

1: The 20 Worst Product Failures - SalesHQ

All 90 Day Success Formula participants will get access to a private Facebook group. This will be where we can interact with you, where you will post your assignments, share your wins and support each other.

But some new products fail for hilarious reasons. Does your child have a doll? Odds are its not the Baby Wee-Wee. Listening to an MP3 player now? Is it a Zune? Over the years, these failures and the reasons for them have become the stuff of myth. We take a look at why these products flopped and try to separate fact from fiction. Baby dolls that pee are nothing new. But baby dolls with a disproportionately large penis that moves when you tickle them? This doll “ manufactured in Spain, but sold in the UK and Ireland “ may or may not still be on the market it appears to be unavailable on Amazon. How it got the green light in the first place is a mystery. While it had some nifty product features that the iPod lacked like sharing music from player to player , the Zune, despite an expensive marketing effort by Microsoft, never really caught on. Of all MP3 players listed on Amazon. Why did it fail? The Zune seemed clunky in comparison. By integrating the music experience from cradle to grave, so to speak , Apple created strong disincentives to any competitor that just could not be overcome. Betamax Sony Betamax was the first home video recording tape to hit the market in May Sony, however, was not the only company that had been working on recording video data on magnetic tapes. Sony was slower to license the technology to other manufacturers. VHS was, for a time, less expensive. Sony refused to let the pornography industry use Betamax. The main problem, though, was time. As everyone knows, an hour does not a movie make. As a result, forty production companies adopted VHS instead of Betamax. The company wanted to produce a device that combined the portability of cassettes with the Magnetic-Optical technology being used in CDs. MDs were introduced at a difficult market time and had to jockey for position with CDs, a battle which it lost. Part of the reason was the standalone nature of the MD players. CD players were being incorporated into boomboxes that also could play cassettes. It allowed them to have both. Moreover, under pressure to ensure that MDs would not be used to pirate music, Sony made MD-Audio discs incompatible with MD-Data discs, making using the audio files on a computer impossible. That was followed by The Edsel Show on October 13 and an advertising campaign to sell the country on the charms of car whose name evoked a weasel. But the truth is that the Edsel was no more or less reliable than any other car on the market at the time. In the run up to its unveiling, Ford put out rumors that the Edsel would be a revolutionary car that would change the automotive landscape. When the curtain was finally pulled back, though, people saw that it was just another Ford with a different body. The Edsel also suffered from larger economic forces. Similar to today, a recession hit and customers wanted smaller, less expensive and more efficient cars. From the outset, the league was plagued with problems. Many teams had trouble finding permanent stadiums in which to play, others were relocated frequently, some merged with other teams or went bankrupt. Despite these problems, the league survived and expanded following the first season in , adding six new teams. At the urging of Trump, the owners agreed to compete directly with the NFL and planned to begin playing games in the fall in Seven teams folded because they did not want to or felt they could not compete with NFL teams in their cities. Microsoft My grandmother knew that Vista was doomed before Microsoft did. Vista was released on January 30, after its predecessor Windows XP had been on the market for five years. Though designed to fix many of the security flaws in prior Windows operating systems, customers, and not just IT pros who often malign Microsoft products, gave it a resounding thumbs down. A short time later, Microsoft essentially admitted failure and in April allowed Dell to start offering XP on new computers again. Microsoft also accelerated development of its next OS, Windows 7. Vista sucks the performance from a computer and can create a host of problems when using the internet. In , as Euro Disneyland prepared to open, the media warned that there would be chaos on the roads as , would try to make it to opening day. By midday, the parking lot was half full with attendance of only 25, The following month, 3, employees walked out on their jobs. By September , Euro Disney had lost almost a billion dollars. Realizing that the name might be part of the problem, the park was rechristened Disneyland Paris in and began to turn around. First introduced commercially in , two years after VHS, LaserDiscs offered significant benefits over. LaserDiscs had several

