If there is significant divergence from the condition of the vinyl, or specific flaws, these will be noted in the comments section of the item. However, please be aware that since the emphasis of this site is towards the music listener, our main concern is with the vinyl of any used item we sell. Additionally, all of our records are graded visually; considering the volume of used vinyl we handle, it is impossible for us to listen to each record. If we spot any significant flaws, we make every attempt to listen through them and note how they play. The following grading conditions apply to the vinyl component of an album or single: Sealed This is what it says, that the record is still held fast in shrink-wrap. Near Mint Dusty Groove does not use the grades of Near Mint or Mint, for that matter because in our experience, we find that no records ever qualify for such a high grade. Even sealed records tend to have one or two slight faults, enough to usually qualify them for a grade of NM- or lower. Near Mint - minus Black vinyl that may show a slight amount of dust or dirt. Should still be very shiny under a light, even with slight amount of dust on surface. One or two small marks that would make an otherwise near perfect record slightly less so. May have some flaws and discoloration in the vinyl, but only those that would be intrinsic to the pressing. These should disappear when the record is tilted under the light, and will only show up when looking straight at the record. May have some slight marks from aging of the paper sleeve on the vinyl. Possible minor surface noise when played. Should still shine under a light, but one or two marks may show up when tilted. Can have a few small marks that may show up easily, but which do not affect play at all. Most marks of this quality will disappear when the record is tilted, and will not be felt with the back of a fingernail. This is the kind of record that will play "near mint", but which will have some signs of use although not major ones. May have slight surface noise when played. Very Good Vinyl can have some dirt, but nothing major. May not shine under light, but should still be pretty clean, and not too dirty. May have a number of marks 5 to 10 at most, and obvious signs of play, but never a big cluster of them, or any major mark that would be very deep. Most marks should still not click under a fingernail. May not look near perfect, but should play fairly well, with slight surface noise, and the occasional click in part of a song, but never throughout a whole song or more. This is clearly a copy that was played by someone a number of times, but which could also be a good "play copy" for someone new. Very Good - minus Vinyl may be dirty, and can lack a fair amount of luster. Vinyl can have a number of marks, either in clusters or smaller amounts, but deeper. Still, the flaws should be mostly cosmetic, with nothing too deep that would ruin the overall record. Examples include a record that has been kept for a while in a cover without the paper sleeve, or heavily played by a previous owner and has some marks across the surface. The record should play okay, though probably with surface noise. May have marks on all parts, too many to qualify as Very Good-, or several deeper marks, but the record should still be ok for play without skips. In general, this is a record that was played a fair amount, and handled without care. A typical example may be a record which has been heavily played by a DJ, and carries marks from slip cueing. Depending on the quality of the vinyl, may play with surface noise throughout. Will have marks across all parts of the playing surface, and will most likely play with surface noise throughout. May have some other significant flaws, such as residue, or a track that skips. In most cases, a poor quality copy of a very difficult to find record. Fair This is a grade we rarely use, as we try not to sell records in very bad condition, though in some rare cases we will list a record in such bad shape that it does not conform to the standards above. An example might be a recording with surface noise so heavy that it is equal to the volume of the music. For records listed as "Fair", we will describe the extent of the condition in the comments. Poor Like "Fair", we rarely list records in this condition, as they represent the extreme low end of spectrum. These records typically have multiple serious problems, and we offer them as "relics" or "objects" only for those who want to at least have a copy of a record, even if it is not really worthy of play, perhaps for the cover alone. For these records, we will describe the extent of the condition in the comments. This grade

is somewhat all-encompassing, but we choose it because we try to offer Used CDs in the best shape possible. All of our Used CDs are guaranteed to play without skipping or flaws. If you purchase a Used CD from Dusty Groove, you have 1 week to play it to determine that it plays correctly and if it does not, then you may return it for a full refund. With our Used CDs, you can expect the disc to be free of all but the lightest of surface marks clean, and not dirty at all. You can also expect the case to be clean we often change the cases ourselves putting fresh cases on Used CDs we handle and you can expect the booklet to be in good shape, unless noted otherwise. You might be interested Various.

