She took the abitur , the university entrance examination, at age 17, a year early, with three or four girls from her school and thirty boys. All the girls passed, but only one of the boys did. In her doctoral thesis [9] she worked out the theory of possible two-photon absorption by atoms. She taught some courses, [14] [20] and published an important paper on double beta decay in "Mother Wins Nobel Prize". Sklar on the spectrum of benzene. Goeppert Mayer and Herzfeld became involved in refugee relief efforts. Pegram , arranged for Goeppert Mayer to have an office, but she received no salary. Fermi asked her to investigate the valence shell of the undiscovered transuranic elements. Using the Thomasâ€™Fermi model , she predicted that they would form a new series similar to the rare earth elements. This proved to be correct. The objective of this project was to find a means of separating the fissile uranium isotope in natural uranium; she researched the chemical and thermodynamic properties of uranium hexafluoride and investigated the possibility of separating isotopes by photochemical reactions. This method proved impractical at the time, but the development of lasers would later open the possibility of separation of isotopes by laser excitation. Joe came back from the Pacific earlier than expected, and they returned to New York together in July When Teller also accepted a position there, she was able to continue her Opacity work with him. When the nearby Argonne National Laboratory was founded on July 1, , Goeppert Mayer was also offered a part-time job there as a senior physicist in the theoretical physics division. Nuclear shell model Maria Goeppert Mayer walking into the Nobel ceremony with King Gustaf VI Adolf of Sweden in Chicago and Argonne in the late s, Goeppert Mayer developed a mathematical model for the structure of nuclear shells , which she published in These numbers are what Eugene Wigner called magic numbers: Enrico Fermi provided a critical insight by asking her: Think of a room full of waltzers. Suppose they go round the room in circles, each circle enclosed within another. Then imagine that in each circle, you can fit twice as many dancers by having one pair go clockwise and another pair go counterclockwise. Then add one more variation; all the dancers are spinning twirling round and round like tops as they circle the room, each pair both twirling and circling. But only some of those that go counterclockwise are twirling counterclockwise. The others are twirling clockwise while circling counterclockwise. The same is true of those that are dancing around clockwise: Jensen, and Hans Suess , were also working on solving the same problem, and arrived at the same conclusion independently. Although she suffered from a stroke shortly after arriving there, she continued to teach and conduct research for a number of years. Open to all female physicists who hold Ph. The Argonne National Laboratory presents an award each year to an outstanding young woman scientist or engineer, [48] while the University of California, San Diego hosts an annual Maria Goeppert Mayer symposium, bringing together female researchers to discuss current science.

Pokorny, well known citizen and farmer of this section reached here. His death occurred at the LaGrange Hospital on Thursday of last week where he had been taken several days previous for treatment for some serious form of bladder trouble. An operation was performed Wednesday, we understand, and for a time the patient seemed improved and conversed with family and friends, stating he felt better and thought the worst was over. However, a change for the worse followed and the good man soon passed away. Funeral arrangements were made, the body brought home, and interment took place Friday afternoon at the Masonic Cemetery, Rev. ViIt of Needville officiating. Pokorny was born at Beztrekov, Czecho-Slovakla, in February, He came to this country in , landing at Galveston, where for a time he worked on the docks. Later he came to this section, working for Mr. Fred Schriefer for a time, later living on the Ward, Dittrich, Hurta and Foitik farms in this section. In he was united in marriage to Miss Elizabeth Foitik. To this union three children were born, one dying in infancy. The surviving members of his family are two children, a daughter and son, Miss Antonle and Frank. He was a member of the S. Lodge and was secretary of same for a number of years. This lodge took an active part in the funeral ceremonies. Pokorny was a well educated, honest, honorable, upright citizen. He stood high among the people of this section. He was a hard worker, a good husband and father, popular among a large circle of friends, and his unfortunate taking off so early in life