

## 1: The Andromeda Incident - R J Denardo - HÃ¶ftad () | Bokus

*The Andromeda Incident is a sci-fi fantasy novel about the disconcerted and mixed-up life of Emrys Myrddin Calyx, his adventures and misadventures in the twelfth and twenty-first centuries.*

I cannot handle your almost daily, incessant and constant barrage of questions regarding The Gate 3 Incident and the astronomical data you keep asking me for regarding our Visitors. At the present time, I am going over reams and reams of documents some of which will be released to you for public distribution through your large list and the Serpo Web site over the summer and into the fall. Whether you wish to combine and represent their responses as one individual or break it up matters little to me; you have the full confidence of me and my group as to how you wish to proceed. Here is the detailed background information on "The Gate 3 Incident" which led up to the unfortunate series of events in April. The Ebens showed us creatures they created. Yes, they can clone almost any living tissue into a creature via a method called "rapid-cycle cloning. He was intelligent, contained a brilliant mind and was able to adapt quickly to our environment. The second creature -- the Archquloid -- was primitive. The second creature was a form of a slave. It could be controlled, given orders and was safe, or at least we thought it was safe. The Ebens provided this creature to us for medical experiments. JROD became frustrated with our efforts to control this creature. At some point, the creature expressed a desire to be free. The Archquloid creature -- which survived the shooting and once medically healed -- was placed inside a more secure facility and restrained by a system provided to us by the Ebens. The creature died about one year later from a mixture of the trauma associated with the shooting incident and his brain activity, which simply failed. After this incident, JROD was never fully trusted again. He was under strict control at all times. His mood changed because of the increased detention. JROD, although gentle, was upset over these new measures. You sure ask a lot of questions of our group. There are two common links between each alien group and the Ebens. The second common link is the DNA. They have special containment facilities to house each alien. Victor, one thing that has never been disclosed is the name given to the second alien, the one shot [the Archquloid]. The USG named that alien: The word "Archquloid" was coined by A51 [Area 51] scientists to classify each different alien race. We knew of five, all given to us by the Ebens. We developed other names for each race especially for the "Archquloid" who was the creature shot in the Gate 3 Incident. The Ebens cloned other races of aliens. As one of my other colleagues recently wrote and told you, it is really an incredibly complex story. It would take hundreds of hours and thousands of pages of written clarifications to explain it all neither of which I am prepared to do. The Quadroids were cloned from two other species. So, as you can see, it really gets very complicated hence my reluctance to delve into it too deeply. Regarding your question as to the number of "S-level" facilities at Area I can only tell you that there are nine such levels within the S-2 facility at Area. In only the most general of terms, there are nine levels at the S-2 complex. Containment for Visitors Level 3: Open storage and work sites for Visitor Crafts Level 4: Secondary Containment for Visitor Crafts Level 7: Not used, at least through Please note that sometimes S-2 is referred to as an 8-level facility as the floor that houses our Visitors is often times not counted as a floor; I have listed them for you exactly as they appear in the base security manual. A detailed description of each "S" facility might also bring you some very costly legal problems. Some of this information is still extremely classified. To this day, many involved in the shooting still have great differences of opinion as to what should have been done especially with a containment team enroute and only minutes away. The agents on scene did what they thought was right and while they were generally praised, others differ on that point. The examination of the scene revealed the guard was imploded. The Archquloid had a hidden weapon in [on? The weapon, which was recovered and locked up, contained a form of an energy-directed beam. The largest piece of a body part left was about the size of a quarter. According to the information we developed from the Archquloid, which appears in the page report, the guard threatened him and he killed the guard in self-defense. The gun was not destroyed, which brings up another interesting point. As you can see, there are many UNanswered questions. The Agent fired from a distance of feet, which is really outstanding shooting. The following section was written by a confidential source within the Defense

*The Captain's Propensity is the sequel to his first novel The Andromeda Incident. He is currently writing the third and final book of the trilogy, Out of Chaos Comes Hope. In he published a small collection of poems and accompanying black-and-white photographs of Key West, Florida.*

