

1: SEAGRAM BLDG. GOES ON THE BLOCK “ LANDMARKED LEGEND HOME TO 4 SEASONS

Fulfillment by Amazon (FBA) is a service we offer sellers that lets them store their products in Amazon's fulfillment centers, and we directly pack, ship, and provide customer service for these products.

Tetris-like Stacking Game Online - 99 Bricks: Legend of Garry Rating: Unlike classic Tetris where the goal is to keep your tower as low as possible, in 99 Bricks: Legend of Garry, you have to build tall and solid buildings using the familiar rotatable Tetris blocks. Fans of online engineering-based brainteasers and freestyle building games should find the tower building gameplay in this cool yet tricky block stacking activity at the higher quality end of the scale. The game is based on the laws of physics and gravity, so your Tetris block towers must be well-balanced and firmly supported in order to remain upright. The gameplay also includes an element of fun and adventure as you actually have a goal of rebuilding towns along your epic journey. Enjoy this great block stacking test of your construction skills, stamina and patience! In each of the 24 levels towns, your goal is to build a tower to the specifications laid out by the helpful, bearded Wizard. As in classic Tetris, the blocks descend slowly from the top of the game screen. Press the Down Arrow or S key to increase the speed of the falling block. Once you reach the target specified by the wise old Wizard, you progress to the next level. However, if your tower collapses before you reach the target, you must replay the level. Press the C key to discard your current block, and the V key to remove the previously-placed block. Hold down the Z key to zoom out in order to gain a better view of the whole tower. This comes in handy at times. Thank you for playing games on our site over the years. This game is Flash-based, and it appears that your browser does not support Flash Player. This game can be played after installing a web browser with Flash support, and can be played on most desktop browsers without any further installing. Play Mobile Games here on Learn4Good. 2: King Solomon - Solomon's Temple - Crystalinks

Legend for the Six Energy Building Blocks and their Modulators It pays to realize that the personality (the 'persona', lat meaning 'mask') is not the Self, rather it constitutes the software without which the hardware (the body) could not operate and would be reduced to a moron-like existence instead.

Docs Archive Getting started This guide will help you get started and acquainted with Grafana. It assumes you have a working Grafana server up and running. If not please read the installation guide. Logging in for the first time To run Grafana open your browser and go to <http://localhost:3000>: There you will see the login page. Default username is admin and default password is admin. When you log in for the first time you will be asked to change your password. You can later go to user preferences and change your user name. How to add a data source Before you create your first dashboard you need to add your data source. First move your cursor to the cog on the side menu which will show you the configuration menu. If the side menu is not visible click the Grafana icon in the upper left corner. You can also simply click the cog. Click Add data source and you will come to the settings page of your new data source. After you have configured your data source you are ready to save and test. Beginner guides Watch the 10min beginners guide to building dashboards to get a quick intro to setting up Dashboards and Panels. You can find the new Dashboard link on the right side of the Dashboard picker. You now have a blank Dashboard. The image above shows you the top header for a Dashboard. This toggles the side menu, allowing you to focus on the data presented in the dashboard. The side menu provides access to features unrelated to a Dashboard such as Users, Organizations, and Data Sources. This dropdown shows you which Dashboard you are currently viewing, and allows you to easily switch to a new Dashboard. From here you can also create a new Dashboard or folder, Import existing Dashboards, and manage Dashboard playlists. Adds a new panel to the current Dashboard Star Dashboard: Star or unstar the current Dashboard. Share the current dashboard by creating a link or create a static Snapshot of it. Make sure the Dashboard is saved before sharing. The current Dashboard will be saved with the current Dashboard name. Manage Dashboard settings and features such as Templating and Annotations. Dashboards, Panels, the building blocks of Grafanaâ€ Dashboards are at the core of what Grafana is all about. Dashboards are composed of individual Panels arranged on a grid. Grafana ships with a variety of Panels. Grafana makes it easy to construct the right queries, and customize the display properties so that you can create the perfect Dashboard for your need. The Basic Concepts guide explores these key ideas in detail. Zoom out time range Time picker dropdown. Here you can access relative time range options, auto refresh options and set custom absolute time ranges. Will cause all panels to refresh fetch new data. You edit panels by clicking the panel title. You can change series colors, y-axis and series visibility directly from the legend. To edit the graph you click on the graph title to open the panel menu, then Edit. This should take you to the Metrics tab. In this tab you should see the editor for your default data source. Use the Query Editor to build your queries and Grafana will visualize them in real time. Drag-and-Drop panels You can Drag-and-Drop Panels by simply clicking and holding the Panel title, and drag it to its new location. Tips and shortcuts Click the graph title and in the dropdown menu quickly change span or duplicate the panel. Click the Save icon in the menu to save the dashboard with a new name Click the Save icon in the menu and then advanced to export the dashboard to json file, or set it as your default dashboard.

