Essays on the student movement. by J. S. Kunen
State sails off the edge, by B. Barlow and P. Shapiro
An emergency letter to my brothers and sisters in the.

And who knows what effect Salem and its witches, only a few miles away, have had on me? He has been a production editor, production manager, manufacturing manager, art director, book designer, and once had his own design and production company. Now that our three daughters are well beyond high school sports, the time seems right to focus on real creativity. There is a time in the wheel we return to claim after we have followed the path to our goal and start who have broken the spell of passage from chromosome cord through bell-peaked power to worm-end under grass. We were born too old to be young from the past, we will die too young to be over. We know too much to be taken in unless we let ourselves be taken--and we will by the giving we make in the calling to break the beginning and ending. We are a calling. She never became what she was and you are, she never grew into your laughter. Do you understand where we were when the world began and the world we were when it ended? Time is only once and forever. And we were born before we gave birth to one another. Rwandan Mother, In three months, at least , people were murdered Her little girls are clotted with fat flies. She screams to scare away the mob of vultures and curses God for keeping her alive. She cannot move her legs, heavy as cooking pots. She screams to scare away the mob of vultures. Still she sees the doctor swinging his machete. He forced apart her legs, heavy as cooking pots, fire blooming in her throat and belly. Still she sees the doctor swinging his machete, even a priest--men she did and did not know-- fire blooming in their throats and bellies as they kicked and beat her, spit into her face. She waits for the clods of dirt to drop. She curses God for keeping her alive and waits for the clods of dirt to drop. Her little girls are clotted with fat flies. She was also a finalist for the Joy Harjo Award. Forthcoming is a Rooftop Chaplet from the Adrienne Lewis series. Lockie lives in California. She won the Poets on Parnassus Prize for poetry about the medical experience. The organ bursts Here Comes the Bride and the flower girl follows the incense smoke straight toward God. She drops rose petals snow-slow onto the carpet. At the altar the flower girl strokes the cold-skinned chalice, feels the holy blood sloshing against its hips. When the groom says I do she twists her birthstone ring round and around her finger. She tastes sea water in her eyes. Her petal-scented hands wipe away the sting. The flower girl leans toward the nuptial kiss. The groom whirls her round and round the ballroom. Her feet leave the ground. The crown flies off her head and the flower girl whoops, she whoops. She lives, writes, and teaches in Carbondale, Illinois, where she is on the creative writing faculty at Southern Illinois University. She serves as editor of Crab Orchard Review and director of the Young Writers Workshop, a summer writing conference for high school-aged writers. Look at you--you are falling apart and coming together all at once, sprouting and sizzling and popping off at the mouth, imperfections twitching up overnight to grab you, trip you, make you split-second vicious or so liquid-slow that all you yearn to do is sleep a sleep so voluptuous that you wake in a different country, an oblivion so deep it lets you become someone else. He has published four poetry collections in the past fifteen years and has won numerous awards, most notably first prize in the competition of the National Writers Union. His work has appeared in more than forty literary magazines. Nothing Lost After counting my losses, all that had vanished from my hands, I remember Miss Gordon saying in 8th grade science that the elements the world is composed of never dissipate, cannot be lost or separated from ourselves--only transformed. She herself was made up of wild hair and a dress I squinted to see through as she perched on her desk, legs crossed. She has taught English and creative writing to students of all ages and backgrounds for more than ten years. She is completing a mixed-genre memoir about growing up off the grid in the Maine woods in a log cabin built by her father. In fall , Ecotone will publish an excerpt of her memoir. Family Plot Let me remember what is mine to keep, melancholy frog-song echoing from the pond wake memory from its mortal sleep. Tree-filtered purity bundled deep; bones and duff slumber in a soil bond. Let me remember what is mine to keep. Tall alder shadows flicker and weep, ghosts of forgotten pastures do not respond: How the carrots rest in sandy beds, steep, filigree tops that flared in the garden--gone. Wake memory from its mortal sleep. A baby lies within a cruciform heap. By iron sides sing a love-song, let

me remember what is mine to keep; wake memory from its mortal sleep.

Essays on the student movement.. [Patrick Gleeson] State sails off the edge, by B. Barlow and P. Shapiro An emergency letter to my brothers and sisters in the.

