

1: State-Specific EOC and Common Core Practice Tests - USATestprep

Teamwork Test Prep Grade 5 Reading and Math by Carson-Dellosa Publishing Company, Tim Foley, Cynthia Johnson Prepare students for standardized testing success with Teamwork Test Prep! Written by assessment experts, these books combine valuable test-taking practice with creative, skill-building activities.

Great ways to prep for elementary grade tests Grades 3-5 Whether I am reviewing material for a unit test or the state exam, I try to incorporate as many team-building activities as possible. The trick is to be creative and engaging while still focusing on the standards students are required to know. The following are activities that I use to create a comfortable but academically challenging setting. Games Students enjoy demonstrating their knowledge through team games. This allows the students to learn from each other and not feel pressured to be responsible for representing the team. Since the team works together, they must agree on an answer before sharing it. This forces the groups to work as a team to ensure each person knows the answer. Specific types of games you can use include: Game Shows There are several PowerPoint games I play with the students that encompass all subject areas. From Jeopardy to Hollywood Squares, I transform the classroom into a game show. I download the theme music for each show and use the microphone to announce each question. You can control the complexity of the questions or you can have students submit questions for review. Spin the Wheel I purchased a spinner that comes with several laminated wheels that allow me to target specific areas of review. Students enjoy spinning the wheel to reveal their question or topic. I also designate how many points each round will be by having students spin the wheel. Eggspert Students are divided into teams of six, with one student representing each team for each round. I use this unique Eggspert buzzer. Each student has a buzzer; the student who knows the answer squeezes the buzzer. Students become quite competitive and cheer on their teammates. I also distribute blank Bingo cards for students to fill in with vocabulary words or concepts we are studying. As a class we will record a list of words or concepts on the board and then students will randomly fill them in on their card. After completion of a unit, students will cut their cards up into squares to play memory with another student during rainy day schedules. Time Fillers Throughout the year, I make the most of every moment by using quick and portable activities that can integrate content from any subject area. Tic-Tac-Toe I play a couple of rounds during morning meeting and also use it as a quick review at the end of the school day. This requires almost no preparation because I create the questions as the game progresses according to whatever subject we are studying. Each group has an opportunity to discuss the question and place an X or an O on the board. This game goes rather quickly and students are able to play several quick rounds. Key Ring As we discuss a particular concept, I will record it on an index card, punch a hole, and add it to my concept ring. As students are dismissed to lunch or recess, I will grab the ring and randomly flip to a concept card. I will ask a question and call on students raising their hands to dismiss them. I vary the complexity of the questions to ensure all students are able to answer the review questions. Anyone who knows the answer may have an opportunity to answer the question. I have concept rings for every subject, including math, language arts, science, and social studies. Testing Conditions To prepare students for the testing conditions, I have them use their test cubbies throughout the year. I tape two folders together and students use them for quizzes, tests, or when they would like some privacy. Prior to taking the state tests, we will do some kind of relaxation exercises, such as stretching or yoga. During the state test, I allow students to take off their shoes and chew gum. Allowing students to be as relaxed as possible provides a comfortable environment for test taking. One of the reasons I think these strategies have been successful is because they are integrated into activities every day.
