

1: How to Have Fun While Studying (with Pictures) - wikiHow

Edit Article How to Make Studying Easy. In this Article: Using your best learning approaches Using specific habits to ease studying Community Q&A Studying can feel like an enormous challenge, especially when tests and exams are looming.

Western thankfully offers a tremendous amount of support throughout your academic careers; and taking advantage of these resources will be truly beneficial. It can be hard sometimes to keep track of everything available, so this should help you embark on an academically successful year. Plan out your week ahead of time: This will help you stay organized and keep track of upcoming due dates. Use this weekly planning guide provided by Learning Skills Services at Student Development Center, or create your own. Spend a little bit of time reviewing for each class, and review the information that you learned during class at the end of the day. Be sure to leave some time for yourself. Keeping yourself organized is one key way to make sure that you never run out of time to finish assignments or study for exams. Also, keep in mind that Learning Skills Services also offers an e-newsletter with strategies for success, for both undergraduate and graduate students. Check out their website for more details about this handy newsletter. While this may seem intuitive, not enough students take advantage of the abundant knowledge that their professors and TAs have to offer. Most are happy to answer questions during office hours, and are willing to arrange additional appointments to fit your schedule. In some cases, they may even be able to answer your questions quickly and clearly through email; all you have to do is make that first step. Be sure to check your course outlines if your professors have any specific rules about emails and remember, professors want to help you succeed! Check out the Writing Support Centre: The Writing Support Center offers a wide range of services for both undergraduate and graduate students, including a drop-in service that runs from 10:00am to 5:00pm. Alternatively, you can sign up for a minute one-on-one session with a writing counselor. Take a look at their website for more details about all the services they offer and this page to see a list of writing workshops and seminars. Finally, the most crucial note of all, take care of yourself: As important as studying is, your mental and physical health always comes first. Go to the gym, or watch a movie with your friends. If you feel tired during the day, it might be helpful to take a minute nap, check out this article for 13 tips to planning the best nap. With these helpful tips, hopefully the upcoming assignments and exams seem like less of a trek. Upcoming sessions for international students:

2: How to Make Studying Easy: 12 Steps (with Pictures) - wikiHow

My college mentor has done a great service to students by providing this easy-to-read book on study skills. With students' time being limited, it is written in such a way that the key points are addressed without information overload.

Margaret October 8, at I have for years had trouble studying or working with music. It is very distracting to me since I have synesthesia. I see music , but several teachers and other people have told me that I would study better with music in the background. It always seems to distract. Now I know that I am not the only one. Nice topic, I liked the way you started with questions that you sort of answered at the end. Good, informative sources as well. Do you prefer to study with music? Or since you are a movie buff with a movie going on in the background? Thanks, Sheela Doraiswamy October 8, at As for me, I do like having music on, but I prefer instrumental music when I study. As I mentioned in my post, movie scores work pretty well for me, usually. Another thing I think would be an interesting research topic would be looking at whether the language the vocal music is in will have an effect. Unfortunately I have to save my movie watching for when my homework is done! Margaret October 9, at I can put on a good marathon and do lots of homework admittedly not as quickly as without tv. I would like to see more research into this as well. Margaret Elizabeth Fryer October 9, at TV is a different story. I never work in front of a TV, but I can read on one end of the couch while my husband watches TV from the other. I liked seeing the ref to U. Dayton, my undergrad alma mater. You all need to assess whether writing in first person adds anything to the post. Andrew Maynard October 9, at But given that there is still a trend toward more personal writing styles, and that blogs are by their nature personal, I wonder whether you could say more about how you would gauge whether to write in first person or not. Thanks Tarun Johnson October 12, at 1: When we were kids, my dad always used to get angry at my brother and me because we could never study without music running in the background, sometimes it was TV!! As you said Sheela, this depends on person to person. I guess it depends whether you want to study with music in the background, or listen to music with a book in front of you! Sarah February 7, at I lison to his songs in all my classes and even gym. I need his songs to help me get through the long time of homework. Hunter hayes helps me alot try his songs out SouthPaw February 21, at 3: I like to consider music a mild stimulant and an entertainment. Just for a little perspective I used to work in isolation on a mine site and the music was the only thing that could keep me sane. You must admit though now days everyone is a bit of a sensation seeker eg. A-Man February 28, at 7: It also turns out We both got the same results! I will soon update a website and give it to you for more info and research. I just have one question though, Was the testing all performed on the same age group of people or were there different people involved? I am so glad we have gotten the same results. When you use Vuze, you will then be able to download the Dub Turbo torrent file to your laptop or desktop. I will look on and await some results before i say anything.

