Puzzle Solution No part of this booklet may be reproduced or utilized in any form without permission from the author Page 6 Preface Puzzles forms an important constitute of our day to day life and solving of them increases the sharpness of the brain. This book has been written by the author with an intention to solve the puzzle in a quite simpler approach and using technique with proper explanation. The solution to each and every problem has been explained in details and can be understood easily with the basics of mathematics and physics. This book serves as an important purpose for the students those who are preparing for cracking interviews where puzzles are asked. This is the first edition of the book and feedbacks and suggestions are always welcome from the readers. You can reach me at subrato. Since, it is less than so, it is Thus, the angular location of minute hand is given by: So, angular location of minute Puzzle Solution No part of this booklet may be reproduced or utilized in any form without permission from the author Page 8 hand is given by: Time, t Thief Police 0 7 0 1 15 10 2 23 20 3 31 30 So, the Police will move a distance of 30 units 11 To strike 7 the clock has to move 6 intervals. To strike 10 the clock has to move 9 intervals. Puzzle Solution No part of this booklet may be reproduced or utilized in any form without permission from the author Page 9 Thus, there is no value created or lost. Puzzle Solution No part of this booklet may be reproduced or utilized in any form without permission from the author Page 10 7 9 and 1 on one side and 3 on the other side. So, the sequence is a GP series so the weights will be 1, 3, 9, 27 and Let, the number of 5p stamps be y. So, each 5 minutes for up and down was saved. Thus the man had to walk for hr. At each station there are 24 tickets. Then daughter will get 2x and son will get 6x. Assume that the number of son be m and daughter be n. So, we are left out with two black squares and hence it cannot be done. The factors of are and So, cats killed mice. Now, let us consider that Cf and Ch be the circumference of the fore wheel and hind wheel. We need to work on this part and have to increase the value by 2. So, we will split up IX nine in such a way that it acts as I and X i. Highest multiple is which can be 3cows, 8 sheep and pigs. So, 6 miles he covered in 30 minutes. He was late by 25 minutes and hence met the train 6 miles before the crossing that means the train requires minutes to cover the 6 miles. Speed of the train will be 72m. She brought for 60 and sold at 70 so made a profit of Rs. Again, brought at 80 but sold at 90 so profit of Rs. So, total profit made will be Rs. Hence the number is 84 41 42 Let us group them in the three groups A 3 parts , B 3 parts , C 3 parts , D 1 part. Each part is the 1 flywheel of each machine. Let us weigh the group: Of coffee 1 and 30 kg. So, the three numbers are 4, 5 and 6. Today, he is 11 years old. So, the sequence will be 1, 1. So, for Rs. The ship X is twice as old as its boiler Y-X was when the ship was x-X as old as boiler is now. Puzzle Solution No part of this booklet may be reproduced or utilized in any form without permission from the author Page 18 56 She has to take all total of 3 shocks because if the first one is black and the next one is white then the third result whatever black or white will always result in a pair. However, if there is a left right combination matching then she has to take 11 shocks because let us consider the worst case 20 shocks means 10 left and 10 right. First she picks up 10 left white left shocks and then next 10 left black shocks next whatever she picks up will always result in a pair because at that instant she is left with 10 white right and 10 black right shocks. Puzzle Solution No part of this booklet may be reproduced or utilized in any form without permission from the author Page 19 61 This is a confusing problem and we have to go from backward i. Both have 2 eyes. Pigs have 4 legs and ducks 2. Each egg costs 50p. So, I need to pay her for 5 sheep and I paid her Rs. So, cost of each sheep will be Rs. The trains are separated by 50 miles. The speed of the two trains is 25 mph. So, the trains will meet after 1 hr. Since the speed of the bird is mph, so, the bird must have travelled a distance of miles. Then, age of kishu i.

Thus we can work out a table showing the number of each type apartment, which should look as follows: Type of Apartment Number of Apartments Rounded out to the nearest figures 2 8. So, the number was changed to So, he made a loss of Rs. For 16 bricks weight will be 48 lb. For 11 bricks weight will be 33 lb. So, one must draw 4 marbles. Thus, $n-1$ sawing divides into n pieces. So, 11 sawing are required for 12 pieces. Since, 1 sawing requires 1 minute therefore, 11 sawing requires 11 minutes. Churchgate train into the station at 1. This way each train would be arriving every ten minutes but his chances of getting the Churchgate train would be 9 times as great as of getting on the Bandra train, because if he arrives in the station between 1. So, the two parts are 14 and The amount should be like Weight Inference 1 Three groups each of weight 40 Kg. Weigh the first two if equal then the third one is faulty else the difference in weight is the faulty one. Let the two parts be a and b . G started with 8 quarter of a rupee. So, whatever the opponent take I can take the left out and win. Similarly, the opponent person will loose when there are 10 to 15 sticks. So, the best way is to start the game and take to match sticks and make it Then one can easily win the game. The sum of the distances is So, in ascending 16 ft. So, ratio of wine: The prices are reducing and becoming 0. The next price will be 0. The sides are 31, 41 and Then, second labourer should carry his crate two miles and turn it over to the first, who will then carry Puzzle Solution No part of this booklet may be reproduced or utilized in any form without permission from the author Page 32 it one mile. Thus each carries a crate 2 miles. Christian due east and the Turk due west. So, when they meet again the Christian gains a day and the Turk loses a day. So, when they meet at the Jews house all three will agree and celebrate their Sabbath on the same day. Now, the number should leave the remainder 0 when divided by Puzzle Solution No part of this booklet may be reproduced or utilized in any form without permission from the author Page 34 This leaves the remainder 6 so, the number is

2: Puzzles To Puzzle You - Shakuntala Devi - Google Books