Plot summary[ edit ] A military satellite returns to Earth. Aerial surveillance reveals that everyone in Piedmont, Arizona , the town closest to where the satellite landed, is apparently dead. The duty officer of the base tasked with retrieving the satellite suspects that it returned with extraterrestrial contamination and recommends activating Wildfire, a protocol for a government-sponsored team intended to contain threats of this nature. The team of scientists believes the satellite, which was intentionally designed to capture upper-atmosphere microorganisms for bio-weapon exploitation, returned with a deadly microorganism that kills by nearly instantaneous disseminated intravascular coagulation lethal blood clotting. Upon investigating the town, the Wildfire team discovers that the residents either died in mid-stride or went "quietly nuts" and committed bizarre suicides. Two Piedmont inhabitants—the sick, Sterno -addicted, geriatric Peter Jackson and the constantly bawling infant Jamie Ritter—are biological opposites who somehow survived the organism. Jackson, Ritter, and the satellite are taken to the secret underground Wildfire laboratory, a secure facility equipped with every known capacity for protection against microorganisms escaping into the environment, including a nuclear bomb to incinerate the facility if necessary. Wildfire is hidden in a remote area near the fictional town of Flatrock, Nevada , sixty miles from Las Vegas , concealed in the sub-basements of a legitimate Department of Agriculture research station. Hall is the only scientist authorized to disarm the automatic self-destruct mechanism ; he is an unmarried male and thus presumed to make the most dispassionate decisions during crises. Further investigation determines that the bizarre deaths were caused by a crystal-structured, extraterrestrial microbe transported by a meteor that crashed into the satellite, knocking it from orbit. The microbe contains chemical elements required for terrestrial life and appears to have a crystalline structure , but lacks the DNA , RNA , proteins , and amino acids present in all forms of terrestrial life, and directly transforms energy to matter with no discernible byproducts. The microbe, code named "Andromeda", mutates with each growth cycle, changing its biological properties. The scientists learn that the current form of Andromeda grows only within a narrow pH range; in a too-acidic or too- alkaline growth medium, it will not multiply. That is why Jackson and Ritter survived: Trapped in a contaminated laboratory, Dr. Burton demands that Stone inject him with Kalocin a fictional "universal antibiotic " ; Stone refuses, arguing it would render Burton too vulnerable to infection by other harmful bacteria. Burton survives because the mutated Andromeda is no longer pathogenic. The mutated Andromeda attacks the synthetic rubber door and hatch seals within the Wildfire complex, rapidly migrating toward the upper levels and the surface. The self-destruct atomic bomb is automatically armed when it detects the containment breach, triggering its detonation countdown to prevent the spread of the infection. To halt the detonation, Dr. Hall must insert a special key he carries into an emergency substation, one of which should be accessible from any location in Wildfire. Unfortunately, he is trapped in a section which due to an oversight has no substation. He barely disarms the bomb in time before all the air is evacuated from the deepest level of the Wildfire complex which contains the remainder of the team and their assistants. Andromeda is suspected to have eventually mutated into a benign form and migrated to the upper atmosphere, where the oxygen content is lower, better suiting its growth.

Please click button to get the andromeda incident book now. This site is like a library, you could find million book here by using search box in the widget. Strategic Book Publishing Format Available: Emrys was created experimentally to be double-sexed, and can change sexes at will, via a telepathic command. This startling adventure was years in the making! Rodrick Rajive Lal Language: The Andromeda Connection is a collection of yarns, some true and some not so true! Though not a novel, it presents a series of stories bound together, by the voice of the narrator. He tells you about what young man did when he was attacked by a crocodile. He goes on to narrate the story about Sonia, how she disappeared remains a mystery even today. And what about the Toxic Canisters, what would happen if one of these accidentally fell into the hands of civilians? Each short story deals with a unique theme whether it is adventure involved in discovering lost kingdoms, or science fiction, fighting aliens, or even a domestic matter where he humours a wife who has no scruples in decimating his funds. This adventuresome story further goes on to describe how Robie, a now highly sought after and wanted fugitive by the United League of Planets and the Aurelian Empire, is transported back to Earth through time and space with the help of his alien cohorts and with the use of a Myrddissian Time and Space Continuum Device, some , years. Yes, onto the ancient and fabled continent of Atlantis, where he, Robie, with the assistance of the Atlantean high priests, the ruling class, and their greatly advanced and alien-provided technology, he is able to begin, once again, his extensive and sometimes fraught with danger, search for his missing father, Emrys Myrddin Calyx. S Kaye Saunders Language: Earth history is about to take a degree spin. You will never look at the Milky Way as you did in the past. Solans are under Martial Law. There is one chance to change that status by doing what no one else can do in making contact with beings from another galaxy. And there is only one remarkable ship that can make the trip. Timing is everything and revolution is in the air. The Solans have run into a trap. Can Patrol 7 save them? Will Lut Trevalian finally get his hands on one of The Seven? Patrol 7 - Where science fiction and fantasy emerge.