3: Six Steps to Smarter Studying

Studying with a friend is an almost guaranteed way to make studying more fun, and it's enormously beneficial to those given to procrastination. It can be difficult to motivate oneself when studying alone, but with someone else there to spur you on (or for you to spur on!), everything seems much easier - particularly when you can help each.

You could spend days on end trying to cram it all in but the results will not be very promising. Thankfully, there are much more fun and rewarding study techniques that can help you learn how to study well and improve your exam results. Here are some of those study techniques: Underlining Underlining is one of the simplest and best known study tips. Ideally you should do a comprehensive read of a text before you even consider underlining anything. Only on the second reading should you proceed to underline the most notable aspects. The act of underlining something means you are engaging with certain key aspects of the text. There is no need to go crazy and highlight entire blocks of text. You should highlight one key sentence per paragraph and a few important phrases here and there. Essentially the aim of note-taking is to summarise lectures or articles in your own words so you can easily remember the ideas. In most cases, the key is to be able to summarise the content as quickly as possible while not leaving out any key info. Mind Mapping A good Mind Map can save you many hours of study and further consolidate your knowledge for your exams. Mind Maps are an extremely versatile tools. They can be used for brainstorming, outlining essays or study topics and for general exam preparation. Flashcards Using Flashcards is a particularly effective method of learning when trying to assimilate different facts, dates, formulas or vocabulary. Subjects such as History, Physics, Maths, Chemistry, Geography or any language are made much easier if you incorporate Flashcards in to your study. Using Flashcards for memorising can become a fun process unlike a lot of other study tools. On top of this, online Flashcards allow you to save a lot of work and time in actually creating your Flashcard decks. Case Studies Sometimes it can be difficult to grasp the implications of some theories. This is where studying case studies can be a big help. Case studies can help you visualise a theory and place it in a more familiar and realistic context. This is especially useful in business or law subjects. Quizzes Quizzes are an excellent way to review study notes in the weeks and days before an exam. Quizzes can show where your strengths and weaknesses are, so it allows you to focus your efforts more precisely. Moreover, if you share your Study Quiz with your classmates and test each other as much as possible you can discover even more details and areas you may have overlooked. So before any exam, make sure you create and share a bunch of different Quizzes with your Friends. Brainstorming is a great way to expand every possible idea out of any topic. Just get a bunch of friends together and shoot the breeze, there are no wrong answers when brainstorming – just talk and capture the ideas, you can review afterward. Some ideas that sounded great before will be ruled out straight away afterwards while others that sounded crazy before will be seen to have great promise. Using Mind Maps is an ideal way of capturing all this info as it mirrors the explosive nature of your thought processes. Mnemonic Rules Mnemonics are especially useful when memorising lists and sets. Mnemonics rules basically work by associating certain concepts with other concepts that are more familiar to us. There are many different ways to make mnemonics and these can be individual to the person. This Mnemonic rule is for remember the primary colours: Organising Your Study One of the most effective study skills is also one of the most often overlooked; this is organising your study. Creating a study timetable gives you goals and a time in which to achieve them. Having a study timetable as you study is greatly motivational. Drawing Many people find it easier to recall images rather than text, that is why they are better able to memorise concepts if they associate them with pictures or drawings. However, what is new is the way in which you can now utilise them. Today new technologies have changed how we can interact with these study techniques. So it makes sense to reassess how you use these techniques and see what new tools and techniques you can incorporate into your study. 4: How to Study: 10 Study Tips to Improve your Learning

Bible Study Made Easy is not just some course you take and get through. It's a community that is committed to your spiritual growth. With easy-to-use checklists, cheat sheets, resource guides and worksheets you can use for a lifetime, you will be well equipped with a strategic plan to study the Bible for a lifetime!

