Terrier Book One in Beka Cooper: A Tortall Legend Beka Cooper is a rookie with the law-enforcing Provost's Guard, and she's been assigned to the Lower City. It's a tough beat that's about to get tougher, as Beka's limited ability to communicate with the dead clues her in to an underworld conspiracy.

Won â€” Skylark Edward E. Smith Memorial Award for Imaginative Fiction List of works[edit] Tortall universe[edit] The Tortall universe is a fictional setting shared by five book series: The capital of Tortall is Corus, located near the western coast on the Emerald Ocean. To the north is Scanra, a wild and somewhat barbaric country. The Trickster books mostly take place in the Copper Isles, further south than the Yamani islands. The Hunt Records take place hundreds of years before the other books, and Barzun, a nation between Tortall and the Inland Sea later is occasionally mentioned. Barzun was later conquered by Tortall. Tortall is a place somewhat reminiscent of the European Middle Ages, with its monarchy, court, nobility, and knights, but is otherwise a completely different world. Deities are revered and often play a part in human lives, sometimes choosing humans as champions, sometimes using them to further their own purposes. Though these deities are shown as powerful beyond belief, they rely on their human instruments to shape the world. The Song of the Lioness[edit] Main article: The Song of the Lioness The Song of The Lioness was originally written as one single book for adults, but her literary agent suggested that she rewrite it into four books aimed at a young adult audience. Although noble-born girls traditionally go to the convent to learn how to be proper noblewomen and wives, Alanna desires to become a knight, a position only given to noble-born boys. In order to achieve her dream, Alanna disguises herself as a boy under the name of Alan and goes to the palace in place of her twin brother Thom. As Thom has no interest in becoming a knight, and is far more interested in his magic, Thom forges a letter so that he can go to a temple to become an enormously strong and skilled sorcerer. Alanna has quite a few strong romantic relationships throughout the series, including Prince Jonathan, George Cooper, and Liam Ironarm, the Shang a martial arts society Dragon. She learns to reconcile with her magic, a part of her she formerly despised, and becomes a shaman. Alanna soon finds another relationship with George, the Rogue, but continues to struggle with her romantic feelings for Jonathan, who has gone on to court a "proper woman," a princess of the Copper Isles. Lioness Rampant â€” Alanna travels to the "Roof of the World" in search of the mystically powerful Dominion Jewel in order to prove her worth as the first female knight in centuries. The Dominion Jewel is a legendary magical artifact rumored to unite any ruler who holds it with the land that he or she rules. During this journey she meets Princess Thayet, her bodyguard Buri, and the Shang Dragon, whom she develops a strong romantic relationship with, despite his open fear of magic. She later returns to Tortall to face an old nemesis, who threatens the entire kingdom. The Immortals series This quartet is also called Wild Magic after its first volume, published by Atheneum in The story features Veralidaine Daine Sarrasri who was orphaned when raiders attacked her village. Her abilities manifest gradually throughout the series, allowing her first to speak with animals, to heal their injuries and eventually to shape-shift into animal forms. The series covers a timespan of four years, following Daine as she learns to communicate with humans, animals, and Immortals. Emperor Mage â€”

Daine joins a delegation of Tortallan diplomats sent to Carthak, where she finally meets the Emperor Ozorne , who had previously attempted to execute her teacher Numair. Daine is caught up in a strange battle involving displeased gods and strange magics. The Realms of the Gods â€” Caught in a mysterious attack, Daine and Numair are snatched into the Divine Realms and struggle to make their way back to Tortall , where war is raging again. Pinterest The original s covers of The Song of the Lioness series. PR This, says Pierce, has always been a key impetus behind her writing. Growing up in Pennsylvania and California, she fell for fantasy after a teacher introduced her to Tolkien. Stew takes forever to cook. Where do they get the animals? Where do they get the time to cook? I was always searching for female heroes. The very few I found were highly dissatisfactory, so when I started writing, I wrote what I wanted to read “ girls like me. When she was 11, he overheard her telling herself stories while doing the washing up, and suggested she should try writing a book on his typewriter. She flew into a rage. Her parents split up and her father took the typewriter with him, but she continued writing until her second year in high school, when she sent a short story to Seventeen magazine. And she hated speculative fiction “ she was an English major and had a very snobby view of what a person was supposed to write. She just went on and on. I tried to run away, but ran out of nerve and went home. But being exposed to new books, people and thoughts at university “ Penn in Philadelphia, where she was on a full scholarship “ lifted her block. She wrote her first book-length manuscript, about a girl who disguises herself as a boy to enter a tournament. Six months later, a scrap of a half-forgotten dream sparked a new idea: Working in a home for girls at the time, she would read edited versions to the teenagers she was caring for in the evenings. It was turned down by three publishing houses, but she had set herself rules: By then, Pierce was working for a literacy agency in New York, while writing stories, articles and radio plays. Finally, the first Alanna book arrived in Readers wanted the rawness of reality. It took a while, though, for her books to find their audience: When it came out in the US earlier this year, Tempests and Slaughter debuted on the New York Times young adult bestseller list at no 1. But she has no intention of straying from her fantasy universe. I can say almost everything I need to say. JK Rowling is absolutely brilliant on the failures of justice in human society. We do this stuff all over the place. The Immortals quartet will be reissued by Harper Collins on 18 October.