I stopped pretending to myself that I was anything other than what I was, and began to direct all my energy into finishing the only work that mattered to me. Had I really succeeded at anything else, I might never have found the determination to succeed in the one arena I believed I truly belonged. I was set free, because my greatest fear had already been realized, and I was still alive And so rock bottom became the solid-foundation on which I rebuilt my life. Some failure in life is inevitable. It is impossible to live without failing at something, unless you live so cautiously that you might as well not have lived at all - in which case, you fail by default. Failure gave me an inner security that I had never attained by passing examinations. Failure taught me things about myself that I could have learned no other way. I discovered that I had a strong will, and more discipline than I had suspected; I also found out that I had friends whose value was truly above rubies. Rowling Love is a momentary-affliction ;. When she subsides you have to make a decision. Whether your roots have become so entwined together that it is inconceivable that you should ever leave each-other; or stay-together. Love is not breathlessness; an urge; lust; or carnal-excitement. Love is what is left over when being "in love" passion: I am just being-myself. You might ask; who am I? You are the world - to that person - everything you do makes a difference. Especially to that one. And that is as true for your work as it is for your lovers. Your work is going to fill a large part of your life, and the only way to be truly satisfied is to do what you believe is great work. And the only way to do great work is to love what you do. And, like any great relationship, it just gets better and better as the years roll on. So keep looking until you find it. We must assume our existence as broadly as we in any way can; everything, even the unheard-of, must be possible in it. This is at bottom the only courage that is demanded of us: Love discovers truths about individuals that others cannot see. We have killed him. Who will wipe the blood off-us? With what water could we purify ourself? What festivals of atonement; what sacred-games do we want to invent? Is not the greatness of the deed too-great for us? Must we not ourselves become gods simply to be worthy of it? Amor Fati Love of Fate: I do not want to war against Ugliness. I do not want to accuse; or even accuse the accusers. Looking away shall be my only respite. The Gay Science to know and not to know, to be conscious of complete truthfulness while telling carefully constructed lies, to hold simultaneously two opinions which cancelled out, knowing them to be contradictory and [yet] believing in both of them, to use logic against logic, to repudiate morality while laying claim to it - to forget, whenever it was necessary to forget, then to draw it back into memory again at the right moment when it was needed, and then promptly to forget it again - George Orwell def. In that threat hanging over our-heads; there is a lesson of Truth. As we face future; hierarchies; titles; honors are reduced to what they are in reality: The only certainty left to us is that of naked-suffering, common to all, intermingling its roots with those of a stubborn-Hope. When these things can be-said, then may that country boast of its Constitution; and Government. He told me to quit going to those places. How can life be what you want it to be? You waste your time with hate; and regret. What U Think of Me!!! Clowns will eat me. I make mistakes, I am out-of-control; and at times; hard-to-handle. To remember the other-world; in this-world; is to live in your true-inheritance. You are not a troubled-guest; on this earth; you are not an accident; amidst other accidents; you were invited from-another; and greater night; than the one; from which you have just-emerged. There is no one alive who is U-er than U". Seuss "There are a thousand-paths that have never yet been trodden.. My sons and daughters ought to study math; - and philosophy, geography, natural history, naval-architecture, navigation, commerce, and agriculture; in-order to give their Children a right to study painting, poetry, music, architecture; ART; design; dance; tapestry, and porcelain. John Adams - U. She alone - will stand against the Vampires, the Demons and the forces-of- Darkness. She is the Slayer. For Love; if it finds-you-worthy; will direct your-Course. So throw off the bowlines. Sail away from the safe-harbor. Catch the trade-winds in your sails. It is the flash-of-a-Firefly, in the night. It is the breath-of-a-buffalo, in the wintertime. It is the little-shadow, which runs across the grass, and loses-itself in the Sunset. If you bring love to that moment-not