problems, though. Most importantly, they were expensive—far more expensive than VCRs. The discs were large, awkwardly shaped and they could not be used for recording. Oh but there was one. Back in , Apple released a handheld device they hoped would change personal computing. It was officially called MessagePad, although it was popularly known as Newton the more captivating name of its operating system. It was discontinued in , but the Newton was not a complete debacle. After all, the gadget did become a template for the PDA craze followed. That confusion was why it failed. But this was more than a game console! It was a computer! Only selling 42, units, the Pippin was quickly discontinued. Crystal Pepsi Pepsi It was the early nineties, and purity was all the rage. As health and wellness moved center stage, more and more consumers were picking up Evian and Perrier instead of cola. In an attempt to snag a piece of the purity pie, Pepsi launched Crystal. Its new cola was clear, caffeine-free and a total failure. It was hard for consumers to think of cola as a clear liquid. In fact, no one really knew what it tasted like — just that it was not good. Two years later, the product was pulled from the shelves. Shortly after the clear cola fiasco, the company decided to get in on another, more widely accepted clear liquid market: That went much better for them. Cocaine Redux Beverages A few years back, a Las Vegas company launched an energy drink that would turn heads and stomachs. It was called Cocaine. It contained three times as much caffeine as Red Bull and it made no apologies for its shameless brand strategy. The font in its logo resembled a white powder. Its marketing language was rife with drug references. Not long after its launch, the FDA pulled the drink from store shelves. They said Redux was illegally marketing its product as an alternative to street drugs, and that it had falsely claimed Cocaine could treat disease and act as a dietary supplement. Sure, they could generate some buzz and make a quick buck, but what chance would they have had at longevity when retailers like refused to carry it? Kitchen Entrees Brand extensions can be highly successful. They can also fail miserably. Think Colgate Kitchen Entrees. Never heard of it? Once upon a time, Colgate yes, the toothpaste brand thought it wise to launch a line of frozen dinners. The logic behind the pairing? Consumers can eat a Colgate meal, then brush their teeth with Colgate toothpaste. The product was a complete bust, and was pulled from the shelves shortly after. In theory, Thirsty Dog is kind of brilliant. Where did this company go wrong? Probably when they decided to infuse the water with flavors like crispy beef for dogs and tangy fish for cats. That was going too far, even for the creepiest of pet owners. They were called Premier. But really, they were anything but. There was no guarantee that they were healthier than regular cigarettes. And to top it all off, they were rumored to be an effective receptacle for smoking crack cocaine. Non-smokers had no interest in trying them.

3: Stock Options: The 90% + Success Rate Formula | Udemy

In this high power motivational video, Mr. Vivek Bindra lays emphasis upon the importance of the 1st 90 days to create a strong 9 months later.

While we are pretty sure that you leave no stone unturned in working hard on PTE preparation, the task can be made a bit easier with tips and tricks suggested by experts. Here, we would lift the curtains to unveil the secret of scoring 90 in PTE. We have discussed a few items from each section that pupils find difficult to score full. The score formula for Reading Reading bothers many. The lengthy paragraphs that ask you to select one or more than one options MCQs are tricky. The reordering of the paragraphs given is just more than applying grammar knowledge. However, for both the types of fill in the blanks, yes, grammar tips and tricks work; the PTE itself provides you with the list of collocation words that you need to read daily as a PTE preparation. There are hundreds of words but reading 50 a day may help after a month. Reordering the randomly placed paragraphs: At times, logic works better. Furthermore, if you are taught that in case the paragraphs mention years, you may simply start rearranging them in chronological order. Well, what if one of the paragraphs talks about something in the past and mentions the year, and is actually the last paragraph! Short paragraphs can be remembered easily whereas long paragraphs are easy to parse or skim. The score formula for Listening Keeping your eyes closed makes a lot of difference in our opinion. This works better in Repeat Sentence as well. PTE gives you a few seconds before the audio clip starts. In such a fraction, it is difficult to go through all the options given. However, you can certainly read the first line, i. If you listen to the audio clip peacefully keeping your eyes closed, it would be easy for you to find out the correct option and Crack PTE in Listening successfully. Instead, write key words or phrases swiftly. Writing only initial letters of keywords will enable you to note down more keywords, and the summary will be better. Take care of punctuations and articles while writing it. The score formula for Speaking There is no secret formula for Speaking unless you practice it daily. If you are a non-native speaker, you should speak English with your friends and families. If you are fluent in day-to-day English, it would be easy for you to score high in speaking and crack PTE. You may form a format to speak it. And, so can go with pie charts. When it comes to processes and pictures, you need to describe it the way you see the images. You should not miss key points such as the highest and lowest values on the images. Pauses and hesitations should be kept at bay because they are the main culprits to blame for the low score in Speaking. Every single word matters and thus, you need to be aware of the content spoken. If you listen to the lecture in a slipshod way, you will be losing contents points. The score formula for Writing Full marks in Writing will require you to have good knowledge of grammar and thesauruses. You may use positive and negative adjectives to score high in vocabulary. You may read the sample essays on the Internet. The coaching classes for PTE provide you with experienced PTE faculty who can assist you in understanding the modules in a better way.
