

1: The Beautiful Waters Rifleman T3 Magazines for Tikka Rifles -The Firearm Blog

The latest gadget and technology news, reviews, buyer's guides and features. Covering smartphones, laptops, audio, gaming, fitness and more.

But, thankfully, all that is changing. They grip ears like superglue, but in complete comfort. They stay in place, too, thanks to a patented earhook and angled ear-tip combo. The immersive Dolby sound curls around your earlobe like a pleasing sort of ear worm, and sound isolation is effective, too, meaning you can drown out passing lorries. Earhooks keep them in place, while an adjustable clip on the wire, for attaching to your T-shirt, is a nice touch. The bass-orientated sonics are clear, and background noise is obscured well. These minimalist wired earphones are an enticing old-school option. Each bud is barely the size of a small coin, slotting quickly and imperceptibly into your ears. Sweatproof, dustproof and waterproof, they also boast of a useful clip on the wire, and come with free eartips for life. Sound quality is good, if a little on the bassy side, and they come in shades of white, black, blue and yellow. A remote control enables you to skip tracks and take phone calls, while the battery lasts six hours and can be fully charged in 90 minutes. The sound quality is decent but by no means the best on test. Under the hood, both devices are more or less the same, save for few differences. The design also varies in case of Galaxy Note 5. It has an unique clicking 1 2 3 4 5 6 7 8 9 mechanism that pops out the S Pen with one click. Users can now quickly jot down notes without having to unlock the phone. What is the hardware on both the phones? Do these phones have fast charging? Short for Magnetic Secure Transmission will enable users to carry out Samsung Pay transactions at regular PoS terminals Samsung will sell a wide variety of accessories for both the devices, which includes cases and covers, battery packs, wireless charger but the one peculiar accessory that takes the cake is the QWERTY keyboard case. Is it available now? Not just any camera. What advantages does the back-illuminate sensor offer? Vital stats XAVC S Number of focal-plane phase-detection AF points Supports 4K recording in the new format at Mbps bitrate 5-axis 50 per cent Image stabilisation to support highresolution shooting capacity Reduced vibration and shutter-lag compared to its predecessor For starters, the sensor enhances light collection, which means it will offer better low-light performance. Furthermore, with the help of an expanded circuit scale and copper wiring design, it enables up to 3. Sounds good, what else does it have? The A7R II can shoot pictures in up to It is also 40 per cent faster than the last-generation A7R. What about the lenses? Wide range of lens options When does the camera go on sale? You can buy it right now. Can I still use all my mou For sure! But this can record at ultra-wideangle 1, x 1, at 30fps. Any other cool features? It can capture stills in burst mode up to ten photos in one second. And the time-lapse feature enable you to take a picture in intervals between and 60 seconds. Oh, and its one-button operation makes things super-simple. There are also dual mics, which automatically help to eliminate wind noise when mountain biking for instance. The auto low-light feature pretty neat. What about battery life? With Wi-Fi off, you should be able to record for around one hour and 55 minutes When can I get it and how is it? Just bung it in a GoPro mount and get in the sea! You get two frames in the box: A hoverboard is just like a skateboard but the major difference is that it does not have any wheels. Yes, this hoverboard developed by Lexus takes advantage of magnetic levitation to keep the board above the ground without touching it. This is just a proof of concept by the car maker to showcase all that is possible with the technology. No wheels How exactly does this work? Can levitation work on any surface? Sounds cool, when can I buy it? That said, you might catch glimpses of the hoverboard as Lexus plans it to use it for marketing of its cars. The scooter is foldable, which makes ideal to carry in the boot of your car even on public transport. What else does it have? The battery charge varies from two to four hours. Moreover, the motor is waterproof, making it usable even in Mumbai monsoons! The scooter features three speed modes and reaches a top speed of 35 kmph. It also offers climbing capability of up to 45 degrees. Not yet but keep your eyes peeled as Nanowin is looking to enter the Indian market soon. What differentiates this Zenfone to the other countless variants? The phone is evidently different in looks but what about the hardware? The Zenfone 2 Deluxe is more or less similar to the other variants that are available in the market. This means the Deluxe sports a 5. What about the camera? The rear-facing camera supports 13 megapixel

