once you click this option, your default web browser will open OneDrive to the sharing options of the particular shared folder. Then choose any one from the following share options. Invite People Choose this option if you want to give specific individuals or group permissions to an item. This lets you remove permission for specific individuals or groups later if you need to. Add a note to recipients if you want. To make other changes like adding or deleting files in a folder , recipients need to sign in with a Microsoft account. People with edit permissions can also invite others to have edit permissions to the item. This can be a security concern for some users. This helps prevent other people from accessing the shared item if a recipient forwards your message. Get Link Choose this option to share items with lots of people you might not even know personally. You can use these links to post to Facebook, LinkedIn, email, or text message. Anyone who gets the link can view, copy, and download the item. The recipients can even forward the message. Choose the type of link you want. The permissions for the item are automatically updated when you create the link. View only — When you share an item with this type of link, then recipients can view, copy, or download the items without signing in. They can also forward the link to other people. Edit — When you share an item with this type of link, the recipients can edit specific files, and can add, copy, move, rename, or even delete files in a shared folder. Recipients can forward the link, change the list of people sharing the files or folder, and even change permissions for their recipients. To post the link on a social network site, tap or click the icon for the social network. If you want to include the link in a text message, or in a printed document then you might want to shorten the link. Stop Sharing File or a Folder You cannot stop sharing or control permissions through a desktop. You have to do it through the OneDrive website. If you are the owner of the item or have edit permissions then you can stop sharing an item or change the permissions others have to it. You can switch the permissions between editing and only viewing, and stop sharing through any links you created. Just be extra cautious with the permissions.

2: How do I attach a file from my One Drive using Outlook - Microsoft Community

This will send your file(s) to the root of your OneDrive. But you might want to send certain files to specific folders within your OneDrive, and you can.

You can also upload other files, like photos, videos, and music. In total, OneDrive gives you 5GB of free space to store files of all types. In this lesson, you will learn how to upload and sync files from your computer to OneDrive. Watch the video below to learn more about uploading and syncing files in OneDrive. Uploading and syncing files with OneDrive The OneDrive desktop application makes it easy to upload and sync files across all of your devices. If you have Windows 8. The OneDrive desktop application works like any other folder on your computer. Whenever you move a file to the OneDrive folder, that file is moved online to the cloud, allowing you to access the same version of that file from any computer connected to the Internet. Locate the file on your computer that you want to upload to your OneDrive. Click and drag the file to the OneDrive folder. The file will appear on your OneDrive. Now you can access the file from anywhere by signing in to your OneDrive account. Uploading individual files can be time consuming. Fortunately, you can move entire folders to OneDrive. Whenever you upload a folder, the folder and every file stored within it will be uploaded to your OneDrive. Locate the folder you want to upload to your OneDrive. Click and drag the folder to the OneDrive folder. The folder and its files will appear on your OneDrive. To upload files to OneDrive on the Web: Locate and select the Upload button. Locate and select the desired file. You can select multiple files by holding down the Ctrl key, then click Open. Your files will be uploaded to OneDrive. This may take a few moments. Fortunately, OneDrive offers several features to help you manage and organize them. Watch the video below to learn more about managing your files in OneDrive. You can choose which files to view by selecting various options in the left navigation pane. You can also change how your files are displayed by clicking the View Options icon. Tiles view lets you view your files in a grid of icons. This is the default view for your files and folders. List view lets you view your files with their names and other information, which may feel more familiar if you usually work with files on a desktop computer. It shows you thumbnails of your photos scaled down in a grid. Searching for files You can find documents by using the search feature. Searching lets you look for a specific document using words contained within the document and its title. To search for a file, click the search bar. Type the word or words you want to search for, then press Enter. Your search results will appear. Working with folders You can use folders to organize your files. Documents can be stored in folders and moved from one folder to another. Moving documents can be useful because you can share a document simply by moving it to a shared folder. Then you can move any files you want to share with the group to that folder. To learn more about creating and sharing folders, review our lesson on how to Create and Share Office Documents. To move a file to a folder: Hover the mouse over a file, then click the check box in the upper-right corner. You can select multiple files by clicking additional check boxes. Click the Move to button in the menu at the top. A Move items to pane will appear on the right side of the screen. Select the folder where you want to move the file, then click Move. Your file will be moved. If you moved your file to a shared folder, your file will be shared as well. More file options To access additional file management options, right-click the file. Access and restore earlier saved versions of the file. Save a copy of the file to your computer. Downloaded documents will not be updated when you make changes to them on OneDrive. Move the file to the Recycle Bin. You will need to empty the Recycle Bin to permanently delete a file. To empty the Recycle Bin: Locate and select the Recycle Bin in the left navigation menu. The Recycle Bin will appear. Click the Empty recycle bin button. The files will be permanently deleted from your OneDrive.

3: www.enganchecubano.com lets you share large files from OneDrive directly

A free OneDrive account provides 15 GB of online storage and allows you to access files from multiple devices, such as a PC, a smartphone, and a tablet. You can easily copy files to your OneDrive account using the Send To menu in Windows Explorer. We'll show you how to add an option to the Send To.

