Humans are dependent on parental help for a large portion of their lifespans compared to other mammals. Love has therefore been seen as a mechanism to promote parental support of children for this extended time period. Furthermore, researchers as early as Charles Darwin himself identified unique features of human love compared to other mammals and credit love as a major factor for creating social support systems that enabled the development and expansion of the human species. This would favor monogamous relationships over polygamy. Certainly love is influenced by hormones such as oxytocin, neurotrophins such as NGF, and pheromones, and how people think and behave in love is influenced by their conceptions of love. The conventional view in biology is that there are two major drives in love: Attachment between adults is presumed to work on the same principles that lead an infant to become attached to its mother. The traditional psychological view sees love as being a combination of companionate love and passionate love. Passionate love is intense longing, and is often accompanied by physiological arousal shortness of breath, rapid heart rate; companionate love is affection and a feeling of intimacy not accompanied by physiological arousal. Cultural views See also: Greek words for love Roman copy of a Greek sculpture by Lysippus depicting Eros, the Greek personification of romantic love Greek distinguishes several different senses in which the word "love" is used. Ancient Greeks identified four forms of love: At the same time, the Ancient Greek text of the Bible has examples of the verb agapo having the same meaning as phileo. The word agapo is the verb I love. It generally refers to a "pure," ideal type of love, rather than the physical attraction suggested by eros. However, there are some examples of agape used to mean the same as eros. It has also been translated as "love of the soul. The Greek word erota means in love. Plato refined his own definition. Although eros is initially felt for a person, with contemplation it becomes an appreciation of the beauty within that person, or even becomes appreciation of beauty itself. Eros helps the soul recall knowledge of beauty and contributes to an understanding of spiritual truth. Lovers and philosophers are all inspired to seek truth by eros. Some translations list it as "love of the body". Philia is motivated by practical reasons; one or both of the parties benefit from the relationship. It can also mean "love of the mind. It was an almost ritualized friendship formed between a host and his guest, who could previously have been strangers. The host fed and provided quarters for the guest, who was expected to repay only with gratitude. Ancient Roman Latin The Latin language has several different verbs corresponding to the English word "love. The Romans used it both in an affectionate sense as well as in a romantic or sexual sense. From this verb come amans—"a lover, amator, "professional lover," often with the accessory notion of lechery—and amica, "girlfriend" in the English sense, often being applied euphemistically to a prostitute. The corresponding noun is amor the significance of this term for the Romans is well illustrated in the fact, that the name of the City, Rome—in Latin: Roma—can be viewed as an anagram for amor, which was used as the secret name of the City in wide circles in ancient times, [36] which is also used in the plural form to indicate love affairs or sexual adventures. This same root also produces amicus—"friend"—and amicitia, "friendship" often based to mutual advantage, and corresponding sometimes more closely to "indebtedness" or "influence". Cicero wrote a treatise called On Friendship de Amicitia, which discusses the notion at some length. Ovid wrote a guide to dating called Ars Amatoria The Art of Love, which addresses, in depth, everything from extramarital affairs to overprotective parents. Diligere often has the notion "to be affectionate for," "to esteem," and rarely if ever is used for romantic love. This word would be appropriate to describe the friendship of two men. The corresponding noun diligencia, however, has the meaning of "diligence" or "carefulness," and has little semantic overlap with the verb. Observare is a synonym for diligere; despite the cognate with English, this verb and its corresponding noun, observantia, often denote "esteem" or "affection. As it arises from a conflation with a Greek word, there is no corresponding verb. Two philosophical underpinnings of love exist in the Chinese tradition, one from Confucianism which emphasized actions and duty while the other came from Mohism which championed a

universal love. In Confucianism, one displays benevolent love by performing actions such as filial piety from children, kindness from parent, loyalty to the king and so forth. In this, he argued directly against Confucians who believed that it was natural and correct for people to care about different people in different degrees. Mozi, by contrast, believed people in principle should care for all people equally. Mohism stressed that rather than adopting different attitudes towards different people, love should be unconditional and offered to everyone without regard to reciprocation, not just to friends, family and other Confucian relations. In Buddhism, Ai was seen as capable of being either selfish or selfless, the latter being a key element towards enlightenment. Instead of frequently saying "I love you" as in some Western societies, the Chinese are more likely to express feelings of affection in a more casual way. Japanese The Japanese language uses three words to convey the English equivalent of "love". Because "love" covers a wide range of emotions and behavioral phenomena, there are nuances distinguishing the three terms. Following the Meiji Restoration , the term became associated with "love" in order to translate Western literature. For example, Book 10 of Rig Veda describes the creation of the universe from nothing by the great heat. There in hymn , it states: When the calamity of time afflicts one limb The other limbs cannot remain at rest. If you have no sympathy for the troubles of others You are not worthy to be called by the name of "man".