resolution while the front-facing has a 5 megapixel support. Both cameras support PixelMaster technology that ensures better pictures in low light conditions. Does the phone have fastcharging functionality? Where can I purchase one? The phone is now available on Flipkart. The Chinese smartphone maker has come out with a mid-range phone called the Marathon M4. Does it go on and on? As a matter of fact, it does. Does the phone trade off battery life with performance? The phone is powered by a decent 1. What about the camera and other features? Despite the battery capacity, Marathon M4 is just The Marathon M4 comes in white and black colour options. Can I purchase the phone now? Yes, it is on sale. It also has an interchangeable cover design, thus allowing users to change the look as well as add some features. For instance, Zen Clutch transforms it to resemble a clutch, whereas a Power Case extends battery life and an Audio Cover adds 5. Tell me about the hardware. The tablet has a What about the display? The 8-inch display supports a x resolution. Additionally, the tablet comes with VisualMaster that processes images for an overall improved picture quality. Can you tell me about its picture quality? The result is lifelike colours. The selflighting pixel technology, the TV sports white as well as the darkest black with ease. Additionally, with 4K resolution x the TV offers a great visual experience. What about the sound quality? Is the TV Smart enough? Any other features I should know of? What about the beauty? The curved form factor of the TV adds a cinematic experience with Art Slim 5. But we bet she d these Taylor-made gadget h pp Words: And, amazingly, Apple changed it. With the Smart Voice Recorder, imagine the letters Swift could dictate to other people and organisations: With more than programmes and 1, individual exercises, the Power Plate my7 vibrates you into shape, and comes with a touchscreen and guidance videos. But we reckon she should hook up with that nice lad Ed Sheeran. Yeah, but do you see any tigers around?

2: Magazine problems

T3 magazine combines over 20 years of knowledge, history and research, to provide you with everything you need to know about being at the top of the tech game. With articles written by some of the best gadget writers around, the recently refreshed T3 magazine is the staple of any tech-heads week.

In short, much like humans drive them: The AI then needs to be able to distinguish between unexpected elements – braking if a person or moose steps out in front of you, but keeping going if a plastic bag blows into the road. Erm, well, there are also numerous failsafe systems that need to be tested. Driverless cars, at least initially, need to be degrees safer than standard ones, because people get upset about the idea of robots accidentally killing them. To that end, Volvo is installing two braking systems, for instance, and talking about an approach more akin to the aircraft industry than the automotive one. Technically, it would already be able to if it were fitted with the necessary sensors. Volvo will be testing its Drive Me system in Gothenburg from

What robot vacuum cleaner do you use, Guru? Gadget Guru has historically found Nokia and Sony phones to have the best cameras. Mind you, it will set you back about quid, and battery death is a constant and looming threat. To date, the others have all proved to be either impressively clever but useless at sucking up stuff, or vice versa. All except the Vorwerk VK, that is. The Model S includes a inch touchscreen that provides navigation and even lets you browse the Web, while driving-style options make it handle like a sleek sports car or a comfortable cruiser. Worried about battery life? The British Kitesports Association britishkitesports. At the same time, his other four senses were heightened, equipping him with superhuman powers. After his father is killed by gangsters, he sets out to seek revenge in the form of Daredevil. So why bother with Daredevil in UHD? A whole world of Ultra HD streaming now awaits. Attempting to beat your personal best can reinvigorate even the most run-of-the-mill runs. Signing up for Strava strava. The service enables you to challenge your mates and beat your own best times. But what else can you do to get re-motivated with your fitness band? Challenge yourself with hills and interval running in order to get the most out of your exercise. Now try to keep your heart rate at this level. It enables you to track routes, work out calories burned and cheer on friends. Shoes feeling a bit worn-out? You can even set it to make you a brew as soon as you walk in the door. Models such as the dJi Phantom have sonar systems, enabling you to let them hover indoors without GPs check this – the new dJi Phantom 3 drone has arrived! Game of Drones founder Marque Cornblatt has become a legend in this flying fight club. His first step was to redesign the airborne combatants. Whilst you could use an off-the-shelf model such as the Parrot Bebop, it could get expensive. Pulling together parts is a much more sensible approach for drone warfare. Cornblatt recommends that you get to know your drone and hardware intimately beforehand. More great content at the all-new www. Get feedback and advice on drone building by checking out the community at DIY Drones diydrones. We run it through its paces, but can its much talked-about battery life live up to the hour promise? The most anticipated gadget of the year, or actually for as long as I can remember. Getting your hands on an Apple Watch is very much like purchasing any other Apple product – well, in terms of the unboxing and initial excitement, that is. And a matter of days before T3 went to press, I was finally able to strap the 38mm Sport version with white strap to my wrist and embark on a day-long test to see if it could live up to the hype. A typical day for me is probably much the same as yours: My iPhone 6 Plus is an integral part of my life. Would the Apple Watch fit into my life in the same indispensable way? Booting up Pushing in the digital crown to boot up, I expected the watch to be ready in an instant, but it seemed to take an age. It was probably only a minute or so, but it threw me a little. But I guess setting up any device from scratch takes a while. One thing that immediately struck me was the screen. The very first thing I did? You then plug in the USB and simply attach the magnetic circular charger to the back of the watch. Next, I needed to set up the watch, and this is where the fun started. The first thing the Apple Watch asks you to do is choose a language. This was my first experience of the digital crown and the touchscreen. The 38mm model seems frightfully small, but the screen was immediately responsive. The watch paired quickly, asking me to choose a wrist if you choose right, the digital crown will be at the bottom of the watch, and approve Location Services, Siri and Diagnostics. Next, I was asked to set up a passcode. After