is deeply and sincerely deplored by all. Our heartfelt sympathy goes out to his bereaved ones. Pokorny Held Saturday Funeral services for Mrs. Charles Young, pastor of First Baptist Church officiated. Pokorny had been ill the past 7 years. She died at about 4: Oscar Addicks, in the Osage section. Born near here Dec. She was married in to Bohuslav[sic] Pokorny, who preceded her in death 27 years ago. She lived in Jourdanton for about 17 years after his death, and for the past few years has made her home alternately with her son and daughter. Surviving are one son, Frank Pokorny, and the daughter, Mrs. Addicks, of this area; one grandchild; and four sisters, Mrs. Frances Mikula of San Antonio, Mrs. Charles NemeC of Midfield, Mr. Justin Walchar of El Campo, and Mrs. Margaret Chamrad of Weimar. Burial was in the Masonic cemetery. Rutta of Columbus; one half-sister, Eufrazina Voitle of Houston. Polach, Stroke Victim Funeral services for Mrs. Burial was in St. Polach died at 4: She had been in apparently good health before the stroke. Polach April 29, , at Ammannsville, and they settled on a farm at Holman. They had lived in Weimar since Polach was a member of St. Surviving In addition to her husband are four daughters, Mrs. Bennie Frances Koehn of Weimar, and Mrs. Edgar Mary Brandt, Mrs. Alec Curry of Houston and Mrs. Curry, Charles Schneider and Adolf Stilwol. Father Brian Crookes officiated. He married Linda Rucka in Pallbearers included Ricky Chisum. Richard Polach of Sheridan on Monday, May 14 at 6 p. He suffered a massive coronary. Funeral services were held at 2 p. Wednesday, May 16 from St. Arnold Anders officiated at the services. Rosary was recited at 8: Henneke Funeral Home in Columbus handled arrangements. He was a plant operator for Shell Oil Company in Sheridan for over 25 years. Mary Brandt and Mrs. Martha Bodungen of Columbus and Mrs. He was also a member of the South Central Texas Oldtimers Baseball Hall of Fame and was active for many years in softball and baseball activities in the area. Sympathy is extended to the family in their great loss. Eagle Lake Headlight, Thurs. Tuesday October 9 at his home in Columbus. The recitation of the rosary will be at 8 p. Wednesday in the Henneke Funeral Chapel. Services will be held at St. Burial will be in the church cemetery. Polach had lived at Columbus 25 years. He operated a service station. He was a veteran of World War II. His wife survives, along with two daughters, Sandra and Susan, and a son, John Jr. Bennie Koehn of Weimar, Mrs. Edgar Brandt and Mrs. Martha Bodungen of Columbus, and Mrs. Alton Helm of Rosenberg, and two brothers, E. Anthony Catholic Cemetery in Columbus. Polach passed away January 27, in the Columbus

Her father grew up rich as a result, never working "a day in his life. He had property everywhere. The local movie theater on Main Street, and the pool hall opposite, belonged to him. Our room, terracotta-brick house stood high on a hill overlooking the reservation. Life was far from perfect, though, as her father was a binge drinker and her parents often fought about money. Alexander; Frances " ; and Thomas " , who played football for the University of Oklahoma , and was drafted by the Pittsburgh Steelers ; Gerald " , who was injured in childhood when kicked in the head by a horse and never regained normal cognitive function. As a child, Ruth Porter had dreamed about becoming a performer, but her family could not afford dance or music lessons. Betty Marie was enrolled in summer ballet classes in Colorado Springs at age 3. She and other family members performed at rodeos and other local events. Sabin, visited Fairfax looking for students and took on Betty Marie and Marjorie as students. Impressed by her reading ability, the teachers allowed her to skip the first two grade levels. Between piano, ballet, and school work, Tall Chief had little free time, but loved the outdoors. In her autobiography, she reminisced about time spent "wandering around our big front yard" and "[rambling] around the grounds of our summer cottage hunting for arrowheads in the grass. The clerk recommended Ernest Belcher, father of dancer Marge Champion. In addition to ballet, which she had previously been doing all wrong and went back to square one, she learned tap, Spanish dancing, and acrobatics there. She found tumbling very difficult, and eventually quit the class, but later in life put the skills to good use. The family moved to Beverly Hills where schools offered better academics. At Beverly Vista School, Tall Chief experienced what she described as "painful" discrimination and took to spelling her last name as one word, Tallchief. Tallchief expected a lead role, but instead was put in the corps de ballet. He was impressed, but nothing