discouragement-you will find the strength there. Any disaster you can survive is an improvement in your character, your stature, and your life. It is then burst-into-flame by an Encounter - with another human-being. We should all be thankful for those people who rekindle the inner-Spirit. My mood that makes the Weather; turns-the-Seasons; Spins-the-Stars. In all situations, my Response decides whether a crisis is escalated; or de-escalated, and a person humanized; or de-humanized. Treating people as they ought to be; and can be; we help one-another become what we are capable; of; and essentially; potentially; are For lovely eyes, seek out the good in people. For a slim figure, share your food with the hungry. For poise, walk with the knowledge that you never walk alone. If you ever need a helping-hand, you will find one at the end of each of your arms. As you grow older, you Discover that you have two hands; one for helping yourself, and the other for helping others. But it is those who question-Power; who make a contribution just-as-great; - For it is those who question-Power; who determine- whether we use-Power; or Power-uses-us. Kennedy "Every single-Empire; in its official-discourse - has said - that it is not like all the others, that its circumstances are special, that it has a mission to enlighten; civilize; bring-order; and Democracy; and that it uses-Force - only as a last-resort. And, sadder still, there always is a chorus of willing-intellectual s to say calming-words about benign; or altruistic empires.

3: The Stowaway (Audiobook) by Laurie Gwen Shapiro | www.enganchecubano.com

Nature [Lond.]), but an exactly analogous site cannot exist in stellacyanin as it lacks methionine. The copper coordination in stellacyanin has been studied by x-ray edge absorption and extended x-ray absorption fine structure (EXAFS) analysis.

4: Writecorner Press - Poetry Contest

ways in which international law can and cannot shape state behavior. This part of the book will draw, in part, on our article on "outcasting" as a mechanism for enforcing international law (Hathaway & Shapiro, Outcasting: The Enforcement of Domestic and International Law, Yale Law Journal ()). I look forward to the conversation.

Background[edit] On 9 September , U2 announced their thirteenth studio album, Songs of Innocence , at an Apple product launch event, and released it digitally the same day to all iTunes Store customers at no cost. It should be ready soon enough Bono is trying to capitalize on that momentum and that sharpness. The following week, he flew to Monaco to join the group for what he described as a "two-week tryout". Barlow was surprised by how receptive the band members were to his ideas and how quickly they trusted him, particularly Bono. One of the first tasks that Barlow was given was helping the band progress "The Little Things That You Give You Away" past the idea stage, something that numerous producers before him had failed to do. The producer described the process as "piecing individual pieces of a jigsaw puzzle". By his estimation, only 10 percent of his work took place in actual recording studios—most of it was done in dressing rooms, hotel rooms, and mansions. Around this time, the Edge wrote a new song provisionally titled "Tightrope". They outfitted the house with a makeshift recording studio and jammed in the parlor overlooking the bay. Mullen used a second drum kit positioned in an echoing stairwell. Things are still in their rough state, but sounding really great. You might see a few things in September or October though. So we gave ourselves a moment to reflect if this was a good idea, and concluded it might be better to wait for a minute. To pause, see what was going on in the world, see if the album we had just finished was what we wanted to say. The group were hoping to find arrangements that would work live and on record, so as to avoid their habit of recording, releasing, and ultimately rearranging songs when preparing for a tour. As the sessions continued, Bono had what the Edge called a "brush with mortality". However, he said the episode affected the overall mood of the album and made him realize "Not surrendering to melancholy is the most important thing if you are going to fight your way out of whatever corner you are in. The Edge called it "the best of the band chemistry mixed in with the best of the 21st-century production technology. In an April cover story for Mojo , Clayton said there were 15 or 16 songs that were contenders for the album, which they still hoped to whittle down to During an interview with Hot Press on the second date of the tour, Bono mentioned a new song entitled "American Soul". They ultimately decided to focus it on something other than the band members and to continue the family theme from the cover of Songs of Innocence, which depicted Mullen with his son, Elvis. Contrasting with this, Sian is wearing a US M1 military helmet , which was meant to symbolise the harsh realities of the world they must face. The Edge said that the helmet gave the photo more tension and that it would have been "a little too sleek" otherwise. The bottom of the letters said "U2 will announce" but blacked-out the release title and date. Amazon Music produced online radio programming about the band called The U2 Experience. Released in partnership with Third Man Records , the single includes the album version of the song and a remix by Jackknife Lee.

5: Essays on the student movement in SearchWorks catalog

This is a general list of composers who have written music for the musical theatre, along with their works organized by first production www.enganchecubano.com list primarily contains musicals, but also includes links to film adaptations.

