

## 1: Room Video System | Polycom - Video Conferencing Equipment for the Collaborative Workspace

*Video Conferencing Via Your Smart TV We've all heard of Skype, but what about video conferencing via your home TV? Albeit the newest innovation on the block, the idea is roughly the same.*

Services like Skype can be accessed from a variety of screens -- such as your computer, smartphone, or tablet -- and are relatively easy to use. Luckily, there is a rather simple solution. Skype is the easiest way to video chat with a friend, colleague, or family member. Basic accounts can hold video chats between two people for free, while a premium subscription adds support for video chats with up to 10 people. Otherwise, you must purchase a special TV camera that is compatible with your specific make and model. While this may be the most convenient way to get Skype on your TV, it is also the most expensive. These high-end TVs especially ones with integrated cameras usually retail for thousands of dollars. There are cheaper alternatives, though. Similar to how Skype is bundled with select TVs, the service is also included with some Blu-ray players. A small number of Blu-ray players from companies like Sony and Panasonic are certified as Skype-ready; however, you will still be required to purchase a compatible TV camera. The device can also be controlled by any Android or iOS smartphone or tablet. If you think about it, the console offers the biggest bang for your buck. Microsoft will finally bring Skype to the Xbox ecosystem in November with the release of the Xbox One. The Xbox One is scheduled to be released on November 22, 2013. Perhaps the easiest and not to mention cheapest method to Skype on your TV is to use your computer. Given that most laptops are equipped with integrated cameras, simply connect your computer to your TV through an HDMI cord, launch Skype, sign in, and begin a video chat. There are a few hurdles you must overcome with this method. Alternatively, the sensor can be swapped for an Xbox Live Vision Camera and headset. Open the "More Friends" options and select someone to chat with. In addition to a PlayStation 3 game console, requirements include a free PlayStation Network account, a camera such as the PlayStation Eye, and a microphone or headset. Scroll over to the Friends icon, choose to start a new chat session, and invite individuals you wish to chat with from your friends list. After your friend accepts the invite, scroll over to the chat settings icons and make sure the camera option is toggled on. The PlayStation 3 supports video chats for up to six people. The negative for using either the Xbox or PlayStation 3 to video chat, however, is that you can only do so with friends who own the same console. Microsoft has also hinted that it may release a Skype app for the upcoming PlayStation 4 in the future.

## 2: Smart Video Conferencing Solutions | Ctelecoms - KSA

*Smart Videoconferencing: New Habits for Virtual Meetings [Janelle Barlow, Peta Peter, Lewis Barlow] on www.enganchecubano.com \*FREE\* shipping on qualifying offers. Smart Videoconferencing is the first book to show people how to participate effectively in videoconferences.*