I remove all the overwhelm and make things focused and organized! Pass the Dental Boards has helped hundreds of students study and pass the dental boards! I will teach you the most important concepts. No fluff, just high yield information. Dental Anatomy I have had many students tell me this section was so thorough, that they destroyed it on the exam. I provide detailed breakdowns so comprehensive, yet so focused that you will be a tooth morphology pro in no time. In this module you will find my famous series, facts to ace dental anatomy, learn occlusion in 15 minutes, eruption times, pediatric teeth, and more! You will walk away from these videos with a deeper understanding of proteins, enzymes, krebs cycle, glycolysis, lipids, and other difficult subjects. If you have ever dreaded studying biochem, then this module alone is worth the price of admission. The problem with micro is there is so much memorization required. I simplify it with awesome memory aids and mnemonics. The little details will stick. With only 2 weeks and a first aid book or dental deck that is close to pages it is important to find efficient and high yield study materials. This is one of those materials. Every video lecture has a powerpoint just for you to print, study, mark up, and memorize to your hearts content! Testlet Tips Video Series Lectures with the most important information you need to know about the most tested on diseases. Includes lectures on neurodegenerative diseases such as Parkinsons and Alzheimers. I consistently have students tell me how helpful these have been to answer testlet questions on their board exam. The Overwhelmed Dental Student These videos will simplify the content for you and reduce being overwhelmed International Dentists Are you applying for licensure in the US? I will help with that. This is the most requested and coveted request I get. I know you want to be able to print these lectures out, follow along the videos, and write and take notes. These lectures alone are worth their weight in gold, but when paired with my videos the combination is really invaluable to your study of the dental boards. Will This Make It Easier? You will be able to dive in deeper after I set the foundation for you. Do you have a membership agreement, or a privacy policy, or a terms of use. Basically are you legit? Click the links to go to the respective pages.

5: Pass The Dental Boards | Let's Make Board Studying a Whole Lot Easier

It will make it easier for you to learn and do well in class, especially as you move up to middle school and high school. Here are six steps to smarter studying: Pay attention in class.

How to Study Chemistry: Chemistry is a subject that is often studied alongside Physics. However, it is important to remember that the two subjects are very different. With this in mind, we have distinguished and identified the best methods and study techniques for each. **How to Study Chemistry 1:** However, its effect in learning Chemistry can be seen twofold. The technique encourages students to study the lesson before going to class. This concept familiarises the student with the subject content making the class much easier to follow. Students can then consolidate that knowledge and use class time to raise important questions. You have to be selective with what you memorise. When we study, efforts should focus on understanding concepts rather than memorising every last detail. Once we have gathered the important facts, we can implement this selective memory method. But remember, under no circumstances should memorisation replace understanding. **Use Flashcards** The course is full of Chemical symbols, Chemical formulas and very scientific language. **Interpreting** all of these concepts correctly is key to your success in Chemistry. Although this may seem like an obvious point, large numbers of students fail Chemistry each year because they underestimate the importance of understanding this complex subject. With this in mind, study sheets or flashcards are ideal for organising and storing chemical symbols and formulas on. Once you have created a good set of flashcards containing the periodic table of the elements and formulas, memorisation will become much easier. **Take Notes** It is not enough to simply pay attention in class. In Chemistry, it is necessary to write down everything and understand what you taking notes on. Formulas and equations are far easier to understand once written down and presented in the right way. If you want a simple way to create some great notes wherever you are, try our **Online Notes** tool. **Practice Daily** Continuing with the previous point, one of the key areas in the study of Chemistry is practice. Solving equations and practical problems should be a feature part of your study routine. Test your knowledge with sample Chemistry tests on a regular basis. This will prepare you for your exam and assesses your level of understanding of Chemistry to date. Moreover, as we mentioned in the subject of Biology, it is important to go to the lab as often as possible. There is no substitute for hands on experience. It strengthens our knowledge of Chemistry in a practical environment. **Discover How To Study Chemistry** Finally, we would like to emphasise that, although we have separated these study methods into 5 sections, these are not stand alone ways to succeed. Rather, when used together, they will increase effectiveness of your study time. In addition, Chemistry includes many fields of study, each with its own particulars, so it is necessary that you evaluate your own strengths and weaknesses and choose the study method that best suits you. Some of these fields have a heavy load of Maths or Physics, so mastering these subjects is also crucial. This will facilitate the introduction of formulas, equations and other mathematical concepts. Do you have any other tips on how to study Chemistry? If so, share them with us in the comments section below! This entry was posted in Exam Tips and tagged chemistry , How to Study , online study , study tips.