On the OneDrive website sign in with your Microsoft account, and then browse to the location where you want to add the files. Select the files you want to upload, and then select Open. You can also drag files from File Explorer straight to your files on the OneDrive website. In the Google Chrome or Microsoft Edge browser, you can also upload folders from the Folder option on the Upload menu, or drag folders to the website. Learn ways to organize and find photos in OneDrive. Using File Explorer to copy or move files to OneDrive You can copy or move files between folders within OneDrive, or from other folders on your computer. Drag files from the file list in the right pane to OneDrive in the left pane. This means you can access those files from any device that can connect to the Internet, and they are protected in case your computer is ever damaged. You can change your default save setting anytime. Learn how to set where your files are saved or move your files to OneDrive. Files you add to OneDrive this way can be up to 20 GB in size. To make sure your PC is set up to save automatically, check your OneDrive settings. Swipe in from the right edge of the screen, tap Settings, and then tap Change PC settings. For photos, select Camera roll, and then choose Upload photos at good quality, or for higher resolution copies, choose Upload photos at best quality. Browse to the files you want to move, and then swipe down on them or right-click them to select them. Swipe in from the top or bottom edge of the screen or right-click to open the app commands, and then select Paste. Files you upload using the desktop app can be up to 20 GB in size. To learn how, see:

4: How to Use OneDrive on iOS (with Pictures) - wikiHow

To add OneDrive to the Windows send to menu, press "Win + R" to open the run dialog box. Here type shell:sendto and press the Enter button. This action will open the "send to" folder located in your user account.

For more, see [What is OneDrive for Business?](#) Tap Add account, then tap Work or school account. Enter the sign in information you use for your OneDrive for Business account, then tap Sign in. To sign in to OneDrive for Business, your organization needs to have a qualifying SharePoint Online or Office business subscription plan, or your organization needs to have its own SharePoint Server deployment. Tap Menu at the top of the screen, and then tap the account you want to use. To add another account, tap Account settings, and then Add account. On the Accounts page, each of the accounts connected to your OneDrive app is shown, with total storage and space available for each. On other devices, select Give feedback on most pages to get help. Find the photo or video you want to upload, select it, and then tap done. Under Photos or Videos, select either Good quality or Best quality. To learn how to move photos and videos on your phone to the OneDrive folder on your computer, see [Sync photos and videos using my computer on the Windows Phone website](#). To search for text in a file or photo, type the phrase you want in the Search box. Change how files are sorted Open the OneDrive app. Open the folder you want to sort, tap more , and then tap sort by. You can sort by name, date, or size. Sorting works in a folder, or in the All Files view. To see if you have Windows Phone 8. To add a OneDrive for Business account, open the OneDrive app, tap Menu at the top of the screen, tap Add OneDrive for Business, and then enter the email address and password you use for your company, school, or other organization. For you to sign in to OneDrive for Business, your organization needs to have a qualifying SharePoint Online or Office business subscription plan, or your organization needs to have its own SharePoint Server deployment. If you have a problem signing in with your OneDrive for Business account, try signing in at <https://sharepoint.com>. Share a file personal OneDrive accounts In the OneDrive app, tap the check box by the file or folder you want to share and tap share. If you want to share with a few specific people, select Invite people or Send files. If you want to share with a large number of people, such as in a social media or blog post, select Share a link. At Add people to share with, enter the names or e-mail addresses you want. Tap Add to enter more names. Look under share with a recent contact - the person you want to share with might be there. If you want the recipients to be able to add changes or edits, check the box at Allow editing. Uncheck that box to make the file read-only for the recipients. To add a note to your sharing invitation, tap the arrow at the end of Allow editing, then tap Add a quick note and type what you want to say. The recipients get an email message with a link to the document. Select whether you want recipients to be able to Edit the file, or View the file as read-only. In the Share list, tap the app you want to use for sharing the link. You might have to drag the list upward to see all the options. Remember that anyone who has the link can open, download and save the document, and forward the link. In the Share list, tap the app you want to use to send the attached file. After you make this selection, the app you selected opens. Use it to share the file. Sharing as an attachment works only with individual files. If you want to share a folder, use Invite people or Share a link. Share files and folders OneDrive for Business accounts In the OneDrive for Business app, open the file or folder you want to share and tap share. To share multiple files or folders, tap select , tap the items, and then tap share. Under Invite people, tap where it says "Type a name or email" and enter the person you want to share with. Switch between accounts If you have Windows Phone 8. To do this, open the app, tap Menu at the top of the screen, and then tap the account you want to use. See how much storage space you have personal OneDrive accounts only In the OneDrive app, tap Menu at the top of the screen, tap Settings , and then tap your personal account to see your total storage and space available. In Windows Phone 8. If the OneDrive app appears, tap it for more info, or tap Update to download the app immediately over your mobile network. Share feedback on the OneDrive app You can rate the OneDrive app, or get help, by shaking your device. OneDrive for Windows Phone 7 Add a photo or video On your phone, find a photo or video you want to upload.