Not when he came back and led his team to a Stanley Cup win, and had two more good years before a torn ACL ended his career. Not even when he went to college and took a creative writing class because he needed one more elective to graduate. What if, instead of playing hockey together, Jack and Bitty met as authors on a book tour? This work will be posted in two parts. See the end of the work for more notes. Chapter Text Jack Zimmermann has been called a lot of things in his life. Boy Wonder, they called him, both admiringly and disparagingly, when he was coming up in juniors, cocky and full of potential, poised to go first in the draft. Then, after a near-fatal overdose his rookie year, Fallen Son, flung about by gossip and sports reporters to inflict maximum damage on Jack and his celebrity parents, a golden family due for a downfall. The fictional Falcons are more diverse than the teams Jack played on as a kid, and part of the reason he writes is to convince his young readers that anyone can play. Not as good as he was at hockey, he thought, but he would never really be good at hockey again, so why not try this? It was a long shot. Some suggested he hold out for a major house that could offer more money and a bigger publicity budget. For all of his career mishaps and missteps, he was still a big name, one that might give the tiny startup some visibility. The first book, The Fearless Falcons, sold surprisingly well for a debut author with a small press. Helped along with a push from Jack and some of his famous friends, it had caught on in the close-knit hockey community and word had spread from there. Eric Bittle, like Jack, left the ice years ago. Plus, what better way to launch our new author than to send him on tour with you? Depending on the success of this tour, a national book tour could be in their future. But he is expected to do press and make appearances to promote the books. And this is something he still struggles with. Grateful because, honestly, it takes some of the pressure off of him. Infuriated, because Bittle and their publicity team have turned what used to be short book signings into a half-day events that seem designed to highlight how uncharismatic and awkward he is. Bittle travels with an entire extra suitcase full of everything he needs to prepare his table: Oh yes, there are also the mini pies. As far as Jack knows, he preps them the night before their events. They have this part down to a science. But today, as he has the previous two weekends, he dutifully puts on his skates and takes the ice with a couple dozen kids. Bittle instinctively knows what to do with them. Jack, by contrast, skates in slow circles and counts the minutes until he can leave the ice. Act like you want to be here. You could run some drills? Maybe set up a goal and have a shootout with the kids? I can talk to Julie about that. I used to play for the Falconers, you know. I was pretty little, though. Jack slows down to match her lurching stride. Free skate ends at 1: You were real sweet to those kids out on the ice. Jack had patiently skated with her for the rest of their ice time. We should carpool next week. Sometimes I listen to old radio shows. All would be partial truths, but Jack just shrugs. Jack shrugs, because when he puts it that way, it does seem silly. Come on over to my room tonight. You can put the TV on and keep me company while I make my mini pies. Do you want to sit down? It takes Bittle a second to realize Jack is joking, and then he laughs brightly. The oven is already on. A baking sheet filled with tiny foil pie tins sits on the counter on one side of the oven, and a bowl of cherries sits on the other. Jack sets the wine down on the counter and watches as Bittle goes back to stirring his bowl of cherries. And then they get to take the recipe home, so they can learn something new. Hopefully with their parents helping out. The pies and the social media and everything. I prefer to just write my books and keep to myself. Lets me control the narrative and all that. Even with only five years in the NHL, he made what most people would consider an obscene amount of money for essentially playing a game. He owns his home and car outright, can afford a nice meal out or vacation whenever he wants, but otherwise lives fairly modestly. He sits down on the opposite end of the couch and hands one off to Bittle. Everyone knows about your diet plan. That may have been an exaggeration. And I was really wrong about the pie, it smells amazing. And pizza sounds great, actually. Play your cards right, there may even be a mini pie with your name on it for dessert. Jack enjoys photography, even took a few classes in college, and has always found sharing pictures on Instagram to be more comfortable than sharing

brief thoughts on Twitter. Bittle adjusts the pies on the counter and tries to help Jack frame the photo until he realizes Jack knows what to do, and he looks on with a little bit of pride as Jack takes several shots from different angles. See you tomorrow, Princeton. At the beginning of the tour, his anxiety would begin to spike as the weekend crept closer. It is, he realizes, a lot more fun when he allows himself to have fun. Hanging out with Eric is also fun. I think there are even some chocolate chips in this one. Carob chips, not chocolate, dear god, why € Here, try it. Jack takes the bag and tries some. Would you believe JLZWrites thought vending machine trail mix was an acceptable dinner? Thank goodness for delivery. And the couch pulls out into a bed. I can sleep here. More than that, he realizes he likes being with Eric more than he likes being with most people.