came of it. Dancing in the movie was "not gratifying" and Tallchief decided against making a career of it. A secretary told her that the company did not need any more dancers and she left crying. A few days later, she was told there was a place for her after all. Based on a combination of her talent and her passport, Tallchief was taken on as an apprentice. On her first day as a full member of the company, Tallchief was surprised to find Nijinska had come to town to stage Chopin Concerto with Ballet Russe de Monte Carlo. When Tallchief was surprisingly promoted by Nijinska, she became the primary target of their animosity. It was a sensitive subject for Tallchief" Dunham had previously suggested Tallchief change her surname to a Russian-sounding name such as Tallchieva, a practice common among ballet dancers at the time. Tallchief agreed and was known as Maria Tallchief for the remainder of her career. In particular, she admired Alexandra Danilova who was known for her work ethic and professionalism. Tallchief practiced whenever she could, earning a reputation as a hard worker. She nearly quit the company late in and Tallchief was told she would go on in her place. In the spring of , Krassovska argued with Denham and left the company. She has an easy brilliance that smacks of authority rather than bravura", and predicted she would be a big star in the near future. Glory, however, was short lived as Tallchief returned to the corps when the staging of Chopin Concerto was complete. She was drawn to Balanchine from the start. Describing one of her first experiences with him, she wrote "When I saw what he had done, I was astonished. Everything seemed so simple yet perfect: An elegant ballet fell into place before my eyes. He was glad to get back into ballet after years on Broadway and in Hollywood and accepted the offer. The steps were classical in form, but they were presented in a unique manner. After some thought, she agreed and the couple wed on August 16, I knew he was right. Tallchief relearned the basic exercises the way Balanchine wanted and transformed her greatest weakness" turnout "into a strength. He has been called upon to "save" the famous troupe, but not everyone appreciated his presence. A group of supporters of Serge Lifar , who was on leave while accusations of aiding the Nazis during World War II were investigated, led a vocal campaign to get rid of Balanchine. Spectateur and Les Arts

SPRING, BY MARIA T. EARLE: FEBRUARY, MARCH, APRIL, MAY, BY MARGARET WATERFIELD. pdf

joined in, publishing articles attacking Balanchine personally. Another dancer pulled out of Apollo shortly before opening night, forcing Tallchief to learn more difficult role on short notice. Does she have any equals anywhere, inside or outside of fairyland? While watching her in The Nutcracker, one is tempted to doubt it. Tallchief was known for "dazzling audiences with her speed, energy and fire. She was not just a great dancer, but a real artist—a true interpreter who brought her personality to bear on the dancing. She had in iron will inside She phrased her curls and extensions as delicately or as strongly as the music itself. However, in the spring of he had a sudden change of heart when another girl began to pursue him. She, however, was unaware of his attraction: It would have been preposterous to think there was anything personal. During the summer of , he asked her to meet him after a Los Angeles performance. Balanchine opened the car door for her; when she got in he sat in silence for a moment before saying, "Maria, I would like you to become my wife". I feel that I hardly know you. After a day to think it over, Tallchief accepted his proposal. While they were engaged, Balanchine made extravagant romantic gestures and treated Tallchief with great affection. I was falling in love. We saved our emotions for the classroom. The couple divorced two years later. With this marriage Tallchief also had a stepdaughter, Margaret Wright. She died on April 11, , from complications stemming from the injury. However, she wished to be judged on the merits of her dance alone. Tallchief was called "one of the most brilliant American ballerinas of the 20th century" by The New York Times. With English ballet, it was Fonteyn. For American ballet, it was Tallchief. She was grand in the grandest way. And thank God I knew it. In , Tallchief received a Kennedy Center Honor for lifetime achievements. Her Kennedy Center biography states that Tallchief was "both the inspiration and the living expression of the best [the United States] has given the world. Her individualism and her genius came together to create one of the most vital and beautiful chapters in the history of American dance. Her autobiography, Maria Tallchief:
