New Hollywood Trend, Black king and queen films! Starring Black people!!" Below are 10 kings and queens whose extraordinary accomplishments would make great storylines for films.

Roger Taylor also contributes to this instrumental, using only a bass drum pedal. Like the preceding number, "Father to Son" has parts with May on multi-tracked guitar, played through the Deacy Amp. Queen added "Father to Son" to their live setlists immediately and toured extensively, but the song was dropped from the setlists in Although it was performed a few times in The song covers a two-octave range: May explained that he conceived the idea for this song while reading *The White Goddess* by Robert Graves. The song also had personal significance for May; he drew inspiration from a fellow student whom he revered and thought represented the idea of the "perfect woman". The song was also performed at the BBC in April It has a similar feel to the live version of the song because of the piano being omitted from the album version. The song features May playing his Hairfred acoustic guitar. The guitar had been given a replacement hardwood bridge, chiselled flat, with a small piece of fret wire placed between it and the strings, which lay gently above. The strings produce the buzzing effect of a sitar. It features May on acoustic guitar and electric guitar and the last guitar solo during the fade-out features three solo guitars. This kind of complex guitar arrangement is typical of May; however, usually the guitars are harmonious, but in this case, all of the guitars play different parts. The original handwritten lyrics of the song were almost lost in when they were nearly shredded, and now is the oldest example of handwritten lyrics in the Queen archive. The band did not want to record it for their first album, but rather waited until they could have more studio freedom to do it properly. As the title suggests, it tells the story of a battle between ogres, and features a May guitar solo and sound effects to simulate the sound of a battle. The beginning of the song is the end of the song in reverse including the final gong, which when played backwards at the start of the song, creates the building wave sound. It was a longtime live favourite. This version starts right away with its riff without any long intro , does not have any effects that the version on "Queen II" has and sounds much less polished. The BBC version of "Ogre Battle" did originally have a long intro featuring a grand guitar build up; it was not used for this release, allegedly because the original tape was damaged. The ending gong flows into the next track, with added clock ticks. For the intricately arranged studio recording, Mercury played harpsichord as well as piano, and Roy Thomas Baker played the castanets. The complex arrangements are based around a backing track of piano, bass guitar and drums, but also included harpsichord, multiple vocal overdubs and overdubbed guitar parts. The lyrics follow the claustrophobic atmosphere of the painting, and each of the scenes are described. The song was performed only a few times during the Queen II Tour. All the vocal parts were performed by Mercury, who added some contemporary piano "ring" effects as well. These effects were widely suspected to be synthesisers; however, they were created by someone plucking the piano strings while Mercury played the notes. The lead vocals cover two and a half octaves G2 - C5. The intro to the song is all that was played, as they quickly transitioned into Bohemian Rhapsody. This song ends with an ascending note progression, which climaxes in the first second of the following track. Mercury wrote it and played the piano while Robin Cable produced. It was produced using the " wall of sound " technique. The song is written in the key of C , in which it goes up from an E minor chord in "The March of the Black Queen" to a C chord in this song. The song was never performed live, largely due to the demanding high-register vocals from Mercury throughout the song. It features a distinctive arpeggiated piano introduction " on the Queen II recording, the arpeggios are played with both the right and left hands, an octave apart, whereas on the Queen recording, and most live performances, Mercury played the simpler one-handed version of these arpeggios. Artwork and packaging[edit] The Queen II album cover features a photograph taken by Mick Rock of, according to VH1, "Queen standing in diamond formation, heads tilted back like Easter Island statues " against a black background. Subsequently, the brief the photographer received from Queen was to have a black and white theme for the Queen II artwork. Release and reception[edit].