6: Dua for Students

Studying Made Easy. Sp S on S so S red S Â· May 3 Â· CIMA ebooks now available and comes with Revision kits Kaplan. @studyingmadeeasy. Studying Made Easy.

Someone probably gave you a few lessons and then you practiced a lot. You can learn how to study in much the same way. No one is born knowing how to study. You need to learn a few study skills and then practice them. Why work on your study skills? It will make it easier for you to learn and do well in class, especially as you move up to middle school and high school. Here are six steps to smarter studying: Pay attention in class. Plan ahead for tests and projects. If you have a bunch of stuff to learn, break it into smaller chunks. Ask for help if you get stuck. When you pay attention in class and take good notes, you are starting the process of learning and studying. Do you have trouble paying attention in class? Are you sitting next to a loud person? Is it hard to see the board? Tell your teacher or parents about any problems that are preventing you from paying attention and taking good notes. Start by writing down facts that your teacher mentions or writes on the board during class. Try your best to use good handwriting so you can read your notes later. It also makes it hard to do your best. Ask for a cool calendar something you like and can keep by your desk or study area and write down your test and assignment due dates. You can then plan how much to do after school each day, and how much time to spend on each topic. Are lessons or extracurricular activities making it hard to find time to study? Ask your mom or dad how to make a schedule of what to do when. Instead of thinking about all of the words at once, try breaking them down into five-word chunks and working on one or two different chunks each night. The more days you spend reviewing something, the more likely it is to stick in your brain. There are also tricks called mnemonic say: For example, are you trying to learn the eight planets and their order from the sun? Your teacher can give you ideas, too. Another way to break it up is to study regularly instead of just the night before. How much studying should you do each night? Your teacher can help you figure it out. Most brains can only pay attention for about 45 minutes. Just fight the temptation to turn on the TV or stop working! You can check yourself by reading through your notes. Does it all make sense? If not, ask your teacher to go over it with you.

7: Does Music Help You Study? - Mind the Science Gap

We build online platforms to simplify the application processes for higher studies abroad. Currently we have platforms for Germany, USA and Poland.

You should be very attentive to his words. You should not converse with others in his presence and you should allow the people to benefit from his knowledge. You should not speak ill of anyone before him. If anybody speaks ill of him in your presence, you should defend him. You should conceal his shortcomings and bring his virtues to light. You should not associate with his enemies and should not dispute with his friends. If you act on these lines the angels of Allah will testify that you have paid attention to him and have acquired knowledge for the sake of Allah and not to attract the attention of the people. And the right of your pupils on you is that you should realize that in granting you knowledge and opening its path to you, Allah has appointed you to be their guardian. In case, therefore, you teach them properly and do not frighten them and are not furious with them, Allah will, through His kindness, increase your knowledge. But if you drive the people away from knowledge and, as and when they approach you for it, you frighten them and get annoyed with them, it will only be appropriate that the Almighty Allah may take away the light of knowledge from you and may degrade you in the eyes of the people. To his credit will be so many good deeds that they will be heaps, or towering mountains. All this for me-and what have I done for them? Whoever taught the path to wrongdoing will have as much punishment as those who acted upon such teachings without in any way decreasing the punishment of the latter. The real value of a person is his knowledge and the perfection of his attainments. His worth and position would be in accordance with the status of knowledge and attainment he holds. Eyes that are conscious of real values do not look at the face, features, tallness of stature, size or worldly pomp and position but look at the attainments of a person and assess his worth according to these attainments. The conclusion is that a man should strive to acquire distinction and knowledge. The worth of every person is according to the extent of his knowledge. Therefore, he who acts according to his knowledge, has really delivered His deposit. If a person acquires a branch of knowledge, it is better for him than possessing as much gold as the height of Abu Qubais Mount which he would distribute in the way of Allah. In fact, if people knew the merits and the goodness of our statements, surely they would follow us. Know certainly accomplishment of religion is obtaining knowledge and acting accordingly. If your knowledge and courtesy become much, your price will be high. Then you are led to your lord by knowledge and you can serve your lord with courtesy very well. Heart confides to written.