His was a prominent family of English ancestry in St. Louis. His maternal uncle, Ivy Lee, was an advertising pioneer later employed as a publicist for the Rockefellers. His father ran an antique and gift shop, Cobblestone Gardens in St. Louis; and later in Palm Beach, Florida when they relocated. He attended John Burroughs School in St. Louis where his first published essay, "Personal Magnetism" which revolved around telepathic mind-control was printed in the John Burroughs Review in 1907. The school was a boarding school for the wealthy, "where the spindly sons of the rich could be transformed into manly specimens". According to his own account, he destroyed these later, ashamed of their content. Yet, according to his own account, he left voluntarily: Louis Harvard University[edit] Burroughs finished high school at Taylor School in Clayton, Missouri, and in 1908, left home to pursue an arts degree at Harvard University, where he was affiliated with Adams House. During the summers, he worked as a cub reporter for the St. Louis Post-Dispatch, covering the police docket. He disliked the work, and refused to cover some events, like the death of a drowned child. He lost his virginity in an East St. Louis, Illinois brothel that summer with a female prostitute whom he regularly patronized. He visited lesbian dives, piano bars, and the Harlem and Greenwich Village homosexual underground with Richard Stern, a wealthy friend from Kansas City. They would drive from Boston to New York in a reckless fashion. Once, Stern scared Burroughs so badly that he asked to be let out of the vehicle. It was enough to keep him going, and indeed it guaranteed his survival for the next twenty-five years, arriving with welcome regularity. The allowance was a ticket to freedom; it allowed him to live where he wanted to and to forgo employment. He traveled to Europe and became involved in Austrian and Hungarian Weimar-era LGBT culture; he picked up young men in steam baths in Vienna and moved in a circle of exiles, homosexuals, and runaways. The two were never romantically involved, but Burroughs married her, in Croatia, against the wishes of his parents, to allow her to gain a visa to the United States. She made her way to New York City, and eventually divorced Burroughs, although they remained friends for many years. In 1917, his mental health became a concern for his parents, especially after he deliberately severed the last joint of his left little finger at the knuckle to impress a man with whom he was infatuated. But when he was classified as a 1-A Infantry, not an officer, he became dejected. After being evaluated by a family friend, who was also a neurologist at a psychiatric treatment center, Burroughs waited five months in limbo at Jefferson Barracks outside St. Louis before being discharged. During that time he met a Chicago soldier also awaiting release, and once Burroughs was free, he moved to Chicago and held a variety of jobs, including one as an exterminator. When two of his friends from St. Louis, the two fledgling authors were unable to get it published, but the manuscript was eventually published in November by Grove Press and Penguin Books. During this time, Burroughs began using morphine and became addicted. He eventually sold heroin in Greenwich Village to support his habit. Vollmer also became an addict, but her drug of choice was Benzedrine, an amphetamine sold over the counter at that time. Because of her addiction and social circle, her husband immediately divorced her after returning from the war. With some urging from Allen Ginsberg, and also perhaps Kerouac, Burroughs became intellectually and emotionally linked with Vollmer and by the summer of 1925 had moved in with Vollmer and her daughter. In spring 1926, Burroughs was arrested for forging a narcotics prescription. Vollmer asked her psychiatrist, a Dr. As part of his release, Burroughs returned to St. Louis. Upon hearing this, Burroughs immediately returned to New York City to gain her release, asking her to marry him. Their marriage was never formalized, but she lived as his common-law wife. They returned to St. Louis. Their son, William S. The family moved briefly to New Orleans in 1927. Vollmer and their children followed him. Burroughs also attended classes at the Mexico City College in studying Spanish, as well as "Mexican picture writing" codices and the Mayan language with R. Burroughs shot Vollmer in the head, killing her almost immediately. Louis to live with his grandparents. Burroughs reported every Monday morning to the jail in Mexico City while his prominent Mexican attorney worked to resolve the case. According to James Grauerholz, two witnesses had