3: Making of Grimrock 2: level building blocks Â» Legend of Grimrock

Cannabis Seeds Lineage Legend OG Kush x Legend OG Kush Marijuana Seeds Description. The Famous Legend OG Kush in feminized seed form is here! The Legend OGK or CrinkleLegend is one of the building blocks of today's modern OG's.

The Karmic Debt is the modulator with the strongest impact, and it can be found in the birthday as well as in the name vibrations. The name-dependent Modulators indicate characteristics that are either above or below the average intensity, as found to be typical in our present western type of civilization and society. These disclosures display themselves as the talents and gifts aka Intensities or Inclusions with which a person has been born, and which have become part of the overall quality we call the Expression. Talents and gifts are therefore natural propensities to which the individual inclines and which are expressed either with ease or with great disease, respectively not at all in the case they are missing in the birth chart. A Missing Ability now indicates potential weaknesses, difficulties, or obstacles, because its vibration was not attuned to in past lives. The energy is less insistent than that of the Karmic Debt but is still exerting an important influence. The experience of learning through a Missing Ability is not going to come easily. Until it is taken to heart, life is full of gloom and hardship and a cause of misery to those around. Missing Abilities Assisted still have to be encountered, yet the individual is supplied with the type of energy needed to handle the situations. Only if a given type of this vibration appears in the form of a master number, a doubled element, or a karmic debt, the Missing Ability Assisted is experienced as an obstacle and learning it will be on par with learning a Missing Ability. If these challenges in their numerical value are equal to one in the Fundamental Lesson, a certain Pinnacle, or to a certain Pythagorean Life Cycle, particular attention has to be paid to them to avoid destruction and ruin during those periods. There are three types of Challenges: It is accentuated in the First Half of life but is felt throughout the entire existence of the person. It is accentuated in the Second Half of life but is felt throughout the entire existence of the person. It is emphasized in the Youth but it is in force for the entire life span of the person. GROW The GROWTH a name vibration The Growth describes a type of energy that modulates the Core Energies towards a more rapid development, provided, it is matched by the same or a similar potential among these energies, or among the Modulators, and it is not in conflict with other strong vibrations among the Core Energies. If these conditions are not met, the person will show little development, particularly in his earlier years. As before, a Grow of 4, an FL of 2, but an Expression of 5: The 4 and the 5 being in discord with each other, the subject has to make a decision whether he wants to concentrate on his No 2 Fundamental Lesson and use the No 5 energy constructively to achieve the goal of the lesson, or succumb to the negative side of the 5 and become distracted and scatter his forces altogether. Again, a Grow of 4, an FL of 2, but no vibration among the Core Energies, or as a strong Modulator, to match or be similar to his Growth number: The type-4 energy is accentuated by the presence of the Grow of 4 and the EX of 4. There is no doubt, this person will learn expressing himself in a structured and organized way and develop in other areas equal or similar to this type of energy. This may be an emergency situation, a fait-accomplis presentation, a new idea or project, or simply the need to make an ad-hoc decision about something. The way the individual reacts depends on the quantity of Missing Abilities in his chart. The Temperament, like the Core Energies and other modulators, describes the conditions at birth. This manifests in the alteration of his name. Unlike other modulators, which add or subtract to or from the Core Energies, the Temperament Filters act as a strainer allowing only parts of the Core Energies to express themselves in the open. With most people or businesses, there seem to be only minor alterations in their nature during their life. When these circumstances change later in life, formerly attenuated Core Energies are evoked and are then able to express themselves. The Core Energies represent the very essence of a person, but the Temperament Filters are important when it comes to meeting, attracting, and associating with people. The delineations in the assessment distinguish between weak, average, strong, and too strong Temperaments on their respective levels. It should be kept in mind that no Temperament Filter can let through vibrations that are not present in the group of Core Energies. The description of a certain Temperament has only a relative value and must be referred to the vibrations that are

listed in the Core Energies. Hyper- or hypoactivity affects the nervous system and from there filters down to the physical level where it manifests as weakened strength, vigor and fitness. The impact of this factor is proportional to the number of repetitions of a certain digit in the birthdate. Three times the No 1, if a person was born on the , is a case in point. They are an important factor in viewing or maintaining long-term connections. If you experience any malfunctions on this page, eg loading difficulties or failing link connections, pls email us stating the nature of the problem in the message field.

