Business Nonfiction Carrie Wilkerson offers the opportunity to live life on your terms. Want to start your workday with e-mail and coffee on the back patio? Want the flexibility of joining your fourth grader on an all-day field trip? Then you have a choice to make, and *The Barefoot Executive* will help jump-start your transition. Why do you want to work for yourself? What type of business best suits your experience and talents. How to stay focused on your goal and avoid distractions. Where to find the support that will accelerate your success. How to link your business to the right market. Carrie will walk you through the process of building the business you need to achieve the life you want. Her guidance is practical. *The Barefoot Executive* will have you energized by the possibilities and embracing the extraordinary life that is well within your reach. *The Barefoot Executive* will pull you over the hurdle of uncertainty and get you moving, planning, doing. What Others Are Saying: I highly recommend this book! If you are looking to build a viable, sustainable, and lucrative business from home- or anywhere else- Carrie Wilkerson is your example, and her new book will show you the way. But a lot of those books leave readers high and dry when it comes to practical application. You need a plan and the tools to build with. Combine that with her enthusiasm, warmth, and core values, and you have someone very real to learn from. I know that when Carrie advises Ziglar, Inc.

*The Barefoot Executive isn't a how-to book that takes you step-by-step through how to start your own business. Instead, it is a book that motivates and encourages your dreams. You'll discover how to take skills you already have, determine what business model you're interested in, and how to be successful in the marketplace.*

What disappointed you about The Barefoot Executive? The title is completely misleading. Definitely not executive material. Has The Barefoot Executive turned you off from other books in this genre? It is a useless book for anyone who has been or wants to be in the business world. I can not imagine it being useful to anyone, whether you are starting out as a network marketer, an entrepreneur or a small partnership. However I do think it was worth the money. This review may seem harsh but keep reading to the end to understand my point. The book is not a straight road-map from business idea to creation to profit. She presents ideas and concepts in a non-linear fashion and often repeats herself. She mentions her 1b weight loss, adopted kids, mountains of debt, professional contacts Zig Ziglar, etc a lot! Her story is very inspiring! I applaud her will, dedication and commitment to success. I was expecting a more in depth discussion about how she built her business, the hurdles, the successes, the choices, etc. She briefly mentions her first business and extensively covers how her current business can help us reach new heights but never peels back the curtain. I think she used the steps she outlines in this book to grow her business to the point where she expanded in to this industry. Every chapter references how her current business and products can help us do the things she is teaching us to do. It is clear that the book is a marketing vehicle for her business. And for that reason I wanted to give this book 1 star. However, after listening objectively and ignoring the self promotion, I definitely see the value in the book. This book is great for someone who is considering getting in to business for themselves and is not sure how or why. The action steps she gives will help you get an idea of what YOU can do to build a business that you are good at and care about. It is not technical, so it is great for beginners and not so great for experienced business owners. There are a few insights for current biz owners but I think the greatest value in this book is in finding, evaluating and starting your business idea. This book gave me ideas that will allow me to make times the cost of the book within the next 6 months, so it was definitely worth reading. I prefer books that give the history of a business or CEO and talks about the tactics, ideas and tools they used to start and grow their business. Carrie Wilkerson has a very engaging style and is very encouraging, yet practical, in her strategies and techniques for starting a business. Carrie read the audio herself - that is sincerity at its max. Because she wrote the book and now she is reading it to her listeners, you feel that she is speaking to you directly and sharing with you all that she knows. The most amazing first audio book experience for me!!!