agreed to testify that the gun had fired accidentally while he was checking to see if it was loaded, with ballistics experts bribed to support this story. He was convicted in absentia of homicide and was given a two-year suspended sentence. June 8, , "Joan, what kind of knowledge have the dead? What do you remember of us? I live with the constant threat of possession, and a constant need to escape from possession, from Control. So the death of Joan brought me in contact with the invader, the Ugly Spirit, and maneuvered me into a life long struggle, in which I have had no choice except to write my way out. I mean a definite possessing entity. The ugly American", and took part in a shamanic ceremony with the explicit aim of exorcising the Ugly Spirit. In any case, he had begun to write in Years later, in the documentary What Happened to Kerouac? Before Vollmer died, Burroughs had largely completed his first novel, Junkie , which was written at the urging of Allen Ginsberg , who was instrumental in getting the work published, even as a cheap mass-market paperback. Confessions of an Unredeemed Drug Addict it was later republished as Junkie, then in as Junky, and finally in as Junky: Due to legal problems, he was unable to live in the cities toward which he was most inclined. He realized that in the Moroccan culture he had found an environment that synchronized with his temperament and afforded no hindrances to pursuing his interests and indulging in his chosen activities. He left for Tangier in November and spent the next four years there working on the fiction that would later become Naked Lunch, as well as attempting to write commercial articles about Tangier. He sent these writings to Ginsberg, his literary agent for Junkie, but none was published until when Interzone, a collection of short stories, was published. Under the strong influence of a marijuana confection known as majoun and a German-made opioid called Eukodol , Burroughs settled in to write. Eventually, Ginsberg and Kerouac, who had traveled to Tangier in , helped Burroughs type, edit, and arrange these episodes into Naked Lunch. Naked Lunch Whereas Junkie and Queer were conventional in style, Naked Lunch was his first venture into a nonlinear style. He began slicing up phrases and words to create new sentences. Scenes were slid together with little care for narrative. Perhaps thinking of his crazed physician, Dr. Benway, he described Naked Lunch as a book that could be cut into at any point. Although not considered science fiction , the book does seem to forecast AIDS , liposuction , and the crack pandemic. Irving Rosenthal , student editor of Chicago Review, a quarterly journal partially subsidized by the university, promised to publish more excerpts from Naked Lunch, but he was fired from his position in after Chicago Daily News columnist Jack Mabley called the first excerpt obscene. Rosenthal went on to publish more in his newly created literary journal Big Table No. John Ciardi did get a copy and wrote a positive review of the work, prompting a telegram from Allen Ginsberg praising the review. Once published in the United States, Naked Lunch was prosecuted as obscene by the Commonwealth of Massachusetts, followed by other states. In , the Massachusetts Supreme Judicial Court declared the work "not obscene" on the basis of criteria developed largely to defend the book. In this sense, the cut-up method may be considered as analogous to the collage method in the visual arts. New restored editions of The Nova Trilogy or Cut-Up Trilogy , edited by Oliver Harris President of the European Beat Studies Network and published in , included notes and materials to reveal the care with which Burroughs used his methods and the complex histories of his manuscripts. Paris and the "Beat Hotel"[edit] Burroughs moved into a rundown hotel in the Latin Quarter of Paris in when Naked Lunch was still looking for a publisher. Tangier , with its political unrest, and criminals with whom he had become involved, became dangerous to Burroughs. He left behind a criminal charge which eventually caught up with him in Paris. Paul Lund, a British former career criminal and cigarette smuggler whom Burroughs met in Tangier, was arrested on suspicion of importing narcotics into France. Lund gave up Burroughs, and evidence implicated Burroughs in the importation of narcotics into France. When the Moroccan authorities forwarded their investigation to French officials, Burroughs faced criminal charges in Paris for conspiracy to import opiates. It was during this impending case that Maurice Girodias published Naked Lunch; its appearance helped to get Burroughs a suspended sentence, since a literary career, according to Ted Morgan, is a respected profession in France. The " Beat Hotel " was a typical European-style boarding house hotel, with common toilets on every floor, and a small place for personal cooking in the room. Life there was documented by the photographer Harold Chapman , who lived in the attic room. This shabby, inexpensive hotel was populated by Gregory Corso , Ginsberg and Peter Orlovsky for several months after Naked Lunch first appeared. The actual process by

which *Naked Lunch* was published was partly a function of its "cut-up" presentation to the printer. Girodias had given Burroughs only ten days to prepare the manuscript for print galleys, and Burroughs sent over the manuscript in pieces, preparing the parts in no particular order. When it was published in this authentically random manner, Burroughs liked it better than the initial plan. Dent, a well-known English medical doctor who spearheaded a reputedly painless heroin withdrawal treatment using the drug apomorphine. Burroughs however was convinced. Following his first cure, he wrote a detailed appreciation of apomorphine and other cures, which he submitted to *The British Journal of Addiction* Vol. Though he ultimately relapsed, Burroughs ended up working out of London for six years, traveling back to the United States on several occasions, including one time escorting his son to the Lexington Narcotics Farm and Prison after the younger Burroughs had been convicted of prescription fraud in Florida. He claims he went through the most excruciating two months of opiate withdrawal while seeing his son through his trial and sentencing, traveling with Billy to Lexington, Kentucky from Miami to ensure that his son entered the hospital that he had once spent time in as a volunteer admission. Louis, Missouri, taking a large advance from *Playboy* to write an article about his trip back to St. Southern and Burroughs, who had first become acquainted in London, would remain lifelong friends and collaborators.