First Test[edit] The story opens in the realm of Tortall, where women have been legally allowed to train for knighthood since Alanna the Lioness disclosed her gender publicly; however so far no one has tried. Keladry Kel is a serious 10 year old who - with the support of her noble family who have just moved back from the Yamani islands after 6 years - is determined to become the first official female knight of the realm in over a years. One of the realms most outspoken conservatives, Wyldon of Cavall, who also happens to be the training master insists that Kel is put on a year of probation to determine her fitness for the program. Her determination, skill at arms - particularly with a Yamani glaive which is her weapon of choice - and inborn sense of justice gain her both friends including the animal kind! Her primary opponent is fellow page, Joren of Stone Mountain, who has been marked by Wyldon as the best page in his year. His unspoken antagonism takes physical form when Kel declares an unofficial war against the hazing of the first year pages, something that Joren and his gang revel in. Her role in the skirmish that ensues showcases her natural ability as a leader. Her successes do not go unnoticed and at the end of the year Lord Wyldon surprises everyone by allowing Kel to continue to train to become a knight. These three years are not going to be easy as she continues to deal with relationships, training, hormonal changes, and an unshakeable fear of heights while the public page examinations loom which will determine her future ever closer in the horizon. At the outset of the book Joren, her archenemy, appears to have stopped tormenting her. While initially Kel is distrustful of this apparent reversal, eventually she lets go of her animosity. While Joren has backed away, another antagonist in the form of Vinson comes to the fore. Kel catches him attacking her timid maid Lalasa Isran who Kel recently hired with the aim of protecting her from such incidents. While she chooses silence, this decision weighs heavily upon her. Her expertise serves her well when she and her friends are attacked by bandits whilst camping in the Royal Forest. Despite the overwhelming odds Kel keeps a cool head and calmly orders her friends, leading them to safety until Lord Wyldon and his troops can arrive. While Kel makes extraordinary progress throughout the book, her fear of heights torments her throughout her time as a page. While Kel is determined to save her she knows this mean both potentially missing the exams " the punishment for which is repeating the last four years of study " and confronting her own shortcomings. For her bravery, and because of the extenuating circumstances, Kel is allowed to retake the examinations alone; she passes with flying colors and officially becomes a Squire. He not only allows her to carry and use her chosen weapon, the Yamani glaive , but also helps her to take her skill at jousting to the next level in addition to nurturing her natural ability to lead. With his help, she becomes a formidable new force on the tournament field, sending shock waves through the world of young Tortallan knights-in-training, and intriguing young lady nobles. Old friends and foes appear: Through it all, Kel never allows herself to forget what awaits her after her night-long vigil in Midwinter of her fourth year as a squire: Lady Knight[edit] Kel is now an official Knight of the Realm. As war with the neighboring country of Scanra is declared, Kel finds herself in charge of a refugee camp. While she fears that her district commander, Lord Wyldon, has given her this assignment because he views her combat skills as inferior to those of other men he disproves this notion. Kel soon comes to realize that these refugees, torn from their homes, robbed of their wealth and self-respect, are her responsibility. She must feed them, house them, and keep them safe from harm, on a piece of ground that is far too close to the Scanran border. She is able to be a hero, even off the battlefield. In her work she receives help in the shape of her old friends Neal and Merric, the horses Peachblossom and Hoshi, the dog Jump, and her personal sparrow flock, as well as from mixed a myriad group of others: While Kel struggles with her responsibilities and the urge simply to abandon the camp and find a real fight, another obligation hangs over her. Before the war began, she was given a task by the Chamber of the Ordeal: Kel tricks her guards into letting her slip away from them, and pursue a journey to bring back her stolen refugees. She is quickly accompanied by her friends, and once and