The Multimedia I Ching [CD-ROM], and: The Columbia I Ching on CD-ROM (review) Kenneth Goodall China Review International, Volume 5, Number 2, Fall , pp.

Meanwhile, both retail and wholesale trade lost ground. Higher actuarial liabilities for life insurers pushed overall profits in the financial sector down 7. But much of the damage to retail sales has already been done in Q1 and Q2. Retail Sales Outlook Canada Q3 The following is a list of the largest stock trades made by corporate executives, directors and other company insiders of B. August 19, 22 Trade total: August 22 Trade total: Jim Pattison, director Company: August 18, 19, 23 Trade total: First Majestic Silver Corp. August 18, 19, 22 Trade total: Fortuna Silver Mines Inc. August 15, 16, 17 Trade total: Robert Leclerc, chairman Insider: August 23 Trade total: Rohan Hazelton, vicepresident, finance Company: Carl Icahn, investor Company: Lions Gate Entertainment Corp. August 16, 18 Trade total: Date Thursday, September 29, time 5: Tickets will be emailed once payment is received. Or maybe it was right on time but had too much competition. More often than not, though, it fails because of a lack of seed money and guidance in the critical early stages of a company. UBC students, faculty and alumni are eligible to apply. The program " an initiative of the Sauder School of Business " also offers startups office space for six to 12 months. The newest accelerator on the block is GrowLab. It got a very public launch at the August 17 to 19 Grow conference held at the Vancouver Convention Centre. The annual conference is sponsored by DealMakerMedia. Its founder, Debbie Landa, also founded GrowLab. Born in Saskatoon, Landa has lived in San Francisco for two decades. The idea behind GrowLab is to put five startups through a threemonth boot camp for techpreneurs before shipping them off to Silicon Valley for a month to fight for venture capital. While the funding they receive is important, Landa said the networking and mentoring they get from successful high-tech executives is equally vital. There will be two programs a year, running four months each. The first is just getting underway, with two startups from Vancouver, one from Toronto, one from Philadelphia and one from Bucharest chosen from more than applicants. During that time, they get help with issues like product development, marketing, financing and legal advice from established hightech entrepreneurs. The two Vancouver startups accepted into the GrowLab incubator program are Matygo, which develops software used in post-secondary institutions, and Placeling, a website that will allow people to share experiences about their favourite places in the world to visit. Starting an Internet-based company is relatively easy; turning it into the next YouTube is an entirely different story. Several made important connections with venture capitalists, and there was at least one acquisition. The High-Tech Office had several important anniversaries in August. And they licensed an operating system from a small company, Microsoft. One result of these decisions: By the number of personal computers descended from that IBM model passed one billion By the number of personal computers descended from that IBM model passed one billion. And these have become increasingly affordable and generic. As prices dropped, so did profitability. You probably have one of those personal computers on your desk or in your laptop bag right now. Would you believe ? Despite that, he said we all owe more to Linux than many of us may realize. It also powers projects ranging from anti-missile missiles to the New York Stock Exchange. Got an Android smartphone in your purse or pocket? Jim Whitehurst, CEO of Linux distributor Red Hat, noted that like other open source software, Linux is free " both in price and in the freedom to copy and modify the underlying code. And that, he proclaimed, means that companies " both existing enterprises and startups " can use it for innovative projects that might otherwise be too expensive to undertake. Facebook, Amazon and more all have initially been built at lower cost, using Linux servers and other opensource tools " and have been able to continue to use it as their infrastructure expands. And August is also the month of my own wedding anniversary. His column appears weekly. That finally went to a mediator last November. Gameday boss Tony Vitrano became the transport lead for the London Olympic committee. Usually, a top-ranking executive from the most recently completed Games joins the panel. The former head of Speedskating Canada was on the job for just 18 months. Chris Overholt succeeded Dupre, handing his chief marketing officer job to Derek Kent. The managing partner for Fusion Sponsorship and Events and Altius Sport Marketing since will maintain a

senior consultancy role with Cossette in Vancouver. Companies are under more pressure to spend less, spend wisely and gauge the results, he said. Nelson remains the sponsorship agent for BC Place Stadium, where he was involved in the deal that gave Budweiser the pouring rights and shared sponsorship of the BC Lions and Vancouver Whitecaps. Mediated talks continue Wednesday and Thursday. Alex Stieda, the first North American to win a Tour de France stage and wear the famed yellow jersey, will be among the speakers. The race is scheduled to begin at 7 a. Increased quality of products and services delivered. Increased Customer Satisfaction â€” needs and wants. Increased Employee Satisfaction â€” Improved morale.