6: Copper electron-nuclear double resonance of cytochrome c oxidase. - Europe PMC Article - Europe PMC

William Seward Burroughs II (/ ˈ ɛ ː b ɛ ɔ ː r o ʊ ː z / ; February 5, - August 2,) was an American writer and visual artist. He was a primary figure of the Beat Generation and a major postmodernist author whose influence is considered to have affected a range of popular culture as well as literature.

I want to just cut open myself open and let all my emotions just spill out. So this might be one of those reviews. The kind that will make no sense until you read the book and understand the way a heart can break and heal and hope all at the same time. We met Sasha Cherlin as a twelve year old girl in Slack. Ten years to become a member of society and not just a child assassin. Ten years to get over the broken heart of her broken promise. But if the rumors are true, Nick Tate is returning to the states. Returning for what is the question that everyone wants to know, but only Nick holds the answer to. Let me touch on the sexy times a bit. At first I was a little worried about a grown up Sasha having sex. I imagined Ford busting in to ruin the moment every time. Since she was little. But what I loved most was that the sex in this was part of two characters progression through this story. It was not too subtle, it was not overdone. It was just right. There were far too many things going on in this story to make it too heavy on the sex. This story was all about the emotions. I cried like a baby. I spent the weeks leading up to this release rereading all twelve books in this journey. So much was fresh in my mind. So many characters that I loved. I wanted to be prepared to read Wasted Lust. I needed to be up to speed. I think doing that turned this conclusion into an epic experience. There is no doubt that JA Huss writes stories that are twisty, dark and yet, still remain romances â€” but Wasted Lust was all of that but more. Wasted Lust was that climatic moment where everything that had happened gets closure. We get answers to all the questions we had. We get our hope restored. We get our hearts healed although we got it smashed just moments before. I think the fact that this book was the conclusion of the whole Company Saga gives it an advantage because the emotions were already there for all these characters. There was no need to find a connection, it had been forged long ago. It will be OK. I love that this book reached inside and affected me. I love that even thinking about this story right now has me choked up all over again â€” because that is what it is all about. Julie makes you feel and that is the best gift an author can give you. Wasted Lust delivered in every way imaginable. A little girl with braces who loved dinosaurs stole my heart and as a grown woman, she amazed me. Nick Tate was a character that was cloaked in so much mystery. I loved what I saw. I claimed Jax a while back. I can show it to you. He was everything I needed him to be. Like, your life is missing something. For fans of Julie, who have read all these books there is no doubt that this is going to be loved.

8: Wasted Lust by J.A. Huss

Songs of Experience is the 14th studio album by Irish rock band U2. Released on 1 December, it was produced by Jacknife Lee and Ryan Tedder with Steve Lillywhite, Andy Barlow, Jolyon Thomas, Brent Kutzle, Paul Epworth, Danger Mouse, and Declan Gaffney.

