Toriel, Caretaker of the RuinsThe deviant flower was launched out of sight by what was apparently a ball of fire, and a tall bipedal goat woman came into view. The womanâ€™ um, goat-woman, gave a heartfelt sigh and chuckle, and beckoned them to her. I shall not harm you. I pass through this area every day to see if anyone has fallen down. You are the first humans to come here in a long time. Come, I will heal you and guide you through the catacombs. They needed help, urgently, and if this was the only being that could help - it would be worth the try. She bent down and enveloped the trio into a loving, tender hug. During the warm embrace a soft green glow surrounded them, and Frisk and Mason felt the pain suddenly disappear, and was instead filled with a sense of security and hope. She broke the contact and stepped back a bit. When she started to walk, they clung to her side, not wanting to encounter with any other dangerous monsters such as Flowey. What was most interesting, though, was a floating yellow object similar to a star in the middle of the leaves. Magnus stepped forward while Toriel led the others up the balcony and waited patiently for the exploratory boy. He slowly reached forward and tapped the star, and a black box suddenly appeared in front of him causing him to jump back with surprise. The shadow of the ruins looms above, filling you with Perseverance, Bravery, and Determination. It then gave him the option either to Save or to Return. Out of curiosity, he hit Save. The letters turned yellow, and after flashing this message disappeared. Did you see that? Magnus hopped up on the balcony and the three comrades walked ahead, quietly discussing the passing of the recent event. She then passed in front of them and stopped them before they were able to trigger the puzzle trap. Allow me to educate you in the operation of the Ruins. Ancient fusions between diversions and door keys. One must solve them to move from room to room. Please adjust yourself to the sight of them. Brave ones, foolish ones. Both walk not the middle road.

Valves are now numbered top-down, but you can flip the order if you want. The images in this article, and the download have been updated. Last month, Santa Claus brought me a special present. I awoke on December 25th to find this shiny instrument waiting for me under the tree. It was a pocket trumpet from the Taiwanese manufacturer Carol Brass. It has as much tubing as a regular trumpet, but the tubes are twisted a bit more, so it takes up a lot less space in your closet. It is beautifully constructed, especially considering the fairly low price. So these button contraptions were a mystery to me. So I needed a bit of retraining. There are several varieties of fingering charts, as you will see in the image results of said search. The fingering charts show which valves to press for which notes. Three valves, eight combinations, how fun! These thoughts quickly led me to the idea of creating a Visio shape that could be used atop imported screenshots of sheet music. So I quickly set to work creating a Visio SmartShape that could easily display trumpet fingerings like this: As you progress through the piece, you can place fewer and fewer fingerings so that you or the student is forced to learn or memorize. You just drop it on the page and type the numbers of the valves that should be pressed: The text that you type is not visible, once you are finished editing the shape. To show Open or No Valves Pressed, just clear the text. If the valve number is present, then it will be activated. Here is an extreme example of a way to turn on valves 2 and 3: You can edit the text in a number of ways, including: Select the shape and type Double-click the shape and edit the existing text. You can choose to show or hide numbers on the valves, and you can choose to show 3 or 4 valves, and you can choose to reverse the order. I originally created a shape that number 1 at the bottom, 3 or 4 at the top, because when you hold a trumpet and look down at the valves, that is what it looks like. But there seems to be a standard that numbers the valves from top down. I still think my way is betterâ€”at least for trumpeting! If you are also a programmer, you will appreciate the binary tie-in. Three valves have eight combinations. Four valves have sixteen combinations: Note for those of you with two layers of tape across the bridge of your glasses: Trumpet valves open tubes of differing lengths. To open increasing lengths of tubes, you would press valve 2 first, then 1, then 3. The least significant bit is valve 2, then 1, then 3. Note that the text will automatically determine the darkness of the fill and toggle between black and white so that it remains readable! If you resize the shape, the valve text will grow automatically: For rapidly placing lots of these shapes on a page, I like to use a few keyboard modifiers. Select an existing VF valve fingerings shape, or drag one from the Document Stencil. This keeps things nice and tidy. Press F4 repeatedly to create more duplicates with the same offset as the first copy. Importing Music Notation Images Visio can incorporate images into drawings and diagrams. You can import from files on your disk or in cloud services such as Dropbox or OneDrive, or just cut and paste. Sometimes you can even drag and drop from your browser. Since a lot of sheet music is available in PDF form, you might need to grab a screenshot of the portion of music that you want to annotate. I use the Snip app from Microsoft Garage. If you use OneNote, there is a button that you can use. I usually name this layer Images or Photos or Bitmaps. It shows the relationship of trombone slide positions to trumpet valve fingerings: Trombonists convert the three trumpet bits to a single number In order to learn the fingerings, I figured I would take an AI approach and bombard myself with practice. Since trumpets are really, really loud, I figured simulation would be my best bet. It has enough useful options, such as choosing the range of notes to practice, fingering a horn with 3 or 4 valves, screen layout of the valves, quizzing via random notes, scales or exercises, and more. You can even kind of hold your phone like a trumpet and press the valves as the notes appear on the screen: The main page in the document is loaded with demonstrations and helpful notes, but be sure to check out the second page in the document, which is the same as the first, but without all the notes.