This CD-ROM is designed to be used every day as a source of reflection and elightenment. It provides an interactive divination section. It also offers a guide to the I Ching including its history.

At some point he said something like: Well, he is kind of skeptic of European Union, mostly because of its huge bureaucracy, and it following almost Byzantine model. His statement was a result of frustration, a sad confirmation of the fact that the rest of the world, mostly Asia, is outrunning Europe. Even more so when one considered that many specialized manufacturers brought their production back to their homelands to have a better supervision over every stage of the whole process. I guess these companies that never moved their production outside Europe USA and Japan could feel like moral winners right now. Today we would call this product a music server or a music files player that read signal from hard drives and flash drives. It was the very first device offered by Italian company Akamai S. The brand was new and it confused me a bit as I already had known two other brands owned by the same guy, Maurizio Aterini: Blue Note and Golden Note. I asked him back then to explained this confusion with brands: Some time later they all had been consolidated into one brand: In my opinion it was the right decision to make. It also involved design changes for the products and that also was a good move. Let me add that I love the new logo too. And it is beautiful. When looking at it man knows right away that it is an Italian product, that it was designed and made by people with a special gift of a natural not learned sense of taste. This impression is created by a amazing plinth of Italian walnut combined with a steel insert and an acrylic top. The deck also sports, which is not a rule today, a hinged cover. User can also adjust how quickly the covers closes. The deck sits on large, steel cones. All the proportions, used materials and finished are truly refined. Range includes also two less expensive models: Giglio and Valore, and a flagship Bellagio sold in three versions: Reference, Conquest and Conquest Black King. One could easily compose a complete audio system of this range. With one exception – there are no music servers which, considering my first experience with this company described above, seems somehow ironic. When one orders a whole system deck comes factory fitted with a tonearm and cartridge which make is almost ready to use. One has to fit the drive belt, anti-skating and plug in the external power supply. One could also adjust VTF vertical tracking force. In this case manufacturer declares the range between 1,1 g – in my experience something close to the maximum value works best so I decided to use 2 g and it worked fine. The cartridge delivered with the deck is a high level MC so it should work fine with any MM phonostage. I conducted part of this test using such setting but if you have a MC phono with adjustable gain you should try it too – it might yield better results, as it did in my case. The output signal of Machavelli Gold declared by manufacturer is of 1,2 mV, and most MM phonostages offer gain for cartridges with mV output. So if only possible set the gain as close as possible to 1,2 mV. We received for a review a complete turntable. Basing on stereotypes and personal believes we transfer certain elements from one world to another. Most people believe that gold Cds offer warmer, richer sound. My personal experience confirms that believe. Audiophiles are not the only ones that perceive gold in this way as same might be said about musicians. It is believed that gold flutes sound warmer, softer than silver ones, although it is a matter of personal sensitivity to the sound. In high-end audio wood and Italy are widely associated with a warm, rich, refined sound. Now, if you have better things to do you skip next paragraphs right to the summary, as I will mostly elaborate on these three, already mentioned features. Elements creating this impression are: Listener immediately focuses on midrange as this part of the range is most charming. Both range extremes are not so exposed compared to midrange, and lower should be more powerful. All these albums sounded good, I enjoyed them a lot even though I missed some more powerful, more immediate attack. Yes, performance in lower bass area was somewhat limited, and mid-bass could be faster and more powerful. A one that I could easily live with or even forget about it at least until I played some music that would clearly remind me about it. When using this turntable I was compelled to play high quality releases of: Because with them turntable delved deeper between sounds enriching them with more meaning and delivers tangible, rich presentation. Tonal differentiation is really good and sound is particularly rich. This way Mediterraneo presents all qualities of such records. High quality releases and Gold