this, I chose to unlock my watch with my phone. This basically means that as long as your watch stays on your wrist, it will stay unlocked. The final option in set-up is choosing to pre-install all compatible apps from your iPhone onto your watch. I did this and after a few minutes, the watch was ready, laden with apps. By this time it was late, so I set up an alarm for 7. Even my Fitbit feels obtrusive and uncomfortable. My morning routine on my iPhone involves checking any meetings for the day, checking my Twitter feed and replying to any urgent emails that have come in. A trip to BBC News is also a must over a cup of tea. But before all of this, I wanted to play around with the Apple Watch. How exactly did it work? The haptic engine in the watch begins to subtly vibrate on my wrist. I can see the point in this 4 8 T3 j u n e 2 0 1 5 Roll-neck: Tapping the digital crown brings the watch to life, showing you the standard face. Tapping it again takes you to the circular interface. As you turn the crown, the interface zooms in and out, the app at the centre opening if you zoom right in. By swiping the touchscreen, you can move the app you want to open into view, and then either use the crown to open it or use the crown to zoom in a little and touch the app. Touching apps takes a bit of getting used to on such a small screen – especially if you have fingers of the more chubby variety. I think the 42mm would better suit me! Hitting the digital crown again acts as a back button. But I found this a little confusing at first – before realising that tapping the crown once again on the circular interface will take you back to the middle, once again to the watch face. To end your workout, force-press on the screen and choose End. If they have an Apple Watch, you can even send your heartbeat, a tap vibration or a sketch. You can have 12 friends in this mini app – and you set them up using the Apple Watch app on your iPhone. I set a few up, including my wife and parents, and made sure their contacts had a nice photo using the Phone app on my iPhone. But back to my day. Time for a very quick run around the block – mainly to test both the Activity and Workout apps. Now, I only did a couple of miles, but I immediately liked the simplicity of Activity, which gave me a calorie, step and distance count in a neat interface. It breaks your activity down into three sections: On each screen, by swiping up and down, you can get a text-based readout. There really is something supercool about opening up your car using your watch. The Workout app is equally good, enabling you to choose a type of workout outdoor walk, run, indoor run and so on and set a goal such as time or calories. It really bothers me that I need to take my iPhone with me for accurate readouts – having an iPhone 6 Plus with you out on a run is just not feasible. I had a look over my numbers before getting ready for work. The watch came off for a shower: It was a warm day; the sun had been beating down on the.

3: T3 COMPACT TACTICAL RIFLE | Tikka

This website use cookies and similar technologies to improve the site and to provide customised content and advertising. By using this site, you agree to this use.

Find your distributor A multipurpose rifle that adapts to any given situation. This rifle comes with a durable aluminum trigger guard and a magazine release lever that enables rapid magazine changes. New stainless steel option The safety is easy to operate and indicates when the rifle is ready for firing. Action The action is designed for accuracy, reliability and easy servicing. Tikka rifles provide you with an extremely rigid action with a two-locking lug T3 bolt. This is one of the smoothest actions on the market. Trigger A single-stage pull with a comfortable trigger feel. The steel trigger has vertical grooves for added grip, even when wearing gloves. It is easily adjustable through the magazine well from 1 to 2 kg 2 to 4 lbs. All models are available with an optional single-set trigger. Stock The stock is a light but solid T3 TrueBody design of high-grade walnut or fiberglass-reinforced copolymer polypropylene. An optional recoil pad system with spacers provides adjustability in length of pull. Grip patterns are carefully designed for added comfort and a firm grip. Sling swivels as standard. Barrel A cold hammer-forged Sako barrel of highest-grade stainless steel or Cr-Mo alloy. It is free-floating in models with wooden stock. The barrel is fastened to the receiver by a sturdy thread for safety and accuracy. It is hand-crowned, as a good and even muzzle crown is essential for accuracy. Magazine The single-column detachable clip magazine has a strong fiberglass-reinforced composition. The magazine holds 3, 5 or 6 rounds depending on the model and caliber. A flush release is installed at the front of the magazine to prevent accidental releases. The latch is horizontally grooved for improved contact.