EmD23 If someone had told her a year ago that she would be seriously discussing her relationship with Link with Groose of all people, Zelda would have laughed. Strangely enough, however, the big guy makes for a good ear. The Legend of Zelda Rating: If someone had told her a year ago that she would be seriously discussing her relationship with Link with Groose of all people, Zelda would have laughed. Intricate designs, perfect materials, spacious living quarters! No offense to Gondo but when you need to build things from scratch you leave it to the Grooseman! The Groosenator is proof enough! He turns to stare at Zelda directly. But really, should I start saving for baby gifts? Then, her eyes fiery and face determined, she stares down Groose with an intense gaze. Zelda looks down at the ground and begins speaking, her tone hesitant and unsure. Zelda waves his apologies off. Her vows of purity, her thoughts and beliefs, all of that. It makes me feel incredibly guilty which is why I stop Link before we go any further. I just want to be me! I can see that and Link can definitely see that and uh, darn. What else am I supposed to say here? And when you do," Groose paused, "I get to be godfather. Bucha need some help. I picked up some fruit though. Link glares at him and Zelda takes the fruits and places them on the ground as Link and Groose argue their way towards the home the three of them have been working on. Her gaze lingers on the Statue of the Goddess before she catches up to the two men, who are still arguing. An hour later, Zelda finds herself and Link painting the exterior walls as Grose hammers away on the roof while whistling a merry tune. Zelda stares at Link as he paints, quite obviously trying to stop himself from joining Groose in his whistling. Some of us for the better. He steps away from the house and at distance so as to give the two of them some privacy and Zelda follows. This identity crisis of yours? Groose is still whistling and not looking at them but she can see the amused smirk forming on his face and realizes Link has miscalculated. She does not care, however and continues on. I do appreciate you telling me this and we can talk more tonight so I can help you with getting over those memories. Her body is burning and half of her is begging for more while memories assault her and a voice chides her about decency and purity. My body is telling me yeeeACK! The rest of our lives" which you should all check out! Please leave a review and constructive criticism. The author would like to thank you for your continued support. Your review has been posted.

Creating graphics for games can be quite technical at times. A game artist needs to keep in mind that there's a finite amount of memory available for graphics in the game.

You can read the full Legend here and buy a copy here. Van Tassel homestead Schoolmaster Ichabod Crane began his famous flight from the headless horseman at the home of the Van Tassel family. Local tradition attaches the flirty Katrina to the Elizabeth Van Tassel house, which was converted to a tavern before the Revolutionary War by the Mott family. The Landmark Condominium building presently on the site was formerly the Frank R. There is a bronze marker on the southwest corner of the Landmark noting that it occupies the site of the former Mott Tavern. The park and monument are located on the west side of Route 9 Broadway at the border between Sleepy Hollow and Tarrytown. A few rough logs, laid side by side, served for a bridge over this stream. In the dark shadow of the grove, on the margin of the brook, [Ichabod] beheld something huge, misshapen and towering. It stirred not, but seemed gathered up in the gloom, like some gigantic monster ready to spring upon the traveler. He appeared to be a horseman of large dimensions, and mounted on a black horse of powerful frame. Philipsburg Manor , North Broadway, Sleepy Hollow, NY , Our man of letters, therefore, was peculiarly happy in the smiles of all the country damsels. How he would figure among them in the church-yard. The church and churchyard are adjacent to but not affiliated with the acre Sleepy Hollow Cemetery. Old Dutch Church of Sleepy Hollow and Old Dutch Burying Ground , North Broadway, Sleepy Hollow, NY, at the south gate to Sleepy Hollow Cemetery Indeed, certain of the most authentic historians of those parts, who have been careful in collecting and collating the floating facts concerning this spectre, allege that the body of the trooper, having been buried in the church-yard, the ghost rides forth to the scene of battle in nightly quest of his head; and that the rushing speed with which he sometimes passes along the Hollow, like a midnight blast, is owing to his being belated, and in a hurry to get back to the church-yard before daybreak. Local historians Jeff Canning and Wally Buxton describe three ghostly associations with this spot in their book History of the Tarrytowns. It is far enough off the beaten path that its location has remained obscure even for most locals. Until, that is, archivist Lucas Buresch did a little sleuthing that made a positive ID on the rock formation of Raven Rock. Some mention was made also of the woman in white, that haunted the dark glen at Raven Rock, and was often heard to shriek on winter nights before a storm, having perished there in the snow. In the gathering gloom of some overcast autumn afternoon, you might just hear hoofbeats approaching from behind. Not far from this village, perhaps about two miles, there is a little valley or rather lap of land among high hills, which is one of the quietest places in the whole world. A small brook glides through it, with just murmur enough to lull one to repose; and the occasional whistle of a quail or tapping of a woodpecker is almost the only sound that ever breaks in upon the uniform tranquility. I recollect that, when a stripling, my first exploit in squirrel-shooting was in a grove of tall walnut-trees that shades one side of the valley. I had wandered into it at noontime, when all nature is peculiarly quiet, and was startled by the roar of my own gun, as it broke the Sabbath stillness around and was prolonged and reverberated by the angry echoes. If ever I should wish for a retreat whither I might steal from the world and its distractions, and dream quietly away the remnant of a troubled life, I know of none more promising than this little valley.