Note turntable are a perfect match. So the way it played albums prepared using digital masters came as a surprise. Like, for example, Maria Callas Remastered, released on vinyl using a CD box release of her complete works as a pretext. Sound it normally rather bright but when played on Mediterraneo this album did not sound bright at all. But the way music is played attracts out attention to the qualities of each record making us also ignore any issues of said recording. Such approach allowed me to enjoy some Polish releases from particularly bad time bad in terms of quality of record pressing of ties. One of these records was I Ching, that I bought for a few zloty on Allegro in mint condition. Also some records that already wore off because of frequent usage sounded pretty well. I truly enjoyed listening to them as they offered a rich, coherent sound with a bit ethereal but also quite resolving treble. Summary Summarizing this review with a quote from Jestem z miasta by Elektryczne Gitary that goes like this: And yet here I go because this cliché tells you the whole truth about this device: Chic and style plus many years of experience. It is a proposition for someone who is ready for a long time commitment. Mediterraneo deck Mediterraneo is a non-suspended mass-loader. Vibrations are damped due to usage of three different materials for its base: What makes it look so special, so Italian is the wooden curved platform handmade from aged Tuscan Walnut. It features irregular shape that helps to control vibrations. Its finish is remarkable – it seems to me that only Italians are capable of turning a piece of wood into such a beautiful piece of applied arts. Yes, I know it is not actually true, but it surely seems like that to me. This beautiful wooden platform sits on three tall, massive aluminium spikes with mat finish, that are placed on three small, brass discs. A maximum thickness of wooden part of the plinth is 60 mm. On top of it sits a 3 mm thick polished steel plate, and on top of that another 20 mm of black acrylic white version is also available. This steel element is clamped to the wooden platform in 18 different point carefully chosen for the best sonic results. The electronic control circuits are placed in the top layer. The whole plinth measures: Mediterraneo features also a nice, acrylic cover. In recent years many manufacturers decided to stop using covers as these often downgrade sound quality. This time I truly appreciated the practical aspect of having a cover as dusting a turntable every day is surely not my cup of tea. A new 12 Volt synchronous motor electronically controlled by the PWM design sits in the rear left corner. The PWM – Pulse-Width Modulator – transforms the power voltage in AC-DC-AC mode, enhancing the best coupling of the two AC semi-waves for a perfect performance, eliminating virtually any motor resistance and vibration, and allowing at the same time the highest motor torque. The Power Supply of the motor electronically controls the 33 rpm, the 45 rpm, and the fine speed adjustment, thus keeping the selection permanently in the turntable memory even without AC power. The platter is designed to stay only 3 mm away from the turntable plinth. The spindle is made of the hardest carbon steel hardened with a boiling oil process. Lucca Power Distributor Other: It is made in six different thickness sections to enhance the damping vibration feedback effect due to both, the material and the geometry. The Tone-Arm features a double counterweight to set up most of the market phono cartridge up to 15 gram mass. The vertical ball bearings are pivoted through custom stainless steel threaded bolts manually adjusted, while the horizontal movement is driven by two micro ball bearings directly inserted in the main rectified pivot of the arm runs into the 23mm diameter arm shaft from which the arm can be secured to the turntable plinth. As the name suggests it is a cartridge with moving coils but it generates a higher output, similar to that of Moving Magnet carts. In this particular case we are talking about output of 1,2 mV. It features a Boron cantilever and line contact diamond. In fact it was made in cooperation with a renown manufacturer, Adamant-Namiki. The used cooper wire for coils and Samarium-Cobalt magnets. Specifications according to manufacturer.