About Related Links 1. The addition of significant quantities of data acquired with modern data-acquisition devices has enabled us to measure several additional relativistic phenomena for the first time in this system, while also refining previously measured ones. Among the parameters newly measured with various degrees of accuracy are the Shapiro gravitational propagation delay, a relativistic correction to the elliptical orbital shape, and the time derivative of projected pulsar semimajor axis. All of the the data used in this study are published with this paper in a. We describe the observations used in this work in Section 2, while Section 3 delineates the scope and methods of our relativistic analyses of these data. The results of our fits to the data are explained in Section 4, and their applications for tests of relativistic gravitation are discussed in Section 5. We conclude in Section 6 by summarizing our work and placing it in the context of results from other relativistic binary pulsar systems. DATA The data for our analyses consists of pulse times-of-arrival TOAs derived from five-minute integrations of the pulsar signal at frequencies near MHz measured at Arecibo Observatory from to Geodetic precession of the pulsar spin axis has induced pulse profile changes Weisberg et al. To do so, we adopted the following process. First, we formed a pulse profile at each frequency band for each two-week session. Each resulting "session-band" standard profile has a much greater signal-to-noise ratio than does a single five-minute integration, while still being short enough to avoid the secular changes we are trying to measure. Next, we measured the offset of the midpoint of this session-band standard profile with respect to the grand standard profile. The midpoint is assumed to correspond to a fixed longitude on the pulsar regardless of profile shifts. Then we fitted out a "primary" linear model of the profile offsets as a function of time at each band. In this fashion, we provided an empirically determined, model independent, first-order TOA correction that accounts for the effects of profile changes, thereby minimizing the long-term effects of profile shifts that might be mistaken as the signature of other phenomena. We next fitted the timing model to all such "primarily offsetted" TOAs and chose the resulting dispersion measure as our nominal value. Finally, secondary offsets were determined through single session fits, where the dispersion measure was fixed at its nominal value and the residual offset of each band was fitted for and then removed. This process ensures that the infinite-frequency TOAs calculated from each band and session are self-consistently de-dispersed 1 and offsetted. To verify that the above profile variation correction process does not contaminate our parameter measurements, we also employed an alternate approach, fitting for an offset for each band in each session simultaneously with all other parameters Demorest et al. Among the fitted parameters, we determined improved values of the pulsar spin and orbital parameters that were published in WNT, plus a number of new ones. For the first time, we have successfully fitted for the Shapiro gravitational propagation delay while also placing constraints on two additional ones: The improved, previously fitted parameters include the pulsar spin frequency and derivative \dot{s} , \dot{f} , The newly fitted post-Keplerian parameters include the following: All of the new parameters are discussed in greater detail in Sections 3. Our software implementation of their parametrization for high-eccentricity pulsars is available in our augmented version of TEMPO see footnote 2. The measurements of either pair of Shapiro parameters, s , r or \dot{s} , \dot{f} , can be utilized in either of two different manners, as described below. First, if general relativity is assumed to be the correct theory of gravitation, then either pair of Shapiro measurables can be utilized as independent constraints on the orbital inclination and binary companion mass. We summarize the theory here, and then apply it in Section 4. The alternate FW parametrization of the Shapiro delay gives while m_2 is a combination of the two measurables h_3 , Alternatively, each measured parameter of the Shapiro pair can be considered to be an independent test of relativistic gravitation. We apply this procedure in Section 5. However, subsequent observations of pulse profile changes have shown that this is not the case. This procedure, detailed below, is more closely tailored to parameters determinable from TOA analyses. DT92 show that aberration will bias the observed value of the

relativistic orbital shape parameter, e , with respect to its intrinsic value, where the small parameter A is defined as $A = \frac{v}{c}$. Hence the observational bias can be removed, given measurements of the aberration parameter A and the Keplerian quantity x . The corrected value could then serve as an additional test of gravitation theory. However, the fractional corrections to x and e are tiny. More interesting is the effect of geodetic spin axis precession on the time-derivatives of these parameters, because DT92 show that they are potentially measurable. The precessional motion will cause the aberration geometry to change, resulting in secular changes to A and hence to e on precession timescales where τ_p is the geodetic precession period of the pulsar spin axis. The observed, normalized time derivative of e results from the sum of two phenomena where "GW" designates effects due to gravitational waves, while the observed, normalized time derivative of x stems from a combination of five terms: The final term of Equation 13, involving changes in the Doppler factor D of Equation 1, is caused by the relative line of sight galactic accelerations of the solar system and the binary system. The above equations demonstrate that measurements of e or x , along with experimental or theoretical determinations of some of the other quantities appearing therein, can usefully constrain others. See Tables 1 and 2 for our results and their estimated uncertainties. This convention differs from our previous practice, wherein many uncertainties were instead estimated from fitted parameter variations across multiple reasonable fits. Astrometric and Spin Parameters Parameter.

9: Of Mind and Music () - Soundtracks - IMDb

"Black sails" is a series based on Robert Stevenson's "Treasure island". Its main character is old good Captain Flint and his crew who takes John Silver as a new member into that dangerous and adventurous community.