6: The Legend of Love - Wikipedia

The Landmark Condominium building presently on the site was formerly the Frank R. Pierson School (ca.), which itself was formerly the Washington Irving High School until the s when the school district built a new Washington Irving High School at the corner of Franklin Street and South Broadway in Tarrytown.

We accept Paypal, and credit card via paypal. Payment is due within 7days after end of auction. This item will be shipped for the rate quoted via air to your Paypal address. Package are shipped within 2 days of auction Check Out with payment except weekends and holidays. All products will generally be shipped out within 2 working days after we receive the payment, please also provide us your phone number. We endeavor to deliver your products as soon as possible. Should you receive the wrong product due to shipping or packing erroe, please contact us as soon as possible in the event your product is damaged or defective. We are not responsible for wrong or undeliverable address. Please provide us your full address and telephone number and make sure your shipping address is correct and deliveries can be made to this address. We will not take responsibility if the shipping is delayed due to address problem. If you need to change your address, please change it in Paypal first before you pay. Please note that delays due to bad weather or custom inspections may still occur. If you are not satisfied with the items or our service, please contact us before you leaving neutral or negative feedback. We will work with you to until you are satisfied. We will provide a quicker and faster solution than ebay and Paypal. Your understanding and help will be highly appreciated. Still have another enquiries? Thank you for your viewing and good luck to you! Seller assumes all responsibility for this listing. Shipping and handling This item will ship to Germany, but the seller has not specified shipping options. List the building components and annotations in your project. Click View tab Create panel Legends drop-down (Legend).; In the New Legend View dialog, enter a name for the legend view and select the view scale.

In the early s, an industrial engineer, Allan H. Mogensen began training business people in the use of some of the tools of industrial engineering at his Work Simplification Conferences in Lake Placid , New York. Another graduate, Ben S. Graham , Director of Formcraft Engineering at Standard Register Industrial , adapted the flow process chart to information processing with his development of the multi-flow process chart to display multiple documents and their relationships. FFBDs show the same tasks identified through functional decomposition and display them in their logical, sequential relationship. For example, the entire flight mission of a spacecraft can be defined in a top level FFBD, as shown in Figure 2. Each block in the first level diagram can then be expanded to a series of functions, as shown in the second level diagram for "perform mission operations. Each block in the second level diagram can be progressively developed into a series of functions, as shown in the third level diagram on Figure 2. For example, does the spacecraft antenna acquire the tracking and data relay satellite TDRS only when the payload data are to be transmitted, or does it track TDRS continually to allow for the reception of emergency commands or transmission of emergency data? The FFBD also incorporates alternate and contingency operations, which improve the probability of mission success. The flow diagram provides an understanding of total operation of the system, serves as a basis for development of operational and contingency procedures, and pinpoints areas where changes in operational procedures could simplify the overall system operation. In certain cases, alternate FFBDs may be used to represent various means of satisfying a particular function until data are acquired, which permits selection among the alternatives. Flow is from left to right. Each function on an FFBD should be separate and be represented by single box solid line. Each function needs to stand for definite, finite, discrete action to be accomplished by system elements. Each level should have a consistent number scheme and provide information concerning function origin. These numbers establish identification and relationships that will carry through all Functional Analysis and Allocation activities and facilitate traceability from lower to top levels. Each diagram should contain a reference to other functional diagrams by using a functional reference box in brackets. Lines connecting functions should only indicate function flow and not a lapse in time or intermediate activity. Diagrams should be laid out so that the flow direction is generally from left to right. Arrows are often used to indicate functional flows. AND is used to indicate parallel functions and all conditions must be satisfied to proceed. OR is used to indicate that alternative paths can be satisfied to proceed. These symbols are placed adjacent to lines leaving a particular function to indicate alternative paths. Function symbolism[edit] A function shall be represented by a rectangle containing the title of the function an action verb followed by a noun phrase and its unique decimal delimited number. A horizontal line shall separate this number and the title, as shown in see Figure 3 above. The figure also depicts how to represent a reference function, which provides context within a specific FFBD. See Figure 9 for an example regarding use of a reference function. Function Symbol Directed lines[edit] A line with a single arrowhead shall depict functional flow from left to right, see Figure 4. A condition in which all preceding or succeeding paths are required. The symbol may contain a single input with multiple outputs or multiple inputs with a single output, but not multiple inputs and outputs combined Figure 5. Read the figure as follows: A condition in which one of multiple preceding or succeeding paths is required, but not all. The symbol may contain a single input with multiple outputs or multiple inputs with single output, but not multiple inputs and outputs combined Figure 6. F2 OR F3 may begin after completion of F1. A condition in which one, some, or all of the multiple preceding or succeeding paths are required. Read Figure 7 as follows: Figure 9 is a decomposition of the function F2 contained in Figure 8 and illustrates the context between functions at different levels of the model.