November 20, at McDuff had witnessed multiple cases of Vietnamese civilians being abused and killed by American soldiers and their allies, and he had found the U. Army criminal investigators, the reply was only four sentences long and included a matter-of-fact reassurance: In many ways, it remains the popular understanding in the United States as a whole. Today, histories of the Vietnam War regularly discuss war crimes or civilian suffering only in the context of a single incident: Even as that one event has become the subject of numerous books and articles, all the other atrocities perpetrated by U. The visceral horror of what happened at My Lai is undeniable. As it happened, though, instead of finding Vietnamese adversaries spoiling for a fight, the Americans entering My Lai encountered only civilians: Many were still cooking their breakfast rice. Soldiers of Charlie Company killed. They killed everything that moved. Advancing in small squads, the men of the unit shot chickens as they scurried about, pigs as they bolted, and cows and water buffalo lowing among the thatch-roofed houses. They gunned down old men sitting in their homes and children as they ran for cover. They tossed grenades into homes without even bothering to look inside. An officer grabbed a woman by the hair and shot her point-blank with a pistol. A woman who came out of her home with a baby in her arms was shot down on the spot. As the tiny child hit the ground, another GI opened up on the infant with his M automatic rifle. Over four hours, members of Charlie Company methodically slaughtered more than five hundred unarmed victims, killing some in ones and twos, others in small groups, and collecting many more in a drainage ditch that would become an infamous killing ground. They faced no opposition. They even took a quiet break to eat lunch in the midst of the carnage. Yet when the military released the first news of the assault, it was portrayed as a victory over a formidable enemy force, a legitimate battle in which enemy troops were killed without the loss of a single American life. And the truth might have remained hidden forever if not for the perseverance of a single Vietnam veteran named Ron Ridenhour. The twenty-two-year-old Ridenhour had not been among the hundred American troops at My Lai, though he had seen civilians murdered elsewhere in Vietnam; instead, he heard about the slaughter from other soldiers who had been in Pinkville that day. Unnerved, Ridenhour took the unprecedented step of carefully gathering testimony from multiple American eyewitnesses. Then, upon returning to the United States after his yearlong tour of duty, he committed himself to doing whatever was necessary to expose the incident to public scrutiny. The Pentagon, for its part, consistently fought to minimize what had happened, claiming that reports by Vietnamese survivors were wildly exaggerated. At the same time, the military focused its attention on the lowest-ranking officer who could conceivably shoulder the blame for such a nightmare: Twenty-eight of them were officers, including two generals, and the inquiry concluded they had committed a total of serious offenses. He was sentenced to life in prison for the premeditated murder of twenty-two civilians, but President Nixon freed him from prison and allowed him to remain under house arrest. He was eventually paroled after serving just forty months, most of it in the comfort of his own quarters. Twenty-five years later, Ridenhour would sum it up this way. At the end of it, if you ask people what happened at My Lai, they would say: Lieutenant Calley was one of the people who went crazy and killed a lot of people at My Lai, but this was an operation, not an aberration. No other American atrocity committed during the war—and there were so many—was ever afforded anything approaching the same attention. The great majority were never known outside the offending unit, and most investigations that did result were closed, quashed, or abandoned. Even on the rare occasions when the allegations were seriously investigated within the military, the reports were soon buried in classified files without ever seeing the light of day. Until the My Lai revelations became front-page news, atrocity stories were routinely disregarded by American journalists or excised by stateside editors. The fate of civilians in rural South Vietnam did not merit much examination; even the articles that did mention the killing of noncombatants generally did so merely in passing, without any indication that the acts described might be war crimes. But what had been previously brushed aside as propaganda and leftist kookery suddenly started to be

disregarded as yawn-worthy common knowledge, with little but the My Lai massacre in between. Murder, torture, rape, abuse, forced displacement, home burnings, specious arrests, imprisonment without due process—such occurrences were virtually a daily fact of life throughout the years of the American presence in Vietnam. And as Ridenhour put it, they were no aberration. Rather, they were the inevitable outcome of deliberate policies, dictated at the highest levels of the military. McDuff, letter to Richard M. Davis, letter to Charles R. University Press of Kansas, , Vintage , Many detailed works on the My Lai massacre exist. Atheneum, , “Hersh, Cover-Up, 27, “Committee to Denounce the War Crimes of the U.