8: Studying Made Easier: V. Jackson Smith: www.enganchecubano.com: Books

Ways to Make Studying Easier and Faster for College Students is a quick read and an easy reference for college students with limited time. It is thorough and concise, outlining the required skills needed to be successful throughout one's college years, including how to spend summers and "down time" to maximize the entire experience.

Being a part of a community of people who desire to grow just like you who can encourage you along the way. That, my friends, is exactly what our God wants for you! He is a licensed and ordained minister and has been teaching the Bible for 20 years. Allen is also the founder of The BEAT, an online Bible teaching ministry that publishes videos that reach thousands of weekly viewers worldwide. Allen has been teaching people how to study the Bible for the past twenty years. Allen currently resides in McKinney, TX and is happily married to his beautiful wife Jennifer and is the proud father of their daughter Anaiah. Module 3 will teach you exactly how to get the correct interpretation of what you are reading. Module 4 will show you specific strategies for applying the Bible to your daily life so that you can experience transformation. Here are just a few of the benefits of joining our community of believers on mission to go deeper with God in His word inside our private Facebook group. It was like I was reading the Bible in the dark at times, then I came across Allen and he explained things so simply and practical that the lights just all turned on. I now feel encouraged to participate in my church, and I have been helping teach, and create a curriculum for our young Sunday school kids. God used him to open my eyes and forever change the way I approach scripture. Now I know how to read the word of God as He intended it to be read. From the first lesson, I could clearly see how God has gifted him with the ability to break down the Bible in a way that speaks to new and seasoned believers alike. Is this a one-time payment or ongoing? How long do I have to take the course? This is a "go at your own pace" course. You can purchase it today and begin using it next year or whenever. There is no time limit on when you start or finish the course. Is this course for a seminary student? They have seminary for that! This course is designed for any Christian at any level who desires to learn a step-by-step method for effective Bible study. Can I still join the group? You will still have access to the course but not the additional training going on inside the private Facebook group. Why should I have to pay to learn the Bible? For a fraction of that cost you can invest in your spiritual life and let me invest back into you! Will I be lost? Module 1 will give you a very detailed overview of the entire Bible before we dive into how to study it. What if I miss the ongoing training? Can I still access it? You can try to sift through a plethora of videos, but this course packages everything you need all in one place along with the support of a community and mentor. You have nothing to lose! More importantly, my life has changed because of how I can hear God speaking to me. For our full refund policy, [click here](#). You can sift through a ton of videos and books that may teach you a thing or two about Bible study. But what happens after that? For the price of a nice dinner for two you can make an investment into your spiritual life and experience something that you cannot put a price on; a deeper relationship with our Lord and Savior Jesus Christ. Instead of thinking of the price, pray and ask God if this is something He wants you to invest in at this time and then trust Him to provide for you. Bible Study Made Easy is not just some course you take and get through. With easy-to-use checklists, cheat sheets, resource guides and worksheets you can use for a lifetime, you will be well equipped with a strategic plan to study the Bible for a lifetime! It would be my sincere honor if you would allow me to hold your hand every step of the way and show you the EXACT step-by-step strategies to get the most out of your Bible study. Click the link below to get instant access to our course, join our community and go on this journey with us together!