for all, given the chance to earn her name as a Lady Knight, protector of the small. Characters[edit] Keladry "Kel" of Mindelan: The protagonist of the series, a young noble striving to become the first official Lady Knight in Tortall in over years. She is the youngest daughter of Piers and Ilane of Mindelan, and has several older siblings. She spent six years of her childhood in the Yamani Islands, where her father, a Tortallan diplomat, negotiated a peace treaty between the two countries. As a result, Kel adopted several Yamani customs, which she continued to practice after returning to Tortall. Nealan "Neal" of Queenscove: He is the son of Duke Baird of Queenscove, the chief of the palace healers. Neal is several years older than his year mates, since he initially studied healing at the university of Corus before deciding to carry on the family tradition of always having a Queenscove knight in royal service. Lord Wyldon, nicknamed "the Stump" by Neal, is the stiff, conservative training master when Kel tries for knighthood, and is the one to demand a year of probation for her, because she is a girl. Joren of Stone Mountain: Joren is an enemy of Kel, and tries to drive her out. He has a group of followers who are against women being knights. He bullies first-pages, claiming that it is making them obedient. In Page , Joren seems to have changed, but it is later shown that this was just a ruse. A maid to Keladry, and niece to Gower Isran. Joren hired two thugs to kidnap her, and this made Kel face her fear of heights and overcome them.

*Tamora Pierce faced a conundrum when she began writing her latest young adult novel, *Tempests and Slaughter*. Ever since she published the groundbreaking quartet of novels *The Song of the Lioness*.*

Born Tamora Pierce on December 13, in South Connellsville Pennsylvania, Fayette County; she cut her own niche with writings that feature young heroines. The name Tamora was born out of a spelling error when her maid was filling her birth certificate, contrary to the mother wanting to name her Tamara. The eldest in a family of three girls, her two other sisters are Kimberly and Malanie who were born when she was five and six respectively. She lived in Dunbar from when she was five but later moved to California at the age of eight, in June with her family. They settled there for six months then later moved to El Granada where they stayed for a year before relocating to Burlingame where they lived for three years. Her passion for books came at a tender age through reading; her writing began when she was in her sixth grade. What led to her interest into fantasy writing was when she was exposed to the *Lord of the Rings* by J. Tolkien which influenced her writing of the type of books. There she was into acting and singing, and her writing got an opportunity to write for the school paper. Her writing process involves things she comes upon accidentally, for instance the concept of magic being a weave of threads, was inspired by her involvement in crocheting, and in a way every magic work of her is founded upon David Attenborough the British naturalist, which she got after she watched his documentaries. Her fantasy novels were founded upon the type of world she imagined when she was a child. She later included current issues such as crime and youth. For inspiration she sometimes turned to people and animals. For instance the persona Alanna is founded on her sister. Her early fictions had their basis upon stories she loved, even relating her writings to them very closely. What made her write about outstanding feminine characters was the fact that she realized they were missing in the books she read. It is the name of the main county who capital is Corus which finds its location next to the coast of Emerald Ocean. It shares its borders with Country Scanra on the northern side, which is wild and brutal. Three countries are found to the east: Tusaine, Tyra and Galla, with Maren and Sarain far beyond them. In some sense it resembles Europe during the middle age which had Monarchy, royalty, courts and among others. In this land magic is alive from every corner from the lowest hedgewitch to the king himself. In her writings gods are respected who occasionally use humans as heroes and other times as means to fulfil their purposes. Gods are displayed to wield power unimagined yet they still depend on humans to mould the world in what they desire. Aided by her twin brother known as Thom, Alanna a noble girl realizes her dream of becoming a knight, while the brother heads for the temple to become a mage. She ends up attracting some powerful allies including the prince and the king of thieves. Meanwhile she fights the attention of Duke Rogers as she also struggles with her own identity as a woman. She is romantically drawn to George Cooper and the Prince. She struggles to balance her relationship with the prince and her ambition to become a knight. The fact that none of her books have been turned into a movie has raised a number of questions from her fans as they wish to see at least one of them make it through. She recognizes that for a book to be turned into a movie, the producers must make such a decision. Besides she says due to the nature of her books making movies out of them would be expensive. They are set in a historic period that will lead to incurring a lot of expenses from costumes and suitable locations and they would also need a number of special effects. Jack Reacher is back!
