Learning Shift Scheduling Software for Retail Workers Reduce labor costs, manage employee requests, and save critical time to do more on revenue producing activities. Equip managers and workers with on-the-go mobility to manage work schedules. Get Your Free Trial No credit card required, no obligation Snap Schedule employee scheduling software takes the pain out of creating work schedules and controlling labor budgets for retail and wholesale companies. It offers several different work schedule views designed to accommodate a variety of scheduling styles and processes. Employee scheduling and rostering for retail can be complicated and present many challenges. Retail businesses have peak hours, high seasons and a variety of job positions to schedule and shifts to cover. Retail managers are usually given labor budgets payroll dollars that generally vary from week to week as retail store sales fluctuate. Union and FLSA rules may place restrictions on work hours, overtime compensation, and the types of work schedules that can be implemented. Retail managers must also consider time-off requests, labor rules, and personnel availabilities when developing schedules for full-time and part-time workers. With Snap Schedule employee scheduling software, retail and wholesale companies like department stores, hardware stores, home improvement stores, grocery stores, convenience stores, supermarkets, warehouses, landscaping and nurseries, gas stations, etc. Using spreadsheets, documents, online calendars, or paper to schedule retail workers may be familiar. While these methods may be sliding by, they lack the capabilities and features needed to increase efficiency, reduce labor costs, and promote employee work-life balance. The trial period starts on the day you first use our software and automatically expires 30 days after. You can use one of the sample schedules to evaluate the software features or enter real data and use Snap Schedule to schedule and manage your employees. We will schedule one of our product specialists to help you set up your schedule, walk you through the many features of our scheduling software, and answer your specific questions. There is no risk, no cost, and absolutely no obligation on your part. It is packed with powerful employee scheduling features and gives you instant access to key decision-making criteria, including staffing requirements, regular, overtime and on-call hours, labor costs, employee skills and certifications, employee availability and preferences, and more. View assignments and schedule your staff from three different views. Use whichever view is easiest and most effective for your scheduling tasks. Create rolling work schedules â€" from days to years. Software automatically generates work schedules using industry standard shift patterns or user-definable schedule plans. From this planner, employees can filter what they want to see, request time off, bid on open shifts, and trade or pick up shifts from co-workers. Employees can see the approval status and are automatically alerted when their request is approved or rejected via an in-app notification. Employees can post their assigned shifts to trade with coworkers who are eligible to work the shifts. Employees can punch in and out of their assigned shifts, and schedulers can see the punch data in real-time in the Punch view or run reports to see the variances between planned vs. Self-scheduling with Open Shifts: Empower employees by letting them self-schedule with open shifts. Schedulers can simply create an open shift for a position and specify the number of employees needed and the required skills. View Time Card Information: Employees can view their planned and actual work hours for the current, previous, or next payroll cycle. On-call, overtime, paid and unpaid time-off hours are also presented. Schedulers decide whom to include or exclude from the directory. Save time and stay up-to-date by allowing employees to update their own contact information and availability. Employees can enter their availability information for each day of the week, and in multiple time segments as needed. Quickly and efficiently fill a shift or find a substitute Quickly find and contact a substitute worker to fill a cancellation. Tell Snap Schedule software your criteria and it will show you a ranked list of available candidates to fill a shift. Ranking can be based on many criteria including job position, skills, availability, labour cost, work hour limits, and seniority. Track all training, vacation, sick leave, and other off-work requests Define as many paid and unpaid time-off reasons as you like. Available reports provide details on planned vacation, training, time off hours for any time period you select. Visually assign tasks of any length from 1 minute to several hours with a simple drag and drop. You may use a

task to identify a scheduled break, a checkout lane, or a specific duty. Standard reports provide detailed and summary information on assigned breaks and tasks for cost control, payroll, and accounting purposes. Define hourly cost, overtime exempt status and work hour constraints for each employee. Standard reports provide labor cost data by shift, employee, position, work order, location, and other criteria. Export labour cost data for payroll and accounting purposes. Adjust individual shift assignment start and end times Employees assigned to a shift are anticipated to work the same period from the shift start time to shift end time. You can also adjust the hours that the workers will be paid for working a shift. Labor cost reports reflect any adjustments made to the individual shift start and end times. Work around your schedule constraints with ease Define your operational constraints such as non-working days, shift start times, end times and applicable days of the week for each shift. The Daily Assignment Validation report identifies all discrepancies and constraint violations. Easily publish schedules to retail workers with Snap Schedule software Print schedule views, lists, assignment calendars, and reports to communicate schedule information to management and your employees. Easily publish work schedules, calendars, and reports in PDF and a variety of other formats.