## 4: Andromeda Incident

*The Andromeda Incident (or Out of Chaos Comes Hope!) will reveal unto you, in great detail, all about the mixed-up life Emrys lives, plus his adventures and misadventures in the 12th and 21st Centuries.*

Edit After discovering the Charon Relay , humans began a rapid expansion thanks to their new-found connection to the mass relay network. Hoping to expand their territory and driven by immense curiosity about the galaxy, they began activating every mass relay they could find. However, in , their actions caught the notice of the turians , who found human explorers reactivating an inactive mass relay known as Relay This was forbidden under the Citadel regulations after the Rachni Wars , but instead of negotiating, the turians opened fire. One starship escaped to warn the Alliance; a retaliatory force destroyed the turian vessels, and the situation quickly escalated into war. To the turians, it was merely a police action against an ignorant species violating Council law; to humanity, it was their first encounter with another intelligent race - and it would shape their views of the galaxy for decades to follow. The Occupation of Shanxi Edit Not knowing what enemy they faced - at first, some even wondered if these aliens might be Protheans - humanity sent probes into turian space, armed with nuclear fusion warheads to prevent the probes from providing dangerous insights into human technology. However, there were also extraordinary acts of human bravery. A soldier named Tadius Ahern was sent with a small squad to retrieve a data module, only to be beset by dozens of turian soldiers. With just a couple of defense turrets to assist them, a small strong point and no cover, Ahern and his men managed to fight the turians off for five minutes until their evac arrived. Eventually the turians broke through to attack Shanxi , the closest human colony to the mass relay, and settled in for a protracted orbital siege. With the turians in a superior position, able to kill any human soldiers from above, the Shanxi defenders began to starve, unable to get food or supplies without risking civilian lives. The turians - who were also suffering logistical problems, as they had to ship in all their food - believed they had defeated the bulk of the enemy forces. But they would be proven wrong when a month later Admiral Kastanie Drescher led the Second Fleet against Shanxi, catching the turians by surprise and evicting them from the planet. The turians and humans prepared for full-scale interplanetary war, drawing the notice of the rest of the galaxy. Peace and Consequences Edit Fortunately, the Citadel Council then intervened to negotiate a peace and bring the war to an end. From the Council, humans learned of the existence of the Citadel , and that there were many more sentient species in the galaxy who co-existed peacefully. In the end, only six hundred and twenty-three human lives were lost with slightly more turian casualties. The only notable engagements were the turian attack on Shanxi and its subsequent liberation by human forces. There were political and cultural ramifications for both sides. This led to the emergence of extreme pro-human groups like Terra Firma and, later, Cerberus. Some of the nuclear-armed probes sent into turian space remained at large; their existence remains an Alliance secret that could result in political consequences from the Citadel if revealed. For their part, the turians were ordered by the Council to pay heavy reparations to the Alliance. Veterans on both sides would harbour mistrust for a long time; Saren Arterius nurtured a hatred for humanity for the death of his brother and became an outspoken critic of human policy. In recent years, though antagonism remains, relations have improved slightly. The two races are now trade partners, and the construction of the SSV Normandy , which was designed and built by engineers of both races, began to mend the antagonism between humans and turians. In Mass Effect 2 , if Commander Shepard chooses to save the Citadel Council in the first game, a news report can be heard claiming that the Turian Hierarchy is considering additional reparations to humans whose ancestors died during the Relay Incident. Up until the Battle of the Citadel , the Turian Hierarchy had refused to pay interest on top of the reparations already paid.
